Solicitor, - - - W. B. McMURRICH, Esq., M.A.
TRUANT OFFICER, - - JOHN T. THOMPSON, Esq.
AUDITOR, - - - - R. C. FITZGERALD, Esq.

Anspector's Annual Report.

Angector's Annual Report.

To the Board of Public School Trustees of the City of Toronto:

GENTLEMEN,

In accordance with a Resolution of your honorable Board, I respectfully submit the Twenty-second Annual Report of the Schools under your charge.

Appended to the Report will be found Statistical Tables which give in detail all important particulars relating to teachers, pupils, attendance, absenteeism, tardiness, studies pursued, cost of maintenance, &c.

ATTENDANCE.

The total number of pupils registered during the year was 12,465.

The average daily attendance was 8,215. Last year it was 8,144.

577 pupils attended school less than 20 days.

| 1103 | 66 | 46 | " | between | 20 | and | 50 | days |
|------|----|----|----|---------|-----|-----|-----|------|
| 2461 | " | 44 | 66 | 66 | 50 | " | 100 | " |
| 2051 | 66 | 66 | 46 | " | 100 | 66 | 150 | 66 |
| 3935 | " | 66 | " | " | 150 | 66 | 200 | 66 |
| 2338 | 44 | 66 | 66 | 66 | 200 | " | 203 | 66 |

The number who attended school for over 100 days is 8,324, or 67 per cent. of the total registered number.

The number in attendance over 200 days is 905 more than last year.

The most correct idea of the relation of the Average to the Registered Attendance is obtained by comparing the average of Monthly Averages with the average of Monthly Registered Numbers.

The average of Monthly Registered Numbers was 8,987. This shows an increase compared with last year of 77. (See Table A.)

The average of Monthly Average Numbers was 8,108. This shows an increase of 38 when compared with the corresponding number of last year. (See Table B.)

The increase shown by Tables A and B over the attendance of the previous year is small, owing to the fact that there was not a sufficient number of schools to accommodate those who applied for admission.

The average of Monthly Averages was 90.3 per cent. of the average of Monthly Registered Numbers.

The best average for any month in the year was 93.3 the average for December.

The worst average was 88, the average for February.

The largest number was registered in October, and the smallest number in July. The attendance in July was 1,058 less than in any other month, and 1,302 less than the average.

LATENESS.

The improvement in the punctuality of the pupils has continued during 1880. Both parents and pupils in nearly every part of the city seem to be fully alive to the importance of acquiring the habit of promptness. By reference to Table D it will be seen that the lateness is confined largely to a few Schools.

The following table shows the number of cases during the past seven years.

| | Average | Cases of |
|-----------|-------------|----------|
| Date. | Attendance. | Lateness |
| 1874 | 4,814 | 69,456 |
| 1875 | 6,386 | 65,364 |
| 1876 | 5,976 | 31,476 |
| 1877 | 6,860 | 15,272 |
| 1878 | 7,467 | 7,474 |
| 1879 | 8,144 | 6,615 |
| 1880 | 8,215 | 5,967 |
| Table D.) | | |

(See Table D.)

CERTIFICATES OF HONOR.

Certificates of Honor are awarded at the Christmas Vacation to such pupils only as have not been once absent or late, and whose conduct has been uniformly good, unless the absence or lateness shall have been occasioned by sickness, of not more than three weeks' continuance, to be certified in writing by the pupils' parents or guardians.

These Certificates are of two grades, and named respectively First Honor Certificates and Second Honor Certificates.

The First Honor Certificates shall be awarded to such pupils as have fulfilled the above condition for two consecutive sessions.

The Second Honor Certificates shall be awarded to such pupils as have conformed to the said rules for one session during the year.

The following statement shows the number of Certificates given in the various schools at the close of 1879:

| | First | Second | |
|--------------|-------|--------|--------|
| Schools. | Honor | Honor | Total. |
| Dufferin | 159 | 146 | 305 |
| Wellesley | 236 | 310 | 546 |
| Ryerson | 149 | 181 | 330 |
| Phœbe Street | 150 | 256 | 406 |
| John " | 118 | 136 | 254 |
| Victoria " | 78 | 121 | 199 |
| Winchester " | 102 | 146 | 248 |
| Niagara " | 85 | 100 | 185 |
| Park " | 70 | 85 | 155 |
| George " | 47 | 88 | 135 |
| Louisa " | 42 | 96 | . 138 |
| Bathurst " | 54 | 136 | 190 |
| Palace " | 16 | 44 | 60 |
| Parliament " | 62 | 91 | 153 |
| Church " | 65 | 127 | 192 |
| Elizabeth " | 39 | 74 | 113 |
| York " | 13 | 17 | 30 |
| Givins " | 51 | 58 | 109 |
| Borden " | 20 | 31 | 51 |
| Leslieville | 7 | . 17 | 24 |
| Markham " | 11 | 29 | 40 |
| | | | |
| Total | 1,574 | 2,289 | 3,863 |

I would strongly recommend that in the matter of conduct the number of misdemeanour marks allowed without invalidating a claim to a Certificate be reduced, so as to give good behaviour a more preponderating influence than heretofore.

TEACHERS.

There were 150 Teachers in the employ of the Board at the close of the year, exclusive of the Special Teachers in Music and Drawing.

There are 22 Male, and 128 Female Teachers employed.

They hold Certificates as follows:

| First | Class | Provinci | al | | | -47 |
|-------|--------|-----------|-------|----------|-----------|---------|
| First | Class | County | Board | •••• | • • • • • | .18 |
| Secor | nd Cla | ss Provin | ncial | | | .85 |

I am glad to be able to report that Miss A. A. Gray, of Palace Street School, succeeded in raising her grade from Second to First Class at the examination last July.

SCHOOL ACCOMMODATION.

There is no doubt that unless some method be adopted by the Legislature of Ontario to correct the legislation of 1879 in regard to school accommodation, great injustice will be done to rate-payers in cities and towns, where the school population is increasing. It may have been desirable to restrict School Boards so far as to prevent their building larger and more stylish school houses to take the place of those which provided sufficient accommodation for all pupils in the municipality or section, without authority from the ratepayers. There might be a difference of opinion regarding the substitution of a new brick building for an old frame house, which, though old fashioned, was sufficiently commodious. It is questionable, however, whether even this step would have been justifiable, as trustees are not often too extravagant in spending money, a part of which comes out of their own pockets in the shape of taxes. Whatever opinion may be

held on this question, however, it is difficult to see what could have induced a body of intelligent men to place it within the power of a Council to completely paralyze School Boards in their efforts to provide accommodation in a reasonable manner for children who have no schools at all which they can attend. The Trustees of Toronto have for years admitted pupils to their schools far in excess of the number allowed by law, in the hope that they would be able in a few years to overtake the rapidly increasing school population of the city. They found themselves in the early part of 1880 with over two thousand pupils in the schools more than the legal number, and with over six hundred applicants who could not be admitted. Under these circumstances application was made for the moderate sum of \$15,600.00, to provide additional accommodation, and the City Council took advantage of the right given by the amendment of 1879 to treat the request of the Board with absolute indifference, until near the close of the year, so that it was impossible to provide the accommodation which was so urgently needed. The result was that hundreds of children, whose parents were anxious to have them in school, had to remain on the streets.

During the coming year it will be absolutely necessary (1) to enlarge Borden Street School; (2) to relieve Wellesley, Church Street, and Winchester Street Schools by a School in the northern part of the city; and (3) to provide accommodation in some way for the children unable to obtain admission into Phœbe Street, John Street, and Niagara Street Schools.

APPARATUS.

During the year the schools were supplied with Globes, 60 in all having been purchased.

The Apparatus most needed now consists of Charts for Vocal

Culture, and some Geographical Apparatus for the primary classes.

CLASSIFICATION.

The Pupils of the Schools are classified into ten grades. This makes the progressive steps in the advancement of a child comparatively easy. The most encouraging fact in this connection is that the number of pupils above the Second Book continues to increase. It is to be regretted that in the highest Divisions of boys the numbers are small.

On this question I offer the following remarks:

- 1. Promotions to these classes are only made once a year, in September, and consequently towards the close of the second session the number of pupils becomes reduced, owing to the fact that the larger boys are constantly leaving to go to business.
- 2. While fifty is regarded as the legal number in a class, it must be remembered that this is the *maximum* number, and all authorities agree in recommending a smaller number than this for advanced classes.
- 3. It is desirable that the Head Master of a large school should have reduced responsibility in connection with the class immediately under his charge, that he may be able to devote the necessary time to the supervision of his school.
- 4. Parents have a right to get for their children a thorough English education in the Public Schools. The Philistines who, for various selfish reasons, oppose the Public Schools, of course deny this. They would close these schools altogether if they could, and any concession made to them would but sharpen their appetites for the entire destruction of the system. The Fifth Book Classes can not be so cheaply taught in any other way, as

in the Public Schools. If they were removed from the Public Schools it would necessitate the erection of an additional High School, where they would be taught at a vastly increased cost to parents and the ratepayers generally. The corresponding classes in High Schools are not so largely attended as the smallest of our advanced classes.

5. The higher classes might be equalized by teaching the sexes together.

PRIZE GIVING.

Prizes were given as usual at the close of the first session in July. In the highest four divisions they were given as the result of the combined examination. (See report of the combined examination). In the classes below the fourth book, the prizes were given on the joint basis of sessional records, and examination results. The Board presented prizes in books to the value of \$350.07.

In addition to the above, twelve scholarships were presented by the Board of Trustees of the Collegiate Institute, and two medals, one gold, and one silver, by Mr. John McDonald. These medals and scholarships were given for general proficiency. A medal was given by the Inspector for the best original design, and Mr. John Hallam presented a gold and a silver medal to the pupils who obtained the highest marks in Canadian History and Geography.

The Jesse Ketchum prizes were distributed in December, by Rev. Samuel Rose, D. D., Rev. John M. Cameron, Rev. H. D. Powis, and Mr. Warring Kennedy, accompanied by the Chairman of the Board, Mr. James Bain. These gentlemen visited the various schools, and delivered very useful and interesting ad-

dresses to the pupils before giving the prizes. This annual visitation is regarded with great interest by both teachers and pupils. Three hundred and sixty-six books were presented this year.

NIGHT SCHOOLS,

The establishment of Evening Schools by the Public School Board was an experiment, and grave doubts were entertained, even by those who advocated the opening of these schools, as to their success. They had been tried several years ago, and with unsatisfactory results. The work of giving instruction to those unable to attend school during the day had been done by the Mechanics' Institute classes and by other organizations. The classes opened by the Board were very successful, however, and the attendance, interest, conduct, attention, and progress of the majority of the pupils were very satisfactory. The total number admitted was 1,292; 855 males and 437 females.

The average attendance was in January,723; males, 460; females, 263; in February, 655; males, 428; females, 227; in March, 424; males, 272; females, 153. The average for the whole time was 601, or 46.5 per cent. of the total registered number.

The number not once late was 1,118.

The number not once absent after entering was only 83.

It was found that a good many, especially of the junior pupils, entered the school without having a very strong desire for learning, with a view of causing amusement, and in some cases to annoy the teachers. This is a difficulty uniformly experienced to a greater or less degree in connection with Night Schools, and various plans have been tried to remedy the evil. The best that I have become acquainted with, is that suggested by Superintendent Marble of Worcester, Massachusetts. In order to meet the

difficulty the following circular is issued by him to those who wish to join the evening classes. The circular also serves as a ticket of admission to the schools, and a receipt for the deposit made:

"The Evening Schools have cost the city more than \$2,000 each winter the past few years. They are kept for the benefit of persons over fifteen years old, who have not had a good chance to go to school when young. But a great many boys and girls who do not care to learn have flocked in; they have taken up the time of the scholars who try to learn; and they have dropped out as soon as they found they could not go to school for fun. Others have begun to go to School, and have fallen out as soon as good skating or some other amusement comes along.

In order to protect those who give their time, and really wish to learn, and to save the cost of keeping School without profit to the scholars, the Committee now require a deposit of \$1.00 from each pupil when he receives his ticket of admission. If he is studious and orderly, and is not absent except when he is absolutely obliged to be, the money will be refunded at the end of about one month, or Dec. 24. He can then renew his certificate for another month. The School will, therefore, cost nothing to those pupils who go regularly, and make a business of it. Those who go once in a while for amusement will lose the money deposited, and thus pay the city part of the cost incurred on their account.

Mr. Marble speaks of the success of the system adopted as follows:

"On the first evening, the attendance in each of the schools opened was as large as the average last year; the number has steadily increased; and there has not been the least disorder or disturbance. The school has gone on from the first as well as it used to after three or four weeks of irregularity by the old plan. With scarcely an exception the pupils have taken hold with a will, and shown a disposition to improve their opportunities. The plan has eliminated all the idle and indifferent. In very few cases has the deposit been forfeited. It seems from the experience thus far that the difficulty solves itself, and with no hardship to any one."

It is well known that there are many young men and women in Toronto, who are anxious to make up for lack of school training in early years by attending classes established for their benefit in the evening; and I am confident that the only plan that can be adopted to make these classes a permanent success, is to make regulations which will prevent the admission of any but those who are earnestly desirous of improving themselves. It is not fair to such pupils that most of the teacher's time should be occupied in dealing with those who are careless or unruly; nor is it right that the Board should be put to the expense of lighting and heating extra rooms for the benefit of those who only attend a few evenings. Fewer rooms would need to be opened, if only deserving pupils were admitted.

TRUANT SCHOOLS.

Children may be divided into three general classes:

- 1. Those whose parents or guardians send them to School, and who go regularly as sent.
- 2. Those who are sent to School by their parents or guardians, but who do not go regularly as sent.

3. Those whose parents or guardians do not send them to School or take any interest in their education.

Classes two and three, as a rule, fall into bad habits and are ultimately dealt with by law as criminals.

The Board cannot deal with class three in any way without an Industrial School, which, I regret to say, is not likely to be established in Toronto for some time; therefore, those children belonging to class three may at present be left out of consideration altogether.

With the pupils in class two, the case is quite different. They naturally divide themselves into two sub-divisions: (a.) Those who are under the control of their parents, and who only play truant occasionally. (b.) Those who are beyond parental control and are confirmed truants. With regard to sub-division (a) no action is necessary by the Board. The present system of direct communication and joint action between the school authorities and the parents or guardians, produces satisfactory results so long as the pupils respect home authority. In the case of sub-division (b), however, I think the time has come when both for their own welfare and that of the other pupils in our Schools prompt action should be taken. So long as the parent or guardian possesses sufficient influence, he is clearly the person who should compel the pupil to go to school. It is equally clear, however, that when this power is wanting the Board should interfere. It may either prohibit the attendance of such pupils and drive them into criminal courses (a plan I am confident that no member of the Board would recommend); or it may take the place of the parent in forcing these confirmed truants to go to School. The latter method is not possible so long as the truants attend twenty-one different Schools, without the aid of a very large staff of absentee officers. To make it possible I strongly recommend the formation of one central class for confirmed truants alone.

The following are some of the advantages that would result from the establishment of such a class:

- r. The Absentee Officer could find out at once every morning if any pupil were absent from the class.
- 2. The discipline and general management of the class might be adapted to the special necessities of the class of pupils who attend it.
- 3. The other classes throughout the city would be at once relieved of the evil influence of the confirmed truants.
- 4. The mere fact of the formation of such a class would deter many pupils from becoming confirmed truants.

PROGRESS IN STUDIES.

The advancement made by the pupils as a whole has been very satisfactory. Perhaps the most gratifying feature in this connection is the fact that the pupils throughout the city attain more nearly to a uniform standard year by year. This is mainly due to the improved system of classification and promotion adopted a few years ago, but it also results to a large extent from the improved methods adopted by the teachers, and the increasing interest which they manifest in their work. With remarkably few exceptions the teachers devote themselves earnestly and faithfully to their work; this of course produces a corresponding improvement in the pupils.

It is pleasing to find that the uniformity spoken of applies chiefly to those subjects which will be of most importance to the pupils after they leave school. In regard to this subject the Combined Examiners speak as follows: "The Examiners would congratulate the Board of Trustees and the citizens of Toronto, on the growing efficiency of the Public Schools of the city and the system of instruction conducted in them, as brought out by this examination. It is pleasant to have to state that the standard of excellence is highest and most nearly equal in those branches of study which all would deem of greatest importance."

With reference to the individual subjects of study the following remarks may be made:

READING.

This subject is one in which our teachers manifest a lively interest. It has occupied their attention at every meeting of the Association since its organization, and it is regarded by all as one of the most important subjects taught in the Schools. In the primary classes attention has been mainly given during the year to the introduction of a large amount of phonic drill in the teaching of word recognition. Several of the teachers have succeeded admirably in this work, in fact considering the very large numbers in the junior classes, the progress made in learning to read must be regarded as eminently satisfactory. In the higher classes more attention is being given to securing a thorough understanding of what is read. Vocal drill has also received a fair share of attention during the year, although what has been done in this matter has been accomplished under difficulties. There is urgent need of Vocal Charts in all the advanced classes. The schools have been liberally supplied with maps and globes, and as charts are quite as necessary in vocal culture as maps are in teaching geography it seems reasonable that the charts should be supplied as well as the maps. Good reading is of more practical utility than a knowledge of geography. I would recommend the use of Shoemaker's Chart in our schools.

I am glad to be able to report that the subject of good reading is awakening an interest outside of the schools. Rev. Septimus Jones, a gentleman who has in many ways shown his interest in our schools, has kindly offered a valuable prize for reading, to be competed for annually by the pupils of the higher classes. He properly distinguishes reading from declamation, and gives his prize to encourage the developement of the ability to read the good literature of our own language fluently and intelligently.

The subject of Reading is connected on our programme with English Literature. The latter subject I regret to say, is not taught very systematically. The school regulations of the Department, and our own programme of studies, provides that in the highest divisions of our schools the pupils shall read the literary works selected from time to time for the Intermediate Examination. I think the time has arrived when our pupils are sufficiently advanced in other departments to warrant their making a critical study of a few of the masterpieces of English literature.

The results of such a study in improving the literary taste of the pupils, and familiarizing them with the correct use of their own language, are too evident to need explanation. I would also strongly recommend that every child in our schools be required to commit to memory certain appropriate selections from the best English authors. A limited number of selections might be chosen for each grade, and set down as a part of the work to be prepared by each pupil before promotion. The reading hour on Friday of each week has been set apart for the recitation of pieces suitable for declamation. This exercise produces certain good results, but those who receive most benefit are generally those who need it least. If every pupil is required to prepare a very short selection, each one is able to enter intelligently into the study of the proper method of reciting it. In addition to this,

each pupil will have at the end of his school career, a number of good quotations stored in his memory, which will be of great service to him through life.

SPELLING.

This subject is taught chiefly as a written exercise. It is one of the most difficult of all subjects in which to secure uniformly good results. I am satisfied that so far as the direct teaching of spelling is concerned, our teachers are pursuing the correct method—by dictation. Each pupil by this method spells every word, and he is compelled to use the words as he uses them in after years, by writing them. No other plan can so impress any form or fact on the memory, as actually making a form or representing an idea by the hand. I am convinced that correct spelling depends very largely upon the training of the eye, and that additional effort put forth in the junior classes to secure a more accurate and critical development of the powers of observation will be amply repaid to both teachers and pupils by the increased facility in learning to spell afterwards.

ARITHMETIC.

The constant aim of our teachers is to render the pupils independent of paper or slate and pencil, in calculation. To this end great attention is devoted, in all grades, to securing rapid and accurate working in the simple rules, especially in addition. The ridiculous practices of counting fingers, writing down the number to be carried, &c., have disappeared from our classes. Children are not allowed to add on slates until they are familiar with the combinations mentally. I would recommend that the highest classes use a more advanced arithmetic than the one now used.

HISTORY AND GEOGRAPHY.

The modern text books on these subjects are greatly in advance of those formerly in use. The results reached in both subjects in our schools are very satisfactory. The interest taken in the highest classes in Canadian Geography and History was clearly shown by the excellent papers sent in by the candidates for the special examinations for Mr. Hallam's medals. The pupil who won the gold medal received within eleven marks of the possible maximum.

WRITING.

A great improvement in the general excellence of the writing done in our schools has been made during the past five years. The pupils begin to write script in the lowest classes. Probably the most difficult thing a teacher has to accomplish, is to make all the pupils in a class hold their pens in the correct position, and sit properly while writing. I am glad to bear testimony to the pains taken by nearly all our teachers to secure the correct position of body, book and pen, in practising this subject. I am confident that it only requires a fair examination of the copy books of any of the classes in our schools, from the lowest to the highest, to convince an unprejudiced mind that this subject is well taught. Among the most striking facts which such an examination reveals are: 1. Uniformity of excellence among the members of the class; 2. Great care in the formation of letters; 3. Freedom from blots or creases in the copy books. The Combined Examiners note very encouraging progress in the writing and style of work done by the pupils at each successive examination.

DRAWING.

In no subject has the advancement been so marked during the past two years as in Drawing. The amazing progress made is

attributable to the fact that the crippling delusion, that it requires an *artist* to teach Drawing, has been dispelled, and our regular teachers teach this subject as they teach other subjects. Industrial Drawing receives the greatest amount of attention.

CITY MODEL SCHOOL.

To enable students residing in Toronto to fulfil the Departmental requirements for admission to the Provincial Normal School for second class professional training, without leaving home, and at the same time to furnish elementary training for those who are in the future to be our teachers, the Board decided, in November, to establish a City Model School on the following plan:

a City Model Schools throughout the city shall be designated a City Model School, and shall be used as Practice Schools for the Teachers in training, who shall act as assistants in the primary classes under the supervision of the regular Teachers, and also as occasional Teachers in case of temporary vacancies.

2nd. The lessons on School Management, Discipline, Education, Methods of Teaching, and School Law and Regulations shall be taught to the students by the Inspector, those on Mental Arithmetic by the Head Master of Victoria Street School, and those on Elocution by a Teacher specially appointed for that purpose. The lessons to be taught by the Inspector shall be given from 3.30 to 4.30 p. m., twice each week, in York Street School.

3rd. The Head Master of Victoria Street School shall keep the various records required by the Education Department, and perform such other duties pertaining to the position of Head Master of a Model School as are not assigned to the Inspector.

4th. Teachers in training shall pass in order from School to

School, spending a period of two weeks in each of such Schools as may be designated by the Committee on School Management.

5th. The length of a term in the Toronto City Model School shall be one School year, beginning in September and ending in the July following.

6th. On completing a full term in the Toronto City Model School, with the necessary training and practice, and passing a satisfactory examination in the prescribed professional work for Third Class Certificates, the Teachers in training shall be allowed to attend the Provincial Normal School to receive the necessary training for Professional Second Class Certificates, provided they have the requisite non-professional rank.

7th. Those students who hold Intermediate Certificates, and who were residents of the city of Toronto for the six months last past, previous to seeking admission, shall be permitted to attend the City Model School as teachers in training. Other residents may be admitted by the Committee on School Management.

This is one of the most important steps taken by the Board for many years. The young ladies in training will act in the capacity of assistants in the primary classes, and will thus to a certain extent, overcome the pressing difficulty of overcrowding. They will also do most of the necessary occasional teaching, and will thus save the Board a considerable sum each year. In addition to this there can be no doubt but that the ladies so trained will be much better able to perform the special duties of city teachers than those trained at a County Model School.

It may seem at first sight that it is scarcely fair to the candidates themselves to require them to teach a year without any salary. This is not the case, however, as will be seen from the following considerations:

- r. It is certainly no hardship to be allowed to receive a training for a profession free of charge. The candidates, in most cases, pay for the non-professional part of their training in the Collegiate Institute, and have to devote their time as well, generally for more than a year. They certainly should be glad of the opportunity of getting their professional training free.
- 2. The candidates without the City Model School would have to spend at least two months at a County Model School, and then teach a year somewhere in Ontario, before being allowed to attend a Normal School.
- 3. The advantages offered by the City Model School may justly be regarded as adding an additional year to the free course of the Public School system in Toronto. There can be no doubt that, whether a lady intends to teach or not, the year spent in the Model School will be one of the most valuable years of school life to her in fitting her for the proper fulfilment of her duties in life.

TEACHERS' ASSOCIATION.

The meetings of the Association were held during the year in accordance with the regulations of the Education Department. Both were largely attended by the teachers of Toronto and Yorkville. In addition to discussing the various pro'essional subjects on the following programmes, several other questions were considered, the most important being the establishment of a professional Library in connection with the Library of Reference belonging to the School Board. The teachers show a commendable anxiety to avail themselves of the privilege of using the books already purchased.

PROGRAMMES.

FIRST MEETING, JANUARY, 1880.

FRIDAY, JANUARY 23.

| 9-9-5- | Calling Roll of Teachers. |
|------------|--|
| 9.5-10.30. | "Expressive Reading," Senior Classes-Mr. Richard |
| | Lewis. |
| 10.45-12. | "Marking for Conduct and Work"—Discussion led |
| | by Mr. Levi Clark. |
| 2.3.15. | "How I manage my Class."—Mrs. S. E. Wallace. |
| 3.30-5. | "The Education of the Citizen."—W. A. Douglas, |
| | M. A. |

SATURDAY, JANUARY 24.

9-10. Election of Officers.

10-11. "The Teaching of History."—Mr. S. McAllister.

11.15-12.15. Written Questions answered by the President.

On Friday evening (Jan. 23rd) a Lecture was delivered by Professor Loudon, of Toronto University. Subject—"The Tuning Fork."

SECOND MEETING.

FRIDAY, SEPTEMBER 17.

Calling Roll of Teachers

| 9-9-5. | Canning Roll of Teachers. |
|--------------|---|
| 9.5-10.15. | "School Hygiene."—Dr. Playter. |
| 10.15.10.45. | Vocal Drill.—Mr. R. Lewis and Miss Lewis. |
| II-I2. | "Per Cent."—Mr. G. K. Powell. |
| 2-3. | "The Teacher's Temptations."-Miss Alice Free- |
| | man. |
| | O1D' ' D 1-' 1D |

3.15-5. General Discussion on Regulations and Programme.

SATURDAY, SEPTEMBER 18.

9-10.30. "How to Teach Euclid."—Mr. F. F. Manly, M. A.

10.45-12. "School Hours."—Mr. F. S. Spence.

2-3.15 "Class Movements in the School and in the Yard."

-Mr. R. W. Doan.

3.15-4. General Business.

Rev. Professor Calderwood, of Edinburgh University, lectured before the Association on Friday evening.

R. McCAUSLAND,

JAMES L. HUGHES,

Secretary.

President.

EXAMINATIONS.

Three written Examinations were held during the year; the Combined Examination and two Promotion Examinations. The Examiners for the Combined Examination were Rev. I. Tovell, A. McMurchy, Esq., M. A.; Rev. John M. King, M. A., and William Anderson, Esq. The list of Scholarships and Prizes awarded will be found in the Report of the Examiners. The comparative standing of the different schools in the various departments of study, will be found below by comparing the marks obtained at the Combined Examination.

COMBINED EXAMINATION.

I have deemed it advisable to make the following explanation in reference to the mode of conducting the Combined Examination. Examiners are appointed who prepare their papers independently, and send them to the School Board Printer themselves. The proofs are sent to them, and the papers also *under seal*. They retain them until the day of Examination, when they are opened by them in the presence of the candidates.

No school officer or teacher has anything to do with the papers until they are submitted to the candidates.

This is the only competitive examination held by the Board.

The following tables give the standing of the various divisions at the Combined Examinations.

FIRST DIVISION.

Twelve Pupils from each Division.

| Schools and Divisions. | Mathematics. | Grammar, Composition, and Hygiene. | History and Geography. | Reading, Spelling, and Derivation. | Writing, Drawing, Music, & Book-keeping. | Total. |
|------------------------|--------------|------------------------------------|------------------------|---------------------------------------|--|--------|
| Marks possible | | 2160 | | | | |
| Wellesley, Girls | | 1811 | | | | |
| Ryerson, Boys | | 1789 | | | | |
| Wellesly, " | | 1476 | | | | |
| Dufferin, Girls | | | | | | |
| Ryerson, " | 1423 | 1430 | 1540 | 1638 | 1365 | 7403 |
| Dufferin, Boys | 1555 | 1412 | 1477 | 1351 | 1334 | 7029 |

SECOND DIVISION.

Ten Pupils from each Division.

| Sshools and Divisions. | Mathematics. | Grammar, Composition, and Hygiene. | History and Geography. | Reading, Spelling, and Derivation. | Writing, Drawing, Music, & Book-keeping, | Тотаг. |
|------------------------|--------------|------------------------------------|---------------------------|---------------------------------------|--|--------|
| Marks possible | | | | | | 10300 |
| Wellesley, Girls | 1355 | 1205 | 1017 | 1177 | 907 | 5702 |
| Dufferin " | 1294 | 897 | 1198 | 1191 | 1024 | 5634 |

| Park, | | 317 | 339 | 377 | 523 | 309 | 1865 |

GOVERNMENT GRANT.

The amount received during the year from the Government Grant was \$8,756. The whole amount set apart for Toronto was \$10,555. The Separate Schools received \$1,799. The sum of \$10,555 is apportioned to Toronto, on the basis of its population, when compared with the other municipalities of the province at the time of our last census. This sum is then divided between the Public and Separate Schools, according to their average attendance. The amount received per pupil was over one dollar. This sum changes every year, and becomes less (per pupil) as the average attendance increases.

PROGRESS OF THE PUBLIC SCHOOLS.

Table H gives a comparative statement of various items relating to the Schools since 1844. It will be seen by reference to it, that the increase in the attendance at our Schools has been very rapid.

| In | 1869 the | Average | Registered | No. w | as 2,846, | the Daily | Attendance, | 2,260 |
|-----|----------|---------|------------|-------|-----------|-----------|-------------|-------|
| 6.6 | 1870 | 6.6 | 66 | 6.6 | 4,106, | 44 | 6.6 | 3,288 |
| 66 | 1880 | 66 | 6.6 | 64 | 8,987, | 66 | 66 | 8,215 |

The Registered and Average Attendance have thus been more than doubled during the past ten years.

Respectfully submitted,

JAMES HUGHES,

Public School Inspector.

Toronto, February 10, 1881.

Examiners' Peport.

REPORT

OF THE

Examiners in regard to the Combined Examinations

OF THE

PUBLIC SCHOOLS OF TORONTO.

The Examiners have the honor to report that, in the discharge of the duty entrusted to them, they examined, on the 22nd and 23rd of June, the selected pupils sent up to them from the several Public Schools in the City, in which the more advanced pupils are taught. The examination was conducted in the Dufferin and Ryerson Schools, and, as in former years, was throughout a written one. The pupils examined belonged to the four highest divisions, and numbered in all 247, being 15 more than took part in the corresponding examination last year.

The Examiners beg to submit the following results as brought out by a careful comparison of the papers handed in to them:—

I. FOURTH DIVISION.

The pupils of this Division, numbered 65. They were taken from the Fourth Divisions of the following Schools; the Dufferin, the Ryerson, the Wellesley, Victoria Street, Phœbe Street, Winchester Street, Niagara Street, the Park, and John Street; ten—five boys and five girls—from each of the first four; and five from each of the others. They were examined in Arithmetic, Grammar, and Composition, Hygiene, History and Geography, Read-

ing, Spelling and Derivation, Writing, Drawing and Music. Taking a general view of the Schools in this Division, the Girls' department in the Wellesley School stands first; the Boys' department of the Dufferin comes next; and after these the Boys' department of the Ryerson, and the Wellesley Schools and the Girls' department of the Ryerson are nearly equal. In this, as in the other divisions, the highest prizes are given for General Proficiency; the holders of these are not permitted to take prizes also for excellence in the separate branches of study in the examination. The Examiners recommend the General Proficiency prizes in this Division to be awarded to the following;

- 1. Richard Weston, The Dufferin School.
- 2. D'Arcy Winterbottom, Wellesley "
- 3. Minnie Jackes, " "
- 4. Jennie Houston, " " "
- 5. Isabella McDonald, " "

Taking the subjects separately, or in natural groups, the Examiners find that in this division the greatest excellence in Arithmetic was exhibited by the Girls' department in the Wellesley School; the Boys' department of the Dufferin comes next, and close upon it both departments of the Ryerson. In Grammar and Hygiene, which for prize purposes are grouped together, the highest place was taken by the Girls' department of the Wellesley School; the Boys' department of the Dufferin again taking the second place; the Boys' department of Wellesley and the Girls' department of Phœbe Street taking the third and fourth places respectively. In History and Geography the Boys' department of the Ryerson stands first, and close upon it, the Girls' department of the Wellesley; the Boys' departments of Victoria Street and the Dufferin School follow at some distance In Reading, Spelling and Derivation the place of honor is held by the Boys'

departments in the Dufferin and John Street Schools and by the Girls' department in the Ryerson; these being found to be of nearly equal merit. In the last group, which includes Writing, Drawing and Music, the greatest amount of excellence is exhibited by the Girls' departments in the Ryerson, Phœbe Street, Wellesley and Dufferin Schools, and in the order now enumerated.

In addition to the prizes for Proficiency, the Examiners recommend the following to be given in the branches specified:—

I. ARITHMETIC.

Alexander Hunter, Dufferin School.
 Alfred Ashbridge,
 Dufferin School.
 Brown, Phœbe Street School.
 Alice Arnall, Victoria Street School.

II. GRAMMAR, COMPOSITION AND HYGIENE.

Arthur Goldsmith, Dufferin School.
 Alexander Murphy, John Street School.
 Louie Ross, Ryerson School.
 William Taylor, Wellesley School.

III. HISTORY AND GEOGRAPHY.

1. J. McGregor, Ryerson School. 2. John Watson, Victoria Street School. 3. P. Brunskill, Ryerson School. 4. G. Graham, Ryerson School.

IV. READING, SPELLING AND DERIVATION.

1. Lousia Devlin, Victoria Street School; Esther Schiebe, Victoria Street School: Alex. Murphy, John Street School. 4. Katie Harris, Victoria Street School; Alex. Hunter, Dufferin School.

V. WRITING, DRAWING AND MUSIC.

1. Louie Ross, Ryerson School. 2. L. Palmer, Ryerson

School; A. Young, Ryerson School. 4. Katie Vaughan, Phoebe Street School.

II. THIRD DIVISION.

Fifty pupils appeared for Examination in this Division; ten boys and ten girls from the same Division of the Dufferin, and an equal number from the Ryerson, and ten girls from John Street School. They were subjected to examination in the same subjects as the Fourth Division, with Algebra and Book-keeping added. For the two previous years the best examinations on all the subjects, was in this Division passed by the Girls' department in the Ryerson School. This year the place of honor is taken by the Boys' department of the Dufferin, closely followed by the Girls' department of the same School. Coming to the separate branches, in Arithmetic and Algebra, and in Writing, Book-keeping and Drawing, the first place is taken by the Boys' department of Dufferin, the second by the Girls' department of the same school; in Grammar, Composition and Hygiene, and also in History and Geography the first place is taken by the Boys' department of Ryerson School. In Reading and Spelling the Girls' department of Dufferin stands first.

The Examiners' recommend Prizes to be given in this Division as follows:

I. GENERAL PROFICIENCY.

Maggie Gowans, Dufferin School.
 Fannie Hamilton,
 Dufferin School.
 Frank Wells, Dufferin School.
 Mary Dawson, John Street School.

II. MATHEMATICS.

1. George Jameson, Dufferin School. 2. Carrie M. Ellis,

Dufferin School; J. A. Fraser, Dufferin School. 4. Albert Summers, Dufferin School.

III. GRAMMAR, COMPOSITION AND HYGIENE.

1. Carrie M. Ellis, Dufferin School. 2. W. Phillips, Ryerson School. 3. P. R. Herrington, Dufferin School. 4. M. Purvis Ryerson School.

IV. HISTORY AND GEOGRAPHY.

W. J. Darby, Dufferin School.
 George Jameson, Dufferin School; W. Phillips, Ryerson School.
 W. McMurchy, Ryerson School.

V. READING, SPELLING AND DERIVATION.

1. Genevieve Miller, Dufferin School. 2. Lena M. Hood, Dufferin School. 3. Carrie M. Ellis, Dufferin School; Bella E. Passmore, Dufferin School; William Hill, Dufferin School.

VI. WRITING, BOOK-KEEPING, DRAWING AND MUSIC.

1. George Jameson, Dufferin School. 2. William Hill, Dufferin School. 3. A. S. Groat, Dufferin School. 4. Norman Bolton, Dufferin School; Mary Wright, John Street School.

III. SECOND DIVISION.

Sixty pupils took part in the Examination in this Division; ten boys and ten girls from each of the following Schools: Dufferin, Ryerson and Wellesley. They were examined in Euclid and Natural Philosophy in addition to the subjects embraced in the examination of the third division. Of the three Schools, the aggregate marks of Ryerson are the highest; but taking departments alone, the Girls' department in Wellesley stands highest, and the same department in Dufferin comes next. Coming to

separate branches of study, the highest excellence in Mathematics is exhibited by the Girls' department in Ryerson, the same department in Wellesley taking the second place. In Grammar, Composition and Hygiene, the Girls' department in Wellesley is much in advance of the others. In History and Geography, the first place is taken by the Boys' department of the Ryerson School, and the second by the Girls' department in the Dufferin. In Reading, Spelling and Derivation, the Girls' departments in Dufferin, Ryerson and Wellesley, were first and nearly equal. In the remaining group of subjects, Writing, Book-keeping, Drawing and Music, the first place was taken by the Girls' department of the Dufferin School, and the second by the same department of the Wellesley.

The Examiners recommend the following Prizes in this Division:

I. GENERAL PROFICIENCY.

1. Letitia Armstrong. Ryerson School. 2. Minnie Green, Dufferin School. 3. Maggie Donald, Wellesley School. 4. Robert Moggridge, Dufferin School. 5. Carrie Hall, Ryerson School.

II. MATHEMATICS.

Robert Davis, Ryerson School.
 Walter Evans, Dufferin School.
 Frank Webster, Dufferin School.
 Annie Lawson, Wellesley School; Jennie Pursey, Wellesley School.

III. GRAMMAR, COMPOSITION AND HYGIENE.

Bertha Christie, Wellesley School. 2. Henrietta McKim, Wellesley School. Jennie Pursey, Wellesley School. 4. Minnie Christie, Wellesley School.

IV. HISTORY AND GEOGRAPHY.

1. Walter Evans, Dufferin School. 2. Maggie Hay, Dufferin School; J. Carter, Ryerson School. 4. A. Oakley, Ryerson School

V. READING, DERIVATION AND SPELLING.

1. Alice Harding, Dufferin School. 2. A. Mullen, Ryerson School. 3. A. Douglas, Wellesley School; Maggie Hay, Dufferin School.

VI. WRITING, BOOK-KEEPING, DRAWING AND MUSIC.

Henrietta McKim, Wellesley School.
 Bella S. Laidlaw,
 Dufferin School.
 Sarah Grove, Dufferin School.

IV. FIRST DIVISION.

In this Division 12 pupils appeared for examination from each department of the corresponding divisions in Dufferin, Wellesley, and Ryerson Schools, making a total of 72. They were examined in all the subjects (fifteen) taught in the Public Schools of the City, and the results were such as reflected very high honour, both on the teachers and the scholars. The aggregate marks of the highest pupil this year are 15 per cent in advance of those reached by the pupil holding the same position last year. Three departments in these Schools exceed the aggregrate reached by the highest department last year; one of them being 20 per cent. in advance. The marks of the holder of the 10th Scholarship this year, equal those obtained by the holder of the first last year. This is no doubt due, in great measure, to the increasingly large number of pupils who are willing to prolong their attendance from year to year in the highest division of the School. There can be no doubt of the fact that the degree of excellence exhibited this

year is largely in advance of that reached on any previous occasion in the history of the Public Schools of Toronto. Taking all the subjects iuto account, the highest standard was reached by the Girls' department in Wellesley School: the Boys' department in Ryerson comes next, though at a considerable distance; and after it, the Boys' department in Wellesley. The record of no department in this highest division is discreditable. Passing the various branches of study under review, the first place in each of them is taken by the Girls' department of the Wellesley School; in Mathematics, the second place is taken by the Boys' department in the same school; in Grammar, Composition and Hygiene, and in History and Geography, the second place is taken by the Boys' department of Ryerson; in Reading, Spelling and Derivation, the second place is held by the Girls' department of Dufferin, and in Writing, Book-keeping, Drawing and Music, by the Boys' department of Wellesley.

The Gold Medal awarded to the pupil who has passed the best examination in all the branches of study in the highest division, has been gained by Christina Niven of the Wellesley School, and the Silver Medal, by William Graham of the Ryerson School, who stands next.

The Examiners recommend that the Scholarships for General Proficiency and the Prizes for excellence in special subjects be awarded as follows:—

SCHOLARSHIPS.

1. Christina Niven, Wellesley School. 2. William Graham, Ryerson School. 3. Frederick Featherstonehaugh, Ryerson School. 4. Annie Brown, Wellesley School; Albert Keeler, Ryerson School. 6. Alice Kirk, Wellesley School. 7. Jennie Gray, Dufferin School. 8. Elizabeth Young, Wellesley School.

9. Amiel Schadel, Wellesley School. 10. Newton Kent, Wellesley School. 11. John Laidlaw, Wellesley School. 12. Robert Duncan, Ryerson School.

PRIZES. I. MATHEMATICS.

W. J. Massey, Wellesley School.
 Joseph Skirrow, Wellesley School.
 Ralston, Ryerson School.
 Amanda Hicks, Wellesley School.

II. GRAMMAR, COMPOSITION AND HYGIENE.

 Mahala Hicks, Wellesley School; James Maybee, Ryerson School.
 Minnie Brewer, Wellesley School.
 George Anderson, Ryerson School.

III. HISTORY AND GEOGRAPHY.

r. Jennie King, Dufferin School. 2. Hattie Holmes, Wellesley School. 3. William Robins, Wellesley School. 4. Emily Maybee, Ryerson School.

IV. READING, SPELLING AND DERIVATION.

r. Amanda Hicks, Wellesley School; Jennie King, Dufferin School. 3. Mary Baillie, Ryerson School; Prudence Henry, Ryerson School; Christy Ashby, Wellesley School.

V. WRITING, BOOK-KEEPING, DRAWING AND MUSIC.

 William Sills, Dufferin School.
 Amanda Hicks, Wellesley School.
 Jennie Sinclair, Dufferin School; Emma Saunders, Ryerson School.

At the request of the Board, a Supplementary Examination was conducted in Canadian History and Canadian Geography, with the view of awarding two Medals, generously offered by a citizen of Toronto, for excellence in these branches of knowledge. Fifty-four pupils submitted to the examination. The acquaintance

with the subjects evinced by all was highly creditable; very many showed a knowledge of these departments of History and Geography so wide and accurate that it was no easy matter to decide as to the holders of the Medals. It was found that Jennie Gray of the Dufferin School, was entitled to the first, and Newton Kent of the Wellesley School, to the second. It should be stated that Joseph Mills, of Dufferin; Fred. Featherstonhough, of Ryerson; and Christina Niven, of Wellesley, were nearly equal to the second pupil in the competition.

In concluding their Report, the Examiners would congratulate the Board of Trustees and the citizens of Toronto on the growing efficiency of the Public Schools of the city and the system of instruction conducted in them, as brought out by this examination. It is pleasant to have to state that the standard of excellence is highest and most nearly equal in those branches of study which all would deem of greatest importance. In the opinion of the Examiners it would not be wise to extend farther, in the meantime, the subjects of study; in some branches, as in Euclid, it might be the course of wisdom to reduce somewhat the amcunt of work attempted. In conducting the examination, much valuable assistance was given to the Examiners by the Inspector, and by those Teachers who were appointed to distribute papers and superintend the pupils while writing their answers.

JOHN M. KING, M. A.,

Chairman of Board of Examiners.

Examination Papers.

Examination Papers.

COMBINED EXAMINATION.

SENIOR FIFTH BOOK.

ARITHMETIC AND MENSURATION.

- 1. Find the sum of the third, fourth, fifth, sixth and seventh parts of 32760.
- 2. Define a Fraction. Distinguish between a Vulgar and Decimal Fraction. Give example of a Proper, Simple and Complex Fraction.

3. Simplify
$$\begin{cases} \frac{2\sqrt[2]{3} \times 1^{5/9} \text{ of } ^{7}/6}{11\sqrt[2]{3} - 1^{1}/12 \text{ of } 7\sqrt[1]{3}} \end{cases} \div \frac{5\sqrt[1/2]{2} \times (3\sqrt[1/2]{2} - 1^{2}/13)}{16\sqrt[1/4]{4} + 3\sqrt[3]{16} \text{ of } 7\sqrt[1/5]{16}} + \frac{11\sqrt[3]{8} \text{ of } 3^{1}/5 \text{ of } 1\sqrt[1/4]{4}}{89 \times 7/8 \text{ of } 4}$$

- 4. How many cubic feet of timber would be required for the sleepers of a double line of railway 18 miles long if each sleeper be 9 feet long, 10 inches broad, and 8 inches thick, and they are placed 3 feet apart?
- 5. Two persons start at the same time, one for Weston, driving at the rate of 11 miles an hour, and the other from Toronto, walking at the rate of four miles an hour. Where and when will they meet, the distance between the two places being ten miles?
- 6. Divide '3102 by '071; and give the quotent as decimal of 5'051.

- 7. A certain estate is left to five sons; the diameter of the whole estate is 1½ miles. Each of four sons is to receive a share equal to a circle whose radius is 400 yards, and the eldest the residue. What is the share of each? Answer in acres, &c., to yards.
- 8. The Fahrenheit thermometer marks freezing point at 32°, and boiling point at 212°. The Centigrade freezing point is zero and boiling point 100°. What degree Fahrenheit corresponds to 60° Centigrade?
- 9. If I sold \$8,000 stock, yielding 6 per cent. per annum dividend at 81, and invested in bank stock at 101, yielding 7½ per cent. annually. Find gain or loss by the transfer.

GRAMMAR AND COMPOSITION.

- r. Define Relative Pronoun, Etymology, Impersonal Verb, Passive Voice, Interjection.
- 2. Give the plural of attorney, 2, i, cloth: the singular of kine, phenomena; the past tense, past participle, and present participle of go, lay, die; the possessive plural of woman, boy, lady.
- 3. Explain the origin of the sign of the possessive case of the noun; and of the suffix forming the past indicitave of the weak verb.
- 4. Name and illustrate the four principal syntactical combinations or relations of the parts of speech.
 - 5. Parse the words in italics in the following quotation:
 - "I who wept a little did, I will contess,
 The moment I was seated here alone,
 Honor my little cell with some few tears,
 Which anger and resentment could not dry."

6. Analyse:

"Tell me not in mournful numbers,
Life is but an empty dream;
For the soul is dead that slumbers;
And things are not what they seem."

- 7. Correct anything faulty in the following sentences—giving your reasons:
 - (a) There appears to be many who will not be promoted.
 - (b) Boys are in the plural number because they mean many.
 - (c) James and John have returned more than a month ago.
- (d) In the observance of the laws consists the stability and welfare of the kingdom.
 - 8. Write on one of the following subjects:

The Play-ground.

Vacation.

Advantages derived from the practice of English Composition. 3rd and 4th Divisions.

DICTATION AND DERIVATION.

- 1. Write a passage to be dictated in the class-room.
- 2. Correct the errors in spelling in the following passage:

There are precidents, therfore for all such things; but such precidents as could not for a moment survive the times of madness and destraction which gave them birth, but which, as soon as the spurs of the occasions were blunted, were repealled and execrated by parliments which, little as I may think of the present,

ought not to be compared with it—parliments sitting in the darkness of former times, in the night of freedom—before the principals of government were developed, and before the constitution became fixed.

3. Derive the following words, giving the meaning of the root, and, where such occur, of the affix and prefix in each case; dedicated, lecture, circumstances, obtained, designation, falsehood, imposed, currency, significance.

HISTORY.

- 1. Give the character of James I, and some of the more important events in his reign.
- 2. What do you understand by the Petition of Right; under what circumstances was it granted and with what result?
- 3. State the origin and principal events of the Civil War under Charles I.
- 4. With what results was the protectorate of Cromwell attended in relation to the foreign possessions of England?
- 5. Give the date of the Restoration, and give the names and purport of the more important Acts passed after it to secure the religion and liberties of England.
- 6. Give the date and circumstances attending the discovery of Canada.
- 7. What is Seignorial tenure, and when and how was it abolished?
- 8. Give the names of the Governors of Canada between 1840 and 1867.

GEOGRAPHY.

- r. What evidence have we that the waters of Lake Ontario once extended over parts that are now being tilled by the farmer?
- 2. Account for an eclipse of the moon As to the shape of the earth what does an eclipse of the moon prove?
- 3. It is said the earth is nearest the sun in winter, account then for the cold temperature of winter.
 - 4. Define Ecleptic, Horizon. What is our first meredian?
- 5. From what countries principally come our buffalo-robes, seal-skins, teas, coal, coal-oil, and finest silks?
- 6. Name six of the greatest nations in the world. In what zones are they found?
- 7. Where are Borneo, Ceylon, Madagascar, Cuba, Sicily, Formosa, Anticosti?
- 8. In what countries are Sedan, Sebastapol, Lucknow, Sadowa, and the battle-field of Waterloo.

EUCLID.

- 1. Define a right angle, an oblong, a rhombus.
- 2. If two triangles have two sides of the one equal to two sides of the other, each to each, and have likewise their bases or third sides equal, the angle which is contained by the two sides of the one shall be equal to the angle which is contained by the two sides equal to them of the other.
- 3. To describe a square that shall be equal to a given rectilineal figure.

4. The angle in a semi-circle is a right angle, the angle in a segment greater than a semi-circle is less than a right angle, and the angle in a segment less than a semi-circle is greater than a right angle.

ALGEBRA.

Define Index and Coefficient.

- I. Simplify $(a^2 + b^2 + c^2) (x^2 + y^2 + z^2) (bz cy)^2 (cx az)_2 (ay bx)^2$.
- 2. Divide $1 \frac{2}{3}x x^4 + 2x^5$ by $1 + \frac{4}{3}x + \frac{5}{3}x^2 + 2x^3 \frac{7}{3}x^4$.

3. Simplify
$$\frac{b+c}{(a-b)(a-c)} + \frac{c+a}{(b-c)(b-a)} + \frac{a+b}{(c-a)(c-b)}$$

- 4. A miller has 125 bushels of Winter wheat for which he paid \$1.35 a bushel, and now Spring wheat is selling at \$1.28 a bushel. How many bushels of Spring wheat must he add so that a bushel of the mixed wheat may be sold for \$1,25?
 - 5. Find the value of x in the equation

$$\frac{2x - \frac{1}{3}}{1 - x} - \frac{x - 2}{3x + 1} \times 3^{2/3} = 0.$$

NATURAL PHILOSOPHY.

- 1. What is Mechanics?
- 2. When are forces in equilibrium? Illustrate by examples.
- 3. What is a Motor?
- 4. Name the seven Mechanical Powers?
- 5. These seven Powers are the combination of what three simple machines?

- 6. Describe a Plumb-line, and tell its use.
- 7. What force is it that gives weight to bodies.
- 8. What is an inclined Plane?
- 9. In constructing roads in mountainous districts what principle in mechanics is observed?
 - 10. What are the practial uses of a Barometer?

BOOK KEEPING.

- 1. Explain the use of the Journal and the Ledger.
- 2. What is the chief difference between single and double entry. Name four or more accounts not used in the single entry.
- 3. How would you close Merchandise, Loss and Gain, Balance.
- 4. Explain fully the meaning of the following terms as employed in Book-Keeping: Stock, Bill Payable, Trial Balance.
- 5. Name an Account in which the Dr. side can never be greater than the Cr., and one in which the Cr. side can never be greater than the Debtor.

6. Journalize:

- (a) Sold goods to A. B. amounting to \$500, and received in payment Cash \$300 and other goods for the balance.
- (b) Bought goods from C. D. amounting to \$1000, paying Cash \$700 and giving my note for \$300.

- 7. When do you credit and when debit Loss and Gain?
- 8. Should the totals of the debits and the credits of all the accounts in the Ledger taken together always be equal? Give your reason.

FIRST DIVISION.

HYGIENE.

- 1. On what does the heat of the body depend? What is the principal object of clothing? And what is the comparative value of linen and of woolen clothing in relation to this object?
- 2. What is the life-sustaining element in the air we breathe? Account for the sense of fatigue after remaining for some time in a crowded room?
 - 3. State the effects of too little physical exercise?
- 4. What methods may be used for purifying water, and what are some of the sources of its impurity?
 - 5. Through what organs does oxygen get into the blood?
- 6. How would you proceed to extinguish the fire which had caught the clothing worn by a human being?
- 7. Sleep; how much is needed? What are the results of an insufficient amount? Under what conditions may it be made most conducive to health?

MUSIC.

1. What is meant by the Key-note?

- 2. What is the Key-note when 4 Flats in the Signature! And 3 Sharps?
- 3. What is the relation between the Major and Minor Scales? How do their signatures differ?
 - 4. What is the difference between a Major and Minor third?
 - 5. How many Semitones in a perfect fitth?
 - 6. Which Scales have 4 Sharps? Which 6 Sharps?
- 7. What are the Signatures for Compound Common Time? Also for Compound Triple Time?
 - 8. What is the effect of a Slur?
 - 9. What Notes form the Triad for E. Major Scale?
- 10. Give the Notes which form the third position of the Triad for F. Minor Scale.
- II. What is the effect of the Double Sharp, Double Flat, the Signs, and how are they contradicted?

SENIOR AND JUNIOR FIFTH BOOKS.

DRAWING.

- 1. Draw an original industrial design.
- 2. Draw from memory an industrial design given during the session.
- 3. Draw an edge view of a circle—also an oblique view, and name it.

SENIOR AND JUNIOR FOURTH BOOKS.

- 1. Draw an industrial design—original.
- 2. Draw an industrial design from memory.
- 3. Draw a quadrant, a sector, an arc.

HYGIENE.

- r. On what does the heat of the body depend? What is the principal object of clothing? And what is the comparative value of linen and of woolen clothing in relation to this object?
- 2. What is the life-sustaining element in the air we breathe? Account for the sense of fatigue after remaining for some time in a crowded room?
 - 3. State the effects of too little physical exercise?
- 4. What method may be used for purifying water, and what are some of the sources of its impurity?
 - 5. Through what organs does oxygen get into the blood?
- 6. How would you proceed to extinguish the fire which had caught the clothing worn by a human being?
- 7. Sleep; how much is needed? What are the results of an insufficient amount? Under what conditions may it be made most conducive to health?

JUNIOR FIFTH BOOK.

ARITHMETIC AND MENSURATION.

1. Find the sum of the third, fourth, fifth, sixth and seventh parts of 32760.

- 2. How many posts, six feet apart, would be required in fencing a circular plot of ground one mile round?
- 2. Define a Fraction. Distinguish between a Vulgar and Decimal Fraction. Give example of a Proper, Simple and Complex Fraction.

3. Simplify
$$\begin{cases} \frac{2\sqrt[2]{3} \times 1^{5/9} \text{ of } ^{7}/6}{11\sqrt[2]{3} - 1^{1}/12 \text{ of } 7\sqrt[1]{3}} \end{cases} \div \frac{5\sqrt[4]{2} \times (3\sqrt[4]{2} - 1^{2}/13)}{16\sqrt[4]{4} + 3\sqrt[3]{16} \text{ of } ^{7}/51} \\ + \frac{11\sqrt[4]{8} \text{ of } 3^{1}/5 \text{ of } 1\sqrt[4]{4}}{89 \times 7/8 \text{ of } 4}$$

- 4. How many cubic feet of timber would be required for the sleepers of a double line of railway 18 miles long if each sleeper be 9 feet long, 10 inches broad, and 8 inches thick, and they are placed 3 feet apart?
- 5. Two persons start at the same time, one from Weston, driving at the rate of II miles an hour, and the other from Toronto, walking at the rate of four miles an hour. Where and when will they meet, the distance between the two places being ten miles?
- 6. Divide 3102 by 071; and give the quotent as decimal of 5'051.
- 8. Find the difference between Banker's and true discount on a note made the first day of January, 1880, due 22nd June same year, and paid on the 1st of April, rate of discount being 8 per cent. per annum.

GRAMMAR AND COMPOSITION.

- 1. Define Relative Pronoun, Etymology, Impersonal Verb, Passive Voice, Interjection.
 - 2. Give the plural of attorney, 2, i, cloth: the singular of kine,

phenomena; the past tense, past participle, and present participle of go, lay, die; the possessive plural of woman, boy, lady.

- 3. Explain the origin of the sign of the possessive case of the noun; and of the suffix forming the past indicitave of the weak verb.
- 4. Name and illustrate the four principal syntactical combinations or relations of the parts of speech.
 - 5. Parse the words in italics in the following quotation:

"I who wept a little did, I will confess,

The moment I was seated here alone,

Honor my little cell with some few tears,

Which anger and resentment could not dry."

6. Analyse:

"Tell me not in mournful numbers,

Life is but an empty dream;

For the soul is dead that slumbers;

And things are not what they seem."

- 7. Correct anything faulty in the following sentences—giving your reasons:
 - (a) There appears to be many who will not be promoted.
 - (b) Boys are in the plural number because they mean many.
 - (c) James and John have returned more than a month ago.
- (d) In the observance of the laws consists the stability and welfare of the kingdom.
 - 8. Write on one of the following subjects:

The Play-ground.

Vacation.

Advantages derived from the practice of English Composition. 3rd and 4th Divisions.

DICTATION AND DERIVATION.

- 1. Write a passage 'o be dictated in the class-room.
- 2. Correct the errors in spelling in the following passage:

There are precidents, therfore for all such things; but such precidents as could not for a moment survive the times of madness and destraction which gave them birth, but which, as soon as the spurs of the occasions were blunted, were repealled and execrated by parliments which, little as I may think of the present, ought not to be compared with it—parliments sitting in the darkness of former times, in the night of freedom—before the principals of government were developed, and before the constitution became fixed.

3. Derive the following words, giving the meaning of the root, and, where such occur, of the affix and prefix in each case; dedicated, lecture, circumstances, obtained, designation, falsehood, imposed, currency, significance.

GEOGRAPHY.

- I Sailing from London, Eng., what would be the shortest route to India?
- 2. In what countries respectively are Canton, Yokohama, Melbourne, Bombay, Damascus?
- 3. What countries lie along the northern shore of the Mediterranean?
 - 4. Name the British possessions in Europe.

- 5, Give the course of the Gulf Stream. State some effects produced by it.
- 6. It is said the earth is nearer the sun in winter than in summer, account then for the difference in temperature.
- 7. From what countries principally come our buffalo-robes, teas, rice, sugar, and coal?
- 8. What are the chief sources of wealth in France? Name the principal exports of Canada.

MODERN HISTORY.

- 1. About what period was the Kingdom of England formed and by whom?
- 2. State the circumstances attending the Norman Conquest and the effects resulting from it.
 - 3. What do you understand by the Feudal system?
- 4. What was the object of the Crusades? Mention the names of some of the chief actors in them. When did Jerusalem finally pass out of Christian hands?
 - 5. What lent distinction to Florence in the fifteenth century?
 - 6. Give a brief sketch of Charles the Fifth.
- 7, Who were the principal actors in the thirty years' war and what is the name of the treaty by which it was closed?
 - 8. In what ways did Peter the Great contribute to the greatness of Russia?

EUCLID.

- r. Define a line, a square, parallel straight lines.
- 2. To bisect a given finite straight line, that is, to divide it into two equal parts.
- 3. To make a parallelogram given, which shall be equal to a given triangle, and have an angle equal to a given rectilineal angle.
- 4. If the square upon one side of a triangle be equal to the squares upon the other two sides, the angle contained by these two sides is a right angle.

SECOND DIVISION.

ALGEBRA.

Define Index and Coefficient.

- 1. Simplify $(a^2 + b^2 + c^2) (x^2 + y^2 + z^2) (bz cy)^2 (cx az)_2 (ay bx)^2$.
- 2. Divide $1 \frac{2}{3}x x^4 + 2x^5$ by $1 + \frac{4}{3}x + \frac{5}{3}x^2 + 2x^3 \frac{7}{3}x^4$.
- 3. Find the G. C. M. of $2x^2 13x \times 15$ and $6x^2 7x 3$.

4. Simplify
$$\frac{b+c}{(a-b)(a-c)} + \frac{c+a}{(b-c)(b-a)} + \frac{a+b}{(c-a)(c-b)}$$

5. Find the value of x in equation

$$\frac{2x-3}{x+1} - \frac{2x+5}{5x-2} = \frac{3x-4}{5x-2} + \frac{x-5}{x+1}.$$

NATURAL PHILOSOPHY.

- 1. What properties belong to all bodies?
- 2. Give examples of the principle of inertia.

- 3. Define Compressibility, Dilatibility, Porosity.
- 4. Define Specific Gravity.
- 5. What is a Siphon, and how is it prepared for use?
- 6. What is a Water-Pump?
- 7. In using the common Lifting Pump explain how the water is lifted from a well.
 - 8. Name some of the uses of a Barometer.

BOOK KEEPING.

1. How would you enter the following in the Day Book and Ledger?

JUNE 1.
You commence business with Mdse - \$1200

| Lou com | inche | Dusi | 11033 1 | VILII | Musc. | - | φ1200 | |
|------------|-------|--------|---------|-------|----------|-----|------------|---------|
| Cash | - | - | - | ~ | - | | 1500 | |
| Richard : | Daws | on ov | es y | ou | - | - | 100 | |
| You owe | Jame | s Smi | th | - | | - | 75 | |
| | | | 2 | - | | | | |
| Bought fr | om P | eter C | oope | r on | credit | 300 | o lbs. tea | ať 50c. |
| | | - | -3- | - | | | | |
| Paid Pete | r Coc | per o | n acc | ount | - | - | 100 | |
| | | - | -4- | - | | | | |
| Received | from | Richa | ard D | awso | on in fu | ıll | | |
| of accor | unt | - | - | - | - | - | 100 | |
| | | - | 5 | - | | | | |
| Paid to Ja | imes | Smith | - | - | - | - | 50 | |
| | | | | | | | | |

- 2. How would you find the losses or gains by Single Entry?
- 3. What is meant by Liability, Asset, Bill Receivable?

4. On which side of the Cash Book or Cash Account would you enter Cash Received?

SENIOR FOURTH BOOK.

ARITHMETIC AND MENSURATION.

- 1. Find the sum of the third, fourth, fifth, sixth and seventh parts of 32760.
- 2. How many posts, six feet apart, would be required in fencing a circular plot of ground one mile round?
- 2. Define a Fraction. Distinguish between a Vulgar and Decimal Fraction. Give example of a Proper, Simple and Complex Fraction.

3. Simplify
$$\begin{cases} \frac{2\sqrt[2]{3} \times r^{5/9} \text{ of } ^{7/6}}{r \, r^{2/3} - r^{1/1/2} \text{ of } 7^{\frac{1}{1/3}}} \end{cases} \div \frac{5\sqrt[4]{2} \times (3\sqrt[4]{2} - r^{2/13})}{r \, 6\sqrt[3]{4} + 3\sqrt[3]{16} \text{ of } 7/51} + \frac{r \, r\sqrt[4]{8} \text{ of } 3^{1/5} \text{ of } r\sqrt[4]{4}}{89 \times 7/8 \text{ of } 4}$$

- 5. Find the cost of carpeting a room 16 feet by 12 feet 6 inches, with carpet 5% of a yard wide, at \$1.50 per yard.
- 6. Two persons start at the same time, one from Weston, driving at the rate of 11 miles an hour, and the other from Toronto, walking at the rate of four miles an hour. Where and when will they meet, the distance between the two places being ten miles?
- 7. Find the simple interest on \$335.50 from the 1st of January, 1880, to the 22nd of June of the same year at 7 per cent. per annum.
- 6. Divide '3102 by '071; and give the quotent as decimal of 5'051.

THIRD DIVISION.

ALGEBRA.

Define Index and Coefficient.

- 1. Simplify $(a^2 + b^2 + c^2)(x^2 + y_2 + z_2) (bz cy)^2 (cx az)^2 (ay bx)^2$.
- 2. $15x^5 17x^4 24x^3 1382x 130x + 63$ by $5x^3 + 6x^1 9x + 7$.
 - 3. Find the value of x in the equation

$$\frac{x-2}{x+2} + \frac{x-3}{x-2} = 2$$

ANCIENT HISTORY.

- 1. Give the names of ihe various Aryan races in Europe in the order of their migration into it.
- 2. Who were the parties in the Peloponnesian war, and with what result was it waged?
 - 3. Give an account of the second Punic War.
 - 4. What important service was rendered Rome by Sulla?
- 5. When, by whom, and with what results was the battle of Philippi fought?
- 6. Give the names of the Flavian Emperors, and mention the more important events which took place during their reign.
- 7. What importance attaches to Constantine the Great, and when and where did he begin to reign, and how long did his reign continue?

SENIOR AND JUNIOR FOURTH BOOK.

DERIVATION.

Give the root, and the affix, and prefix (when possible) of each of the following words:

| Distinguishable, | Detached, |
|------------------|------------|
| Angular, | Polished, |
| Ordinary, | Descend, |
| Channel, | Carefully. |

Fragments,

GRAMMAR AND COMPOSITION.

- 1. Define Personal Pronoun, Participle, Adverb, Preposition.
- 2. Write the plural of chimney, shelf, story; the past tense and past participle of *ride*, *play*, *lay*; and possessive plural of *man*, *girl*, *soldier*.
- 3. Change the voice of the verb in each of the following sentences:
 - "The curfew tolls the knell of parting day."
 "We were summoned to dinner by the ringing of a gong."
 - 4. Parse the words in italics in the following:

The heart of Robert Bruce, which was preserved in a silver case, they consigned to the care of Douglas.

5. Analyse:

The abuses of John's government caused the combination of the barons which extorted Magna Charta.

6. Write a short letter to a friend describing a walk into the country, or a trip on Lake Ontario.

GEOGRAPHY.

- 1. Name the Provinces of the Dominion of Canada.
- 2. What cities have we in Ontario?
- 3. In what direction from Toronto is Rosseau Lake, Goderich, St. Catharines, Ottawa?
- 4. Name the capitals of New Brunswick, Nova Scotia and British Columbia.
 - 5. What is the population of the British Empire?
- 6. Give the colonies and possessions in Europe belonging to the British Empire.
- 7. What direction would you take to reach the capital of England from Edinburgh, from Dublin, from St. Petersburgh, from Paris?
- 8. In the German Confederation what kingdom is the most important? Name its capital.
 - 9. What States make up the United Kingdom of Italy?
 - 10. Give the rivers of Italy and the seas into which they flow.
- 12. Sailing from London, England, describe the shortest route to India.
- 12. Where is Palestine situated? What is it noted for? In Africa what river possesses the greatest historic importance?

MUSIC.

- 1. How many kinds of Scales are there, and what are they?
- 2. Of what are the Scales composed?

- 3. What effect has a Sharp or Flat placed before a note?
- 4. What is the use of the Natural?
- 5. Is it necessary to put a Sharp or Flat before every note required to be raised or lowered? Why?
 - 6. What is an Interval?
 - 7. What is a Semitone? What a Tone?
 - 8. How many kinds of Tone are there? Name them.
 - 9. What are the Subdivisions in Time?
 - 10. Under which division does C. come? And 3/2? And 4/2?
 - 11. What is meant by the Key-note?
- 12. What is the Key-note when 4 Flats is the Signature? And 3 Sharps?

HYGIENE.

- 1. What are the essential conditions of health?
- 2. How are the muscles rendered strong?
- 3. Why is occasional bathing conducive to health, and when is the warm bath debilitating?
 - 4. Mention some things favorable to digestion.
- 5. Why is it dangerous to eat or drink any food which has remained in the room of any person suffering from fever or contagious disease of any kind?
 - 6. What can be said of milk as an article of food?
 - 7. How would you treat a scald or burn?

JUNIOR FOURTH BOOK.

ARITHMETIC AND MENSURATION.

- I. Find the sum of the third, fourth, fifth, sixth and seventh parts of 32760.
- 2. Add together thirty millions five hundred and eight thousand six hundred, twenty-three thousand twenty-three hundred and twenty-three, ninety one thousand and nineteen, eighteen thousand eighteen hundred and eight, and fifty-nine millions eleven thousand and one.
- 3. After subtracting 357 thirty-five times from a certain number, there remains 309. What is the number?
- 4. How many posts, six feet apart, would be required in fencing a circular plot of ground one mile round?
- 5. The height of Chimborazo, one of the Andes is 21440 feet. Express it in miles, &c.
- 6. Define a Fraction. Distinguish between a Vulgar and Decimal Fraction. Give example of a Proper, Simple and Complex Fraction.

7. Simplify
$$\begin{cases} \frac{2\frac{2}{3} \times r^{5/9} \text{ of } \frac{7}{6}}{1 \text{ i } \frac{2}{3} - \frac{11}{12} \text{ of } \frac{7}{13}} \end{cases} \div \frac{5\frac{1}{2} \times (3\frac{1}{2} - r^{2}/18)}{16\frac{1}{4} + 3^{3}/16 \text{ of } \frac{7}{51}} + \frac{11\frac{1}{8} \text{ of } 3^{1}/_{5} \text{ of } \frac{1}{4}}{89 \times \frac{7}{8} \text{ of } 4}$$

8. From £.062725 + £3.005 take the sum of 15.825s. + 51.25d.

HISTORY.

I. Mention the several races which contribute to form the English people.

- 2. What were the contents of the Great Charter? Where and by whom was it signed?
- 3. Give some particulars of the reign of Henry V., and mention the war which broke out after his death.
- 4. Name, in order, the sovereigns of the Tudor dynasty. Give the name and offices of some of the chief men in the reign of Henry VIII.
- 5. In whose reign did Marlborough die? Give the names of his victories, and state the name and terms of the treaty formed at the close of the war.
- 6. When was the independence of the United States of America acknowledged by England, and what were the causes which led to it?

FOR MR. ALDERMAN HALLAM'S MEDALS.

CANADIAN HISTORY.

- I. Give a brief account of the habits and character of the inhabitants of Canada at the time of the discovery by Europeans.
- 2. Give the names of the four leading tribes of Indians with which the first settlers of Canada were brought into relationship, and state the nature of their relations to them respectively.
- 3. What seems to have been the location of the first European settlement, and under whose auspices was it made?
- 4. Mention some of the impediments to success with which the early settlers had to contend.
 - 5. Give an account of the parts borne respectively by

Champlain, Frontenac, and La Salle in the settlement and exploration of the country, with dates.

- 6. What were the first articles of exchange between Canada and Europe? Compare with them those of to-day.
- 7. Mention several distinct forms of government which existed in Canada previous to the introduction of responsible government. What do you understand by responsible government?
- 8. Give the dates and the purport in relation to Canada of the following treaties: St. Germain-in-Laye, Utrecht, and Paris.
- 9. What causes led to the erection of two governments in Canada—one in Upper Canada and one in Lower—and what causes led to their re-union? Give the date of the latter.
- 10. Mention the Circumstances connected with the foundation of Annapolis and of Halifax.
 - 11. What causes led to the rebellion in Upper Canada?
- 12. Give the dates of the following events: (a) Champlain's first voyage to Canada. (b) His death. (c) Foundation of Quebec. (d) Final surrender of Canada to the British. (e) Ashburton Treaty. (f) Reciprocity Treaty. (g) Confederation.

GEOGRAPHY.

- 1. Give the area and population of the Dominion of Canada.
- 2. Name the Provinces through which the following rivers flow: Saguenay, Red, Fraser, Trent, St. John and Grand.
- 3. Where are the following Islands found: Manitoulin, Queen Charlotte, Long Point, Wolfe, Christian, Orleans, and Magdalen?

- 4. Name the principal minerals of Canada, and tell where they are chiefly to be found.
- 5. What are the chief industries of the Maritime Provinces? What the exports of Ontario?
 - 6. Give the Counties and their capitals on Lake Erie.
- 7. What towns on the line of the G. T. R. between Toronto and Prescott?
 - 8. Give the lines of railway in Ontario.
- 9. What is the length of the St. Lawrence? Name its rapids. Name the lakes of which it is the outlet.

Pinancial Statements.

Financial Statements.

Annual General Statement of Receipts and Expenditure for Public School Purposes, City of Toronto, for the year ending December 31st, 1880.

INCOME FOR 1880.

1 33

Unspector's Annual Report.

Myspector's Annual Report.

To the Board of Public School Trustees of the City of Toronto:

GENTLEMEN,

In accordance with a Resolution of your honorable Board, I respectfully submit the Twenty-second Annual Report of the Schools under your charge.

Appended to the Report will be found Statistical Tables which give in detail all important particulars relating to teachers, pupils, attendance, absenteeism, tardiness, studies pursued, cost of maintenance, &c.

ATTENDANCE.

The total number of pupils registered during the year was 12,462.

The average daily attendance was 8,409. Last year it was 8,215.

509 pupils attend school less than 20 days.

| 743 | 66 | 66 | 46 | between | 20 | and | 50 | days |
|------|----|-----|-----|---------|-----|-----|-----|------|
| 2759 | 66 | 66 | 4.6 | 66 | 50 | 44 | 100 | 4.6 |
| 2140 | 66 | 6.6 | 64 | 4.6 | 100 | . 6 | 150 | - 6 |
| 5123 | " | 66 | 66 | 66 | 150 | 44 | 200 | • 6 |
| 1100 | 66 | " | 46 | 66 | 200 | 66 | 203 | . 6 |

The number who attended school for over 100 days is 8,372, or 68 per cent. of the total registered number.

The most correct idea of the relation of the Average to the Registered Attendance is obtained by comparing the average of Monthly Averages with the average of Monthly Registered Numbers.

The average of Monthly Registered Numbers was 9,321. This shows an increase compared with last year of 334. (See Table A.)

The average of Monthly Average Numbers was 8,409. This shows an increase of 301 when compared with the corresponding number of last year. (See Table B.)

The average of Monthly Averages was 90.2 per cent. of the average of Monthly Registered Numbers.

The best average for any month in the year was 94.9 the average for December.

The largest number was registered in October, and the smallest number in July. The attendance in July was 771 less than in any other month, and 1,291 less than the average. This clearly shows that a large number of parents fully realize the disadvantages of having their children in close school-rooms during the hot weather.

It is gratifying to note that there are now very few parents who refuse to concede the principle, that reasonable regularity is an essential condition in establishing the right of a child to attend school. The regulation based on this principle is one of the most essential in connection with a Public School system.

The following statement shows the Average Registered Number in each School during the year:—

| Schools. | Average Registered No. | No. of Teachers. | Average per Teacher |
|---------------|---------------------------|---------------------|------------------------|
| Dufferin | 583 | 12 | 49 |
| Wellesley | 835 | 13 | 65 |
| Ryerson | 584 | 12 | 49 |
| Phœbe Street | 882 | 13 | 68 |
| John Street | 603 | 10 | 61 |
| Park " | 440 | 8 | 55 |
| Winchester " | 576 | 8 | 72 |

| Centre Street | 52 | · 1 | 52 |

LATENESS.

The improvement in the punctuality of the pupils has continued during 1881. Both parents and pupils in nearly every part of the city seem to be fully alive to the importance of acquiring the habit of promptness. By reference to Table D it will be seen that the lateness is confined largely to a few Schools.

The following table shows the number of cases during the past eight years.

| Date. | Average Attendance. | Cases of Lateness |
|-------|------------------------|----------------------|
| 1874 | 4,814 | 69,456 |
| 1875 | 6,386 | 6 5,36 4 |
| 1876 | 5,976 | 31,486 |
| 1877 | 6,860 | 15,272 |
| 1878 | 7,467 | 7,474 |
| 1879 | 8,144 | 6,615 |
| 1880 | 8,215 | 5,967 |
| 1831 | 8,409 | 5,980 |
| | | |

(See Table D.)

CERTIFICATES OF HONOR.

Certificates of Honor are awarded at the Christmas Vacation to such pupils only as have not been once absent or late, and whose conduct has been uniformly good, unless the absence or lateness shall have been occasioned by sickness, of not more than three weeks' continuance, to be certified in writing by the pupils' parents or guardians.

These Certificates are of two grades, and named respectively First Honor Certificates and Second Honor Certificates.

The First Honor Certificates are awarded to such pupils as have fulfilled the above condition for two consecutive sessions.

The Second Honor Certificates are awarded to such pupils as have conformed to the said rules for one session during the year.

The following statement shows the number of Certificates given in the various schools at the close of 1881:

| School | LS. | First Honor | Second Honor. | Total. |
|-------------|---|----------------|------------------|--------|
| Dufferin | • | . 151 | 171 | 322 |
| Wellesley. | | 257 | 294 | 551 |
| Ryerson | | . 129 | 199 | 328 |
| Phœbe | Street | . 115 | 228 | 343 |
| John | 46 | 149 | 149 | 298 |
| Victoria | 66 | 67 | 84 | 151 |
| Winchester | 66 | 103 | 132 | 235 |
| Niagara | 66 | . 70 | 101 | 171 |
| Park | | 68 | 96 | 164 |
| George | | . 39 | 65 | 104 |
| Louisa | " | 44 | 93 | 137 |
| Bathurst | | 42 | 123 | 165 |
| Palace | 64 | . 11 | 27 | 38 |
| Parliament | " | 54 | 95 | 149 |
| Church | | 55 | 123 | 178 |
| Elizabeth | | 37 | 54 | 91 |
| York | | 3 | 18 | 21 |
| Givins | | 36 | 78 | 114 |
| Borden | 46 | 36 | 80 | 116 |
| Leslieville | | 16 | 17 | 33 |
| Hope | | 15 | 81 | 96 |
| | | | _ | |
| | Total | 1,497 | 2,308 | 3,805 |

It would, in my opinion, be advisable to vary the form and style of the certificates occasionally, as the same pupil often receives several of them during his course in school.

TEACHERS.

There were 157 Teachers in the employ of the Board at the close of the year, exclusive of the Special Teachers in Music and Drawing, and 4 assistant Teachers.

There are 25 Male, and 132 Female Teachers employed.

They hold Certificates as follows:

| First Class Provincial | 48 |
|--------------------------|-----|
| First Class County Board | 17 |
| Second Class Provincial | 0.2 |

Miss Annie A. Gray, of Palace Street School, succeeded in obtaining a Professional First Class Certificate, Grade C., at the Examinations held last July.

SCHOOL ACCOMMODATION.

During the year 1881 Hope Street and Brant Street Schools were completed. Each of them contains six rooms. It was expected that Hope Street School would relieve the overcrowded state of Bathurst Street, Givins Street, and Niagara Street Schools. This result did not follow its opening, however. The population of the western portion of the city has increased so rapidly that although over four hundred pupils are in attendance at Hope Street School, intended for only three hundred, the attendance at the other schools named was not lessened.

In addition to the two new schools already named, the Borden and Elizabeth St. Schools were enlarged, two new rooms being opened in each.

It is to be hoped that during the present year, the power of the City Council to refuse to grant the money required by the Public School Board may be taken away by Parliament.

During the coming year it will be absolutely necessary (1) to enlarge Givins Street School; (2) to relieve Wellesley, Church Street, and Winchester Street Schools by a School in the northern part of the city; and (3) to provide accommodation in some way

for the children in the Senior Third Book Classes who reside in the north-western part of the City. Several new classes have been opened in the Junior Third Book in that district since any additional room was opened for Senior Third Book pupils.

APPARATUS.

The apparatus most needed now consists of Charts for Vocal Culture, and some Geographical Apparatus for the primary classes.

CLASSIFICATION.

The Pupils of the Schools are classified into ten grades. This makes the progressive steps in the advancement of a child comparatively easy. The most encouraging fact in this connection is that the number of pupils above the Second Book continues to increase. It is to be regretted that in the highest Divisions of boys the numbers are small. This part is easily accounted for by the fact that the wholesale trade of Toronto has increased so rapidly that boys are always in demand. It is a pity that they are not allowed to continue longer at school, as girls are. Owing to the small number of boys in the Senior Fifth Book Classes in Dufferin, Wellesley, and Ryerson Schools, it was found necessary to combine the two Fifth Book Classes in the Boys' Department of these schools, after the summer vacation.

I would recommend for the serious consideration of the Board, the propriety of teaching the sexes together in the higher as well as the lower divisions.

OVER-WORK IN SCHOOL.

Considerable attention has been paid to this subject in this city during the past year. In view of this fact, and in order that the position taken by the Public School Board with reference to the question may be properly understood, I submit the following statement of the system carried out for a length of time in Toronto Public Schools, to prevent evil effects from study.

- 1. The time table does not allow the study of the same subject for too long a time without change. Those subjects which require little mental effort are so distributed as to relieve the brain from long continued strain.
- 2. Physical exercises are practised several times each day for a brief period, especially in the Junior Classes. The pupils are also allowed a recess of fifteen minutes each forenoon and afternoon. Where sufficient attention is paid in school to the development and exercise of the physical constitution, there is very little danger of injury to either mind or body from over-study.
- 3. Teachers are required to keep a record of the work assigned by them for home preparation. This is a most important check to prevent the giving of lessons for home study which would interfere with the necessary rest and recreation of the pupils. It also serves to protect the teacher from unfounded charges by parents.
- 4. The lessons assigned for home work are suitable for the average of the classes or a little lower. As stated in the Monthly Reports to parents they are intended to be so short as not to interfere with the health or comfort of the pupils.
- 5. However easy these lessons may be for the great majority of the pupils, there will often be some, who, for constitutional or other reasons, will find them so difficult as to affect their health injuriously. Such pupils are always excused from doing their home work in part or altogether on application to the teacher or the inspector.

SHORTER SCHOOL HOURS.

When the Board decided to shorten the hours of daily attendance for pupils in the Primary Classes, it did wisely, and its action was heartily endorsed by all intelligent parents. I am glad to report that there is no falling off in the progress made in the Junior Classes as a result of the shortening of the hours. I am decidedly of the opinion that any class of young children will make more rapid progress in a given time, if they only study four hours per day, than if they were required to study six hours per day. The difference as regards their health will be even greater than in their advancement. I would strongly recommend that the hours of study in School be reduced even in the Senior Classes. If the Schools were closed at half-past three instead of four it would be a decided advantage. It would afford the pupils a longer time for out door exercise than they have at present; it would reduce the hours of confinement in an atmosphere that even with the most perfect system of ventilation, must be to a certain extent impure; it would shorten the period of continuous mental strain, and it would afford opportunity for many pupils to take lessons in music and other subjects without interfering with their own progress in school, or with the proper grading of the classes to which they belong. There is a very large class of parents in this city who desire to avail themselves of sending their children to the Public Schools, but who, in addition, wish to give their sons and daughters the opportunity of studying certain branches which are not taught in these Schools. They cannot do both at the present without risking the health of their children.

There need really be little loss of time in closing the schools at half-past three. If they continue to open in the afternoon at half-past one as at present, it would be unnecessary to have an out-door recess during the two hours session which would follow.

Thus there would only be a diminution of about fifteen minutes per day in the time at present spent in teaching.

PRIZE GIVING.

Prizes were given as usual at the close of the first session in July. In the highest four divisions they were given as the result of the combined examination. (See report of the combined examination). In the classes below the fourth book, the prizes were given on the joint basis of sessional records, and examination results. The Board presented prizes in books to the value of \$300.07.

In addition to the above, twelve scholarships were presented by the Board of Trustees of the Collegiate Institute, and two medals, one gold, and one silver, by Mr. John McDonald. These medals and scholarships were given for general proficiency. A medal was given by the Inspector for the best original design, and Mr. John Hallam presented a gold and a silver medal to the pupils who obtained the highest marks in Canadian History and Geography. Rev. Septimus Jones presented a handsome prize for the most intelligent reading of selections not previously seen by the pupils.

SCHOOL FOR VAGRANT CHILDREN.

For some years I have recommended the Board to establish a school which would occupy an intermediate position between the ordinary Public School and an Industrial or Reformatory School. Action in regard to this important matter has been taken during the past year. The Board received through the benevolence and liberality of Mr. W. H. Howland and his associate workers in Grace Church Mission, an offer of a school room with fuel and caretaking provided, on condition that they would appoint a teacher, for the purpose of educating those children chiefly in

St. John's Ward, who had been suspended from school for grossly bad behaviour, or whose parents owing to drunkenness take little interest in their welfare and are unable to provide them with sufficiently decent clothing to fit them for attendance at an ordinary school.

The Board appointed Miss H. How teacher of the school, which was opened in September, on Centre Street. The school has been more successful than even its promoters at first expected it would be. The total number registered during 1881 was 77, and the average attendance was 34. Several of the pupils were homeless vagrants, and some of them had frequently been arrested for theft and other crimes. The change in the conduct and manners of the roughest boys under the kind treatment of Miss How, has been very marked. Notwithstanding the fact, that they were totally unaccustomed to restraint, or to any exercise of authority, they have been gradually reduced to a voluntary submission to rule, and are now controlled with little difficulty. Whipping has only been resorted to in a very few cases. As an incidental evidence of the influence of the school upon even the worst boys, it is worthy of note that one of the most notorious offenders of the district, a boy well known to the police authorities, who ran away in order to avoid punishment, came back next day and solicited the privilege of being re-admitted, expressing his willingness to be whipped. A great change indeed must have been wrought to make the ungoverned "arab" desirous to receive a whipping in order to be allowed to attend school. Another boy who had also been several times in gaol, behaved so well that he was deemed worthy to receive one of the "Jesse Ketchum" prizes, and when asked whether he would prefer a Bible or some other book, he promptly replied, "I would rather have the Bible."

Several of the boys, who, before the opening of the Centre Street School, were always on the streets, growing up in idleness, ignorance, and wickedness, have since become so earnest in their desire to secure an education, that they attend the Night School as well as the Day School.

Satisfactory as are the results, however, they have to be attributed chiefly to local causes. The ladies and gentlemen connected with the Grace Church Mission have done much to induce the children to go to the School, and the patience, the kindness and intelligence of Miss How have contributed largely to make the undertaking a success. It is not what the School has done or can do that affords ground for congratulation, but what it will probably lead to. It has served to direct public attention to a class hitherto neglected; it has proved beyond a doubt, that kindness is the correct method of dealing with such pupils after they are brought into school. What is now needed is a slight amendment in the law to enable the School Board to exercise compulsion in bringing such children into school, and securing their regular attendance. It may be argued that we have already a compulsory School Law. True, but that law merely provides that children from 7 to 12 years of age shall have the right to attend School in defiance of their parents. It prevents parents sending their children to work too soon, but is powerless in clearing the streets of vagrant children, as its penalties are directed only against the parents themselves. It is perfectly clear that with drunken, debased parents such a law could not be enforced. We must have power to deal with the pupils themselves, and in most cases they have no inclination naturally to go to school. It is true the Industrial School Law gives such power to deal with those children who are not employed. We are not likely to have an Industrial School in Toronto for some time however, and even if one were in existence, it would be found that most of those for whom it was intended would evade its provisions by claiming to be employed as news-boys or as boot-blacks.

I strongly recommend the Board to urge upon the Government the propriety of licensing all boot-blacks and newsboys, one condition of their receiving a licence being that they attend a School provided for the purpose for two hours each day. Such a system is carried out with most satisfactory results in Boston, and the machinery necessary for the enforcement of its provisions is simple and complete.

PROGRESS IN STUDIES.

I have to report an increasing desire on the part of the great majority of our teachers to acquaint themselves with the best methods of teaching the various subjects included in our programme. This desire has shown itself in a greater interest in reading professional books and periodicals, and in the enthusiasm with which improved methods of teaching are practised, when their superiority has been made manifest.

While satisfactory advancement has been made in all departments of study and in all the grades, there are a few subjects in which the progress has been so marked as to justify special reference to them. Among these are Drawing, Music, in the Junior Classes, Primary Reading and Drill and Calisthenics.

DRAWING.

The progress in this subject continues to be most encouraging. Two great obstacles to uniform progress in teaching drawing have been the foundationless theories that (1) Artists only could teach drawing, and (2) That only specially gifted pupils could learn to draw. These obstructive theories have been almost completely turned out of our schools. There are few on our teaching staff who do not believe that the *teacher* is more essential than the artist in teaching drawing; as to be able to teach well is of more importance than to have a mere technical knowledge of any sub-

ject, in explaining its principles to others. So all are now able to testify that in no subject on our programme is the progress more uniformly good than drawing. All do not draw equally well, neither do they write equally well, or learn Arithmetic, Grammar, or Reading with the same facility. No one urges that Reading should be abandoned in our schools because in an entire school there may be only one pupil who will ever attain to eminence as a public reader; neither should drawing be set aside because only a few can ever become noted artists. Some subjects are taught because they develop the minds of the pupils and some because of their practical utility to the pupils after they leave school. There is perhaps no subject that combines both these excellences to a higher degree than Drawing. In Toronto our object is to make it serve as an educative rather than a utiltanian subject. The primary aim in teaching it is mental growth, the secondary aim is to develop the hand skill on the part of the pupils. It must not be thought, however, that the acquirement of skill in execution is any the less thorough, or of slower growth because it comes incidentally. The contrary is the fact. If the mind is properly educated with regard to drawing, all that remains to be done is to train the hand to execute with rapidity and accuracy the wishes of the mind. The training of the hands depends entirely on practice guided by a few rules. To say that the explanation of these rules for the direction of the hand constitutes the teaching of drawing, is utterly misleading. Drawing is a science more than an art, and in teaching it the teacher should explain principles, rather than aim to secure mere skill in controlling the muscles of the right arm. Give the pupils clear ideas and a liking for the subject, and there need be no fear concerning beauty of execution. That will come in due time by practice, and progress towards perfection in this, as in all other studies, should be a gradual growth.

In the primary classes the principles of design are first taught

with actual things, leaves, colored cardboard, etc., forming the elements to be moulded into patterns. Then the pupils apply these principles to the various geometrical figures, beginning with the square. They do not learn the definitions of the geometrical figures. They learn to recognize a spoon, a chair, a table, a chandelier, and to know their uses without learning a definition of either of them. They do the same with the various regular forms used as the basis of design. They are gradually carried step by step through Harmony about a centre, Radiation from a point, Harmony on opposite sides of a line, Repetition, etc., advancing regularly from straight to curved lines, and receiving from time to time new elements of design, historical or botanical. This course occupies their attention during their first four years at school, and is succeeded by lessons in Perspective and Object Drawing, including Shading.

Fifteen minutes of each day are devoted to drawing in the junior classes, and two lessons per week of half an hour in length are given in the higher classes. The lessons in the Fourth and Fifth Book classes are taught by Miss Gunn, the special teacher of Drawing. She also prepares the work for the Second and Third Book classes, and it is printed on the printogram and distributed to the teachers of those classes. Miss Gunn afterwards visits the junior classes to inspect the work done and to make suggestions regarding the best methods for teaching the subject.

In several of the junior classes the plan of telling stories in pictures occasionally, as practised in Cleveland under the direction of Professor Aborn, has been introduced with gratifying results.

A successful exhibition of the drawing done in the different schools was held in the Board Room in July. The work attracted much attention, and was of a very excellent character. The Inspector's Medal for the best original design was won by William Robins of the Wellesley School.

I would recommend that the Board annually give at least one prize for each grade to be competed for at an exhibition similar to that held last summer, providing that no drawing shall be exhibited which was not done in school and during school hours.

MUSIC.

A great improvement has been made in most of the junior classes during the year in the systematic teaching of music. It has been found that after a proper course of training in singing the scale in the key of D, pupils even in the first book classes can:

- 1. Sing easy pieces at sight.
- 2. Sing music readily as it is written on the blackboard; and
- 3. Write various notes when sung or played in their hearing.

I strongly recommend, as I have done on previous occasions, that as soon as possible the responsibility for the teaching of music be thrown upon the regular teachers in the higher as well as the lower classes. I have no doubt whatever as to the result. If we had one superintendent of music whose chief duty was to train the teachers in music, and how to teach it, and who visited the schools regularly to test the work done in this subject, there is no reason why the musical training given in our schools should not be much more practical and thorough than it now is.

I recommend the Board to take steps to have a piano in each of the larger schools. Arrangements might be made to have good instruments placed in cheap cases, and the cost thereby might be greatly reduced.

I would also suggest the propriety of allowing a competent pro

fessional musician to organize classes for the study of various instruments of music in the larger schools after school hours. The instructor could afford to teach such a class for a nominal sum paid by each pupil who wished to take such a course, and the benefit resulting from such a training to the pupils themselves and to the public at large would well repay the cost.

Mr. F. H. Torrington, the conductor of the Philharmonic Society, has already signified his willingness to teach such classes in connection with the Public Schools, if the Board should approve of the plan suggested. I would further recommend that an annual musical festival be held under the auspices of the Board for the purpose of showing the proficiency of the pupils in this important branch.

PRIMARY READING.

There is no other subject in which such a marked improvement has been made during the past year as in primary reading. Most of the teachers in the junior divisions voluntarily attended the lessons on "How to teach Reading to beginners," given to the students attending the City Model School. Those who did so were convinced that the Phonic method of teaching the recognition of words was the most reasonable and most easily taught. The results of the change made have been eminently satisfactory. There is no class in which the method has been fairly tested in which the pupils have not made as much progress in four months as was formerly made in a year. Nor is this even its chief recommendation. The best result that follows the style of teaching that must necessarily be practised in teaching by the Phonic Method is the awakening and growth of the intelligence of the children, and the accompanying independence from the teacher in making advancement in reading as well as other subjects in the future.

PHYSICAL EXERCISES.

Under this head are included Military Drill and Calisthenics, both of which departments are successfully practised in our Schools.

The drill taught at the present time includes all the parts of squad drill as defined by the British Army Field Exercise book, and prescribed by the Education Department for Ontario. During the year Captain Thompson, drill instructor and absentee officer has regularly drilled the boys in our schools, in the Third, Fourth and Fifth Book classes. The great success which has attended his teaching was clearly shown by the remarkable precision and accuracy displayed by the pupils at the drill competition in July, for the Banner presented by Mr. James Beatty, Esq., L. L. D.; M. P. for West Toronto; and also at the Industrial Exhibition, where the pupils of Dufferin, Wellesley and Ryerson Schools, competed at drill for a Silver Bugle.

The judges in the first competition were, Lt. Col. R. B. Denison, D. A. G.; Lt. Col. Grassett, 10th Royal Grenadiers; and Major Gray, R. A., and the Beatty Banner was awarded to the Wellesley School. Adjutant Manley, 10th Royal Grenadiers, officiated as judge in the second competition and the Exhibition Bugle was won by the Dufferin School.

I would recommend, that there should be annually not only a drill competition among the higher classes in our schools, but a general review of all the pupils in the various schools who are drilled by Capt. Thompson.

Important as is military drill in contributing to the health of the pupils, in giving them an erect and graceful carriage, in developing prompt obedience to command, and in giving tone and spirit to the boys, it is of secondary importance when compared with an efficient system of school-room calisthenics. The education of

mind and body should be carried on at the same time. Where the bodies of the pupils are allowed to work alternately with the minds, there is exceedingly little danger of injury from over study, in or out of school. It is not work nor worry that exhausts children but weariness. It is the monotony of long continued study, not intensity of attention, which weakens the nervous systems of the young in school, and leaves them unable to resist disease when it attacks them. Of course children are also injured in school by breathing impure air, even in the best ventilated schools. Let the school hours be shortened a little to allow the children more time in the open air, and let the study hours be enlivened by recreation and alternated by calisthenic exercises, and there will be little complaint concerning the exhaustive effects of mental labor.

In the finest model school in Europe, that of Brussels, fifteen minutes of every hour are devoted to calisthenic exercises. These exercises are not necessarily for the exclusive developemt of the body, as many of them are performed in time with music, the words set to which convey information or moral lessons.

LITERARY EXTRACTS.

The systematic memorizing of choice extracts from the best writers of the English language, by all the pupils of the corresponding grades throughout the city, has been successfully introduced during the past year. Instead of having a few comic or sentimental pieces recited by the more talented members of the class, every pupil in a class is taught the same selections. The exercise is conducted by the teacher, each line being taught from the blackboard. The advantages of this system, first brought to perfection by Mr. Peaslee, the energetic and public spirited Superintendent of schools in Cincinnati, are numerous and important,

- 1. The minds of the pupils are enriched by the choicest gems of the English language.
- 2. The language of the pupils is greatly improved (a) by the addition of a large number of words, (b) by learning to use words according to the arrangement of the best authors.
- 3. As these extracts are taught line by line from the blackboard, they afford the teacher the best possible means for explaining and illustrating the principles and practice of emphasis, inflection and pausing. No other school exercise so directly affects the speaking and reading of the pupils.
- 4. The learning and recitation of these extracts will give the teachers excellent opportunities for impressing noble sentiments, and high moral principles in the minds of their pupils.

EXAMINATIONS.

Three written Examinations were held during the year; the Combined Examination and two Promotion Examinations. The Examiners for the Combined Examination were Rev. I. Tovell, A. McMurchy, Esq., M.A.; Rev. John M. King, M.A., and William Anderson, Esq. The list of Scholarships and Prizes awarded will be found in the Report of the Examiners. The comparative standing of the different schools in the various departments of study, will be found below by comparing the marks obtained at the Combined Examination.

COMBINED EXAMINATION.

I have deemed it advisable to make the following explanation in reference to the mode of conducting the Combined Examination. Examiners are appointed who prepare their papers independently, and send them to the School Board Printer themselves,

No school officer or teacher has anything to do with the papers until they are submitted to the candidates.

This is the only competitive examination held by the Board.

The following tables give the standing of the various divisions at the Combined Examinations.

FIRST DIVISION.

Twelve Pupils from each Division.

| Schools and Divisions. | Mathematics. | Grammar, Composition, and Hysgiene. | History and Geography. | Reading, Spelling and Derivation, | Writing, Drawing, Music, and Book-keeping. | Total. |

NIGHT SCHOOLS.

These Schools were fairly attended during the year. In nearly every case the pupils seemed anxious to learn and were orderly and attentive. The attendance was as follows:

| | | | -REGIS | Female. | Male. | Female. |
|------------|--------|--------------|-------------|---------|-------|---------|
| Parliament | Street | | 187 | 76 | 65 | 33 |

| Winchester | 66 | ************ | 103 | 55 | 25 | 22 |
| Louisa | 66 | ****** | 56 | _ | 17 | |
| | | | | | —— | |
| | То | otal | 867 | 298 | 203 | 121 |

GOVERNMENT GRANT.

The amount received during the year from the Government Grant was \$8,855. The whole amount set apart for Toronto was \$10,555. The Separate Schools received \$1,700. The sum of \$10,555 is apportioned to Toronto, on the basis of its population, when compared with the other municipalities of the Province at the time of our last census. The sum is then divided between the Public and Separate Schools, according to their average attendance. The amount received per pupil was over one dollar. The sum changes every year, and becomes less (per pupil) as the average attendance increases.

PROGRESS OF THE PUBLIC SCHOOLS.

Table E gives a comparative statement of various items relating to the Schools since 1844. It will be seen by reference to it, that the increase in the attendance at our Schools has been very rapid.

| In | 1861 | the average | registered | No. was | 2,800, | the daily | attendance, | 2,180 |
|-----|------|-------------|------------|---------|--------|-----------|-------------|-------|
| 6.6 | 1871 | 6.5 | 6.6 | 4.4 | 4,646, | 66 | 6.6 | 3,638 |
| 66 | 1881 | 66 | 4.6 | 4.6 | 9,321, | 66 | 6.6 | 8,409 |

The Registered and Average Attendance have thus been more than doubled during the past ten years.

Respectfully submitted,

JAMES HUGHES,

Public School Inspector.

Toronto, February 10, 1882.

REPORT

OF THE

Examiners in regard to the Combined Examinations

OF THE

PUBLIC SCHOOLS OF TORONTO.

The Examiners have the honor to report that, in the discharge of the duty with which they were entrusted, they examined on the 22nd and 23rd of June, the selected pupils sent up to them from the several Public Schools in the City, in which the advanced pupils are taught. The Examination was conducted in the Dufferin and Ryerson Schools, and, as in former years, was throughout a written one. The pupils undergoing examination were taken from the four highest divisions, and numbered in all 248, being 16 more than took part in the corresponding examination last year.

The Examiners beg to submit the following results as brought out by careful comparison of the papers handed in to them.:—

I. FOURTH DIVISION.

The pupils of this Division undergoing examination numbered 67. They were taken from the Fourth Division of the following schools. The Dufferin, the Ryerson, the Wellesley, Victoria Street, ten from each—five boys and five girls; Phœbe Street, the Park, John Street, five from each; Winchester Street and Niagara Street, six from each, They were examined in Arithmetic,

Grammar and Composition, Hygiene, History and Geography, Reading, Spelling and Derivation, Writing and Music. Taking a general view of the results brought out by the examination of the pupils in this Division the first place is won by the Girls' department of of Wellesley, the second by the Boys' department in the same school, and the third by the Girls' department in the Dufferin School. In this, as in the other divisions, the highest prizes are given for General Proficiency, and the holders of these are not permitted to take prizes also for excellence in the separate branches of study included in the examination. The Examiners recommend the General Proficiency prizes to be awarded to the following pupils.

1. Benjamin Morton Jones, Wellesley School.

Nina Matheson, " "
 Rachel Law, Dufferin "
 Ella Adams, Wellesley "

5. Annie McHaffy, "

Taking the subjects either separately or in natural groups, the Examiners find that in this division the greatest excellence was exhibited in Arithmetic by the Girls' department of Wellesley, the second place being taken by the Boys' department of the same school, and the third by the Girls' department of the Dufferin School. In Grammar and Hygiene the highest place was taken by the Boys' department of the Wellesley School, the second by the Girls' department of the same school, and third by the Girls' department of the Dufferin and Ryerson Schools. In History and Geography the Girls' department of Wellesley School stands first, the Boys' department of the same school second, and the Boys' department of the Ryerson School third. The first place for Reading, Spelling and Derivation was given to the Girls' department of the Dufferin School, the second, to the pupils of the John Street School, and the third to the Cirls' department of the

Wellesley School. In the last group, embracing Writing and Music, John Street School stands first, and the Wellesley School second.

In addition to the prizes for Proficiency, the Examiners recommend the following to be given in the branches named:—

I. ARITHMETIC.

Jennie Mathers, Dufferin.
 Annie McDonald, Niagara Street.
 Maggie Kerr, Wellesley.
 J. Chandler, Dufferin, and Andrew Jaffray, Wellesley.

II. GRAMMAR, COMPOSITION AND HYGIENE.

Emma Brownridge, Phœbe Street.
 Maggie Kerr, Wellesley.
 Kate Berkinshaw, Dufferin.
 George E. Roden, Victoria.

III. HISTORY AND GEOGRAPHY.

Alfred Nickle, Wellesley.
 Robert Munro, Ryerson.
 Agnes Byrne, Winchester.
 Bella McDiarmid, Wellesley.

IV. READING AND SPELLING.

Latimer Robinson, John Street.
 Maud Rogers, Phœbe Street.
 Johnston Foy, John Street.
 Minnie Davidson, Dufferin.

V. WRITING AND MUSIC.

Agnes Byrne, Winchester Street.
 Alfred Bell, John
 Street.
 Bella Gardner, Ryerson.

II. THIRD DIVISION.

Fifty pupils appeared for examination in this division, ten boys and ten girls from the Dufferin School, and the same number from the Ryerson, and ten girls from the John Street School. They were examined in the same subjects as the pupils of the Lower or Fourth Division, with the addition of Algebra and Book Keeping. This year, as last year, the Boys' department of the Dufferin School takes the first place, being much in advance of the others. The second and third places are taken by the Girls' department of the John Street School, and the same department of the Dufferin School. Coming to the separate branches or groups of subjects, the first place in each of them is taken by the Boys' department of the Dufferin School. In Mathematics, the second place is taken by the Girls' department of the same school, and the third by the Girls' department of the John Street School. In Grammar, Composition, and Hygiene the second place is taken by the Boys' department of the Ryerson School, while each of the remaining subjects or groups, History, Geography, Reading, Spelling and Derivation, Writing and Music, the second place was taken by the Girls' department of the John Street School, and the third by the Girls' department of the Dufferin School. The Examiners recommend prizes to be given in this division as follows :-

I. GENERAL PROFICIENCY.

R. Weston, Dufferin.
 Sarah Robertson, Dufferin.
 Louisa Devlyn, John Street.
 Alex. J. Hunter, Dufferin.
 A. Goldsmith, Dufferin.

II. MATHEMATICS.

Minnie Brimston, John Street.
 F Coleman, Dufferin.
 Nellie Flint, Dufferin.
 Edith Littleford, Dufferin.

III. GRAMMAR, COMPOSITION AND HYGIENE.

1. George Taylor, Ryerson. 2. Vivian Morgan, Edith Curzon and Lucy Palmer, equal, Ryerson.

IV. HISTORY AND GEOGRAPHY.

Kate Harris, John Street.
 Mary Chandler, Dufferin.
 W. Rutherford, Dufferin.
 Annie Linkie, John Street.

V. READING, SPELLING AND DERIVATION.

Mary Chandler, Dufferin.
 Annie Linkie, John Street.
 Polly Booth, Dufferin.
 A. Ashbridge, Dufferin School.

VI. WRITING AND MUSIC.

r. Minnie Brimston. John Street. 2. Nellie Scarlett, John Street. 3. W. Rutherford, Dufferin.

III. SECOND DIVISION.

Sixty pupils took part in the examination in this Division, ten boy and ten girls from each of the following schools: the Dufferin, the Ryerson, and the Wellesley. They were examined ln Euclid, and in Natural Philosophy in addition to the subjects embraced in the examination of the Third Division. Of the three schools the aggregate marks of the Dufferin are the highest, and while the aggregate marks of the Boy's department of the Dufferin are higher than those of the same department of the other two schools, they are lower than those of the Girls' department, not only of the Dufferin but of the Wellesley and Ryerson. Coming to the separate branches of study, the highest place in Mathematics is taken by the Girls' department of the Dufferin, the same department of Wellesley and Ryerson following in the order mentioned. The highest place in Grammar, Composition and Hygiene was taken by the Girls' department of Wellesley, the second and third by the Boys' department of the Ryerson and Dufferin Schools. In Reading, Spelling and Derivation the Girls' department of the Ryerson School stands first, the Boy's department of the Dufferin coming second. In History and Geography, and in Writing and Music the highest degree of excellence was exhibited by the Girls' department of the Dufferin School, the same department of the Wellesley and of the Ryerson Schools following in the order named.

The Examiners recommend the following prizes to be given in this division:—

I. GENERAL PROFICIENCY.

- 1. Margaret Gowans, Dufferin. 2. Fanny Hamilton, Dufferin.
- 3. Isabella Fraser, Dufferin. 4. Arabella Flaws, Wellesley.
- 5. George Jamieson, Ryerson.

II. MATHEMATICS.

Lottie Wiggins, Dufferin.
 Lena Brown, Ryerson, and Charles Smith, Wellesley, equal.
 Kate Spence. Wellesley, and Libbie Williams, Dufferin, equal.

III. GRAMMAR, COMPOSITION AND HYGIENE.

Gussie Houston, Wellesley.
 Samuel Muirhead, Ryerson.
 Kate Spence. Wellesley.
 Frank Wells, Dufferin.

IV. HISTORY AND GEOGRAPHY.

- Minnie Jackes, Wellesley.
 Stella Phillips, Dufferin.
 Alfred Tucker, Wellesley.
 John Brady, Dufferin.
 - V. READING, SPELLING AND DERIVATION.
- Elizabeth Gundy and Constance Breckon, Ryerson, equal.
 Jessie McGregor, Ryerson. 4. Margaret Purvis, Ryerson.

VI. WRITING, BOOK-KEEPING AND MUSIC.

Frank Wells, Dufferin.
 Lottie Wigglns, Dufferin.
 Fanny Neeley, Dufferin.

IV. FIRST DIVISION.

The number of pupils who were entered for examination in this the highest division was 72, 12 boys and 12 girls from each of the Schools in which First Division pupils are taught viz., the Dufferin, Ryerson and Wellesly, one boy was absent from the Dufferin list so that the number actually taking part in the examination was 71. They were examined in all subjects, drawing excepted (fifteen) taught in the Public Schools of the City, and the results were such as reflect very high honour, both on the teachers and the scholars. Last year the girls department of the Wellesley School stood highest in this division this year, the place of honour is taken by the same department of the Ryerson School in which while no pupil is exceptionally high and only two gain Scholarships, the average reached is very high indeed. The Girls' department of Wellesley School follows Ryerson very closely and at a greater distance the same department of the Dufferin. The Boys' department of the Ryerson School is highest of that side of the division but it is below the Girls' department of each of the School engaged in the competion. The percentage obtained by the best Schools and by the best pupils in each School does not differ much from that of the previous year. After making allowance for the absence of any marks for drawing the maximum reached is somewhat higher than on any former occasion. The first place in the separate branches is divided among all these Schools, though in each subject it is taken by the Girls' department. In Mathematics and in Writing, Book keeping and Music the greatest excellence is exhibited by the Girls' department of the Wellesley Schools; in Grammar, Composition and Hygiene and in Reading, Spelling and Derivation, the Girls' department of the Dufferin School comes to the front, while in History and Geography the same department of the Ryerson School is easily first.

The Gold Medal awarded to Amanda Hicks of the Wellesley

School, and the Silver Medal to Mary Baillie of the Ryerson School. There were only fifteen marks between these two pupils out of an aggregate of 913.

The Scholarship for General Proficiency and the Prizes for excellence in special subjects are recommended by the examiners as follows:—

SCHOLARSHIPS.

1. Amanda Hicks, Gold Medal, Wellesley School. 2. Mary Baillie, Silver Medal, Ryerson School. 3. Joseph A. Skirrow, Wellesley School. 4. Frederick Ralston, Ryerson School. 5. Letitia Armstrong, Ryerson School. 6. Robert Potts, Ryerson School. 7. James Maybee and Maggie Hay, Dufferin School equal. 9. Bruce Bailey, Dufferin School. 10. Helen Corbett, Wellesley School. 11. George Anderson, Ryerson School. 12. Frederick Shea, Dufferin School.

I. MATHEMATICS.

Minnie Parks, Wellesley School.
 Lizzie Riddel, Ryerson School.
 Joseph Leary, Wellesley School.
 David Gray, Wellesley School.

II. GRAMMAR, COMPOSITION AND HYGIENE.

1. Emily Sheppard, Dufferin School. 2. Edith Dawkins, Wellesley School. 3. Bella Mills and Minnie Bee, Dufferin School equal.

III. HISTORY AND GEOGRAPHY.

r. Maud Cruise, Ryerson School. 2. Ella Hamill, Ryerson School. 3. Wm. Robins, Wellesley School. 4. Annie Charlton and May Baxter, Wellesley School, equal.

IV. READING, SPELLING AND DERIVATION.

r. Amy Bain, Dufferin School. 2. Minnie Parks and John Spence, Wellesley School, equal. 4. Bella Mills and Albert Herbert, equal, Dufferin School.

V. WRITING, BOOK-KEEPING AND MUSIC.

Albert Herbert, Dufferin School.
 Abiel Bowers, Wellesley School.
 Edith Dawkins, Wellesley School.

A Special Examination was held in Canadian History and Geography, with a view of awarding medals for excellence in these The competition was very close, and on careful examination of the answers it was found that Harvey Miller, Dufferin School, stood first, taking 195 marks out of a possible 200, and Hattie Holmes, Wellesley School, stood second, taking 186 marks. A Special Examination was also held to decide who should receive the prize so kindly offered by Rev. Septimus Jones for excellence in Reading. Over twenty entered into the competition; the examiners awarded the prize to Mary Baillie, of the Ryerson School. They make honourable mention at the same time of Ellen Corbett, William Sills and Harvey Miller, any one of whom might well have carried off the prize. They desire to make similar mention of Benjamin Morton Jones, whose reading, though a pupil of the fourth division, was singularly accurate and spirited.

In concluding this report, the Examiners have pleasure in reporting their testimony as to the growing efficiency of the Public Schools of this City, and of the system of instruction conducted in them. The papers which they have been permitted to read give evidence of much patient work on the part of the teachers and pupils. In conducting this examination, much valuable assistance was given to the Examiners by the Inspector, and by those Teachers who were appointed to distribute papers and superintend the pupils while writing their answers.

JOHN M. KING,

Chairman, Board of Examiners.

Examination Papers.

Examination Papers

COMBINED EXAMINATION.

ARITHMETIC.

FIRST DIVISION .- [THE WORK IS REQUIRED.]

- 1. Reduce 100 half guineas to four-penny-pieces; 4 tons, 3 cwt., 2 qrs., 1 lb. to drams (cwt.=112 lbs.); 697½ acres to square yards.
- 2. A person bought 1,008 articles for \$3,072; before they were all disposed of, 48 were lost; at what rate must be sell each of the remainder, that on the whole he may gain \$240.
- 3. Required the G.C.M. of 6,327 and 23,997; also the L.C.M. of 9, 16, 42, 63, 21, 14, 72.
- 4. (1) Show how to compare fractions, giving the reason for each part of the operation.
 - (2) Find the value of $\frac{11}{17} + \frac{31}{51} + \frac{266}{357} + 3\frac{5}{13} + \frac{24}{39}$.
 - 5. Find value of $1\frac{2}{3}$ of. $\frac{53}{61}$ of $\frac{825}{416}$ of 100 tons, (cwt.=100 lbs.)
- 6. A merchant sells an article for \$5.00, and losses ten per cent. What will the percentage of gain or loss be if he sell it for \$7.00.
- 7. The breadth of a room is half as much again as it height; its length is twice its height; it costs \$25.20 to paint its walls at $2\frac{1}{2}$ cents per square foot; what are its dimensions?
 - 8. Three men can do as much work as 5 boys; the wages of 3

boys are equal to those of two men. A work on which 40 boys and 15 men are employed takes 8 weeks and costs \$1,680; how long would it take if 20 boys and 20 men were employed, and how much would it cost?

9. If the price of the Dominion 6% stock be 106, a person can obtain an annual income of \$5.00 more than he can if the price be 107. How much has he to invest?

[Same paper for Second Division, except that No. 8 is omitted.]

THIRD DIVISION .- [THE WORK IS REQUIRED.]

- r. Add together fifty millions, ten thousand and two; fifty thousand and five; two hundred millions and eighty; one billion, one hundred millions, and sixty nine; fifty-four millions, fifty thousand and fifty; ten billions, eight hundred and sixty-five thousand and sixty.
- 2. Find the sum, difference, and product of, 2,060, 897, and 4,000,908.
- 3. Reduce 100 half guineas to four-penny-pieces; 4 tons, 3 cwt., 2 qrs., 1 lb., to drams (cwt.=112 lbs.); 697½ acres to square yards.
- 4. A person bought 1,008 articles for \$3,072; before they were all disdosed of 48 were lost; at what rate must he sell each of the remainder, that on the whole he may gain \$240?
- 5. Required the G.C.M. of 6,327 and 23,997; also the L.C.M. of 9, 16, 42, 68, 21, 14, 72.
- 6. (1) Show how to compare fractions, giving the reasons for each part of the operation.
 - (2) Find the value of $\frac{11}{17} + \frac{31}{51} + \frac{266}{357} + 3\frac{5}{13} + \frac{24}{39}$.

7. The breadth of a room is half as much again as its height; its length is twice its height; it costs \$25.20 to paint its walls at 2½ cents per square foot; what are its dimensions?

FOURTH DIVISION .- THE WORK IS REQUIRED.]

- 1. Add together fifty millions, ten thousand and two; fifty thousand and five; two hundred millions and eighty; one billion, one hundred millions, and sixty-nine; fifty-four millions, fifty thousand and fitty! ten billions, eight hundred and sixty-five thousand and sixty.
- 2. Find the sum, difference, and product of 2,060,897 and 4,000,908.
- 3, Reduce 100 half guineas to four-penny-pieces; 3 tons 3 cwt., 2 qrs., 1 lb. to drams (cwt.=112 lbs.); 697½ acres to square yards.
- 4. A person bought 1,008 articles for \$3,672; before they were all disposed of 48 were lost; at what rate must be sell each of the remainder, that on the whole he may gain \$240?
- 5. Required the G.C.M. of 6,327 and 23,997; also the L.C.M. of 9, 16, 42, 63, 21, 13, 72
 - 6. Find the value of $\frac{11}{17} + \frac{8}{5} \frac{1}{1} + \frac{226}{357} + 3\frac{5}{13} + \frac{24}{39}$.

ALGEBRA.

FIRST AND SECOND DIVISION.

First Division will take Nos. 1, 3, 4, 6, 7, 8. Second Division will take Nos. 1, 2, 3, 4, 5, 6.

1. Simplify $15x - \{4 - [3 - 4x - (3x - 7)]\}$.

2. Multiply
$$x^2 + 2ax + 3a^2$$
 by $x^2 - 2ax + a2$.

3. From
$$\frac{1+x}{1x+x^2}$$
 take $\frac{1+x}{1-x+x^2}$.

4. Divide
$$3x^2 + 4abx^2 - 6a^2b^2x - 4a^2b^2$$
 by $2ab + x$.

5.
$$\frac{1}{2}x + \frac{1}{3}x = x - 7$$
. Find the value of x.

6. A can correct 70 pages for the press in 1½ hour, B can correct 150 pages in 2¼ hours; how long will they be in correcting 425 pages jointly?

7.
$$\frac{(2x+3)x}{2x+1} + \frac{1}{3x} = x+1$$
. Find x.

8.
$$x^2-12x = -35$$
. Find x.

THIRD DIVISION.

- 1. Find the value of $2\sqrt{d-b} + 3\sqrt{3d + 2c 1} + 4\sqrt{a + b + 2c + d}$ when a = 0 b = 2 c = 4 d = 6.
- 2. Find the product of a-b by a+b.
- 3. Find the difference between x-3y+4z and x+2y-6z.
- 4. Divide $x^4 + y^4 2z^4 + 2x^2y^2 2z^2 1$ by $x^2 y^2 z^2 1$.
- 5. Find the value of x in the equation, $4x \times 9 = 8x 3$.

EUCLID.

FIRST AND SECOND DIVISIONS.

1. Define a right angle, parallel straight lines, diameter of a - circle.

- 2. If there be two triangles which have two sides of the one equal o two sides of the other, each to each, and have their bases equal the angle contained by the two sides of the one shall be equal to the angle contained by the two sides equal to them of the other.
- 3. Make a parallelogram equal to a given triangle and having one of its angles equal to a rectilineal angle.
- 4. If a straight line be divided into two equal parts and also into two unequal parts; the rectangle contained by the unequal parts, together with the square on the line between the points of section, is equal to the square on half the line.

ENGLISH GRAMMAR AND COMPOSITION.

FIRST AND SECOND DIVISIONS.

- 1. Define case, indicative mood, sentence.
- 2. Give the singular of indices, banditti, genera; the plural of church, stomach, penny; the possessive plural of cousin, country, child; the past tense and past principle of do, send, flee; comparative and superlative of tidy, evil, nigh.
 - 3. What is voice? How is the passive voice formed?
- 4. Change the construction in regard to voice in the following sentences:

The youth read the book and then returned it to the library.

The work was done by the contractor within the specified time.

5. Not a drum was heard, not a funeral note,
As his corse to the ramparts we hurried;

Not a soldier discharged his farewell *shot*O'er the *grave* where our *hero* we buried.

"Tis distance lends enchantment to the view, And robes the mountain in its azure hue.

Parse the words in italics in the above passages and analyze the first stanza.

6. Correct anything faulty in the following sentences, giving your reasons for the changes you make:

Who should I meet the other day but my old school-mate.

- If I had not broke your stick you would never have ran home nor began to tell those kind of stories which nobody but foolish men believe.
- 7. Write a short composition on one of the following subjects:

 Honesty is the best policy.
 - The power of a Habit.

A visit to the Island South of Toronto Bay.

THIRD AND FOURTH DIVISIONS.

- 1. Define case, orthography, transitive verb, person.
- 2. Give the plural of attorney, shelf, duty; the singular of clothes, brethren, data; the past tense and past particple of slay, ride, fly; comparative and superlative of heavy, old, many.
 - 3. What is voice; How is the passive voice formed;
- 4. Change the construction, in regard to voice, in the following sentences:

James wrote the letter and carried it to the post-office.

That work was done by Thomas and his brother.

5. Towards the West lies the fertile shore that stretches along the Adriatic where ripen the rich fruits of the South.

Analyze the above passage, and parse the words in Italics.

6. It was me who steered the boat, but him and his brother that rowed.

A systematic and methodical arrangement of particulars facilitate the completion of the entire work.

As neither John nor Thomas are going, let you and I go.

7. Write a short composition on one of the following subjects:

A House on fire.

A ramble in the country.

A visit to the Island south of Toronto Bay.

The Fourth Division will omit number 6.

GEOGRAPHY.

FIRST AND SECOND DIVISIONS.

FIRST DIVISION will take Nos. 1, 2, 3, 4, 7, 8, 10, 11.

SECOND DIVISION will take Nos. 5, 6, 8, 9, 10, 11, 12, 13.

I. Give the name of the mountain ranges on the north and south of the lower St. Lawrence. State the difference of their

geological character, and give the meaning of Azoic as applied to rocks.

- 2. At what angle is the axis of the earth to the plane of its orbit? To what motion of the earth are day and night due, and to what motion are summer and winter due?
 - 3. Which planets are smaller and which larger than the earth?
- 4. Name the four great regions into which the North American Continent is divided.
- 5. In what lake does the Ottawa rise? What are its tributaries from the South?
 - 6. Name the Counties of Ontario which border on Lake Erie.
- 7. Give the course of the Mississippi; its chief tributaries, and the four largest cities on its banks.
- 8. Give the boundaries of Yorkshire, the names of its five largest cities and towns, and mention the industries for which each is distinguished.
- 9. Give the situation of Madagascar, Anticosti, Malta, the Falkland Isles, Tasmania.
- 10. In what countries and on what waters are the following places situated:—Glasgow, Hull, Coblentz, Delhi, Monte Video, Londonderry, Vienna, Lyons, Mecca, Hong Kong?
- 11. What are the principal exports from Italy, and what are those from Australia?
 - 12. What is Ecliptic?
- 13. Within what zones are the following countries situated:—Borneo, New Zealand, Great Britain, Greenland?

THIRD AND FOURTH DIVISIONS.

THIRD DIVISION will take Nos. 1, 2, 3, 4, 5, 6, 7, 8. FOURTH DIVISION will take Nos. 6, 7, 8, 9, 10, 11.

- 1. Mention the names and general direction of the two principal mountain chains in Asia.
- 2. Describe the course of the Indus, and give the situation of Calcutta, Cabul, and Canton.

What is the principal river in Southern Africa, and in what direction does it flow?

- 4. Name the States in Northern Africa, called the Barbary States.
- 5. Name the main divisions of Australia, and give the capital of each.
- 6. Give the names of the Provinces into which Ireland is divided, and the name of the largest city in each.
- 7. What large rivers flow into the Caspian Sea, the Black Sea, and the Bay of Biscay?
- 8. Give the situation of the following places:—Three Rivers, Fredericton, Halifax, Rio Janeiro, New Orleans, Berne, Prague, Milan, Aberdeen, Cambridge, Bristol.
- 9. Name the Eastern or New England States, and give the capital of each.
- 10. Name the principal Islands off the East Coast of North America.
 - 11. What are parallels of latitude and longitude? Give, as

nearly as you can recollect, the latitude of New York, Montreal, London and St. Petersburg.

HISTORY.

FIRST DIVISION.

- 1. Name some principal event in the reign of William the Conqueror, John, Edward II., Henry V., Henry VIII., Mary Elizabeth.
- 2. Give the names, in order, of the Stuart Kings, and the date of the Stuart Period.
- 3. From A. D. 1629 to 1640, Charles I. held no Parliament. Why?
 - 4. State the principal cause that led to the Civil War of 1642.
 - 5. What battle closed the Civil War, and what followed?
- 6. What events of English History mark the period of the Commonwealth?
- 7. What is the nature of the Test Act, and the Habeas Corpus Act?
 - 8. How long did the French govern Canada?

What do you know of General Brock? Lord Monck?

SECOND DIVISION.

- 1. What principal events are the following names connected with:—William Tyndall, John Wyckliffe, and Martin Luther?
 - 2. Who founded the order of the Jesuits?

- 3. For what were the Waldensians noted? also the Huguenots?
- 4. When did Spain lose the Straits of Gibraltar?
- 5. In the reign of Elizabeth, Queen of England, what event transpired affecting the power of Spain?
 - 6. Give a brief account of the life of Napoleon Bonaparte.

THIRD DIVISION.

- I. Name the first principal nation that occupied a place in Europe. What nation succeeded and surpassed it in greatness?
- 2. In the wars between Greece and Persia what three principal battles were fought? Name the Grecian commander in these battles.
 - 3. What caused the Peloponesian war? How long did it last?
 - 4. Tell what you know of Alexander the Great.
- 5. Who were called Patricians and who Plebians of the Roman Empire?
 - 6. How long did the first Punic War last? Who was Hannibal?
- 7. Give a general statement of the extent of the Roman Empire at the birth of Christ.
- 8. Three great changes marked the reign of Constantine; name them.

DICTATION AND DERIVATION.

SECOND DIVISION.

1. Write a passage to be dictated in the class-room.

2. Derive the following words, giving the meaning of the roots, and when possible, of the prefixes and affixes:—

| Commerce, | Cavity, |
|--------------|-----------|
| Malicious, | Debtor, |
| Edifice, | Paternal, |
| Domestic, | Fluent, |
| Agriculture, | Manual. |

3. Give English words derived from Facio, Fortis, Animus.

THIRD AND FOURTH DIVISIONS.

- 1. Write a passage to be dictated in the class-room.
- 2. Derive the following words, and give the meaning of the roots, and, when possible, of the prefixes and affixes:—

| Equinox, | Suburban. |
|--------------|--------------|
| Transport, | Locality, |
| Consequence, | Dominion, |
| Admirable, | Instruction, |
| Uncivil, | Education. |

BOOK - KEEPING.

FIRST DIVISION.

- 1. What is the use of a Daybook; Journal; Ledger?
- 2. What is the difference between Single and Double Entry in Book-keeping?
 - 3. What is meant by Posting?
- 4. What are Bills Receivable; Bills Payable; Bank Cheques; Invoices.

- 5. Journalize the following:—Bo't Goods from Mr. A,, \$5,000; paid him in cash, \$200; gave my note for the balance, at three months.
 - 6. Of what use is a Trial Balance?
- 7. What three accounts are closed last in Double Entry, and in what order?

THIRD AND SECOND DIVISION.

THIRD DIVISION will take Questions 1, 2, 3, 4.

SECOND DIVISION will take Questions 4, 5, 6, 9, 7, 8.

- 1. What is the object of Book-keeping?
- 2. What is a Receipt? a Note?
- 3. Put the following items into the form of an account:—June 1st, Received Cash, \$100.00; 2nd, Received Cash, \$25.00, 3rd, Paid Cash, \$50.00; 4th, Received Cash, \$10.00; 5th, Lost Cash, \$8.00.
- 5. Put the following items into the form of an account, and show how much James Smith owes you:—Borrowed from James Smith, \$200.00; 2. Sold him 30 yards of fine Cloth, @ \$4.00 per yard; 4. Sold him 80 yards Cotton @ 15 cents per yard; 4. Sold him 100 Fine Silk Hats, @ \$5.00 each; Received from him Cash, \$50.00.
 - 5. What is the use of a Day Book and Ledger?
 - 6. What is meant by Posting?
- 7. Write out a Receipt for \$260.00, paid this day in Toronto, by James Jones to John Smith.

8. Write out a Note for \$:00.00, payable in 10 months, @ 8 per cent. per annum, to Dr. A. from Mr. B.

NATURAL PHILOSOPHY.

FIRST AND SECOND DIVISIONS.

- 1. Define any three of the properties of matter, one of which must be an essential property of matter.
- 2. Explain clearly what is meant by the (1) centre of gravity of a body, and by specific gravity.
 - (2) A cylindrical pillar of white marble, 12 feet long, diameter 16 inches, sp. gr. 2.84. Find the weight of it in pounds.
- 3. Required the force to put the pillar in question 2 into a waggon, the bottom of which is 4 ft. 6 in. above the ground, on a plank 10 ft. long (assuming that there is no friction.)
 - 4. Classify levers, giving an example of each class.

HYGIENE.

FIRST AND SECOND DIVISIONS.

- 1. What are muscles? How many distinct muscles are there in the human body?
- 2. Name three principal uses of the bones; how many bones are found in the adult human being?
- 3. What useful purposes are served in the spinal column not being straight, nor all in one piece?

- 4. Tell where the Cranial Nerves are to be found, also the Spinal Nerves; how many pairs of each are there?
- 5. Through what vessels does the blood flow? Name the two great arteries; tell the difference between arterial and venous blood.
- 6. Why should our dwellings receive much fresh air and sunlight?
- 7. Name as many as you can of the most common causes for producing ill-health?

MUSIC.

FIRST AND SECOND DIVISIONS.

- 1. Distinguish between Melody and Harmony.
- 2. How many notes (or sounds) in the ordinary or Diatonic scale? Where do the semitones occur?
 - 3. What is the object of Sharps and Flats?
 - 4. What is a Chromatic scale?
- 5. Write down the different characters called notes, and compare them in regard to their duration.
 - 6. What is the signature when the key note is 1st D, 2nd A?
- 7. What is the key note when there are 1st two flats in the signature, 2nd two sharps?
- 8. Draw a staff; on it place the treble clef, and one sharp in the signature. Write the key note (a semibreve) on the staff, also two minims, each of which shall form a common chord with the

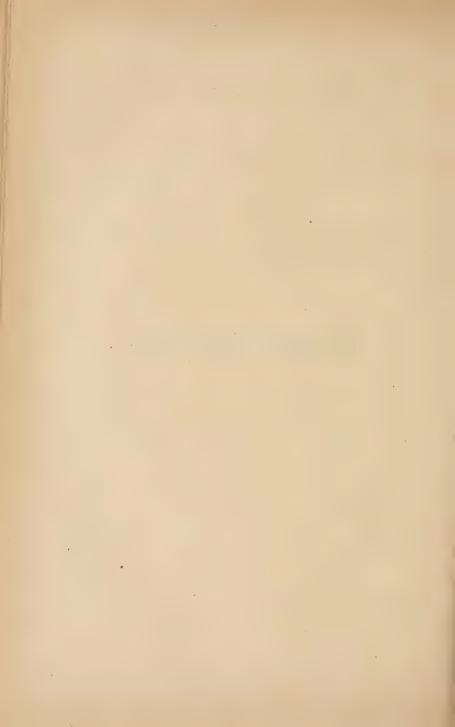

key note. Draw a bar after the first and third note. Next place a crotchet on the second space and a minim on the second space above the staff. Fill out this last measure with a rest, and draw another bar. Place a dotted minim on the first space and a note on the first ledger line below to fill out the measure. Close with the proper kind of bar and some mark to show that the strain is to be repeated. Attach to each note the letter and syllable by which it is known.

In the music you have just written what is the interval between the first and third notes and that between the fourth and fifth?

THIRD AND FOURTH DIVISIONS.

- 1. Define Bar, Slur, Ledger Line.
- 2. What is the use of Sharps and Flats?
- 3. How many notes in a Diatonic scale? Where do the semitones occur?
 - 4. Name the notes, first by letters, second by syllables.
- 5. What is the key note when there is neither sharp nor flat in the signature? When there are two sharps? When there is one flat?
 - 6. When the key note is G, what is the signature?
- 7. If there are two minims or their equivalent in a measure, what mark should be put at the beginning of the staff to indicate the time?
- 9. Name the notes which, when sounded together, produce full chords.

Pinancial Statements.

Financial Statements.

Unspector's Junual Report.

INSPECTOR'S ANNUAL REPORT.

To the Board of Public School Trustees of the City of Toronto:

In accordance with a Resolution of your honorable Board, I respectfully submit the twenty-third Annual Report of the Schools under your charge.

Appended to the Report will be found Statistical Tables which give in detail all important particulars relating to teachers, pupils, attendance, absenteeeism, tardiness, studies pursued, cost of maintenance, &c.

ATTENDANCE.

The total number of pupils registered during the year was 13.631.

The average daily attendance was 8,845. Last year it was 8,409.

662 pupils attend school less than 20 days.

| 1465 | 4.6 | 6.6 | 6.6 | between | n 20 | and | 50 | days |
|------|-----|-----|-----|---------|------|-----|-----|------|
| 2938 | 6.6 | 6.6 | 6.6 | 6.6 | 50 | 66 | 100 | |
| 2308 | 4.6 | | | 4.6 | 100 | 66 | 150 | 661 |
| 6258 | 6.6 | 4.4 | 4.4 | | 150 | | 200 | * * |

The number who attended school for over 100 days is 8,566, or 63 per cent. of the total registered number.

The most correct idea of the relation of the Average to the Registered Attendance is obtained by comparing the average of Monthly Averages with the average of Monthly Registered Numbers.

The average of Monthly Registered Numbers was 9,874 This shows an increase compared with last year of 553. (See Table A.)

The average of Monthly Average Numbers was 8,802. This shows an increase of 393 when compared with the corresponding number of last year. (See Table B.

The average of Monthly Averages was 89.2 per cent, of the average of Monthly Registered Numbers.

The best average for any month in the year was 91 the average for December.

The largest number was registered in October, and the smallest number in July. The attendance in July was 1,038 less than in any other month, and 1,523 less than the average. This clearly shows that a large number of parents fully realize, the disadvantages of having their children in close school-rooms during the hot weather.

The comparatively large number who attend school for less than 100 days can be easily accounted for, when it is remembered that most of the scholars who leave school do so at the close of the first term. The report would appear more favorable if the year closed in July instead of December.

The following statement shows the Average Registered Number in each School during the year:—

| Sci | HOOLS. | Average Registered No. | No. of Teachers. | Average per Teacher |
|---------------|--------|---------------------------|---------------------|------------------------|
| Dufferin | | 600 | 12 | 50 |
| Wellesley | | 835 | 16 | 52 |
| Ryerson | | 552 | 12 | 46 |
| Phœbe Street | | 664 | 12 | 56 |

| Girls' " | | 45 | 1 | 45 |
| Orphans' Home | e | 90 | 1 | 90 |
| Centre Street | | 67 | 1 | 67 |

LATENESS.

The improvement in the punctuality of the pupils has continued during 1882. Both parents and pupils in nearly every part of the city seem to be fully alive to the importance of acquiring the habit of promptness. The total number of cases of lateness in the whole year amounts to about one-half the registered number of pupils.

The following table shows the number of cases during the past eight years.

| Date. | Average | Cases of |
|-------|---------------------|-----------|
| | ${\bf Attendance}.$ | Lateness. |
| 1874 | 4,8I4 | 69,456 |
| 1875 | 6,386 | 65,364 |
| 1876 | 5,976 | 31,486 |
| 1877 | 6,860 | 15,272 |
| 1878 | 7,467 | 7,474 |
| 1879 | 8,144 | 6,615 |
| 1880 | 8,215 | 5,967 |
| 1881 | 8,409 | 5,980 |
| 1882 | 8,845 | 6,735 |
| | | |

(See Table D.)

CERTIFICATES OF HONOR.

Certificates of Honor are awarded at the Christmas Vacation to such pupils only as have not been once absent or late, and whose conduct has been uniformly good, unless the absence or lateness shall have been occasioned by sickness of not more than three weeks' continuance, to be certified in writing by the pupils' parents or guardians.

These Certificates are of two grades, and named respectively. First Honor Certificates and Second Honor Certificates.

The First Honor ('ertificates are awarded to such pupils as have fulfilled the above condition for two consecutive sessions.

The Second Honor Certificates are awarded to such pupils as have conformed to the said rules for one session during the year. The following statement shows the number of Certificates given in the various schools at the close of 1882.

| Sch | ools. | First | Second | |
|-------------|--------|---------|--------|--------|
| | | Honor. | Honor. | Total. |
| Dufferin | | 154 | 152 | 306 |
| Wellesley | | 217 | 293 | 510 |
| Ryerson | | . 115 | 131 | 246 |
| Phœbe | Street | . 115 | 172 | 287 |
| John | 46 | . 98 | 141 | 239 |
| Victoria | " | . 74 | 116 | 190 |
| Winchester | ** | . 70 | 125 | 195 |
| Niagara | " | . 44 | 87 | 131 |
| Park | | . 62 | 104 | 166 |
| George | " | . 32 | 91 | 123 |
| Louisa | | . 35 | 81 | 116 |
| Bathurst | | . 56 | 134 | 190 |
| Palace | | . 12 | 23 | 35 |
| Parliament | | . 60 | 101 | 161 |
| Church | " | . 71 | 174 | 245 |
| Elizabeth | | 46 | 84 | 130 |
| York | ** | . 10 | 18 | 28 |
| Givins | | . 47 | 89 | 136 |
| Borden | " | . 37 | 68 | 105 |
| Leslieville | | . 11 | 26 | 37 |
| Hope | | . 58 | 91 | 149 |
| Brant | 46 | . 24 | 103 | 127 |
| | Total | . 1,448 | 2,404 | 3,852 |

It would, in my opinion, be advisable to vary the form and style of the certificates occasionally, as the same pupil often receives several of them during his course in school.

TEACHERS.

There were 176 Teachers in the employ of the Board at the close of the year, exclusive of the Special Teachers in Music and Drawing.

There are 24 Male and 152 Female Teachers employed.

They hold Certificates as follows:

| First Class | Provincial51 |
|-------------|------------------|
| First Class | County Board17 |
| Second Cla | ss Provincial108 |

Miss Phœbe Johnston, of Elizabeth Street School, succeeded in obtaining a Professional First Class Certificate, Grade C., at the Examinations held last July.

SCHOOL ACCOMMODATION.

During the year 1882, the following additions were made to the Schools: Givins and Wellesley Schools were each enlarged by the addition of four rooms; three rooms were added to Church Street School, and two rooms to Bathurst Street School.

NIGHT SCHOOLS.

The total number registered during the term in each School was as follows:—

| Schools. | Males. | Females. | Total. |
|-------------------|--------|----------|--------|
| Parliament Street | 149 | 55 | 204 |
| Elizabeth Street | 111 | 52 | 163 |
| Niagara Street | 141 | 45 | 186 |
| Bathurst Street | 111 | 46 | 157 |
| Winchester Street | 53 | 29 | 82 |
| Louisa Street | 70 | | 70 |
| | | | |
| Total | 635 | 227 | 862 |

The average attendance for the entire term was:-

| Schools. | Males. | Females. | Total. |
|-------------------|--------|----------|--------|
| Parliament Street | 52 | 28 | 80 |
| Elizabeth Street | 41 | 18 | 59 |
| Niagara Street | 43 | 20 | 63 |
| Bathurst Street | 37 | 20 | 57 |
| Winchester Street | 16 | 13 | 29 |
| Louisa Street | 22 | | 21 |
| | | | |
| Total | 211 | 99 | 310 |

The attendance till Christmas was very good indeed, being 327 males and 129 females; total, 456.

The average attendance for March alone was as follows:

| | | | - |
|-------------------|--------|----------|--------|
| Schools. | Males. | Females. | Total. |
| Parliament Street | . 36 | 22 | 58 |
| Elizabeth Street | . 29 | 15 | 44 |
| Niagara Street | . 22 | 15 | 37 |
| Bathurst Street | . 19 | 18 | 37 |
| Winchester Street | . 8 | 9 | 17 |
| Louisa Street | . 8 | • • | 8 |
| Total | . 122 | 79 | 201 |

I respectfully make the following suggestions regarding the Night Schools in the future:

- 1. The attendance was small after the Christmas holidays, and I would recommend that in future the Assistant Masters be engaged only during November and December, unless the attendance during January and February should be larger and more regular than in the past.
- 2. There can be no doubt that several of the Teachers engaged in the Night Schools during the past term have been exceedingly

good Teachers, possessed of high natural and large acquired ability, but I am so strongly impressed with the conviction that improvements could be made in some instances, as to feel it my duty to recommend that some of the Teachers in the Day-Schools be employed also in the Night Schools in future. The Board might still retain the services of those who have given satisfaction in the Night Schools during the past. The success or failure of the Night Schools depends almost entirely on the Teachers, and those teachers who are accustomed to the management of city pupils are more likely to succeed in our Night Schools than those who are without such experience. The regular teachers are more certain to be mentally in the condition favorable to teaching, than those who are chiefly occupied in some other pursuit, and are less likely to leave the service of the Board during the term.

3. Experience convinces me more thoroughly that the recommendation which I made last year, regarding the propriety of requiring a deposit from all students on entering the Night Schools, should be adopted by the Board. The sum of one dollar need not deter any student, who is in earnest, from attending School, when he knows that the money will be returned to him at the end of each month, if his conduct and attendance have been satisfactory, to be re-deposited in case he intends to continue at the School. I believe that this is the best possible remedy for the worst evil everywhere met with in conducting Night Schools, viz.: irregularity of attendance. It would prevent any but earnest students from entering the Schools, and would perhaps save the necessity for supplying Assistant Masters in some cases. and it would prevent disorderly conduct on the part of those who now only attend for fun, but who by their misconduct prevent the teachers from giving proper attention to those who desire to learn.

THE KINDERGARTEN.

For some years considerable attention has been devoted the Kindergarten in Toronto. So far as was possible, the principles of the Kindergarten have been incorporated with the teaching in the primary classes, and intelligent people of all classes have become much interested in the subject. The necessity of introducing the Kindergarten as the true foundation for a system of Public School education, was also brought to the attention of the Hon. Minister of Education by a resolution passed unanimously by the Provincial teachers' Association, which urged him to have a Kindergartner appointed to conduct a class for the benefit of the students attending the Normal School.

With a view to the accomplishment of this desirable object, the Minister of Education requested the Public School Inspector of Toronto to visit the City of St. Louis, for the purpose of reporting on the practical working of the Kindergarten in connection with the Public Schools of that city. The Public School Board of Toronto appointed one of its members, Mr. E. P. Roden, to accompany the representative of the Education Department. The following report was presented on the return of the deputation:

TORONTO, May 3rd, 1881.

To the Public School Board of the City of Toronto:

GENTLEMEN:

We have the honor to report that in accordance with a resolution of the Board we visited St. Louis for the purpose of making an examination into the practical working of the Public Kindergartens of that city, After a most careful investigation we beg leave to submit the following Report, including:

(1.) A brief statement of the aims of the Kindergarten.

- (2.) The introduction and progress of the Kindergarten in St. Louis.
- (3.) Suggestions regarding its introduction in connection with the Toronto Schools.

1 .- OBJECTS OF THE KINDERGARTEN.

The objects of the Kindergarten may best be briefly stated in the words of its illustrious founder, Froebel. "To take the oversight of children before they are ready for School life; to exert an influence over their whole being in correspondence with its nature; to strengthen their bodily powers; to exercise their senses; to employ the awakening mind; to make them thoroughly acquainted with the world of nature and of man; to guide their heart and soul in a right direction, and to lead them to the Origin of all life, and union with Him."

We have become so accustomed to regard the function of the School as limited to the cultivation of the intellect alone, that it is difficult to form a just estimate of the real value of a system which trains and develops the entire being, morally, mentally, physically and socially. It will be quite impossible to give an explanation in detail of the methods employed in the Kindergarten to accomplish the work outlined by Froebel. It took him thirty years of constant study to complete his system, and it requires at least a two year's course to become a proficient Kindergartener. It may be of service to state also, that the Kindergarten is not a School in the ordinary acceptance of that word. It is not a place to teach reading, writing, etc., but consists chiefly of practice with Gifts, balls of different colors, cubes, spheres, cylinders, squares, triangles, etc.; Occupations, drawing, paper mats, cutting and pasting paper patterns, paper folding, interlacing, stick work, slat work, peas work, moulding with clay, perforating paper, worsted work, drawing, etc., Games, Plays

and Exercise Songs. By means of these elements Froebel arranged a system which reaches effectively every part of the nature of the child, and promotes its vigorous and healthful growth.

MORAL TRAINING.

'If Froebel had designed to accomplish nothing more by the Kindergarten than the development of the moral and religious instincts of childhood, his work would ultimately become an essential part of all national systems of education. There is no other part of his system that to the thoughtful mind so clearly reveals the comprehensiveness and philosophic basis of his methods, and the wonderful adaption to the nature of the child and the laws of its growth. Every one of his remarkable songs, every one of his stories, every one of his games and every one of his occupations gives incidentally a practical direction to the moral natures of the children. There is in the Kindergarten no sermonizing to the children who are not listening, no theorizing about abstractions which they cannot understand, no weak sentimentality, but a genuine acting out of the best tendencies of human nature. The child is made to occupy in a way that is real to him every relationship to nature, the family, society, his country and his Creator. He practises in his games and plays those virtues which form the only sure foundations for the family and the State. He acts submissively to his parents, lovingly towards his brothers and sisters, honorably to his neighbors, kindly to the poor, and tenderly to the aged. He learns to be grateful for benefits, to respect honest workers, to know that work is an advantage to the individual and the community, to acknowledge that labour should be justly rewarded, to destroy nothing, to waste nothing, to submit to constituted municipal and national authorities, to give hearty approval to good actions, and to look with just indignation on mean and ungenerous conduct, to restrain his evil tendencies, to be unselfish, to control his tastes

even when they are pure and good as he cannot get everything he desires, and to recognize God through his works as the Creator, and as the central power of the universe, the source of knowledge, of love and of blessing. It is quite impossible to realize without a close and extended examination of a genuine Kindergarten, how the child can be placed in such a variety of circumstances as to make it necessary for him to develop incidentally without a consciousness of the process, all the better parts of his nature, and to practise the correct moral code for the home, society and the State.

That Froebel was able after even thirty years incessant study to found a system which accomplishes this, proves conclusively that he is entitled to an honored place among educational reformers.

PHYSICAL CULTURE.

The physical benefits conferred by the Kindergarten are second in importance only to those resulting from its moral and religious training. The good effects of this department of Kindergarten work are so quickly apparent and so easily recognized that there is in some places a popular delusion that the Kindergarten consists only of a series of games and plays. This is a grave error; but although the games, plays and songs do not constitute the entire work of a Kindergarten, they form a most important part of it, inasmuch as while accomplishing many other excellent results, they also produce most desirable effects on the physical systems of the children. The chief of these effects are:

- 1. By a large amount of marching in time with music they learn to walk properly, a most important accomplishment.
- 2. As the plays are so judiciously arranged as to call into natural action every part of the muscular system, the result could only be what it uniformly is, harmonious development

and consequently perfect freedom and gracefulness of action. There is no probability that a child in the Kindergarten will grow up with good arms and legs, and weak loins and contracted chest.

- 3. The dramatic gesture practised as a visible interpretation of the thought and sentiment of the songs, while they are being sung, leads to a surprising degree of expressiveness and appropriateness in the movement of the hands, the head, the eyes and indeed the entire body while speaking. This is of more importance than at first sight it may appear to be. The skilled elocutionist may thrill his hearers by his tones alone. Vast audiences are frequently moved to tears by the touching gestures of a deaf mute in reciting the Lord's Prayer. Most people are more deeply affected in a Kindergarten by the gestures than by the singing. Dramatic interpretation is to many more touching than vocal interpretation. Either voice or action alone possesses wondrous power of expression, but it is only when they are appropriately united, that thought is presented in all its clearness and feeling communicated with resistless power. It is no light matter then for girls and boys to have their bodies trained to act in harmony with their vocal organs in expressing their thoughts and sentiments.
- 4. The general health of children is improved and the vigorous growth of their systems promoted. One of the chief defects of the Public School System is that both positively and negatively it interferes with the proper natural growth of the child's body. If adequate attention were paid to the development of the body in school, there would be no complaints about over-study. Body and brain should grow together, do grow together until the child goes to School. The Kindergarten is unquestionably the best means of remedying this grave defect in the School. The distinctive features of Kindergarten exercise,

as well as of every other part of the system, is that the benefit comes incidentally. The children are not conscious that they are preforming calisthenic exercises for the benefit of their health: they are playing for pleasure. Exercise taken merely to improve the health does not bring such advantages as exercise taken for amusement, or in working under healthful circumstances; so in the Kindergarten there are no calisthenics as mere exercises, but the children have to preform the best exercises of the Grecian, Swedish and German systems of calisthenics in playing their games and when singing their songs. While taking his exercise the boy is not a boy moving his legs and arms to develop his muscles, but a hopping bird, a jumping frog, a flying butterfly, a carpenter, or other tradesman at work, a farmer mowing, or threshing with a flail, or sowing grain, a windmill in motion, a ticking clock, etc., etc., always practising the best exercises but never being drilled.

Even the extension motions and balance steps of the Britisharmy are practised in their essential parts in the Kindergarten, not in the unattractive way in which they are presented to the shuffling recruits whom they transform, as if by magic, into erect and graceful men, but as necessary motions in preforming certain plays.

MENTAL TRAINING.

Those who can only gauge a child's mental growth by his advancement in reading will have difficulty in appreciating the mental advantages which a child enjoys in a Kindergarten. Thoughtful people are rapidly learning, however, that reading as a school study has very little to do with mental growth, in fact as usually taught, its tendency is to produce mental confusion and dullness. Reading is not taught in the Kindergarten.

There are some who put on their investigating spectacles and

scrutinize the Kindergarten system to find its mental results, as though they expected them all to be immediately apparent, and then, because they cannot find mind nuggets in the only form which they are capable of appreciating, they say they do not exist, and that the Kindergarten does not promote mental development. They forget that real growth in nature is slow, and that the preliminary processes of growth may go on for long periods without producing marked effects. If the mental training of the Kindergarten produced only immediate results, and if the benefits were discernible to every observer, it would not contain sufficient philosophical truth to make it live.

The object of the Kindergarten is to expand the mind rather than to make it a storehouse of facts. It aims to set the mind in action in the exercise of every function of which it is capable. The School only attempts to train the mind to remember and reason, often only to remember. The Kindergarten calls into play all the powers of the mind, and teaches the child to observe critically to note results, to compare, to conclude for itself. It develops the imagination, and gradually the will, not accidentally but incidentally, as an essential part of Froebel's comprehensive scheme. Memory is developed by exercise, not by word repetition; the child learns and remembers what a cube is in the same way as it learns and remembers what a spoon is, by using it. But while the primary object of the Kindergarten mental training is not to give information, the child really acquires a vast deal of useful knowledge, especially such as will be of value to him in prosecuting the studies of arithmetic, mensuration, geometry and architectural and industrial drawing. Nor does he need to wait until he begins the systematic study of these subjects before making a practical use of the knowledge he gains. Two of the fundamental rules in acquiring knowledge by Froebel's system are: (1) Children learn by doing; (2) Knowledge should be applied as soon as learned. So the extensive knowledge of form which the child receives by using his gifts is applied at once in the various occupations, and through them to an extended examination of all the objects of nature and art with which he daily comes in contact.

The child also receives a practical insight into the relationship of parts to wholes, and is taught the harmony of form and color that must be found in corresponding parts of symmetrical objects and designs. This leads to the display of originality by the individual children, which cannot fail to produce great and lasting benefit both mentally and morally. It is a grand step in the growth of a human mind, when it is convinced that it possesses original power, and need not be a mere imitator.

INDUSTRIAL TRAINING.

There is another kind of physical training in addition to that which trains the physique. It is not alone important to a man's well-being that he should be strong, active and graceful; his hands, the part of his physical system which he chiefly uses in earning his livelihood, should be trained while he is very young, before his muscles have become fixed and his fingers stiff. There is scarcely any limit to the development of finger flexibility and manual dexterity if it is begun in time and continund systematically. It is a common saying that "a boy's fingers are all thumbs." There is no reason why this should be the case. A girl's fingers are expert in proportion to the amount of appropriate exercise they get. The boy does not usually play on the piano, or do the various kinds of needle-work done by his sister, consequently his fingers become thumbs through lack of practice. The boys have thus been allowed to grow up and enter on the work of life without having any attention paid to the development of hand-skill, except what they receive when writing and drawing. This necessarily prevents their ever reaching their highest possibilities in skilled labor of any kind whatever. The individual and national loss thus sustained are too vast to be estimated. The early recognition of this lack in Germany, Switzerland and France, led to the establishment in these countries of technical Schools for the special training of the hand in connection with various industrial pursuits. The result of this was that in a few years England found her manufacturing supremacy passing away, and was compelled to follow the example of her continental rivals. Thoughtful men have for years been studying this problem, and endeavouring to find a remedy for this acknowledged defect in our Public Schools. This study has led to the proposal to have work-shop Schools founded as a part of the Public School System. There has, as yet, however, been no satisfactory plan proposed for the accomplishment of this object. A more simple and practicable proposition is to have the boys in the junior classes do the same needle-work as the girls in School. This has been tried in Boston, and the new educational Code recently passed by the British Parliament makes it compulsory in the primary departments of the Public Schools. So far as I can learn Toronto was two years ahead of any other place in this matter.

Froebel made ample provision for the training of the hand in his system. One of the specific objects in his "finger songs," and in every one of the gifts and occupations is the development of dexterous finger power.

Social Training.

Closely allied with moral training is the attention constantly paid to the practice of the courtesies of good society. The home in most cases can not afford the child the opportunity of associating with a sufficient number of children of his own age to permit the expansion of his social nature. The child needs suitable society and unless he gets it, important elements of his character make but a feeble growth. The child is to be pitied, however rich may be his parents, whose only associates are adults. It is possible for a child to obtain society on the street, but the risk is too great there. Even at School the social intercourse among the pupils is necessarily confined chiefly to the recesses, and then in most cases, is allowed to go on without the presence of the teacher. Froebel saw the evil effect of this and made ample provision for the drawing out of the social instincts of childhood, as well as for practising the recognized rules of politeness at the table, in the drawing room, on the street, wherever man meets his fellow-men.

GENERAL ADVANTAGES.

In addition to what has already been said, it will be sufficient to call attention to the important fact that in his gifts and occupations, Froebel has so completely covered the circle of human activities that every child has an opportunity afforded him in the Kindergarten to show what his special tendency or talent is. The importance of this will be seen at once when it is remembered that most boys leave School without having discovered or shown special fitness or inclination for any particular pursuit, and that too often the selection of a sphere of labor is left to chance, or decided by circumstances quite outside of the individual who is to fill it.

The general scope of the Kindergarten may be indicated in a single sentence. Recognizing the fact that children grow more rapidly morally, mentally, and physically during the first four years of their lives than they ever do afterwards, Froebel tried to found a system which, while it sustained the interested attention of children, would continue in a systematic manner, but

without formalism, the same methods of learning and development to which they were accustomed at home.

II. THE INTRODUCTION AND PROGRESS OF THE KINDERGARTEN IN St. Louis.

In 1872, Dr. Harris, then Superintendent of Public Schools in St. Louis, who has long been recognized as one of the most philosophical of living American educators, said in his annual report, "A genuine Kindergarten, as an experiment, would furnish additional hints to our teachers and suggestions to the Board, enough to doubly repay the cost of its support."

In 1873, Miss Susan E. Blow, the accomplished daughter of the late Senator Blow, who had spent two years in training with Mrs. Kraus Boelte, of New York, offered to undertake gratuitously the instruction of one teacher appointed by the Board, and to supervise and manage a Kindergarten, provided the Board would furnish the rooms and a salaried teacher.

On the 26th of August, 1873, the Teachers' Committee of the Public School Board recommended that one of the school-rooms be set apart for one year "for the purpose of ascertaining by a faithful experiment what valuable features the Kindergarten may have, that can be utilized in our primary schools." The results of that faithful experiment have been greater than even the strongest advocates of the Kindergarten expected. The one Kindergarten has by a natural and gradual process of growth, extended its influence and diffused its light until at the present time there are no less than 237 ladies engaged in the Public Kindergartens of St. Louis. Even this number does not fairly indicate the popularity of the system, as the demand for more Kindergartens can not be met owing to the unavoidable scarcity of competent Kindergartens.

The following table shows the development of the Kindergartens in St. Louis, from 1873.

| Year. | Kindergartens. | Teachers |
|-------|----------------|----------|
| 1874 | 1 | 4 |
| 1875 | : 4 | 17 |
| 1876 | 12 | 50 |
| 1877 | 30 | 182 |
| 1878 | 40 | 189 |
| 1879 | 53 | 196 |

There are at present over 60 Kindergartens, with 237 ladies in charge of nearly 5,000 children.

Each Kindergarten continues in session during one-half of each day, and in some of the Kindergartens there is an afternoon as well as a forenoon class.

Each Kindergarten has a director and a number of assistants, varying in proportion to the number of pupils. Some Directors teach all day and some only for half of each day.

The salary of an all-day Director is \$600.00 per annum; of a half-day Director, \$350. The assistants are classified into paid assistants, 1st and 2nd class, and volunteer assistants. The 1st class assistants receive \$150 a year, and 2nd class assistants \$100. Volunteer assistants work in order to have the advantage of learning the system.

In many cases the pupils who attend the Kindergarten in the forenoon attend the Public School in the afternoon, and vice versa.

The cost of all the materials used by the pupils is less than 50 cents per quarter for each pupil.

A Director with five assistants can fairly take charge of 100 children.

The pupils remain in the Kindergarten for two years, or till they are seven years old.

III. SUGGESTIONS REGARDING THE INTRODUCTION OF THE KINDERGARTEN IN TORONTO.

Your Committee, after mature deliberation, strongly recommend the introduction of the Kindergarten in connection with the Public School system of Toronto. They do this for the following reasons:

- 1. They are fully convinced that the Kindergarten is the most philosophical system of child education, and that it should therefore be the foundation of all Public School education.
- 2. They have no doubt that the influence of the Kindergarten would be most beneficial upon all the teachers in our Schools, as it is based on sound pedagogical principles, and could not fail to be a source of light and inspiration to all who had an opportunity of becoming acquainted practically with its methods and spirit.
- 3. They believe that it would prove an invaluable aid in the thorough training of the young ladies who attend the City Model School.
- 4. The circumstances in Toronto are more favourable to the successful introduction of the Kindergarten, and especially of its organic connection with the primary classes in the Public Schools, than in St. Louis. There is a painful tendency on the part of many of the primary teachers in St. Louis, to show jealousy of, rather than sympathy with, the Kindergartners. This would not be the case in Toronto, as the primary teachers have long shown

a commendable desire to introduce into their classes the true spirit of the Kindergarten, and as many of its methods as was possible for them under their circumstances.

It will be absolutely necessary, however, to proceed carefully and slowly in introducing the Kindergarten.

It is impossible to obtain many ladies who are competent to exhibit the practical work of a Kindergarten, and also explain to others the underlying philosophy upon which it rests, and the inter-dependence of the various departments on each other. To be satisfied with anything less than the genuine Kindergarten in spirit as well as outward form would be misleading, and might delay true progress in our primary departments for at least one school generation.

After thoughtfully looking at the various possible methods of introduction, your Committee recommend:

1. That as a preliminary step, Miss Susan E. Blow be invited to visit Toronto, accompanied by Mrs. Clara Beeson Hubbard, Director of the Ead's Kindergarten. Your Committee have reason to believe that these ladies would be willing to visit Toronto, if by doing so they could in any way advance the Kindergarten cause. That their visit would have such an effect is beyond a doubt. Miss Blow could explain in a few addresses the principles and methods of the Kindergarten, as probably no other English speaking woman could; as in addition to her training in New York, and her eleven years' experience in St. Louis, she has studied the system in Germany with the Baroness Marenholtz Bulow, the most distinguished of Froebel's associate workers. Mrs. Hubbard trains all the St. Louis Kindergarten teachers in the department of physical exercise. She is the author of the best collection of Kindergarten songs published, and is gifted with rare intuitions regarding gesture and calisthenics. She could, in a couple of weeks, present the physical and musical sides of the Kindergarten to our primary teachers, so thoroughly as to revolutionize the work at present done in our Schools in these departments.

2. That as soon as possible one first-class all-day Kindergartner be secured, capable of training those in Toronto who might wish to become Kindergartners. She might conduct one Kindergarten in the eastern part of the city in the morning, and another in the western part in the afternoon. The growth of the work would then be gradual, and would extend under the supervision of the Board. No experiment would be tried on a large scale, so that any possible failure would not materially effect the success of our general system. The apparent delay which this course would cause at the beginning would be more than atoned for in the more satisfactory advancement which must necessarily follow. Your Committee regard it as essential that we should train our own Directors.

In closing their Report your Committee desire to express their deep sense of gratitude to Miss Blow and her associate supervisors of Kindergartens, Miss Dozier and Miss Fisher, for their unremitting attention and for the ready and clear explanations concerning the various departments of their work; as well as their appreciation of the kindness of Mrs. Hubbard, Miss Hart and Miss McCullough, the directors of the Kindergartens in which most time was spent. It is also a pleasure to report that Superintendent Long, Assistant Superintendent Foster, and the Secretary, spared no pains to add to the interest of the visit of your Committee.

Respectfully submitted,

JAMES L. HUGHES. E. P. RODEN.

In accordance with the recommendations contained in this report the Public School Board in conjunction with the Education department extended an invitation to Miss Blow and Mrs. Hubbard to pay a visit to Toronto. The invitation was cheerfully accepted, and the results of the visit of these ladies were highly satisfactory. An intense interest was shown by the public in Miss Blow's instructive lectures, and the practical instruction given by Mrs. Hubbard during her stay of two weeks was of great value to the teachers of the primary classes in the Public Schools, and to the students of the Normal School. While Miss Blow was in the city, the Minister of Education and the Public School Board agreed to work together in regard to the introduction of the Kindergarten in Toronto. They at once secured the services of Miss Ada Marean, a well-trained and experienced Kindergartner, a graduade of the training Institution of Mrs. Kraus Bælte of New York, and sent her to St. Louis to take a further course with Miss Blow and her able assistants. It is the intention to open one genuine Kindergarten class in connection with Toronto Public Schools in September, 1883, and to gradually change the lowest primary grades throughout the city into Kindergartens, under the supervision of Miss Marean.

PHYSICAL EXERCISES.

The past year has been one of decided progress in this important department of School work. Not only in the subject of Drill, but in the more essential part of calisthenic exercises; there has been a marked improvement shown by the teachers in the interest they take in this part of their School duty. This is due largely to clearer convictions regarding the necessity for training the physical system, as a means of giving the rising generation better developed bodies, and for counteracting the injurious effects of long continuance at study. There is no

doubt, however, that the Public Competition in Drill and Calisthenic Exercises aided largely in increasing the interest in physical culture. The visit of Mrs. Hubbard and the exceedingly instructive lessons given by her in the songs and exercises of the Kindergarten also did much to awaken a spirit of enthusiasm in regard to the thorough training of the bodies of children. The object aimed at throughout the year has been to make the physical exercises in time with music an essential aid in discipline, and an agency in relieving the weariness of school routine and promoting the health of the scholars. Some teachers formerly objected that calisthenics took time that should be devoted to the more important subjects of Arithmetic, Grammar, &c., but there are few of the teachers in our Schools who do not now realize that working the brain constantly is the worst way to accomplish its largest possible amount of work. Pupils who work mentally fifty minutes per hour, and take proper physical exercise for the other ten minutes, will make much better progress, and enjoy much better health, than those who are kept plodding at their lessons hour after hour.

At the annual review and drill competition, before the midsummer holidays, the judges were Lt.-Col. Grassett, Major Gray and Major Foster. Over one thousand boys took part in the review. They came from the following schools: Ryerson, Dufferin, Wellesley, Phæbe, John, Park, Winchester, Victoria, Niagara, Louisa and George Street. Under the command of Captain Thompson, and led by their own officers, the boys performed a series of evolutions in a very excellent manner. The competition for the "Beaty Banner" was confined to the highest divisions in Wellesley, Ryerson and Dufferin Schools. After a thorough test, the judges awarded the banner to the Wellesley School for the second time. Every boy in the winning company was presented with a silver badge, to commemorate the success of his company, by Walter S, Lee, Esq., and John Hallam, Esq.

The competition for the marble clock, presented by Robert Hay, M.P., for the class showing the greatest proficiency in calisthenic exercises, was a most interesting event. The movements were executed with precision and gracefulness, and the prizes were awarded as follows: (1) Senior Fourth Book Class, Girls, Dufferin School; (2) Junior Fourth Book Class, Girls, Phæbe Street School; and (3) Junior Second Book, Girls, Phæbe St. School. The judges in this competition were Serjeant Dearnally, Instructor in the Normal and Model Schools, and Adjutant Manly.

CITY MODEL SCHOOL.

The opening of a Model School for the preliminary training of those who are to be teachers in our Public Schools was a most important step. The young ladies who graduate from our Public Schools and who intend to become teachers, are now enabled to do so without leaving home; and the teachers who enter the service of the Board in future will, in most cases, be able to enter upon their duties thoroughly acquainted with the methods of teaching and management practised in our schools.

The young ladies who graduated from the City Model School at the close of its first year were: Miss Henrietta Berney, Miss J. Bradshaw, Miss Agnes Copland, Miss Martha Fortune, Miss Maggie Kettles, Miss Lulu Palmer, Miss Mamie Sturrock, and Miss Maggie D. Young.

With the exception of Miss Copland, these young ladies have all obtained professional second-class certificates, and I have the fullest confidence in strongly recommending the Board to engage them as teachers in our junior classes in preference to even first-class teachers who have not been trained in the city.

TORONTO TEACHERS' ASSOCIATION.

The Association met as required by law, on the 24th and 25th of February, and 27 and 28th of October, in Wellesley School.

PROGRAMME.

FRIDAY, FEBRUARY 24TH.

- 9-9.5. Calling Roll of Teachers.
- 9.5—10.30. Discussion on Reading as contained in Park's Manual of Method.
- 10.30—10.45. Reading, by Miss J. Anderson; and Recess.
 - 10.45—12. The Moral Power and Duty of Teachers—Mr. R. Lewis.
 - 2-2.45. Lesson in Hygiene to a class-Mr.W.Cassidy.
 - 2.45-3. Reading by Miss B. M. Wallace; and Recess.
 - 3-3.45. Lesson in History to a Class-Mr. S. McAllister.
 - 3.45—4. Song taught to Convention—Mrs. G. Riches.
 - 4—5. Competitive Examinations and Prize Giving—Mr. John Campbell.

SATURDAY, FEBRUARY 25TH.

- 9-9.5. Calling Roll of Teachers.
- 9.5—10.15. Election of Officers.
- 10.15—10.45 Class in Phonic Method of Teaching Reading— Miss M. Wilson.
 - 10.45—11. Recess.
 - 11—12. Discussion on Spelling, as contained in Park's Manual of Method.
 - 12. General Business.

A Conversazione was held in the Norman School Building on the Evening of Friday the 24th.

FRIDAY, OCTOBER 27th.

- 9-9.5. Calling Roll of Teachers.
- 9.5—10.30. Discussion of Park's Manual of Method. Spelling.—Mr. J. L. Clark.
- 10.40—11.10 Object Lesson.—Miss Agnes McIntyre.
 - 11.10—12. Testing Preparation of Lesson, and examining Class Work.—Mr. S. McAllister.
 - 2-2.45. General Business.
 - 2.50-3. Reading Miss L. S. Taylor.
 - 3-4. Spelling Reform.-Mr. W. Houston, M.A.
 - 4-4.30. Calisthenics.-Miss I. V. STRAUBEL.
 - 4.30-5. Reports of Committees, and New Business.

SATURDAY, OCTOBER 28th.

- 9-9.5. Calling Roll of Teachers.
- 9.5—9.35. Short Hand in Public Schools.—Mr. R. Lewis.
- 9.35—9.45. Reading.—Miss C. G. Lewis.
- 9.50—10.45. Language Lesson, Second Book Class, Mr. G. K. Powell..
 - 11—12. New Provincial Programme.—Mr. R. W. Doan.
 - 12. Question Drawer—The Association—(Questions to be sent to the Secretary on or before first day of meeting.)

COMBINED EXAMINATION.

The following tables give the standing of the various divisions at the Combined Examinations.

FIRST DIVISION.

Twelve Pupils from each Division.

| Schools and Divisions. | Mathematics. | Grammar, Composition, and Hygiene. | History and Geography. | Reading, Spell- ing, and De- rivation. | Writing, Draw- ing, Music, & Bookkeeping. | Total. |
|--|--|--|--|--|---|---|
| Marks possible 1. Dufferin, Girls. 2. Wellesley, " 3. Ryerson, " 4. Wellesley, Boys. 5. Dufferin, " 6. Ryerson, " | 4140 2979 2978 2676 2692 2249 2465 | 2160 1690 1753 1587 1522 1591 1440 | 2400 1788 1864 1909 1535 1487 1656 | 1920 1561 1514 1480 1320 1407 1194 | 2010 1303 1193 1199 1170 1092 924 | $12630 \\ 9321 \\ 9302 \\ 8851 \\ 8239 \\ 7826 \\ 7679$ |

Dufferin, Girls advanced from No. 3, in 1881, to No. 1, in 1882. Wellesley, Boys "5, "4, "4, "

Dufferin, " " 6, " 5, " 5, "

SECOND DIVISION.

Ten Pupils from each Division.

| Schools and Divisions. | Mathematics. | Grammar, Composition, and Hygiene. | History and Geography. | Reading, Spelling, and Derivation. | Writing, Drawing, Music, & Bookkeeping. | Total. |
|------------------------|----------------------|------------------------------------|------------------------|------------------------------------|---|-------------------------|
| Marks possible | 3200 1308 1039 | 1800 1485 1369 | $2000 \\ 1159 \\ 1152$ | 1600 1307 1233 | 1670 929 805 | $10270 \\ 6188 \\ 5598$ |
| 3. Ryerson, " | 756 564 | 1325 1156 | 1015 687 | 1254 1204 | 795 633 | $5145 \\ 4244$ |
| 5. Wellesley, " | 580 681 | 1006 823 | 711 734 | 1039 1147 | 733 677 | 4069 4062 |

Wellesley, Girls advanced from No. 2, in 1881, to No. 1, in 1882. Wellesley, Boys "6, "5, "

THIRD DIVISION.

Ten Pupils from each Division.

| Schools and Divisions. | Arithmetic, Mensuration, and Algebra. | Grammar, Composition, and Hygiene. | History and Geography. | Reading, Spelling, and Derivation. | Writing, Drawing, Music, & Bookkeeping. | Total. |
|------------------------|---|------------------------------------|------------------------|------------------------------------|---|--------|
| Marks possible | 2000 | 1550 | 2000 | 1600 | 1420 | 8570 |
| 1. John Street, Girls | 992 | 1177 | 1149 | 893 | 862 | 5073 |
| 2. Dufferin, " | 729 | 1120 | 1004 | 1077 | 845 | 4775 |
| 3. Ryerson, " | 624 | 994 | 845 | 815 | 782 | 4060 |
| 4. Dufferin, Boys | 465 | 1117 | 958 | 764 | 686 | 3990 |
| 5. Ryerson, " | 513 | 759 | 827 | 822 | 590 | 3511 |

John Street, Girls advanced from No. 2, in 1881, to No. 1, in 1882.

Dufferin, " " 3, " 2, "

Ryerson, " " 5, " 3, "

FOURTH DIVISION.

Five Pupils from each Division.

| | Schools and Divisions. | Arithmetic. | Grammar, Composition, and Hygiene. | History and Geography. | Reading, Spelling and Derivation. | Writing, Drawing & Music. | TOTAL. |
|-----|------------------------|-------------|------------------------------------|------------------------|-----------------------------------|---------------------------|--------|
| | Marks possible | 750 | 775 | 1000 | 800 | 570 | 3895 |
| 1. | Wellesley, Girls | 565 | 629 | 745 | 577 | 418 | 2934 |
| | " Boys | 472 | 558 | 727 | 585 | 342 | 2684 |
| | Victoria Street, Girls | 307 | 523 | 436 | 554 | 377 | 2197 |
| 4. | Phœbe " " | 380 | 414 | 511 | 518 | 359 | 2182 |
| | Ryerson, Boys | 240 | 391 | 485 | 568 | 311 | 1995 |
| | Winchester Street | 230 | 317 | 523 | 481 | 422 | 1976 |
| 7. | Ryerson, Girls | 240 | 456 | 386 | 491 | 389 | 1962 |
| 8. | John Street | 253 | 419 | 380 | 509 | 350 | 1911 |
| 9. | Dufferin, Girls | 280 | 401 | 301 | 591 | 326 | 1899 |
| 10. | Victoria Street, Boys | 271 | 337 | 322 | 506 | 372 | 1808 |
| 11. | Dufferin, " | 210 | 364 | 323 | 609 | 298 | 1804 |
| 12. | Niagara Street | 260 | 357 | 407 | 420 | 358 | 1802 |
| 13. | Park | 240 | 290 | 283 | 492 | 355 | 1660 |

Victoria Street, Girls advanced from No. 11, in 1881, to No. 3, in 1882. Phœbe Street, 66 66 12. " " 4. Boys 6.6 9, 4.6 4.6 Ryerson, Winchester St., 6.6 6.6 6, 10, 6.6 Ryerson, Girls 8,

NUMBER OF PUPILS STUDYING THE VARIOUS SUB-JECTS DURING THE YEAR:

| First Reader | 6,690 |
|-------------------------|--------|
| Second Reader | 3,693 |
| Third " | 3,664 |
| Fourth " | 1,895 |
| Fifth " | 913 |
| Spelling | 15,400 |
| Writing | 14,872 |
| Arithmetic | 16,267 |
| Geography | 15,001 |
| Drawing | 15,096 |
| Vocal Music | 16,241 |
| Object Lessons | 11,470 |
| Grammar and Composition | 12,012 |
| Canadian History | 2,731 |
| English " | 1,754 |
| General " | 1,336 |
| Hygiene | 6,933 |
| Algebra | 1,421 |
| Natural Philosophy | 891 |
| Domestic Economy | 4,537 |
| Book-Keeping | 1,242 |
| Drill and Calisthenics | 14,323 |

The amount received during the year from the Government Grant was \$8,855. The whole amount set apart for Toronto was \$10,703.50. The Separate schools received \$1,801,50. The sum of \$10,703.50 is proportioned to Toronto, on the basis of its population, when compared with the other municipalities of the Province at the time of our last census. The sum is then divided between the Public and Separate schools, according to their average attendance. The amount received per pupil was over

one dollar. The sum changes every year, and becomes less (per pupil) as the average attendance increases.

PROGRESS OF THE PUBLIC SCHOOLS.

Table E gives a comparative statement of various items relating to the Schools since 1844. It will be seen by reference to it, that the increase in the attendance at our schools has been very rapid.

| In | 1862 | the average | registered | No. w | as 2,825, | the daily | attendance, | 2,183 |
|-----|------|-------------|------------|-------|-----------|-----------|-------------|-------|
| 6.6 | 1872 | 66 | 6.6 | b. b. | 5,100, | 4.6 | 6.6 | 4,070 |
| 4.4 | 1882 | 4.6 | 6.6 | 6.6 | 9,874, | 6.6 | 4. | 8,802 |

The Average Attendance has thus been more than doubled during the past ten years.

Respectfully submitted,

JAMES HUGHES,

Public School Inspector.

Statistical and Reference Tables.

Kxaminers' Meport.

REPORT

OF THE

Examiners in Regard to the Combined Examinations.

The Examiners have the honor to report that in the discharge of the duty entrusted to them by the Public School Board of Toronto, they examined, on the 22nd and 23rd June, the selected pupils sent up to them from those Public Schools in the city in which the more advanced pupils are taught. The Examination was conducted, with the exception of that for the Hallam medals, in the Dufferin and Ryerson Schools, and, as in former years, was throughout a written one. The number of pupils examined was 247; they belonged to the four highest divisions. It will be stated hereafter, how many of these pupils belonged to each division. As in former years, valuable assistance was rendered by the Inspector in making arrangements for the Examination, and by the Teachers of the Schools in which the examinations were conducted, in the distribution of papers and in the superintendence of the scholars while engaged in writing.

The Examiners beg to submit the following results as elicited by a careful comparison of the papers handed in to them:—

I. FOURTH DIVISION.

The pupils of this Division, the lowest of those taking part in the Combined Examinations, numbered 65. They were taken from the Fourth Divisions of the following schools: the Dufferin, the Ryerson, the Wellesley, and Victoria Street; ten from each school—five boys and five girls; Phæbe Street, Winchester Street, and Niagara Street, the Park, and John Street; five pupils from each school. These were examined in the following subjects: Reading, Spelling and Derivation, Writing, Arithmetic, History, Geography, Hygiene, Drawing, and Music. Embracing all the subjects of examination, the Girls' department in Wellesley School stands first, the Boys' department in the same school stands second, while the third and fourth places are taken by the Girls' department in Victoria Street School, and by the pupils from Phæbe Street School. The first and second places were taken by the same school last year; the third and fourth were then taken by the Dufferin School. The aggregate marks reached in this Division are higher than those attained last year.

The highest prizes in this, as in other Divisions, are given for General Proficiency; the holders of these are very properly excluded from the prizes for excellence in the separate branches of study included in the examination. The Examiners recommend the General Proficiency prizes to be awarded to the following:

- 1. Ethel Tennant, Wellesley School.
- 2. Edith Young, " "
- 3. Ella Jackes, " "
- 4. Sophia Cooper, Victoria Street School.

Taking the subjects of examination separately or in the groups into which they naturally fall, the Examiners find that in this division the highest marks in Arithmetic were gained by the Girls' department of Wellesley School, the Boys' department of the same school, and by the pupils of the Phœbe Street School; and in the order named, they find that in Grammar and Hygiene (which is grouped with Grammar in the allocation of prizes), the first and second places were taken by the Girls' department and by the Boys' department of the Wellesley School; the third and fourth by the Girls' department in the Victoria

Street and the Ryerson Schools. In History and Geography the same departments of the Wellesley School take the first and second places, while the pupils from Winchester Street and Phæbe Street Schools take the third and fourth. In Reading, Spelling and Derivation, the highest excellence is displayed by the Boys' department of the Dufferin School, while the Girls' department of the same school comes second. In Writing, Drawing and Music, the Girls' departments in the Wellesley, Winchester Street, and Ryerson Schools take the highest places, and in the order named.

As a whole the pupils in this division displayed what for their years must be regarded as very creditable attainments in the subjects of examination. The greatest diversity of attainment was exhibited in Arithmetic, History, and Geography.

In addition to the prizes for proficiency in all the branches, the Examiners recommend the following to be given in the branches named:

I. ARITHMETIC.

| 1 (| Alexander Cochrane, | Wellesley | School. |
|-----|--|-----------|---------|
| 1. | Alexander Cochrane, Lottie Clink, | 6.6 | 66 |
| (| Mina Hamilton, Phel | be Street | 6.6 |
| 3. | Mina Hamilton, Phel Ida Benson, Niagara | 6.6 | 6.6 |
| | Jemima Dawson, Pha | ebe " | 6.6 |
| | | | |

II. GRAMMAR AND HYGIENE.

- 1. Minnie Kincade, Victoria Street School.
- 2. Ernest Rugg, Wellesley
- 3. Hugh B. Sutherland, Wellesley "
- 4. Lottie Clink, "

III. HISTORY AND GEOGRAPHY.

- 1. Ernest Rugg, Wellesley School.
- 2. Frederick Leyden, " "
- 3. Hugh B. Sutherland, " "
- 4. Lottie Clink, " "

IV. READING, SPELLING, &C.

- 1. Hugh B. Sutherland, Wellesley School.
- 2. William Boustead, Dufferin "
- 3. Charles W. Patterson, "
- 4. Minnie Playter, " " " George Locke, Ryerson "

V. WRITING, DRAWING, AND MUSIC.

- 1. Lottie Clink, Wellesley School.
- 2. Bertrand Bradley, Victoria St. "
- 3. Minnie Kincade, """"
- 4. Maggie Holmes, Winchester " "

II. THIRD DIVISION.

Fifty pupils appeared for examination in this division; thirty from the Girls' department in the corresponding division of the Dufferin, the Ryerson, and the John St. Schools, and twenty from the Boys' department in the Dufferin and the Rverson Schools. They were examined in the same subjects as the Fourth Division, with Algebra and Book-keeping added. The first place was taken last year in this division by the Boys' department of the Dufferin School; this year it is taken by the Girls' department of the John Street School, followed by the same department of the Dufferin and the Ryerson Schools in the order named. The aggregate marks reached in this division this year was considerably lower than those reached last year; this may be due possibly to the greater difficulty of some of the papers. Coming to the separate branches in Mathematics, in Grammar and Hygiene, in History and Geography, the first place was taken by the Girls' department of the John Street School, the second place by the same department of the Dufferin School. Reading, Spelling and Derivation, and in Writing, Bookkeeping,

Music and Drawing, the first place was taken by the Girls' department in the Dufferin School, the second by the pupils from John Street. An approach to uniformity of excellence in this division was exhibited in the answers given in Grammar, History and Geography; the diversity of attainment was very marked in Arithmetic, Algebra, and Spelling and Derivation. The Examiners recommend the following prizes to be given in this division:

I. GENERAL PROFICIENCY.

| 1. Libbie Westman, John Street School. | 1. | Libbie | Westman. | John | Street | School. |
|--|----|--------|----------|------|--------|---------|
|--|----|--------|----------|------|--------|---------|

| 2. | Lulu | Martin. | . Dufferin | 6.6 |
|----|------|---------|------------|-----|

- 3. Fanny Sparling, John Street "
- 4. Mary Ristow, " "

II. MATHEMATICS.

- 1. Ellen Hogg, John Street School.
- 2. Ada Johnston, "
- 3. Mabel Copping, "
- 4. Rebecca Morrison, Dufferin

III. GRAMMAR AND COMPOSITION.

- 1. Arthur Tarriff, Dufferin School.
- 2. Mable Copping, John Street "
- 3. Katie Berkinshaw, Dufferin "
- 4. Howard Elliot, " "

IV. HISTORY AND GEOGRAPHY.

- 1. Rebecca Morrison, Dufferin School.
- 2. Ellen Hogg, John Street
- 3. Annie Hestor. "
- 4. Sarah Hunter, "

V. READING, SPELLING, ETC.

- 1. May Magson, Dufferin School.
- 2. { Katie Berkinshaw, " " " Violet Brodie, " "
- 3. Minnie Ward, "

VI. WRITING, BOOKKEEPING, MUSIC AND DRAWING.

- 1. Sarah Hunter, John Street School.
- 2. Rebecca Morrison, Dufferin "
- 3. Ella Anderson, Ryerson "
- 4. Mable Copping, John Street "

III. SECOND DIVISION.

Sixty pupils appeared for examination in this division; twenty from the corresponding division in each of the following Schools: The Dufferin, the Wellesley and the Ryerson, of whom ten were boys and ten girls. In addition to the branches already mentioned in which the pupils of the Third Division were examined, those in this division were subjected to an examination also in Euclid and in Natural Philosophy. Considering the ages of the pupils and extent of the programme, the result of the examination in this division may be regarded as on the whole satisfactory. The highest pupil gains 66 per cent. of the maximum number of marks; twenty-seven range from 50 per cent. upwards; a few fall below 40 per cent., some even below 30 per cent., showing a greater degree of inequality in attainment on the part of selected pupils in the same division than can be regarded as entirely satisfactory. Taking all the subjects into account, the first place is taken by the Girls' department of the Wellesley School, the second by the same department in the Dufferin School, and the third by the same department in the Ryerson School. In each of the separate subjects, or groups of

subjects, the Girls' department of the Wellesley School stands first, and, with the exception of reading and spelling, where the Girl's department of the Ryerson School stands second; the second place is held throughout by the same department in the Dufferin School.

The Examiners recommend that the following prizes be given:

I. GENERAL PROFICIENCY,

- 1. Nellie Chandler, Dufferin School.
- 2. Maggie Cowan, Wellesley "
- 3. Abbie Eccleston, "
- 4. Annie E. Henry, " "

II. MATHEMATICS.

66

- 1. Alfred Thorne, Ryerson School.
- 2. Ella Sheppard, Dufferin
- 3. Janet Douglas, "
- 4. Mina Matheson, Wellesley '

III. GRAMMAR, ETC.

- 1. Edith Littleford, Dufferin School.
- 2. Louisa Devlyn, Wellesley
- 3. Charles Jeffreys, Dufferin "
- 4. Agnes Byrne, " "

IV. READING AND SPELLING.

- 1. Louisa Devlyn, Wellesley School.
- 2. Wellington Ashbridge, Dufferin "
- 3. Margaret Hall, Ryerson "
- 4. James Breckenridge, "

V. WRITING, BOOKKEEPING, MUSIC, ETC.

- 1. Frederick Thorpe, Ryerson School.
- 2. Ella Adams, Wellesley "
- 3. Mina Matheson, " "
- 4. Kate Brennan, Ryerson "

VI. HISTORY AND GEOGRAPHY.

- 1. Alfred Mickle, Wellesley School.
- 2. Margaret Hall, Ryerson '
- 3. Charles Jeffrys, Dufferin "
- 4. Agnes Byrne, " "

IV. FIRST DIVISION.

In this, the highest Division, seventy-two pupils appeared for examination, twelve from each department of the corresponding Divisions in Dufferin, Wellesley and Ryerson Schools. branches in which the pupils were examined were the same as in the Second Division, though in most cases the ground covered was larger, and the questions more difficult. Nothing like the same degree of disparity in attainment was exhibited by the pupils in this division as in the lower ones. The highest aggregate marks are gained by the Girls' department in the Wellesley School. The same department in Dufferin School makes a close The other schools follow in the order named: The second. Girls' department in Ryerson, the Boys' department in Wellesley, the Boys' department in Dufferin, and the Boys' department in Ryerson. Coming to the separate branches of study, the first place was taken in Mathematics by the Girls' department in the Dufferin and Wellesley Schools; in Grammar by the Girls' department of the Wellesley School; in History and Geography by the Girls' department of the Ryerson School; in Reading and Spelling, and in Writing, Bookkeeping, Music, and Drawing, by the Girls' department of the Dufferin School.

The Medals given by John McDonald, Esq., to the two highest pupils in this division have been honorably won by Alice Baxter, of the Wellesley School, and Minnie Green, of the Dufferin School. These scholars came within 13 marks of each other in an aggregate of nearly 900.

In awarding Scholarships, the Examiners have been guided by what they understand to be the desire and resolution of the Board of the Collegiate Institute, which grants them, viz., that at least six of the twelve should be awarded to boys. Hitherto there has been no difficulty experienced in carrying out this resolution, as the twelve highest places have generally been pretty equally divided between boys and girls. This year, however, disregarding sex, ten of the twelve Scholarships would have gone to the girls. On these circumstances, and having regard to the desire of the Board of Trustees, the Examiners recommend six Scholarships to be awarded to boys in this division, and General Proficiency Prizes to be given to the four girls who would otherwise have taken scholarships.

With this necessary explanation, the Examiners recommend Scholarships and Prizes to be given as follows:

I. SCHOLARSHIPS.

| 1. | Alice Baxter, Wellesley | School |
|-----|---------------------------|--------|
| 2. | Minnie Green, Dufferin | 6.6 |
| 3. | Lizzie Riddel, Ryerson | 6.6 |
| 4. | Minnie Parks, Wellesley | 66 |
| 5. | Alice Smith, Ryerson | 6.6 |
| 6. | Margaret Gowans, Dufferin | 66 |
| 7. | Alexander Hunter, " | 66 |
| 8. | Albert Harboard, " | 6.6 |
| 9. | Joseph Leavy, Wellesley | 66 |
| 10. | David Sturrock, " | 66 |
| 11. | William Philips, " | 66 |
| 12. | Herbert Adams, " | 66 |

Frank Wells, Dufferin

Maggie Thompson, Ryerson

4.

Fifty-five took part in the examination on Canadian History and Geography, for the highest excellence in which the Hallam medals are awarded. The Competition was very close, several of the papers being nearly perfect. After much careful comparison of the answers, the Examiners report Fannie Hamilton, of the Dufferin School, and Annie Henry, of the Ryerson School, as the successful competitors.

They beg to report also that Alex. Hunter, of the Dufferin School, is entitled to receive the prize given by the Rev. Septimus Jones, for excellence in Reading.

In conclusion, the examiners beg respectfully to call the attention of the Board to a fact, observed by them before, but never in so marked a manner as in the examinations of this year, viz.: the great inequality in age and in the length of attendance in the Public Schools, of those pupils who are brought into competition with one another. This applies particularly to the boys in the divisions examined, who are made to compete with girls in very many cases their seniors, both in years and in school attendance. The cause is obvious. The boys as a class are taken from school at a much earlier age than the girls. The size of the division has to be maintained, and accordingly the boys have to be promoted from one division to another somewhat more rapidly than either their age or attainments would warrant. The result is that at the combined examinations many of the boys are subjected to a competition conspicuously unequal and to that extent unfair. This fact must in justice be borne in mind in taking account of the results reported by the Examiners. The Board will, no doubt, endeavor to find some means of rectifying, or, at least, mitigating the inequality.

JOHN M. KING, Chairman of Board of Examiners.
(Signed) ISAAC TOVELL,
A. McMURCHY,
J. ANDERSON.

PRIZE LIST-DRAWING.

Junior 10th.— Gotleib Von Almer.

Senior 10th.— John Fowler.

9th.-2. Arthur Knowles.

Kxamination Papers.

EXAMINATION PAPERS.

COMBINED EXAMINATION.

DICTATION AND DERIVATION.

FIRST DIVISION.

- 1. Write from Dictation the passage in the Fifth Reader, page 303, beginning "There are" and ending "in after ages."
- 2. Derive the following words, giving the meaning of the roots and where they occur, of the prefixes and affixes.

Pensive Granulate
Annual Frenzy
Disturb Panacea
Project Biology
Agnosticism Real
Ultramontane Moral

3. Give English words derived from Humus, Nihil and Tego.

DICTATION AND DERIVATION.

SECOND DIVISION.

1. Write from Dictation the passage in the Fifth Reader, page 121, beginning "Dew" and ending "hoar-frost."

2. Derive the following words, giving the meaning of the roots and where they occur, of the prefixes and affixes:

Insinuate Infant
Tractile Project
Canticle Monad
Modest Pyrometer
Religion Tripod

3. Give English words derived from Ignis and Nascor.

DICTATION AND DERIVATION.

- 1. Write a passage to be dictated in the class-room.
- 2. Derive the following words, and give the meaning, the roots, and when possible, of the prefixes and affixes.

Progress.

Prohibition.

Expel.

Inhuman.

Pervert.

Rural.

Ritualism.

Promote.

Subtract.

Divided.

ARITHMETIC.

FIRST DIVISION .-- (THE WORK IS REQUIRED.)

1. If 10 oz., 13 dwts., 16 grs. of gold, worth £3 5s. per oz., be mixed with 1 oz., 2 dwts., 8 grs. of silver, worth 5s. per oz., how much worthless alloy must be added to reduce the value of the compound metal to £2 16s. 8d. per oz.?

- 2. Assuming that a gallon of water contains 277 cubic inches, and that a cubic foot of water weighs 1,000 oz. Show that the popular rule, "a pint of water weighs 20 oz.," is nearly correct.
- 3. If a school-room is 25 feet long and 20 feet wide, how many children will it accommodate, allowing for each 8 superficial feet at the least? And if the room is 10 feet, 3 inches high, what cubical space is there for each child?
- 4. A metre is defined to be the $\frac{1}{10,000,000}$ of one-fourth of the circumference of the earth, and is 39·37079 inches. Find the circumference of the earth in miles.
- 5. A and B could finish a piece of work in fifteen days; after working together 6 days, A alone finished the remainder in 30 days; in what time could either alone do it all?
- 6. A and B row a race; A rows 35 strokes a minute, and moves his boat 18 feet at each stroke; B rows 33 strokes a minute, and moves his boat 20 feet at each stroke; where will A be when B has rowed a mile?
- 7. A note for \$975.00, and bearing interest at 5 per cent. per annum, becomes due in four months. How much Dominion Stock at 103³/₄ must be sold to pay the note now, ¹/₄ per cent. commission being charged, and money being worth 6¹/₂ per cent.
- 8. State the rule for extracting the Square Root of a Vulgar Fraction, and find the Square Root of $\frac{3757}{65533}$

ARITHMETIC.

SECOND DIVISION .— (THE WORK IS REQUIRED.)

1. If I buy equal numbers of pins at 3 cents and at 5 cents per 1,000, and mix them together, at what price must I sell an ounce of pins thus mixed so as to gain 25°/o profit on my outlay, supposing either 2,000 of the first kind or 1,250 of the second kind weigh an ounce?

- 2. Two cogged wheels worked together, there being 32 cogs on the one and 36 on the other; the larger wheel works 64 revolutions in a second. How often will the same cogs be in contact in the same position?
- 3. A certain ball rises $\frac{4}{7}$ of the distance it falls from; on the third rebound it rose $5\frac{1}{7}$ inches. Find the first height it falls from.
- 4. A note for \$975.00, and bearing interest at 5 per cent. per annum, becomes due in four months. How much Dominion Stock at 103\(\frac{3}{4}\) must be sold to pay the note now, \(\frac{1}{4}\) per cent. commission being charged, and money being worth 6\(\frac{1}{2}\) per cent.
- 5. A cubic foot of water weighs $62\frac{1}{2}$ lbs.; a room 18 ft. 9 in. by 13 ft. 4 in. is flooded to a depth of 2 in. What is the weight of water in the room?
- 6. A and B could finish a piece of work in 15 days; after working together 6 days, A alone finished the remainder in 30 days; in what time could either alone do it all?
- 7. State the rule for extracting the Square Root of a Vulgar Fraction, and find the Square Root of $\frac{3757}{65532}$.

GEOGRAPHY.

FIRST DIVISION.

- 1. Name the countries of Europe, and their capitals.
- 2. What are the general physical features of Asia?
- 3. Name the islands of Africa which belong to the British Empire.
- 4. The islands of Formosa, Ceylon, Cuba and Anticosti are to be found, where ?

- 5. What are the chief productions of Italy, India, and Russia?
- 6. Draw an outline map of that part of Ontario which lies west of the Counties of Peel and Simcoe, locating the counties, county-towns and cities.
- 7. Define Equator, Degrees of Latitude and Longitude, Ecliptic, Isothermal lines.
- 8. Account for the variation of the seasons; also for an eclipse of the moon.

GEOGRAPHY.

SECOND DIVISION.

- 1. Describe the general physical features of Asia.
- 2. Name the capital, principal rivers, and chief productions of India.
- 3. Give the boundaries, capital, and form of government of Egypt.
- 4. Give a general outline map of Ireland, showing the provinces, and the position of the principal cities.
- 5. What are trade winds? How many zones are there? Name them and give their position.
- 6. In which zone is Canada, Mexico, Scotland, Ceylon?
- 7. Give the chief productions of Canada, Southern States, Italy, and Russia.

GEOGRAPHY.

THIRD DIVISION.

- 1. Describe a voyage from London, England, to Calcutta.
- 2. What is Egypt chiefly noted for? Name its capital. What is the religion of its inhabitants?

- 3. What is said of the soil, climate, and productions of China proper?
- 4. What countries of Africa border on the Mediterranean Sea?
- 5. Into what seas do the Nile, the Thames, the Danube, and the Seine empty?
- 6. Give a general outline of Ireland, showing the position of the provinces, and the position of its principal cities.

GEOGRAPHY.

FOURTH DIVISION.

- 1. Name the cities of Ontario.
- 2. Describe a voyage from Prince Arthur's Landing to Montreal.
- 3. Name six of the most important countries of Europe. Give their capitals.
- 4. Give the boundaries of England.
- 5. What is the capital of England, and what are some of its public buildings?
- 6. What counties of England border on the English Channel?
- 7. Give a general outline map of Ireland, showing the position of the provinces, and the positions of Dublin, Belfast, Galway, and Cork.

MUSIC.

FIRST AND SECOND DIVISIONS.

- 1. Explain the terms Interval, Slur, Triple Time.
- 2. What is the key-note (major) when the signature contains, first, one sharp; second, one flat; third, three sharps?
- 3. How do you find the key-note of a piece of music?

4. What are accidentals?

5.

- (a) Name in order the letters and the syllables by which you would designate the above notes.
- (b) What is the key-note of the piece? Is the key major or minor?
- (c) What other key-note may be used with the same signature?
- (d) What is the interval between the first and third notes, and between the fourth and fifth?
- (e) What is the object of the dots at the end of the staff?
- 6. What notes, when sounded together, produce the common chord?

MUSIC.

THIRD AND FOURTH DIVISIONS.

- 1. Explain the use of sharp, flat, natural.
- 2. Define triple time, common time; and give the signature of each.
- 3. What is meant by intervals of fourths? Fifths?
- 4. What sharps or flats should be used in the signature when the key-note is first G; second C; third D; fourth Bb?

- (a) Give the signature indicating the time in which the above is written.
- (b) How many complete bars or measures does it contain?
- (c) Name the first six notes, first by letters, and second by syllables.
- (d) What is the intervals between the first and second notes, and between the fourth and tenth?
- (e) What is the effect of the dots at the end of the staff?

MATHEMATICS.

FIRST AND SECOND DIVISIONS.

First Division will take 1, 2, 3, 5. Second Division will take 1, 2, 3, 4.

- Define an angle, a right angle, a semi-circle and an isosceles triangle.
- 2. The angles at the base of an isosceles triangle are equal to each other; and if the equal sides be produced, the angles on the other side of the base are also equal.
- 3. If one side of a triangle be produced, the exterior angle is greater than either of the interior opposite angles.
- 4. Straight lines which are parallel to the same straight line are parallel to each other.
- 5. To divide a given straight line into two parts, so that the rectangle contained by the whole and one of the parts shall be equal to the square on the other part.

NATURAL PHILOSOPHY.

FIRST AND SECOND DIVISIONS.

Second Division will take questions 1 to 7 inclusive. First Division will take the whole paper.

- 1. Define Inertia, Cohesion, Capilliary Attraction. Give examples of each.
- 2. What is Centrifugal, and what Centripetal Force.
- 3. What is meant by Specific Gravity? What by Centre of Gravity.
- 4. Define Density, Volume, Tension.
- 5. What is the length of the smallest syphon that can empty a vessel three feet deep?
- 6. How is the pressure of the atmosphere ascertained on any given surface?
- 7. Explain the principle of the Common or Suction Pump.
- 8. Name the six simple machines, or mechanical powers.
- 9. Name some instruments which are but modifications of the Wedge.
- 10. A lever is 12 feet long; the fulcrum is two feet from the the weight; how much power is needed to lift 48 lbs.

GRAMMAR.

FIRST DIVISION.

1. Give the plurals of fly, radius, Mussulman, wolf, governorgeneral; the possessive plural of woman, lad, who, lady; comparative and superlative of pretty, virtuous, old; the past tense, present and past participle of raise, set, lay, lie, will (auxiliary), will (principal verb).

- 2. Define passive voice, apposition, sentence, infinative mood.
- 3. What adjectives cannot be compared?
- 4. In the following extract, parse the words printed in italics:

"Heaven from all creatures hides the book of fate,
All but the page prescribed their present state;
From brutes what men, from men what angels know,
Or who could suffer being here below?
The lamb thy riot dooms to bleed to-day;
Had he thy reason, would he skip and play?
Pleased to the last, he crops the flowery food,
And licks the hand just raised to shed his blood."

- 5. Analyze the last four lines in the above.
- 6. Correct any errors that occur in the following sentences:
 - (a) Give me the secrets of his pagan hell, Where ghost with ghost in sad communion dwell.
 - (b) They who I represent in parliament I shall endeavor to serve to the best of my ability.
 - (c) Every one of us talks worse English every day of our lives.
 - (d) Before the expiration of the lease thirty days' notice are required.

COMPOSITION.

7. Write on one of the following subjects:

The pleasures of school life.

A brief narrative of the way in which you spent last Queen's birthday.

Youth is the spring-time of life.

A description of Toronto Horticultural Grounds.

GRAMMAR.

SECOND DIVISION.

- 1. Give the plurals of half, father-in-law, vortex, journey, fly; comparative and superlative of humane, far, kindly; past participle of lose, sit, give, do; the masculine form of heroine, sultana, countess, executrix.
- 2. Define case, person, gender, voice.
- 3. Vary the structure of the following sentences, by changing the active voice into the passive, and the passive into the active. Whatever is offensive in our manner is corrected by gentleness. Every summer we may observe the mischievious effects of the rapacity of birds in the vegetable kingdom.
- 4. Parse the words in italics in the following sentence:—Scott, the famous author, who was an early riser, usually worked four hours in his study, before breakfast.
- 5. Analyze the following:

Led by his God, on Pisgah's height,
The pilgrim prophet stood,
When first fair Canaan blessed his sight,
And Jordan's crystal flood.

Behind him lay the desert ground
His weary feet had trod;
While Israel's host had camped around,
Still guarded by their God.

- 6. Correct anything faulty in the following sentences:
 - (a) Mind who you are speaking to.
 - (b) Neither of these boys do their work well, or are regular in their attendance.
 - (c) The 's cannot be a contraction of his for it is put to female nouns.—Johnson,

7. Combine the following simple sentences so as to produce a continuous narrative, forming compound or complex sentences if necessary:—The polar bear is of a white colour. It is found in the Arctic regions. It leads an almost entirely aquatic life in those regions. Its body is long. Its head is flat. Its mouth is peculiarly small. The paws are very large. They are covered on the under side with coarse hair. From the coarse hair it derives security in walking over the slippery ice. The fur is long. The fur is woolly. It is of fine texture. It is of considerable value.

GRAMMAR.

THIRD AND FOURTH DIVISIONS.

- 1. What benefits do you expect to derive from the study of grammar?
- 2. Give the rules for forming the plurals of nouns, with exceptions.
- 3. Give the possessive plurals of woman, who, lady; the comparative and superlative of pretty, virtuous, old; present participle past tense and past participle of am, set, give, can.
- 4. Define voice, case, person.
- 5. Parse the words in italics in the following stanzas:—

There is not in this wide world a valley so sweet,
As the vale in whose bosom the wild waters meet;
Oh! the last rays of feeling and hope must depart,
Ere the bloom of that valley shall fade from my heart.

Yet it was not that Nature had shed o'er the scene Her purest of crystal and brighest of green; 'Twas not her soft magic of streamlet or hill, Oh! no; it was something more exquisite still.

- 6. Analyze the first of the above stanzas.
- 7. Change the following into simple prose, introducing new words whenever necessary:—

In Bruges town is many a street,
Whence busy life hath fled;
Where, without hurry, noiseless feet
The grass-grown pavement tread.

There heard we, halting in the shade,Flung from a convent tower,A harp that tuneful prelude made,To a voice of thrilling power.

ALGEBRA.

FIRST AND SECOND DIVISIONS.

- 1. Add together 5ax-3by+4cz,-3ax+4by-2cz, -ax+8by-cz, 9ax-10by+11cz, and from the sum take -ax-by-cz.
- 2. Express without brackets (x+y)(x+2y)(x-y)(x-2y).
- 3. Divide $1 + y^3 + z^3 3y$ by 1 + y + z.
- 4. Find the Highest Common Divisor of $a^3-a^2-8a+12$ and $a^3+4a^2-3a-18$.
- 5. Solve the equations:

(1)
$$\frac{x-1}{7} - 7 = \frac{x-23}{5} - \frac{4+x}{4}$$
,

(2)
$$\frac{x}{b} = \frac{1}{2}(a^2 - b^2) + \frac{x}{a}$$
.

(3)
$$5x + 11y = 146$$
.
 $\frac{x}{5} + \frac{y}{11} = 2$.

6. A boy is told to think of a number; to subtract 1 from it, and multiply the result by any number n; then to subtract 1, and finally to add the original number. Show that the number he originally thought of is one more than the one (n + 1)th part of the final result.

ALGEBRA.

THIRD DIVISION.

- 1. Add together 5ax-3by+4cz,-3ax+4by-2cz, -ax+8by-cz, 9ax-10by+11cz, and from the sum take-ax-by-cz.
- 2. Find the value of $1-[1-\{1-(1-1-1)\}]$
- 3. Multiply $a^3+2a^2b+4ab^2+8b^3$ by a-2b. And express without brackets (x+y) (x+2y) (x-y) (x-2y).
- 4. Divide $1+y_3+z^3-3yz$ by 1+y+z.
- 5. Solve the equation 4x-3 (4-5x)=7-3 (17-x).

HYGIENE.

FIRST DIVISION.

- Mention five general hygienic rules which must be observed in order that the body may be strong and healthy, and able to withstand disease.
- 2. (a) Where is the organ of voice situated?
 - (b) Tell what you know about its structure.
 - (c) How is speech produced?

3. Which is better—nine hours' sleep taken from 11 o'clock p.m. to 8 o'clock a.m., or nine hours's sleep from 9 o'clock p.m. to 6 o'clock a.m.?

Give full reasons.

- 4. (a) Describe the nervous system
 - (b) What would you do for a person who has fainted?

HYGIENE.

SECOND DIVISION.

- 1. Mention five general hygienic rules which must be observed in order that the body may be strong and healthy, and able to withstand disease.
- 2. Describe the process of the circulation of the blood fully.
- 3. (a) Define hygiene.
 - (b) What are the most common impurities in the air which we breathe?
- 4. (a) Give directions for taking care of the eyes.
 - (b) Describe the process of hearing as fully as you can.

HYGIENE.

FOURTH DIVISION.

- Mention five general hygienic rules which must be observed in order that the body may be strong, and healthy, and able to withstand disease.
- 2. Write a note on the skin, telling what you know about its structure, uses, etc.

- 3. (a) Where is the heart?
 - (b) What keeps up the warmth of the body?
 - (c) Name the circulatory organs directly connected with the heart?
 - (d) How does the wearing of tight clothing injure the health?
 - (e) Why should food be eaten slowly?

HYSTORY.

FIRST DIVISION.

- 1. Give the main features in the character of James I. of England.
- 2. What was the Petition of Rights? To whom was it presented, and with what results?
- 3. What influence had the action of the Scottish people in the reign of Charles I. in promoting the liberties of England?
- 4. Give the names and dates of the first and of the last battles of the civil war in the reign of Charles I.
- 5. Give a brief account of the battle of Dunbar.
- 6. Who was the chief minister of Charles II. in the early part of his reign, and what was the occasion of his resignation of office?
- 7. What was the purport of the Act of Settlement, and in whose reign was it passed?
- 8. When and by whom was Quebec founded?
- 9. Give some account of the explorations under Frontenac.

10. What were the provisions of "the Constitutional Act of 1791?"

HISTORY.

SECOND DIVISION.

- Give a brief account of the causes which led to the Reformation under Luther. Give the name of the Sovereign by whom he was befriended, of the Diet at which he was condemned, and of the Confession in which his doctrines were embodied.
- 2. Sketch the course of Henry of Navarre.
- 3. When and by whom was the Edict of Nantes revoked, and what were the consequences?
- 4. How did Peter the Great increase the power of Russia?
- 5. Give the names of the two men under whom the more important conquests in India were made in the latter part of the 18th century.
- 6. Give the date of the Declaration of Independence by the American Colonies of Britain and its ground.
- 7. What was the effect of the battle of Leipsic?
- 8. By what steps did Louis Napoleon become Emperor of France?

HISTORY.

THIRD DIVISION.

- 1. Name the more important branches of the Semitic Race.
- 2. Indicate the connection between the physical features of Greece and its early advances in civilization.

- 3. Give brief accounts of the battles of Marathon, Thermopylai and Salamis.
- 4. Define Monarchy, Aristocracy, Democracy, and Tyranny as forms of Government, give the name of a famous tyrant in Athens in the 6th century, B. C.
- 5. Give a brief account of the Second Punic War.
- 6. What importance attaches to the battle of Pharsalos, and what to that of Philippi?
- Mention any particulars connected with the reign of Theodosius the Great.

HISTORY.

FOURTH DIVISION.

- 1. Give the names of the principal races which go to form the English people.
- 2. State the main provisions of the Great Charter, and where and in whose reign was it drawn up.
- 3. Give the principal events in the reign of Edward I.
- 4. Mention the names of the chief ministers of Henry VIII. and of Charles I.
- 5. Give brief accounts of the battles of Hastings, Agincourt, Marston Moor, and Plassey.
- 6. State leading particulars regarding Thomas Beckett, John Wicliff, Sir Walter Raleigh, and Sir Ralph Abercrombie.

BOOK-KEEPING.

FIRST DIVISION.

- 1. What is the use of the Journal?
- 2. Give a rule for Journalizing.
- 3. Journalize the following transactions:—Sold to Thomas Jones goods amounting to \$800, and received in payment \$100 cash, a note at two months for \$100, and the balance in goods. Thomas Jones pays \$50 on his note when due, and gives me another note for the balance.
- 4. What entries do you make on the credit side of stock account, the debtor side of merchandise, credit side of cash, debtor side of profit and loss?
- 5. How do you close merchandise, profit and loss, stock?
- 6. What is the final test of correctness of the Ledger?

BOOK-KEEPING (SINGLE ENTRY.)

SECOND DIVISION.

- 1. What books are usually employed in single entry?
- 2. When do you make an entry on the debtor side and when on the credit side of a customer's account?
- 3. Thomas Simpson in commencing business has \$1,000 in cash; James Thompson owes him \$250; he owes Richard Watson \$100, and his stock of goods is worth \$1,200. In what accounts and on which side would you enter the above?
- 4. How would you enter the following transactions in the day-book:—John Johnson purchases goods on credit, amount-

ing to \$100; James Smith receives \$30 in cash; you purchase from Samuel Jones 250 lbs. of tea at 10 cents per pound, and pay him \$12 on account.

5. How would you find your net capital and net gain?

DRAWING.

FIRST DIVISION.

- 1. Draw an original design in a square.
- 2. Draw a perspective diagram, showing the picture plane, field of vision, horizontal line, distance points, picture points, picture line, line of direction, and station point.
- 3. How do lines drawn at right angles to the picture lane appear to vanish? Do lines drawn at angles of 45° to the picture plane vanish in the same point as lines at right angles to the picture plane?

DRAWING.

SECOND DIVISION.

- 1. Draw an original design.
- 2. Draw an industrial design from memory.
- 3. Draw a horizontal line two inches long for the base of a pentagon; construct it. Retain all construction lines.

DRAWING.

THIRD DIVISION.

1. What is the name of a plane figure having five equal sides and angles?

- 2. Draw an original design in a circle.
- 3. Draw two concentric squares, the first on its diagonals, three inches their length.

DRAWING.

FOURTH DIVISION.

- 1. Draw from memory an industrial design, and state what industrial means?
- 2. Draw an original design?
- 3. On a horizontal line, three inches long, as a base construct an equilatrial triangle. Name that part of the triangle opposite the centre of base.

Auditor, - - - R. C. FITZGERALD.

Anspector's Report.

INSPECTOR'S ANNUAL REPORT.

To the Board of Public School Trustees of the City of Toronto:

Gentlemen,

In accordance with a Resolution of your honorable Board, I respectfully submit the twenty-fourth Annual Report of the Schools under your charge.

Appended to the Report will be found Statistical Tables which give in detail all important particulars relating to teachers, pupils, attendance, absenteeism, tardiness, studies pursued, cost of maintenance, &c.

ATTENDANCE.

The total number of pupils registered during the year was 15,307.

The average daily attendance was 10,111. Last year it was 8,845.

616 pupils attend school less than 20 days.

| 1484 | 66 | 6.6 | 6 . | between | n 20 | and | 50 | days |
|------|-----|-----|-----|---------|------|-----|-----|------|
| 3157 | " | 6.6 | 6.6 | " | 50 | 6.6 | 100 | 6.6 |
| 2700 | 6.6 | 6.6 | 66 | 6.6 | 100 | 66 | 150 | 66 |
| 7350 | 66 | 6.6 | 6.6 | 6.6 | 150 | 6.6 | 200 | 4.6 |

The number who attended school for over 100 days is 10,050, or 66 per cent. of the total registered number.

The most correct idea of the relation of the Average to the Registered Attendance is obtained by comparing the average of Monthly Averages with the average of Monthly Registered Numbers.

The average of Monthly Registered Numbers was 11,191. This shows an increase compared with last year of 1,317. (See Table A.)

The average of Monthly Average Numbers was 10,000. This shows an increase of 1,198 when compared with the corresponding number of last year. (See Table B.)

The average of Monthly Averages was 89.4 per cent. of the average of Monthly Registered Numbers.

The best average for any month in the year was 93, the average for July.

The largest number was registered in October, and the smallest number in July. The attendance in July was 948 less than in any other month, and 1,651 less than the average.

The comparatively large number who attend school for less than 100 days can be easily accounted for, when it is remembered that most of the scholars who leave school do so at the close of the first term. The report would appear more favorable if the year closed in July instead of December. The following statement shows the Average Registered Number in each School during the year:—

| 1 | Schools. | Average Registered No. | No. of Teachers. | Average per Teacher. |
|-------------|----------|---------------------------|---------------------|-------------------------|
| Dufferin | | | 12 | 50 |
| | | | 16 | 56 |
| | | | 12 | 51 |
| - | et | | 12 | 60 |
| John " | | 556 | 10 | 56 |
| Park | | 508 | 8 | _ 64 |
| Winchester | Street, | 577 | 8 | 72 |
| Victoria | " | 498 | 8 | 62 |
| Niagara | | 533 | 8 | 67 |
| Louisa | 44 | 431 | 8 | 54 |
| Parliament | | 415 | 6 | 69 |
| George | " | 364 | 6 | 61 |
| Church | , | 545 | 9 | 61 |
| Elizabeth | | 361 | 6 | 60 |
| Brant | | 369 | 6 | 62 |
| Bathurst | | 521 | 8 | 65 |
| Hope | | 677 | 11 | 62^* |
| Palace | 66 | 219 | 4 | 55 |
| York | | 175 | 4 | 44 |
| Borden | | 271 | 4 | 68 |
| Givins | | 481 | 8 | 60 |
| Leslieville | | 100 | 2 | 50 |
| Boys' Home | e | 77 | 1 | 77 |
| Girls' " | | 68 | 1 | 68 |
| Orphans' H | ome | 99 | 1 | 99 |
| Chestnut St | reet | 64 | 1 | 64 |
| Jesse Ketch | um | 548 | 12 | 46 |
| Cottingham | Street | 97 | 2 | 49 |

^{*} This is the attendance since the enlargement of this school.

ATTENDANCE IN THE VARIOUS CLASSES.

The registered number in attendance during the year in the different grades was as follows:—

| First | Book | 3,390 |
|--------|------|-------|
| Second | · · | 3,488 |
| Third | " | 3,167 |
| Fourth | "1 | ,491 |
| Fifth | | 771 |

Of course, it should be remembered that large numbers of those who began the year, or who entered during the year in the First Book, were afterwards promoted to the Second Book. The same remark is true concerning the other classes.

The progress in the First Book Classes during the year has been so very satisfactory, that several of the Senior First Book Classes will have to be regarded as Second Book Classes in future.

LATENESS.

The high standard in the punctuality of the pupils has continued during 1883. The total number of cases of lateness in the whole year amounts to less than one-half of the registered number of pupils.

The following table shows the number of cases during the past ten years.

| Date. | Average | Cases of |
|-------|-------------|-----------|
| Date. | Attendance. | Lateness. |
| 1874 | 4,814 | 69,456 |
| 1875, | 6,386 | 65,364 |
| 1876 | 5,976 | 31,486 |
| 1877 | 6,860 | 15,272 |
| 1878 | 7,467 | 7,474 |
| 1879 | 8,144 | 6,615 |
| 1880 | 8,215 | 5,967 |
| 1881 | 8,409 | 5,980 |
| 1882 | 8,845 | 6,735 |
| 1883 | 10,111 | 7,631 |
| | | |

(See Table D.)

CERTIFICATES OF HONOR.

Certificates of Honor are awarded at the Christmas Vacation to such pupils only as have not been once absent or late, and whose conduct has been uniformly good, unless the absence or lateness shall have been occasioned by sickness of not more than three weeks' continuance, to be certified in writing by the pupils' parents or guardians.

These Certificates are of two grades, and named respectively First Honor Certificates, and, Second Honor Certificates.

The First Honor Certificates are awarded to such pupils as have fulfilled the above-named condition for two consecutive sessions.

The Second Honor Certificates are awarded to such pupils as have conformed to the said rules for one session during the year. The following statement shows the number of Certificates given in the various schools at the close of 1883.

| Schools. | First Honor. | Second Honor. | Total. |
|-------------------|-----------------|------------------|--------|
| Dufferin | 161 | 196 | 357 |
| Wellesley, | 202 | 340 | 542 |
| Ryerson | 96 | 171 | 267 |
| Phæbe Street | 116 | 182 | 298 |
| John " | 105 | 144 | 249 |
| Victoria " | 69 | 123 | 192 |
| Winchester " | 73 | 132 | 205 |
| Niagara " | 52 | 104 | 156 |
| Park | 93 | 112 | 205 |
| George Street | 38 | 76 | 114 |
| Louisa " | 44 | 93 | 137 |
| Bathurst " | 67 | 110 | 177 |
| Palace " | 31 | 52 | 83 |
| Parliament " | 37 | 89 | 126 |
| Church " | 84 | 159 | 243 |
| Elizabeth " | 51 | 78 | 129 |
| York " | 6 | 27 | 33 |
| Givins " | . 83 | 99 | 182 |
| Borden " | . 30 | 60 | 90 |
| Leslieville | 11 | 20 | 31 |
| Hope Street | . 75 | 102 | 177 |
| Brant " | . 45 | 84 | 129 |
| Jesse Ketchum | . 42 | 117 | 159 |
| Cottingham Street | . 7 | 18 | 25 |
| Total | . 1,618 | 2,688 | 4,306 |

This is an increase of 454 over the number issued in 1882.

A new and greatly improved form of Honor Certificate was issued this year. I would strongly urge the Board to still further vary the plan of rewarding those whose attendance, punctuality, and conduct for two or more years have been such as to entitle them to Honor Certificates. When a child receives three, four, or five certificates exactly similar in form, it ceases to value them. It would be much better to give special forms of certificates to those pupils who were entitled to them for a period of two, three, four, and five years respectively. Small medals of bronze and white metal can be obtained in England, nearly, if not quite as cheap as the certificates are now purchased by the Board. As the numbers entitled to reward for four or five years' attendance, punctuality, and good conduct would be comparatively small, I would recommend the substitution of medals for certificates for the longer periods.

TEACHERS.

There were 200 Teachers in the employ of the Board at the close of the year, exclusive of the special Teachers in Music, Drawing, and Drill and Calisthenics.

There are 24 Male and 176 Female Teachers employed.

They hold Certificates as follows:—

| First Class Provincial 50 |) |
|-----------------------------|---|
| First Class County Board 18 | 3 |
| Second Class Provincial | 3 |
| Kindergarten Diploma | L |

SCHOOL ACCOMMODATION.

During the year 1883, the following additional accommodation was provided:—

- 1. A new School containing four rooms was built on Rose Avenue.
- 2. Hope Street School was enlarged by the addition of six rooms.
- 3. Jesse Ketchum School was enlarged by the addition of four rooms.

NIGHT SCHOOLS.

The total number registered during the term in each School was as follows:—

| Schools. | Males. | Females. | Total. |
|-------------------|--------|----------|--------|
| Parliament Street | . 159 | 72 | 231 |
| Elizabeth Street | 157 | 65 | 222 |
| Niagara Street | 90 | 39 | 129 |
| Bathurst Street | . 129 | 51 | 180 |
| Jesse Ketchum | 98 | 62 | 160 |
| | | | |
| Total | 633 | 289 | 922 |

The average attendance for the entire term was:—

| Schools. | Males. | Females. | Total. |
|-------------------|--------|----------|--------|
| Parliament Street | 85 | 41 | 126 |
| Elizabeth Street | 59 | 29 | 88 |
| Niagara Street | 44 | 14 | 58 |
| Bathurst Street | 37 | 31 | 68 |
| Jesse Ketchum | 46 | 20 | 66 |
| | | | |
| Total | . 271 | 135 | 406 |
| | | | |

The attendance till Christmas was very good indeed, being 355 males and 174 females. Total, 529.

The average attendance for February alone was as follows:

| Schools. | Males. | Females. | Total. |
|-------------------|--------|----------|--------|
| Parliament Street | 67 | 34 | 101 |
| Elizabeth Street | 38 | 22 | 60 |
| Niagara Street | 24 | 8 | 32 |
| Bathurst Street | 25 | 15 | 40 |
| Jesse Ketchum | 15 | 9 | 24 |
| | | | |
| Total | . 169 | 88 | 257 |

I respectfully make the following suggestions regarding the Night Schools in the future:

The Board was fortunate in securing a staff of very competent Head Masters during the past term, and they were ably assisted by the other Masters in nearly every case. As the Head Masters have to perform extra duties, which do not devolve upon the Assistant Masters, I recommend that in future the Head Masters should be paid a little more than the Assistant Masters for their services. Formerly the Head Masters taught five nights each week instead of three, as at present, and in this way received some consideration for the extra work they had to perform.

CO-EDUCATION OF THE SEXES.

The sexes have been taught together as high as the Junior Fourth Book Class inclusive since 1874, but separately in the higher classes. At the beginning of last year, owing to the comparatively small number of boys in the Fifth Book Classes in Ryerson and Dufferin Schools, the girls and boys were combined in these Divisions. The results have been perfectly satisfactory. The grading is much better than formerly, and the discipline, if affected at all, has been improved by the change.

SUPERANNUATION OF TEACHERS.

Taking advantage of the statutory provisions relating to the superannuation of teachers, the Public School Board has, during the past year, adopted, for the first time, the course of supplementing the amount received annually from the Departmental Superannuation Fund, by those teachers who have faithfully served the Board for a long period. So far as I can learn, the honor of initiating this commendable method of dealing with old servants belongs to the Toronto School Board. Teachers can not fail to perform their duties with more spirit when employed by a Board which not only deals liberally with them while in its employ, but also helps to provide for them when they are too old for further efficient service.

FIRE DRILLS.

These drills, which have been regularly practised in the Public Schools of Toronto for some time, have been tested by real fires during the past year. The efficiency of the fire drills in preventing a panic in case of real danger was clearly proved in both cases. The Palace Street School, containing four rooms, and attended by 272 pupils, was emptied in forty-five seconds, and at Hope Street School, containing eleven rooms, the 677 pupils were outside the building in one minute and forty seconds. There was no disorder or tendency towards a panic in either case, as most of the pupils believed that they were taking part in the ordinary practice drill. The following are the rules issued for the management of fire drills:—

- 1. Fire Drills should be held at least twice a month.
- 2. They should not be held at regular times.

- 3. There should be a special signal given with the bell, which should be given only for Fire Drill.
- 4. Teachers should dismiss pupils at once, and always in the same way, on hearing the signal.
 - 5. Pupils should not wait to put on clothing.
- 6. They should be urged to walk quickly, but they must keep in line and avoid crowding.
- 7. Teachers and larger boys should be stationed at the foot of stairways and in other important positions, to raise any who may fall.
- 8. The object of the Fire Drills being to prevent a panic in case of a real fire, it would be desirable, occasionally, to cause a smoke by some means in the halls before giving the signal. No risk of fire should be run in causing this smoke.
- NOTE 1.—It would be advisable to confine the pupils to one means of exit occasionally, so as to be prepared for the contingency of having the other cut off by fire.
- Note 2.—The larger boys, referred to in Rule 7, Fire Drill, should be specially trained in reaching their positions with great promptness.

PROMOTION OF TEACHERS.

During the year the Board decided that teachers holding second-class certificates may be promoted from any grade but the Junior Third Book Class. Those below that grade may be promoted till they reach it, but cannot pass above it. Those who are already above it may be promoted without regard to certificate.

I am aware of the fact that the rule which checks the advancement of teachers with second-class certificates was made with a good object, viz., to induce teachers to prosecute their studies until they obtained a higher certificate. I need not remind the Board that the rule has almost totally failed to secure the end for which it was passed; he has not only failed to accomplish good—it has in some cases been productive of evil, by leading to the promotion of inferior teachers in preference to better teachers who had been longer in the service of the Board. A higher certificate is chiefly increased in value, according to the extent to which it represents additional professional training or skill. The second-class certificates granted at the present time depend, much more than formerly, on professional ability and training, and I have no hesitation in stating that many of the second-class teachers in the lower grades are better teachers than some who hold first-class certificates. Other things being equal, there can be no doubt that a higher cerlificate should entitle its holder to precedence in promotion; but of all the elements which can be taken into consideration, that which should have most weight is teaching power.

I would respectfully direct the attention of the Board to the advisability of endeavouring to obviate a difficulty which is constantly arising from the promotion of teachers from the primary classes. These classes are the most difficult to manage and teach, and yet the most inexperienced teachers are placed in charge of them, and then in a year or two, when they have become thoroughly fitted for the performance of their duties, they are promoted to give place to others, who are in many cases mere novices. I would recommend that teachers be appointed first to the Junior Second Book Class, which is one of the easiest classes to teach, and that promotion should be made downward instead of upward, until the Junior First Book Class

is reached, when the next step in advance would be the Senior Second Book Class.

STUDIES.

In the ordinary studies, satisfactory progress has been made in most of the classes. Believing that it is of vital importance to begin right, and also that the teaching in primary classes is usually more imperfect than in senior classes, I have devoted my efforts during the year chiefly to securing improvement in the junior divisions. The subjects of primary Reading, Writing, and Arithmetic have received the largest amount of attention, and I am satisfied with the results. I believe our progress in Reading and Writing in the primary grades will compare favorably with that made anywhere, and our foundation work in Arithmetic is thorough and systematic. The general progress made by the pupils may be partly judged from the Report of the Combined Examiners. There are some studies which have hitherto been regarded, improperly I think, as of a special character. Of these it is worth while to write more fully:

Drawing.—During the year, Miss B. Gunn, who had, for many years, ably filled the position of teacher of Drawing, resigned, and Mr. E. R. O'Brien, President of the Canadian Academy of Artists, was appointed in her stead. Mr. O'Brien will teach only in the higher classes, but will prepare the work to be done in all, and train the teachers in the method of teaching. The schools are closed an hour earlier, once a month, for the purpose of allowing the teachers to attend his class. His duties are defined in the following Report of the Committee on School Management:

(a) To take general supervision of the teaching of Drawing in all the classes in the Public Schools.

- (b) To prepare, monthly, the details of the Drawing to be taught in the several classes below the Fifth Book during the following month, and, when necessary, to give instruction concerning the method of teaching such work to those teachers who need it.
- (c) To inspect the Drawing done in the classes below the Fifth Book between the 1st of November and the 1st of June, in each school year.
- (d) To teach Drawing in the Fifth Book classes, from November 1st to June 1st, each year, and to prescribe and give directions for the work in Drawing to be done during the months of June, September, and October, in these classes.

Music.—Much attention has been devoted to this subject during the year. Mr. H. F. Sefton, one of the Music teachers, resigned his position, and Mr. E. P. Perrin was placed in charge of the Music in all classes above the Junior Third Book. No teacher has yet been appointed for the junior classes. I recommend the Board to consider the advisability of appointing a trained teacher to the position, as I believe it to be more important for the Superintendent of Music in the primary classes to be a good teacher, with a knowledge of the elementary principles of music, than a professional musician, without training or experience as a teacher.

Needlework.—Continued attention has been paid to this important department of school work. Many of the boys' classes have made very satisfactory progress in the use of the needle, especially in knitting. As most of the boys in attendance at our Public Schools will have to earn a livelihood by the use of their hands, it is essential to their highest success, in any

department of industrial work, that their hands should have some definite training in school. Various plans have been tried in Toronto, but, as yet, no work has been found which fulfils all the conditions of a school study so well as knitting. In order that any kind of work may be successfully introduced into schools, it is essential—

- 1. That it may be done by all the pupils.
- 2. That the apparatus and material used shall be inexpensive.
- 3. That the products of the work may serve some useful purpose.
- 4. That it shall give the fingers such exercise as shall result in giving them increased strength and dexterity.

These conditions are all fulfilled by knitting, and hence its utility as a means of developing hand skill as a school exercise.

With a view of securing perfect uniformity in needlework throughout the city, the following instructions were issued in October:

Circular (No. 2), for Every Lady in Highest Six Classes, teaching Girls.

DEAR MADAM:

Please note the following instructions regarding needlework in schools:

1. Knitting should be taught in the first part of each session until the pupils are fairly proficient in the work of their grade; and also for *review* in the last week of each month, after sewing is taken up.

- 2. Knitting stitches should be carefully illustrated with large wooden needles (pointers will do if the teacher has nothing better.)
- 3. In Junior Third Book a "plain strip" may be made wide enough to form a cuff when the sides are sewed together. The strips should be adapted to *some practical* purpose.
- 4. Sewing patterns and stitches should be illustrated on the blackboard, or in some other way, so that all the pupils may be able to see them.
- 5. Every pupil should do the same kind of work on the same day, as in other subjects.
- 6. It is suggested that one of the first articles made should be a work apron, for use in school during needle-work hour. This may contain pockets for requisites, and, at the close of a lesson, all work and requisites may be neatly folded in a small parcel in the aprons, which may then be collected in work-baskets. Each parcel should be securely fastened with the apron strings, and the pupils' names should be written on the bands.
- 7. So far as possible, the needle-work of each session should be kept in school for examination.
- 8. Patterns should be cut from paper. Pupils may bring newspapers, etc., to cut from.
- 9. The work of the Senior Fourth Book Classes should be taken in the following order: knitting, darning, patching, and other mending.
- 10. This work should not in any way be slighted, but should receive its fair share of attention.

Drill and Calisthenics.—The interest in these subjects continues to increase. Teachers and pupils are realizing more fully the great importance of physical education, in making the discipline of the school easy and natural, in improving the health of the pupils, and in imparting a better tone to school life. Under the training of Captain Thompson the pupils in the senior classes, both boys and girls, have attained a high degree of efficiency, both in drill and calisthenics, and in the primary classes the Kindergarten songs and games have been successfully introduced through the agency of Miss Marean.

The Annual Review, and Competitions in Drill and Calisthenics, passed off very successfully. The "Beaty" banner was won for the third time by Wellesley School, and now remains permanently in possession of that School. The "Hay" clock, for the best senior class in Calisthenics, was won by Phæbe Street Junior Fourth Book Class. The Phæbe and Victoria Street Schools were reported equally excellent in the Drill competition for Fourth Book Schools. The George Street School carried off the prize for Second and Third Book Classes in Calisthenics, and the honors in the First Book competition were divided between Church Street and Bathurst Street Schools.

THE KINDERGARTEN.

The most important advance made during the year was the introduction of the Kindergarten. Under the training of Miss Marean, the class, opened in Sept., in Louisa St. School, has been very successfully conducted. The attendance has averaged about eighty. Miss Marean has been assisted by seven young ladies, who have given their services free, in order to secure a training in the principles and practice of Kindergarten work. Most of these young ladies will be qualified to take charge of Kindergarten departments

at the close of the year, in June. I have the fullest confidence in repeating my recommendation of last year, that other Kindergartens be opened as soon as we can obtain qualified ladies to put in charge of them, under the general superintendence of Miss Marean.

KETCHUM PRIZES.

These prizes were distributed, as usual, in December, by the Rev. Dr. Rose, assisted by Rev. Canon Du Moulin, Rev. Septimus Jones, M.A., Rev. J. H. Locke, and Rev. Dr. Reid.

Owing to the large increase in the number of classes in the city, it has been decided to distribute these prizes every second year in future.

Statistical and Resequence Tables.

Kxaminers' Peport.

REPORT

OF THE

Examiners in Regard to the Combined Examinations

OF THE

PUBLIC SCHOOLS OF TORONTO.

The Examiners have the honor to report that in the discharge of the duty entrusted to them, they examined, on the 22nd and the 25th of June, the selected pupils sent up to them from the several Public Schools in the city, in which the more advanced pupils are taught. The Examination was conducted in the Dufferin and Ryerson Schools, and, as in former years, was throughout a written one. The pupils examined belonged to the four highest divisions and numbered in all 267.

The Examiners beg to submit the following results as brought out by a careful comparison of the papers handed into them:—

I. FOURTH DIVISION.

The pupils of this Division numbered 65. They were taken from the Fourth Divisions of the following schools: the Dufferin, the Ryerson, the Wellesley, the Park, Winchester Street, Victoria Street, Niagara Street, Church Street, Phæbe Street, and John Street; ten—five boys and five girls—from each of the first three, and five from each of the others. One pupil was absent of those sent up from the Dufferin School. They were examined in Arithmetic, Grammar and Composition, Hygiene, History, and Geography, Reading, Spelling and Derivation,

Writing, and Music. Taking a general view of the schools in this Division, the girls' department in the Wellesley School stands first. The second place is taken by the Victoria Street School, and the third by the Phœbe Street School. Of the boys' department in this Division John Street stands first. In this, as in the other divisions, the highest prizes are given for General Proficiency; it must be understood that the holders of these are not permitted to take prizes also for excellence in the separate branches of study in the examination. The Examiners recommend General Proficiency prizes in this Division to be awarded to the following:

- 1. Beatrice Grant, Phobe Street School.
- 2. Edith Coles, Wellesley "
- 3. Nora Headley, "
- 4. Robert Glove, Victoria Street "
- 5. Ella Ronan, " " "

Taking the subjects separately or in natural groups, the Examiners find that in this Division the greatest excellence in Arithmetic was exhibited by the pupils of the Phœbe Street School; the girls' department of the Wellesley School comes next, and after it, the pupils of the John Street School. In Grammar and Hygiene, which, for prize purposes, are grouped together, the highest place was taken by the girls' department of the Wellesley School, the Victoria Street School takes the second place, and the third is taken by the girls' department of the Ryerson School and the pupils of the Phœbe and John Street Schools. In History and Geography, the girls' department of the Wellesley School stands first, followed by the same department of the Ryerson and of the Phœbe Street Schools. In Reading, Spelling and Derivation, the place of honor is again held by the girls' department of the Wellesley School; Phœbe

Street and John Street in this order. In the last group, which embraces Writing and Music, the order of excellence is the girls' department of Wellesley School, the pupils of Niagara Street School, and the girls' department of the Dufferin School.

In addition to the prizes for proficiency in all the subjects, he

- 4. Rebecca Graham, Niagara " Ada Lillie, " " " Effic Maxwell " " "

II. THIRD DIVISION.

Seventy pupils appeared for examination in this Division; ten boys and ten girls from the Dufferin, Wellesley, and Ryerson Schools, and ten girls from John Street. They were subjected to examination in the same subjects as the Fourth Division, with the addition of Algebra and Bookkeeping. In this Division, the girls' department of Wellesley School takes the first prize in all the subjects. In Mathematics, the second place is taken fly the boys' department of the same school. In Grammar, Composition, and Hygiene, the second and third places are taken by the boys' department of the Dufferin and by the girls' department of the same school. In History and Geography, the second place is taken by the boys' department of the Ryerson School, and the third by the girls' department of the Dufferin School. Reading, Spelling, and Derivation, the second place is taken by the girls' department of the Ryerson School, and the third again by the girls' department of the Dufferin School. In Writing, Bookkeeping, and Music, the boys' department of the Wellesley School, and the girls' department of the Dufferin, take the second and third place, respectively,

The Examiners recommend prizes to be given in the Division as follows:

I, GENERAL PROFICIENCY.

II. MATHEMATICS.

1. Charles Playter, Dufferin School.

Sophia Cooper, Wellesley School.

Lottie Klinck, "

4. Edith Young "5. Mina Hamilton, John St.

3. Etta Jackes

| | | |
| | | |

VI. WRITING, BOOK-KEEPING, AND MUSIC.

- 1. Robert A. McCready, Wellesley School.
- 3. Thomas Reed, Dufferin "
- 4. Alice Wilson, "

III. SECOND DIVISION.

Sixty pupils took part in the examination in this Division, or, rather, fifty-nine; ten boys and ten girls from each of the following schools: Dufferin, Ryerson, and Wellesley, with the exception of the boys' department of Ryerson, which lacked one of its proper complement. They were examined in Euclid, in addition to the subjects embraced in the examination of the Third Division. Of the three schools, the aggregate marks of the girls' department of the Wellesley are the highest, followed by the same department of the Dufferin, and then, again, by the same department of the Ryerson. Coming to the separate branches, the first place is taken in Mathematics by the girls' department of the Wellesley School, the second and third by the same department in the Ryerson and Dufferin Schools, respectively. In Grammar, Composition, and Hygiene, the boys' department in Dufferin School stands first, and is followed by the girls' departments of the Wellesley and the Ryerson School, in this order. In History and Geography, the girls' departments of the Dufferin and the Wellesley School take the first place, and are practically equal. In Reading, Spelling, and Derivation, the same schools take the lead, and are again almost on an equality. The third place is taken in these subjects by the girls' department of the Rverson School. In Writing, Bookkeeping, and Music, the first place is taken by the girls' department of the Wellesley School.

The Examiners recommend the following prizes in this Division:

I. GENERAL PROFICIENCY.

- 1. Lulu H. Martin, Dufferin School.
- 2. Edith Roberts, Wellesley
- 3. Rebecca Morrison, Dufferin "
- 4. Ella Wood, Wellesley
- 5. Luella Smith, Wellesley "

II. MATHEMATICS.

- 1. Nellie Milligan, Wellesley School.
- 2. | Jennie Orr, Ryerson School. | Lizzie Blight, Wellesley "
- 4. Eva Nasmith, "

III. GRAMMAR, COMPOSITION, AND HYGIENE.

- 1. Rebecca Peacock, Dufferin School.
- 2. Lizzie Blight, Wellesley '
- 3. Carrie Pearse, "
- 4. Hugh Sutherland, " ' Eva Nasmith "

IV. HISTORY AND GEOGRAPHY.

- 1. Laura Levy, Dufferin School.
- 2. Kate Chamberlain, Wellesley '
- 3. Fanny L. Sparling, Ryerson "
- 4. Nellie Milligan, Wellesley "

V. READING, SPELLING, AND DERIVATION.

- 1. Ada Davy, Dufferin School.
- 2. Mary Ristow, Wellesley

 Katie Berkinshaw, Dufferin
- 4. Laura Levy,

VI. WRITING, BOOKKEEPING, AND MUSIC.

- 1. Bessie Beswetherick, Dufferin School.
- 2. Allen Cochrane, Wellesley
 Laura Levy, Dufferin
- 4. Lizzie Blight, Wellesley "

IV. FIRST DIVISION.

In this Division twelve pupils appeared for examination from each department of the corresponding Divisions in Dufferin, Wellesley, and Ryerson Schools, making a total of 72. They were examined in the same subjects as those of the Second Division. The results are such as to show a great amount of painstaking labour on the part of the teachers, and of diligence and aptitude on the part of the pupils. It is difficult to compare one year with another as regards the attainments of the pupils, for the questions vary in difficulty from year to year. The rate of excellence, especially in the girls department, is extremely gratifying.

Taking all the subjects into account, the highest standard is this year reached by the girls' department of the Dufferin School. The same department in the Wellesley School follows at no great distance, while the third place is taken by the boys' department of the Wellesley School, the girls' department in the Ryerson School being almost equal. The record of no department in the Division is discreditable. The lowest is only 20 per cent. below the highest.

Passing the separate branches of study under review, the examination shows the girls' department of Wellesley School to stand first in Mathematics, the boys' department in the same school coming second, and the girls' department of Dufferin

coming third. In Grammar, Composition, and Hygiene, the first place is taken by the girls' department of the Dufferin School; the second place is occupied by the girls' department of the Wellesley and Ryerson Schools, and by the boys' department of the Ryerson School, the three being in the branches practically equal. In History and Geography, the first place is again taken by the girls' department of the Dufferin School, followed by the two departments of the Wellesley School. The Ryerson School (girls' department) takes the first place in Reading, Spelling and Derivation, &c., followed by the same department in the Wellesley and Dufferin Schools. In the last group, including Writing, Bookkeeping, and Music, the first place is taken by the girls' department of the Dufferin and Wellesley Schools, which are nearly equal.

The Gold Medal, to be awarded to the pupil in the First Division who takes the highest aggregate marks, has been gained by Jennie Charlton, of the Ryerson School, and the silver medal, for the pupil who takes the next highest aggregate, has been gained by Stella Phillips, of the Dufferin School.

Before proceeding to give the names of those who take scholarships, it is proper to state that the competition for these was restricted, by a regulation of the Collegiate Institute Board, to pupils who had not competed for them, or who had not taken part, as First Division scholars, in the Combined Examination more than once previously; also that six scholarships were to be awarded to the six boys eligible for the competition, and taking the highest places, and six to the six girls meeting these conditions.

With this necessary explanation, the Examiners recommend that scholarships for General Proficiency, and prizes for excellence in special subjects be awarded as follows:

I. SCHOLARSHIPS.

(a) Boys.

| | (a) Boys. | | | |

- 3. Andrew Kitchener, "
- 4. Lillie Brown, """ (Jennie Charlton, ""
- 5. Bella Fraser, " " " Nellie Chandler. " "

A special examination was held in Canadian History and Geography with a view to awarding medals for excellence in these branches. The competition was very close. On careful examination of the papers, it was found that Katie Riddle, of the Dufferin School, stood first, and William Taylor, of the Wellesley School, second. These are, therefore, declared to be the successful winners of the medals. A special examination was also held to decide who should receive the prize so kindly offered by the Rev. Septimus Jones, for excellence in reading. The Examiners report the names of Alice Harding, of the Dufferin School, and Katie Spence, of the Wellesley, for this prize, not finding it possible to distinguish between them.

In concluding this Report, the Examiners have pleasure in bearing testimony to the evidence which the papers submitted to them present of the diligence and fidelity of the teachers, and of the industry and ability of the pupils. Some, no doubt, will be disappointed with the result which it has been their duty to intimate. They can only say that they have done their work with the most resolute endeavor to be both fair and accurate in their judgments of the papers submitted to them, and express the hope that these give in the main a correct indication of the standing of the pupils. They would once more deprecate any except the most cautious inference from these returns as to the capacity or diligence of the teachers, in view of the fact that the ages and advantages of the pupils in the schools brought into competition are by no means the same.

JOHN M. KING,

Chairman of Board of Examiners.

4

TORONTO, July 6, 1883.

Examination Papers.

EXAMINATION PAPERS.

COMBINED EXAMINATION.

ARITHMETIC.

FIRST DIVISION.

- 1. The sum of two numbers is $9\frac{5}{8}$, and their difference is $4\frac{5}{8}$; find the ratio of the numbers.
- 2. Sold goods for \$225.50, and gained thereby $12\frac{3}{4}$ per cent.; how much per cent. would have been gained or lost by selling the same goods for \$187.50?
- 3. What sum of money, put out at 4.5 per cent. per annum interest for 3.6 months, will amount to \$506.75?
- 4. A sold a picture to B, who sold it to C at a profit of 5 per cent., who sold it for \$1,071, thereby gaining 20 per cent.; what did B give for the picture? What gain per cent. was the last price on the first?
- 5. Money is borrowed at 3½ per cent. and the interest is paid at the end of the year: the money is loaned at 5 per cent., and the interest is paid half-yearly, whereby \$200 is gained a year. What sum was borrowed?

6. Simplify
$$\frac{2}{3-\frac{4}{5}} + \frac{3}{4-\frac{5}{6}} \times \frac{1}{\frac{2}{3}-\frac{2}{9}} - \frac{1}{1^{1}/2-\frac{19}{22}} \times \frac{167}{97}$$
$$\frac{3}{2-\frac{1}{4}} + \frac{1}{3-\frac{4}{5}} \times \frac{1}{1^{1}/7-\frac{1}{8}} \times \frac{2}{6^{3}/5-2^{5}/11}$$

- 7. The length of an iron cylindrical vessel, with closed ends, is 3 feet, and its outside circumference is 36 inches, the metal being one inch in thickness. Find its weight when filled with water, iron being $7^{1}/_{9}$ times heavier than water, and water $62\frac{1}{2}$ lbs. per cubic foot.
- 8. A tradesman said, "I sell it for \$100 and make 15 per cent. profit, for it cost me \$85." Was he correct? If not, find the true rate of profit, and also the cost price, in order that it might have been 15 per cent.
- What sum, put out at compound interest for 3 years, at 7 per cent. per annum, will produce, as interest, \$180.03¹²/₂₅?
- 10. The difference between the interest of a certain sum for one year, and the discount on the same sum, due a year hence, at 8 per cent., is \$1; find the sum.

ALGEBRA.

FIRST DIVISION.

- 1. Multiply $(b-c) a^3 + (b^3-c^3) a$ by b + c.
- 2. Add together $\frac{a}{b}$, $\frac{ab}{a^2-b^2}$, $\frac{1}{a+b}$ and $\frac{1}{a-b}$.
- 3. From $2a-3x + \frac{a-x}{a}$ subtract $a 5x + \frac{x-a}{x}$.
- 4. Given $\frac{x-3}{4} 6 \frac{x-1}{5} = \frac{x-5}{3} 8$, to find x.
- 5. $\sqrt{x+1} = \sqrt{x-3} + 2$, to find x.

- 6. An uncle divided among three nephews \$375. To the first he gave four fifths of the sum given to the second, and the third received a fifth part of the second's share more than the second. How much did each receive?
- 7. Given $2x^2 5x = 12$, to find x.

EUCLID.

FIRST DIVISION.

- 1. Define a right angle, a circle, a square.
- 2. If one side of a triangle be produced, the exterior angle is equal to the two interior and opposite angles, and the three interior angles of any triangle are together equal to two right angles.
- 3. To make a parallelogram equal to a given triangle.
- 4. State and prove the 5th proposition of the Second Book.

ENGLISH GRAMMAR AND COMPOSITION.

FIRST DIVISION.

- 1. Define strong verb, mood, completion of predicate, parsing.
- 2. Distinguish between rise and raise, lie and lay, set and sit, lose and loose.
- 3. Analyse the following passage, and parse the words printed in Italics:

Live for to-day! to-morrow's light
To-morrow's cares shall bring to sight.
Go, sleep like closing flowers at night,
And Heaven thy morn will bless.

4. Correct any errors that occur in the following sentences:

Profane swearing is, of all other vices, the least excusable.

A moral and honorable mode of action and thought are enforced as a duty.—Mayhew.

I am one of those who can not describe what I do not see.—
F. H. Russell, LL,D..

Them's them.

After they had went a little ways, they returned back home again; for there is, in fact, no houses whatever on that side of the street.

There seems to be either fewer highly educated women in the United States than in England, or they have less influence.—Spectator.

COMPOSITION.

Write a composition, not more than twenty lines in length, on one of the following subjects:

The Great North-West.

'Tis education forms the common mind; Just as the twig is bent the tree's inclined.

All work and no play makes Jack a dull boy.

SPELLING AND DERIVATION.

FIRST DIVISION.

Correct the words in the following list which are mis-spelled, and give the derivation of the words in italics:

| Mutability | Immortal | Solitude, |
|----------------|----------------|-----------------|
| Pureification, | Comprehension, | Survive, |
| Influence, | Armement, | Soverignty. |
| Embarased, | Impaseble, | Posession, |
| Vernal, | Sedition. | Characturistic. |
| | Simpathy. | |

HISTORY.

FIRST DIVISION.

- 1. In Canadian history, when did the Seven Years' War take place? between what contending parties, and with what results?
- 2. In the history of Canada what events of importance occurred in the following years, respectively: 1791, 1812, 1837, 1867?
- 3. Give the date, the contending parties, and the result of the Battle of Waterloo.
- 4. Give five of the most important events in the reign of Queen Victoria.
 - 5. Name the Prime Ministers during the reign of Victoria.
- 6. Give the leading provisions of the Reform Bills of 1832 and 1867.

- 7. Name four important Bills passed by Mr. Gladstone's Government during his several periods in office, and state their leading provisions.
- 8. When was the Catholic Emancipation Bill passed? When were Jews admitted to Parliament?
- 9. Name the most important wars in which England has been engaged during the last 30 years, and give their causes and results.

GEOGRAPHY.

FIRST DIVISION.

- 1. What do you understand by the earth's axis, and what by its orbit? At what angle is the one situated to the other? What is the direction of the earth's diurnal motion?
- 2. Explain the occurrence of the Seasons, the Equinoxes, and the length of the day and night near the poles.
- 3. To what is a lunar eclipse due, and to what a solar? Why, in view of the fact that the moon goes round the earth in a little over twenty-nine days, are eclipses not more frequent?
- 4. Give the course of the Rhine, and the names of the principal cities on its banks.
- 5. Within what zones are the following places situated: New Guinea, Japan, Cape of Good Hope, Cuba, Lapland?
- 6. In what countries and on what waters are the following places situated: Lyons, Venice, Archangel, Seville, Truro, Amprior, Three Rivers?

- 7. Give the names of the principal cotton, coffee, and tea producing countries of the world.
- 8. Where are the following places situated, and for what are they respectively celebrated: Oxford, Sheffield, Portsmouth, Manchester, Belfast?
- 9. Describe the course and name the tributaries of the St. John River.

BOOK-KEEPING.

FIRST DIVISION.

- 1. What books are used in Double Entry Book-keeping? What is the use of each book?
- 2. Define Trial Balance, Stock-taking, Cash on Hand, Resources, and tell what is shown by the Debtor Side of Bills Payable Account.
- 3. Describe minutely the process of Closing the Ledger Accounts in Double Entry Book-keeping.

HYGIENE.

FIRST AND SECOND DIVISIONS.

- 1. What is respiration? Name the organs of respiration?
- 2. Describe the circulation of the blood. What is the difference between arterial and venous blood, and what the cause of the difference?

- 3. What is the special use of the nervous system? How many pairs of Cranial and how many pairs of Spinal nerves are there?
- 4. In cases of Scarlet Fever, Diptheria or Small-pox, what precautions should be taken to prevent them from spreading?
- 5. Give as many Health Hints as you can in as few words as possible.

MUSIC.

FIRST AND SECOND DIVISIONS.

- 1. Where do the semi-tones occur in the major scale? In the minor scale?
- 2. When one or more sharps are placed in the signature, how do you find the key-note? One or more flats?
 - 3. How is a full chord produced?
- 4. What is the signature in the key of G major? Of D minor?
- 5. Explain the meaning of the following expressions at the beginning of a piece of music: $\frac{2}{2}$, $\frac{3}{8}$, $\frac{2}{4}$, $\frac{6}{8}$.
 - 6. Distinguish between melody and harmony.

ARITHMETIC.

SECOND DIVISION.

1. The sum of two numbers is $9\frac{5}{8}$ and their difference is $4\frac{5}{8}$: find the ratio of the numbers.

- 2. If a certain quantity of provisions will serve 1800 men for 12 weeks, at the rate of 15 oz. a day for each man, how many men would three-fourths of the same stock of provisions maintain for 20 weeks at the rate of 8 oz. a day for each man?
- 3. Sold goods for \$225.50, and gained thereby $12\frac{3}{4}$ per cent.; how much per cent. would have been gained or lost by selling the same goods for \$187.50?
- 4. A house which cost \$3500 lets for \$260 a year; give in a decimal form the rate per cent. per annum of interest which it pays to the owner.
- 5. What sum of money put out at 4.5 per cent. per annum interest for 3.6 months, will amount to \$506.75?
- 6. Find the true discount on £328 13s. 5d., due 3 months hence, at 8 per cent. per annum.
- 7. The length of the sides of a triangular field are 20, 21, and 23 rods; find its area in acres and fraction of an acre.

8— Simplify
$$\frac{\frac{2}{3-\frac{4}{5}} + \frac{3}{4-\frac{5}{6}}}{\frac{3}{2-\frac{1}{4}} + \frac{1}{3-\frac{4}{5}}} \times \frac{\frac{1}{\frac{2}{3}-\frac{2}{9}} - \frac{1}{1^{1}/2-\frac{19}{22}}}{\frac{1}{1^{1}/2-\frac{1}{8}} - \frac{2}{6^{3}/5-2^{5}/11}} \times \frac{167}{97}$$

ALGEBRA.

SECOND DIVISION.

- 1. Multiply $x^2 \frac{1}{2}x + \frac{3}{4}$ by $\frac{1}{3}x + 3$.
- 2. Find the greatest common measure of x^3-y^3 and $x^5-x^3y^2$

3. Reduce
$$a + x + \frac{a^2 + x^2}{a - x}$$
 to a fractional form.

4. Given
$$\frac{x+3}{4} - \frac{x-3}{5} = \frac{x-5}{2} - 2$$
, to find x.

- 5. Given 5 x-10-2x=40+4x-56 to find x.
- 6. Given $\frac{x}{a-b} = \frac{x}{a+b} + 1$, to find x.
- 7. Two persons depart at the same time from London and Edinburgh, and travel till they meet; the one goes 20 miles aday and the other 30. In how many days will they meet, the distance being 400 miles?

EUCLID.

SECOND DIVISION.

- 1. Define a straight line, parallel straight lines, and diameter of a circle; write out the third postulate.
- 2. Write out the enunciations of the 4th, 8th, and 26th propositions, I. Book.
- 3. Straight lines which are parallel to the same straight line are parallel to each other.

ENGLISH GRAMMAR AND COMPOSITION.

SECOND DIVISION.

1. Give the nominative, singular forms of whose, them, your, us, children's; and the objective, singular forms of we, you, who, those, themselves.

- 2. Give the plurals of sergeant-at-arms, beef, sheep, 2, t, beau, synopsis, step-son.
 - 3. Parse the italicised words in the following extract:

Friends, Romans, countrymen, lend me your ears, I come to bury Cæsar, not to praise him, The evil that men do lives after them, The good is oft interred with their bones.

4. Analyse-

On earth she is the truest friend,
That is to man in mercy given;
And when this fleeting life shall end,
She'll live for purer joys in heaven.—On Woman.

5. Correct anything faulty in the following sentences:

The introduction of such beverages as tea and coffee have not been without their effect.—Westminster Review.

Who shall we invite to our party next week? Only they who we have been introduced to.

They knowed we were coming and done their best to prepare for the children's entertainment.

Erected to the memory of John Phillips accidentally shot as a mark of affection by his brother.—Epitaph in an Ulster Church-yard.

COMPOSITION.

Write not more than a dozen lines on one of the following subjects:

Railroads.

The Electric Telegraph.

Snow.

DICTATION AND DERIVATION.

SECOND DIVISION.

- 1. Dictation—V. Reader, page 198, "There"—posterity," and page 199, "Her"—"ambition."
- 2. From what language are the following words derived?—the, atone, dignity, father, adieu.
- 3. Give the roots of the following words and tell to what language each root belongs—childhood, geographical, benediction, disgrace, many, productive, cloister, quantity, hydrogen, beautiful, admirable, Cinque.
 - 4. Define the italicised words in Question 3.
- 5. Give the meaning of the following prefixes and affixes, and one example of the use of each: -est, per-, de-, -ic, -ible.

HISTORY.

SECOND DIVISION.

- 1. When was Canada divided into Upper and Lower? What led to the division?
- 2. What is meant by Confederation? What led to it? When? Who was Governor at the time?
- 3. What events took place in the history of Canada in the years 1812 and 1837?
- 4. Name the Norman Kings of England; who occupied England before the Normans?

- 5. When, and by whom was the Magna Charta signed? What was the most important provision in it?
- 6. Name the Tudor Kings in order. What is the date of the Tudor period?
 - 7. Give the principal events in the reign of Henry VIII?
- 8. What relation was Queen Mary to Queen Elizabeth? In what way did they differ from each other? Give some of the principal events in the reign of each.

GEOGRAPHY.

SECOND DIVISION.

- 1. What are the Tropics? What is the extent in degrees of the Torrid Zone, and to what is the great heat due?
- 2. What is the meaning of the Isothermal line? Why does it not coincide with parallels of Latitude? Why is the mountain cooler than the plain?
- 3. Within what Zones are the following places situated: New Guinea, Japan, Cape of Good Hope, Cuba, Lapland?
- 4. Describe the course of the Ganges, and name the chief cities on its banks.
- 5. Draw the configuration of the coast line of the southern part of the Asiatic Continent, and name the Gulfs and Capes.
- 6. Between what States does the Ohio River flow? Give the name of the city at its junction with the Mississippi.

- 7. What countries in Africa border on the Red Sea?
- 8. Give the situation of the following places: Bagdad, Peshawur, Tripoli, Canton, Grahamstown, Erzeroum, Moncton, Nanaimo.

BOOK-KEEPING.

SECOND DIVISION.

- 1. Define Book-keeping, Asset, Liability, Bill-Stamp, Account.
- 2. Write a Bill Receivable, due three months from to-day, in full payment of Mr. C's Account of \$1200.
- 3. Write the Ledger Entries for the following transactions on June 8th.
 - (a) Mr. A pays us Cash \$400.00
 - (b) We buy 20 doz. Corn Brooms @ \$4.00 from James Hunter & Co.
 - (c) George Denison & Co. buy 100 lbs. of Sugar @ 12c. from us.
 - (d) George Denison & Co. give their note at 60 days in payment for (c).

HYGIENE.

FIRST AND SECOND DIVISIONS.

- 1. What is respiration? Name the organs of respiration?
- 2. Describe the circulation of the blood. What is the difference between arterial and venous blood, and what the cause of the difference?

- 3. What is the special use of the nervous system? How many pairs of Cranial and how many pairs of Spinal nerves are there?
- 4. In cases of Scarlet Fever, Diptheria or Small-pox, what precautions should be taken to prevent them from spreading?
- 5. Give as many Health Hints as you can in as few words as possible.

ARITHMETIC.

THIRD DIVISION.

1. Find the amount of the following bill:

3½ cwt. of Coal at 21 cts. per cwt.

13 lbs. of Cheese at $15\frac{1}{2}$ cts. per lb.

 $2\frac{3}{4}$ lbs. of tea at 78 cts. per lb.

17 lbs. of sugar at 11 cts. per lb.

8½ yds. flannel at 71 cts. per yd.

29 yds. Calico at $21\frac{1}{2}$ cts. per yd.

- 2. £28 4s. is divided among 18 men and a certain number of women; each man gets £1 3s. 6d., and each woman 15s. 8d.; find the number of women.
- 3. Reduce $\frac{3\frac{1}{9}}{1\frac{1}{13}}$ of $\left\{\frac{19}{20}$ of £1— $\frac{7}{48}$ of 1s. $\right\}$ to the fraction of a moidore. (A moidore=27s.)
- 4. If a tradesman with a capital of \$2,000 gain \$90 in $3\frac{1}{2}$ months, in what time may be expect to gain \$20.25, with a capital of \$815?

- 5. If each of the hundred pages of a book is to contain 34 lines of print, with an average of $11\frac{1}{2}$ words in each line, and 4 letters in each word, what will be the cost of printing the book at the rate of $\frac{1}{4}$ d. per 16 letters?
- 6. Sold goods for \$225.50, and gained thereby $12\frac{3}{4}$ per cent.; how much per cent. would have been gained or lost by selling the same goods for \$187.50?
 - 7. Defiue a rectangle, and give the rule for finding its area.

ALGEBRA.

THIRD DIVISION.

- 1. Find the value of $a^4-b^4+a^2b^2$, when $a=\sqrt{2}$, and $b=\sqrt{3}$.
 - 2. Find the difference between a-(x-a) and x-(a-x).
- 3. From a x (x 2a) + (2a x) subtract a 2x (2a x) + (x 2a).
 - 4. Multiply $3a^2$ — $6ay + 3y^2 by <math>2a + 2y$.
 - 5. Divide $4a^2 8ax + 4x^2 by 2a 2x$.
 - 6. Divide $6x^4$ —96 by 3x—6.

ENGLISH GRAMMAR AND COMPOSITION.

THIRD DIVISION.

- 1. Define tense, preposition, transitive verb, gender.
- 2. Give the singular and the plural possessives of man, lady, scholar, attorney; the past tense and the present and past participles of fall, lie, fly, loose, lay, lose.

- 3. Of the following adjectives compare those that admit of comparison: near, happy, beautiful, perpendicular. old, eternal.
- 4. Analyse the following sentences, and parse the words in italics.

The sun rose pleasantly over the scene that lay before us.

The sandy table-land which fills the centre of the peninsula was dotted with encampments.

Correct anything faulty in the following sentences:

Them that studies grammar talk no better than us.

My mother gave me these here pictures.

They both done the work pretty good, and feel awful jolly.

He hasn't his lesson I don't believe.

Have either of you a pen?

COMPOSITION.

Write not more than ten lines on one of the following subjects :

Railroads.

The Electric Telegraph.

Snow.

SPELLING AND DERIVATION.

THIRD DIVISION.

Write from dictation the passage on page 275, beginning
 On the," and ending "space."

- 2. Correct the errors, if any, in the following sentences:
 - (a) They were white below, and higher up became dark, so so as to simulate smoke very closly.
 - (b) The cells were as dreary and comfortless there as in the more accessable ones below.
 - (c) But this brief interval of repose was followed by an increased degree of irritation and fury.
- 3. Derive the following words and give the meaning of the roots, and, when possible, of the prefixes and affixes.

 40

| Graceful |
|------------|
| Symphonies |
| Divine |
| Instant |
| Brilliant |
| |

HISTORY.

THIRD DIVISION.

- 1. Give the name and date of the battle fought when the Normans gained possession of England. Who occupied England before the Norman Conquest?
- 2. When was the Magna Charta signed, and what was its most important provision?
 - 3. When had the Reformation its beginning in England?
- 4. What great civil revolution took place during the Stuart Period?

- 5. What relation was Queen Elizabeth to Queen Mary? In what way did they differ from each other? Give some of the principal events in the reign of each.
- 6. In whose reign did the American States become separated from England?
- 7. How long has Queen Victoria been reigning? What wars have taken place during her reign?

GEOGRAPHY.

THIRD DIVISION.

- 1. Give the names of the counties bordering the St. Lawrence on the North Shore, and up to Quebec.
- 2. Describe the course of the Saguenay and of the St. Maurice Rivers.
- 3. What islands lie immediately to the east of New Brunswick and Nova Scotia?
 - 4. Sketch roughly a map of Nova Scotia.
- 5. What countries border the Persian Gulf, and what is the capital of each?
- 6 What countries of Africa border on the Mediterranean? What are the principal exports from the southern part of the Continent?
- 7. In what groups are the following islands: New Caledonia, Hawaii, Erromango and Samoa?

- 8. Where are the following places situated: New Westminster, Pictou, Madagascar, Liberia, Tasmania, Melbourne?
- 9. Give, as nearly as you can, the latitudes of Toronto, New York and London.

BOOK-KEEPING.

THIRD DIVISION.

- 1. What is meant by: A Cash Transaction, An Account, Mr. A.'s Account?
- 2. Mr. A gives his son a dollar on Saturday night, June 16th, and tells him that he wants an account at the end of the next week of what he has spent every day. Write the account.
- 3. Put the following in the form of an account and receipt it:

 —Mrs. C buys from her butcher, James Dent, on June 4th, 5

 Ths. Roast Beef @ 18c.; on June 5th, 1 Leg Lamb (4½ lbs.) @

 20c.; on June 8th, 1 Bag Potatoes, \$1,00; 3½ lbs. Porter House

 Steak @ 16c.

HYGIENE.

THIRD AND FOURTH DIVISIONS.

- 1. What are the uses of the stomach, heart and lungs?
- 2. Describe the circulation of the blood, and explain in what way it comes in contact with the air we breathe.
- 3. Would you advise, from a health point of view, when sleeping in a room, to burn the lamp all night, keep the windows closed, and the door shut? Give your reasons.

- 4. Is it good to bathe in cold water when over-heated? Why?
- 5. When reading by lamp-light, in what position is it best to place the lamp?
- 6. Give as many Health hints as you can in as few words as possible.

MUSIC.

THIRD AND FOURTH DIVISIONS.

- 1. Name the notes in the ordinary diatonic scale; first by letters and second by syllables.
- 2. What is the use of sharps and flats at the beginning of the staff? What are accidentals?
 - 3. Define the terms clef, bar, slur, ledger lines.
- 4. Name the characters called notes, and give their respective values in respect to time.
 - 5. What is the effact of a dot after a note?
- 6. What is the key-note when there is one sharp in the signature? When there are two sharps? When there is one flat.

ARITHMETIC.

FOURTH DIVISION.

- 1. Remainder is 542962567, quotient 5771, divisor 687637943; find dividend.
- 2. The price of a silver snuff box was £2 $^{39}/_{40}$; find its weight at the rate of 6.75s. for 1.125 oz.

- 3. A wheel makes 11,500 turns in $5\frac{3}{4}$ hours; how many does i make in one hour?
- 4. If 30 horses eat $25 \, {}^5/_{7}$ bushels of oats in 6 days, how much will one horse eat in a week at the same rate of consumption.
- 5. What number must be subtracted from $560\frac{5}{8}$ to leave a remainder equal to the sum of $126^{-1}/_7$ and $240\frac{3}{4}$?
 - 6. Simplify $2^{2}/_{5}$ of $2_{4/7}$ of $2^{2}/_{11} \times 1_{7/15}$ of $26\frac{1}{4} \div 21^{3}/_{5}$.

ENGLISH GRAMMAR AND COMPOSITION.

FOURTH DIVISION.

- 1. When should capital letters be used?
- 2. Define syllable, diphthong ; and give two examples of w and y used as consonants.
- 3. Give the plurals of larch, monarch, half; singular of furies, beeves, dice; past tense and past participle of sell, draw, forsake; comparative and superlative of evil, steady, beautiful.
 - 4. Parse the following:

Give me the letters that you received at the post-office.

5. Separate each of the following sentences into subject and predicate.

Wild and fast blew the blast.

Famous was the island fisherman.

Never for a moment did the heroes falter at their work.

6. Form two simple and two compound sentences about water.

SPELLING AND DERIVATION.

FOURTH DIVISION .--- JUNIOR.

Correct the words in the following list, which are mis-spelled, and give the derivation of the words in italics:

| Ansient, | Indicating, | Domestic, |
|-------------|-------------|-------------|
| Obtained, | Colonies, | Anihilate, |
| Simpathy, | Embarassed, | Settelment, |
| Soverignty, | Impasable. | |

HISTORY.

FOURTH DIVISION.

- 1. When did the British obtain possession of Canada? What Indian tribes and what nation had occupied Canada before the British?
- 2. When was Canada divided into Upper and Lower? What led to the division?
- 3. What is meant by Confederation? When did it take place? What Act contains the basis of Confederation?
- 4. Who was the governor at the time of Confederation? Name his successors to the present.
 - 5. Who were the United Empire Loyalists?
- 6. What events of importance took place in the years 1812 and 1837?
- 7. Who were the contracting parties in the Washington Treaty, and what questions were settled?

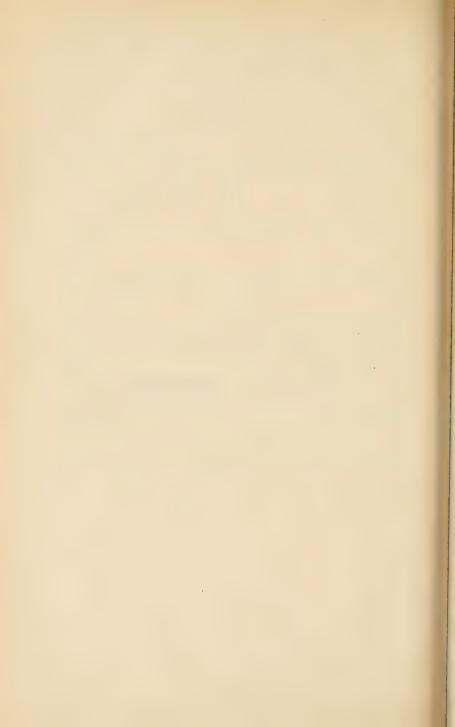

GEOGRAPHY.

FOURTH DIVISION.

- 1. Give the situation of the following mountain ranges: The Caucasus, the Apennines, the Pyrenees and the Carpathian.
 - 2. Give the boundaries of France.
- 3. Give the course of the Danube, and the principal cities on its banks.
- 4. Give the principal rivers of England which flow into the German Ocean, and give the name of one city on each.
- 5. Give the names of the four provinces into which Ireland is divided, and state within which each of the following places is situated: Armagh, Limerick, Galway, Kilkenny and Londonderry.
- 6. Give the names and describe the courses of the three largest rivers of South America which flow into the Atlantic Ocean.
- 7. Give the situation of the following places: Valparaiso, Prague, Dresden, Florence, Munich, Bristol, Inverness, Leeds.

Anspector's Report.

INSPECTOR'S ANNUAL REPORT.

To the Board of Public School Trustees of the City of Toronto:

GENTLEMEN.

In accordance with a Resolution of your honorable Board, I respectfully submit the twenty-fifth Annual Report of the Schools under your charge.

Appended to the Report will be found Statistical Tables which give in detail all important particulars relating to teachers, pupils, attendance, absenteeism, tardiness, studies pursued, cost of maintenance, &c.

ATTENDANCE.

The total number of pupils registered during the year was 17,579. Last year it was 15,307.

The average daily attendance was 11,758. Last year it was 10,111.

699 pupils attend school less than 20 days.

| 1569 | 6.6 | 66 | 66 | between | 20 | and | 50 | days. |
|------|-----|-----|-----|---------|-----|-----|-------------|-------|
| 3706 | 66 | 6.6 | 4.6 | 6.6 | 50 | " | 100 | 4.6 |
| 3066 | 6 6 | 4.6 | 4.6 | " 1 | 00 | 6.6 | 1 50 | 44 |
| 8539 | 6.6 | 66 | 6.6 | 44 | 150 | 6.6 | 200 | |

The number who attended school for over 100 days is 10,050, or more than 66 per cent. of the total registered number.

The most correct idea of the relation of the average to the Registered Attendance is obtained by comparing the average of Monthly Averages with the average of Monthly Registered Numbers.

The average of Monthly Registered Numbers was 13,281. This shows an increase compared with last year of 2,090, (See Table A.)

The average of Monthly Average Numbers was 11,681. This shows an increase of 1,681 when compared with the corresponding number of last year. (See Table B..)

The average of Monthly Averages was 88 per cent. of the average of Monthly Registered Numbers.

The best average for any month in the year was 91.3 the average for December.

The largest number was registered in October, 14,124, and the smallest number in February, 12,067.

The comparatively large number who attend school for less than 100 days can be easily accounted for, when it is remembered that most of the scholars who leave school, do so at the close of the first term. The report would appear more favorable if the year closed in July instead of December. The following statement shows the Average Registered Number in each School during the year:—

| ber in each pencor attring | one jear. | | |
|----------------------------|--------------------|---------------|-----------------|
| Schools. | Average | No. of | Average |
| Dufferin | Registered No. 703 | Teachers. | per Teacher. 59 |

| Chestnut Street | | 1 | 78 |
| Cottingham Street | | $\frac{1}{2}$ | 63 |
| * This is the ettendance | | | |

^{*} This is the attendance since the enlargement of these schools.

ATTENDANCE IN THE VARIOUS CLASSES.

The registered number in attendance during the year in the different grades was as follows:—

| First H | Bool | k | 7,359 |
|---------|------|---|-------|
| Second | 6.6 | | 4,272 |
| Third | 6.6 | | 3,571 |
| Fourth | 66 | | 1,636 |
| Fifth | 44 | | 741 |

Of course, it should be remembered that large numbers of those who began the year, or who entered during the year in the First Book, were afterwards promoted to the Second Book. The same remark is true concerning the other classes.

I am glad to have to report that the number of pupils in the Third and Fourth Book classes has increased during the year very considerably. This increase will no doubt continue and a larger number of Third and Fourth Book classes will be required in the future. Two causes lead to this desirable result. The pupils, especially the girls remain longer at School than formerly, and the work of the lower classes is now accomplished in a shorter time.

LATENESS.

The high standard in the punctuality of the pupils has continued during 1884. The total number of cases of lateness in the whole year amounts to less than one-half of the registered number of pupils,

The following table shows the number of cases during the past eleven years:

| Date. | Average Attendance. | Cases of Lateness. |
|----------------|------------------------|-----------------------|
| 1874 | 4,814 | 69,456 |
| 1875 | 6,386 | 65,364 |
| 1876 | 5,976 | 31,486 |
| 1877 | 6,860 | 15,272 |
| 1878 | 7,467 | 7,474 |
| 1879 | 8,144 | 6,615 |
| 1880 | 8,215 | 5,967 |
| 1881 | 8,409 | 5,980 |
| 1882 | 8,845 | 6,735 |
| 1883 | 10,111 | 7,631 |
| 1884 | 11,758 | 10,181 |
| (See Table D.) | | |

CERTIFICATES OF HONOR.

Certificates of Honor are awarded at the Christmas Vacation to such pupils only as have not been once absent or late, and whose conduct has been uniformly good, unless the absence or lateness shall have been occasioned by sickness of not more than three weeks' continuance, to be certified in writing by the pupils' parents or guardians.

These certificates are of two grades, and named respectively First Honor Certificates, and, Second Honor Certificates.

The First Honor Certificates are awarded to such pupils as have fulfilled the above-named conditions for two consecutive sessions.

The Second Honor Certificates are awarded to such pupils as have conformed to the said rules for one session during the year.

The following statement shows the number of Certificates given in the various schools at the close of 1884.

| G. | First | Second | |
|----------------|--------|--------|--------|
| Schools. | Honor. | Honor. | Total. |
| Dufferin | 181 | 256 | 437 |
| Wellesley | 210 | 349 | 559 |
| Rye son | 118 | 174 | 292 |

| Howard | 0 | 17 | 17 |
| | | | |
| Total | 1,913 | 3,267 | 5,180 |

TEACHERS.

There were 227 Teachers in the employ of the Board at the close of the year, exclusive of the special Teachers in Music, Drawing and Drill and Calisthenics.

There are 29 Male and 176 Female Teachers employed.

They hold Certificates as follows:-

| First Class Provincial | 52 |
|--------------------------|----|
| First Class County Board | 13 |
| Second Class Provincial1 | 55 |
| Third Class | 2 |
| Kindergarten | 5 |

THE KINDERGARTEN.

An additional Kindergarten was opened in September in Niagara St. School. Owing to the fact that the young ladies who were available for the position of Kindergartner had only been one year in training, it was decided to place two of them in each Kindergarten, with Miss Marean as Superintendent of both Kindergartens. Miss Louisa Currie and Miss Bruce Nudel were placed in charge in Victoria St., and Miss Carrie Lawson and Miss Edith Dawkins in Niagara St. The arrangement has given good satisfaction. There were seven volunteer assistants in addition to the above staff, who were engaged in studying the system, and who gave their services free in return for the training they received. In addition to the practice obtained in the Kindergartens all the young ladies engaged in them, both paid assistants and volunteers attended lectures during three afternoons each week, to receive instruction from Miss Marean in the philosophical principles on which the Kindergarten is founded and the methods by which these principles are practically developed and applied in the Kindergarten.

Miss Marean also gave lessons every Wednesday afternoon during the first half of the year to the teachers in the Primary Classes from all the schools. These lessons continue to be given to the young ladies in our City Model School who are being trained to be our teachers in the near future.

It is much too soon to begin to count the results of the establishment of the Kindergarten in our schools. The Kindergarten is not, as many people still imagine it to be, a magic plan for teaching reading, spelling, writing, &c. There is no attempt made in the Kindergarten to teach the ordinary subjects of the school programme, with the exception of drawing, which is one of the Kindergarten occupations, introduced with the double aim of training the hand, and cultivating the intellect. The chief aim of the Kindergarten so far as it relates to the mind, is to qualify the children for the ready and accurate acquisition of knowledge, instead of merely communicating a certain amount of information. It must be borne in mind, however, that the Kindergarten development is not confined to the mind. It includes the training of the whole being, and devotes specific attention to moral, physical, social and industrial education in addition to intellectual culture

In estimating the influence of the Kindergarten it must fairly be borne in mind:—

- 1. That immediate educational effects are not of such importance as the ultimate results upon character.
- 2. That to test the influence of Kindergarten training even on the career of pupils in school, it will be necessary to wait until those who have had a Kindergarten training have passed through all the classes in the school course.
- 3. That in establishing the system at first the assistants are not thoroughly trained.

Where the system has been in existence for a sufficient period, the results have been most satisfactory. Kindergarten pupils when promoted to the higher classes are found to make the most rapid advancement in their studies, to have the best trained powers of observation, to be most fully qualified to deal with new subjects, and to be most easily controlled.

In our own city the few pupils who have passed from the Kindergarten to the Public School classes are doing exceedingly well. One primary teacher reports that she "would be willing to teach for less salary, if all her pupils had been previously trained in a Kindergarten." It is too soon, however, to form definite conclusions based upon our own experience in Toronto. Personally I do not regard the Kindergarten as an experiment. I have perfect faith in the soundness of its underlying philosphy and in the practical means devised for the exposition of its principles in the proper training of young children,

SCHOOL ACCOMMODATION.

The following additional accommodation was provided in 1884:

- 1. Two new wards, St. Mathew's and St. Mark's were added to the City. In the former there were two school buildings, one on Bolton Street containing four rooms, and the other on Leslie Street containing one room. In St. Mark's ward there were two school buildings, one on Mabel Street containing two rooms, and the other on Howard Street containing one room. The school on Leslie Street was divided by a partition during the mid-summer vacation so as to make it accommodate two classes.
- 2. A new school containing four rooms was erected in St. Stephen's ward, on Dewson Street, at a cost of \$7,106.50, exclusive of the site.

- 3. Victoria Street was re-modelled and enlarged by the addition of four rooms at a cost of \$9,476.30. It now contains twelve rooms.
- 4. Borden Street School was enlarged from a four to an eight room school, at a cost of \$6,662.25.
- 5. The three rooms in the third flat of the Elizabeth Street School were completed and prepared for occupation, at a cost of \$1,648.62.
- 6. The Niagara Street School was enlarged by the addition of two rooms, at a cost of \$3,781.94.

PROMOTION OF TEACHERS.

During the year the Board took action in accordance with the recommendation contained in my last report, and rescinded the rule preventing the promotion of teachers holding Second Class Certificates.

I strongly recommend that the system of payment of salaries, in accordance with the grades taught, be given up, and payment by length of service adopted in its stead. My reasons for suggesting this change are:

1. It will prevent unnecessary changes in the staff. In September 1884 there were over seventy promotions and transfers made, although the real number of vacancies on the staff was comparatively small. Nearly one-third of the teachers were removed from one School to another during the year, and more than one-third changed their classes. The evil effects of so many changes will at once be apparent to all. It is especially to be deplored in the case of head teachers.

- 2. It will enable the Board to classify the teachers according to their special talents. Undoubtedly the most difficult classes to teach and train are the primary classes. Some teachers who are well adapted for work in higher classes never attain to superior excellence in primary work. By requiring all teachers to begin with the lowest classes, we often place those who know least about teaching in the most important positions. It has frequently occurred during the last few years, that teachers who have shown great aptitude for success in junior classes, and who have become proficient in the best methods of teaching little children, have been promoted just when they were really qualified for performing their duties in the most effective manner; and novices appointed in their places.
- 3. It will enable the trustees to arrange the salaries of the teachers on a more simple and more satisfactory basis. I believe that the Board should adopt as a guiding principle the payment of slightly reduced salaries at first, and that the amount thus saved should be paid to the teachers who have been longer in the service.

NIGHT SCHOOLS.

The total number registered during the term in each School was as follows:

| Schools. | Males. | Females. | Total. |
|-------------------|--------|----------|--------|
| Parliament Street | 282 | 142 | 424 |
| Elizabeth " | 195 | 70 | 265 |
| Niagara " | 183 | 68 | 251 |
| Bathurst " | . 206 | 75 | 281 |
| Jesse Ketchum | 136 | 19 | 155 |
| Mabel Street | 48 | | 48 |
| | | | |
| Total | 1,050 | 374 | 1,424 |

The average attendance for the entire term was.

| Schools. | Males. | Females. | Total. |
|-------------------|--------|----------|--------|
| Parliament Street | 86 | 69 | 155 |
| Elizabeth " | 66 | 27 | 93 |
| Niagara " | 40 | . 25 | 65 |
| Bathurst " | 88 | 33 | 121 |
| Jesse Ketchum | 50 | 10 | 60 |
| Mabel Street | 18 | | 18 |
| | | | |
| Total | 348 | 164 | 512 |

The average attendance for each month for the term was:

| Schools. | Nov | ember. | Dec | ember. | Jan | nuary. | Feb | ruary. |
|---------------|--------|----------|--------|----------|--------|----------|--------|----------|
| | Males. | Females. | Males. | Females. | Males. | Females. | Males. | Females. |
| Parliament St | . 118 | 61 | 98 | 72 | 72 | 59 | 56 | 50 |
| Elizabeth St. | 73 | 35 | 94 | 29 | 54 | 22 | 42 | 22 . |
| Niagara St. | 82 | 25 | 55 | 26 | 38 | 26 | 24 | 21 |
| Bathurst St. | 123 | 49 | 105 | 40 | 68 | 24 | 53 | 20 |
| Jesse Ketchun | n. 84 | 13 | 52 | 10 | 29 | 9 | 37 | 8 |
| Mabel St. | | | | | 23 | | 13 | |
| | 480 | 183 | 404 | 177 | 284 | 140 | 225 | 121 |

Many pupils, both male and female, petitioned to have the Schools kept open during March. This the Committee granted.

The attendance was:

| School | LS. | Males. | Females. |
|------------|--------|--------|----------|
| Parliament | Street | 33 | 26 |
| Elizabeth | | 24 | 19 |
| Niagara | | | 19 |
| Bathurst | | 28 | 18 |
| Mabel | | 6 | |
| | | | |
| Total | | 91 | 82 |

THE CITY MODEL SCHOOL.

For the session 1884--85 the attendance at the City Model School has been larger than at any previous time. The class includes twenty young ladies. They practise for a year in the following Schools: Victoria Street, Wellesley, Church Street, Phœbe Street, Bathurst Street, Winchester Street, Hope Street, George Street, Parliament Street, Rose Avenue, and Dewson Street Schools.

They attend lectures on Methods of Teaching, Discipline, School Management, Kindergarten Work, &c., on Monday, Tuesday, Wednesday, and Thursday afternoons. They receive in addition to the above professional training, special instruction in Elocution, Chemistry, and Mental Arithmetic.

After leaving our City Model School the students have to pass through the Normal School, in order to complete their professional training for Second Class Certificates.

I recommend the Board to give the graduates of our own training institution a preference over other ladies, whatever may be the Grade of their Certificates. I do so because:

- 1. Those who graduate from our own class are residents of the City. Most, if not all of them, are the daughters of ratepayers, and in most cases they have received their education in our own Public Schools, and afterwards in the Toronto Collegiate Institute to which many of them were sent as "scholarship" pupils.
- 2. Their observation and practice in our Schools during a whole year qualify them in the best possible way for successful teaching in accordance with the methods pursued in our Schools.

DRAWING.

Owing to the facts that no drawing books were adopted by the Board and that Mr. O'Brien, Superintendent of Drawing, believed it to be impracticable to introduce Drawing satisfactorily in the upper classes without having Drawing Books in the hands of the pupils, little has been done during the year in this subject,

except in the lower classes, where the teachers continue to use designing as one of the best means for developing the intellectual powers, as well as for training the eye and hand to work in harmony. I hope for better results in the higher classes in the near future, but I have no faith in any plan for teaching this subject, in which the greater part of the work of teaching is not done by the regular teachers.

MUSIC.

The progress in this subject is on the whole not so satisfactory as I could wish it to be. In many of the primary classes the work is as well done as could reasonably be expected, and even in the first book classes whose teachers have been trained in Toronto, the pupils can not only sing music at sight, written in the natural scale and in a limited register, but they can write music as dictated or sung, within the limit prescribed for their grade, and can sing individually (as they read individually) what they have written, from their slates. Very much of the success in the lower classes in teaching this subject is due to the able training of Miss Agnes McIntyre of Phœbe Street School. This lady has freely rendered very great service by proving to our primary teachers and the students in our Model School that music can be taught simply and progressively as any other subject can.

The Children's Concert in connection with the Centennial Celebration was the greatest musical event in connection with the history of the schools. A chorus of over six hundred children from the Public and Separate Schools sang under the direction of Mr. E. W. Schuch. The Concert was a most satisfactory one in every respect, and I trust that a similar Concert may in future be one of the annual events in connection with the closing exercises in our schools.

TORONTO TEACHERS' ASSOCIATION.

The First Semi-Annual Meeting of this Association, for 1884, will be held on Friday and Saturday, February 29th, and March 1st, in the S. S. Building of Carlton Street Methodist Church (near Yonge Street).

Programme.—Friday, February 29th.

- 9.00— 9.15...Calling Roll of Teachers.
- 9,15— 9.30...Reading Minutes and Communications.
- 9.30—10.15...Mental Arithmetic. Mr. J. L. Hughes.
- 10.15—11.00...Teaching Writing to Senior Classes. Mr. J. T. SLATER.
- 11.00—11.05...Quartette, "How Fair the Maiden," by Members of the Association.
- 11.05—11.10...Recess.
- 11.10—12.00...How to direct the Private Reading of Scholars.

 Miss A. Freeman.
 - 2.00— 2.45...Object Lessons. Mr. J. L. Hughes,
 - 2.45— 3.45...Teaching of Hygiene. Mr. J. A, Wismer.
 - 3.45— 3.50...Quartette, "Evening Bells," by Members of the Association.
 - 3.50-4.00... Recess.
 - 4.00— 5.00... Monthly Report to Inspector. Mr. J. Boddy.

SATURDAY, MARCH 1ST.

- 9.00— 9.15...Calling Roll of Teachers.
- 9.15—10.00...Proposed change in the manner of conducting the business of the Association. Mr. J. L. Hughes
- 10.00—10.30...Election of Officers.
- 10.30—10.40...Treasurer's Report.
- 10.40—11.40...Reports of Committees.
- 11.40—12.30...General Business.

It was agreed at this meeting that it would be much better for the Association to meet by grades once a year than to hold united Conventions during each half year. The reasons for adopting this course were:

1. When all the teachers of the city are present it is quite impossible for more than a very small percentage of them to take any part in the discussion of the subjects laid before the association. As individual development depends chiefly on individual participation and effort the best results are not attained by meeting in full convention.

- 2. That all the teachers in each grade could meet in a school to be named by the Executive Committee to witness the regular teaching of the class. It was felt that more benefit would result from this course than from theoretical discussions.
- 3. By witnessing a practical illustration of the specific work of their own grade the teachers would be able to obtain an insight into the best methods of teaching the subjects which they have to teach themselves.
- 4. The same methods should not be followed in teaching the same subjects to pupils of different ages, hence it is a decided advantage for teachers to direct their attention not only to the work of their own classes, but to the consideration of the best methods of awakening and training the minds of pupils of the same age as those with which they have to deal.

In accordance with the plan adopted Meetings were held during the month of October as follows:

| Meetings | Grade. | Class. | School. | | Date. | |
|----------|----------|-------------------|--------------|-------|-----------|------|
| 1st. | 1 and 2. | Mr. McAllister's. | Ryerson. | Mon. | Oct. 6th, | 1884 |
| 2d. | 4. | Mr. Clark's. | Phœbe St. | Fri. | " 10th | , 66 |
| 3d. | 6. | Miss Sim's. | Wellesley. | Mon. | " 13th | 46 |
| 4th. | 5. | Mr. Cassidy's. | Louisa St. | Tue. | " 14th | 66 |
| 5th. | 8. | Mrs. Warburton's | Bathurst St. | Fri. | " 17th | , 66 |
| 6th. | 7. | Miss Martin's. | Winch'r St. | Mon. | " 20th | , 66 |
| 7th. | 9. | Miss Niven's. | Bathurst St. | Tue. | " 21st, | 66 |
| 8th. | 9. | Miss Tomlinson's. | Parlm't St. | Fri. | " 24th | , 66 |
| 9th. | 3, | Miss Kennedy's. | Dufferin St. | Mon. | " 27th | , 66 |
| 10th. | 10. | Miss Berney's. | Palace St. | Tue. | " 28th | , 66 |
| 11th. | 10. | Miss Fortune's. | Phœbe St. | Thur. | . " 20th | , 46 |
| 12th. | 10. | Miss Jones'. | Hope St. | Fri. | " 31st | , " |

The forenoon in each case was spent in observing the work of teaching by the regular teacher of the class. In the afternoon the section organized under the leadership of the Inspector, and proceeded to a critical consideration of the work of the morning. The details of organization, management, discipline, and methods of teaching as practised in the class visited were considered; the teachers present reported their own plans and methods for doing similar work; and resolutions were passed embodying the opinions of the section regarding the various subjects brought before them.

The numbers in attendance being comparatively small, the teachers had very little hesitation in joining freely in the discussions.

It was unanimously agreed that the new plan of meeting in Sectional Conventions by grades was much superior to the ordinary meetings of the Association. More work was done; it was of a more practical kind than could possibly be done at a Convention of the whole Association; and all the teachers took part individually in the work. Another benefit was the opportunity afforded to the teachers of becoming acquainted with those associated with them in teaching corresponding classes. This cannot fail to aid in producing a decided improvement in the professional spirit among the teachers as a class.

On November 1st., the full Association met in the Sunday School Building of the Carlton Street Methodist Church, to receive reports from the various sections. The reports having been read, they were referred to the Executive Committee with instructions to consolidate the suggestions into one report to be presented for consideration at the first meeting in 1885.

Many very valuable recommendations were made which will undoubtedly prove of great service to the teachers, and will be of decided advantage to the schools.

The officers of the Association for 1884, were:

President—Mr. S. McAllister. Vice-President—Mr. R. W. Doan. Secretary-Treasurer—Mr. R. McCausland.

MANAGING COMMITTEE.

Mr. W. J. Hendry.
Mr. W. Cassidy.
Mr. N. McEachren, (Col. Instructor.)
Miss E. A. Williams.
Mrs. J. S. Arthurs.
Mr. J. L. HUGHES, Ex-Officio.

PROGRESS OF THE PUBLIC SCHOOLS.

Table E gives a comparative statement of various items relating to the Schools since 1844. It will be seen by reference to it, that the increase in the attendance at our schools has been very rapid.

| In | 1864 ti | he average | registered | No. | was 3,121, | the daily | attendance, | 2,400 |
|-----|---------|------------|------------|-----|------------|-----------|-------------|--------|
| 4.6 | 1874 | 66 | 6.6 | 6.6 | 5,924, | 66 | 6.6 | 4,814 |
| 6.6 | 1884 | 6.6 | 6.6 | 6.6 | 13,281, | 4.6 | 66 | 11,758 |

The Average Attendance has thus been considerably more than doubled during the past ten years.

Respectfully submitted,

JAMES HUGHES,

Public School Inspector.

Examiners' Report.

REPORT OF EXAMINERS.

The Examiners have the honor to report that on the 17th and and 18th of June they examined the pupils selected from the four highest divisions of the City Public Schools, numbering in all 280, being 13 in excess of the number sent up last year. The Examinations were conducted in the Ryerson and Dufferin Schools, and were throughout in writing, with of course the single exception of reading. The following is submitted as the result of a careful scrutiny and comparison of the papers handed in.

I. FOURTH DIVISION.

The pupils of this, the lowest Division, taking part in the Combined Examinations numbered 70. They were taken from the Fourth Divisions of the Dufferin, Wellesley and Ryerson Schools; five boys and five girls from each, and five pupils each from John St., Winchester St., Victoria St., Church St., Hope St., Phœbe St., Jesse Ketchum and Park Schools. examined in the following subjects:-Reading, Spelling and Derivations, Writing, Arithmetic, History, Geography, Hygiene and Music. Including all the subjects of examination, the boys department in the Wellesley School takes the first place; the boys of the Ryerson School, second; the girls of Wellesley School, third, and the pupils of Victoria Street School, fourth. In all the Divisions the highest prizes are given for general proficiency, and the recipients of these prizes are not permitted to take prizes, also for proficiency in the separate branches of study. The Examiners recommend that prizes for General Proficiency in this Division be presented to the following:

- 1. Minnie Newcombe, John Street School.
- 2. Thomas Kelly, Victoria " "
- 3. Joseph Meek, Ryerson "
- 4. Emily Whiton, Wellesley "
- 5. May Allison, Ryerson "

Taking the subjects in separate groups, the Examiners find that in this Division the highest excellence in Arithmetic was shown by the pupils of Hope Street School followed very closely by the girls of the Wellesley School, the boys of Wellesley taking third place. In Grammar and Hygiene the pupils of Victoria Street School stand first, those of Phæbe Street, second, the girls of Wellesley School, third, and the boys of the same School, tourth. In History and Geography the boys of Wellesley stand first, the girls of Dufferin, second, and the girls of Wellesley third. In Reading, Spelling and Derivations the pupils of Victoria Street School took first place, the girls of Dufferin, second, and the boys of Wellesley third. In Writing and Music the Dufferin girls come first, the Wellesley girls, second, followed by the pupils of Phæbe Street and Victoria Street Schools.

The Examiners recommend that prizes for proficiency in the subjects specified be given to the following:

ARITHMETIC.

| 1st P | rize. | Inez McPherson, Wellesley Se | chool |
|-------|-------|------------------------------|--------|
| 2nd | 6.6 | Augustus Middleton, Ryerson | School |
| 3rd | 66 | Isidore McFarlane, Phæbe St. | |

II. THIRD DIVISION.

Eighty pupils presented themselves for examination in this Division, ten boys and ten girls each from Dufferin, Wellesley and Ryerson Schools, and ten pupils each from John Street and Jesse Ketchum Schools. They were examined in the same subjects as the Fourth Division, with the addition of Algebra and Book-keeping. In this Division, taking all the subjects together. the girls of the Wellesley School were highest, John Street pupils next, and the boys of Ryerson third, followed closely by the boys of Wellesley. In Mathematics the first place was taken by the girls of Wellesley School, the second by the boys of Dufferin, and the third by the girls of Rverson. In Grammar, Composition and Hygiene the Wellesley girls come first, the Dufferin boys second, the boys of John Street third, and the boys of Rverson fourth. In History and Geography the girls of Wellesley take the lead, followed by John Street pupils, and Ryerson boys third. In Reading, Spelling and Derivations the girls of Wellesley again come first, followed in order by the pupils of John Street School and the girls of Dufferin. In the group, comprising Writing, Book-keeping and Music, John Street pupils come to the front, while the second and third positions are taken respectively by the girls of Wellesley and the girls of Ryerson.

The Examiners recommend prizes to be presented in this Division as follows:

GENERAL PROFICIENCY.

| 1st Prize. | Beatrice Grant, John Street | School. |
|------------|-----------------------------|---------|
| 2nd " | Elvina Saunders, Wellesley | 4.6 |
| 3rd " | Theresa Palmer, " | 4.6 |

| 3rd " | Ethel Dyke, Ryerson | 66 |
| 4th " | (Ellen Rose, " | 66 |
| 4111 | Jane Burchall, John Street | 66 |

III. SECOND DIVISION.

Seventy pupils of this Division took part in the examination, Dufferin, Wellesley and Ryerson sending ten boys and ten girls each, and Jesse Ketchum School ten pupils. Euclid's Elements formed a subject of examination in addition to the branches embraced in the examination of the Third Division. The girls of the Welleslev School received the highest aggregate number of marks, the boys of Dufferin taking second place, and the girls of the same School third. In the separate branches the first place in Mathematics was allotted to the girls of Wellesley, second to the boys of Dufferin, and third to the pupils of Jesse Ketchum School. In Grammar, Composition and Hygiene the girls department of the Wellesley School takes the first place, the boys of Dufferin second, and the girls of the same School third. In History and Geography the foremost position was taken by the girls of the Wellesley, second by the boys of the Ryerson, and third by the boys of Dufferin. In Reading, Spelling and Derivations the Wellesley girls again take the lead, followed by the boys of the Dufferin and the girls of the Ryerson. In Writing, Book-keeping and Music once more the Wellesley girls head the list, the boys of Dufferin taking second place, and the girls of the same School third place.

The Examiners recommend that prizes be given to the following pupils in this Division.

GENERAL PROFICIENCY.

| 1st Prize. | Sophia Cooper, | Wellesley | School. |
|------------|-----------------|-----------|---------|
| 2nd " | Etta Jackes, | 66 | 66 |

| 4th " | Clara Kleiser, "" |

IV. FIRST DIVISION,

In this Division ten pupils appeared for examination from each department of the Dufferin, Wellesley and Ryerson Schools, making a total of 60. The subjects were the same as in the Second Division. The high standard of excellence attained indicates careful and judicious instruction by the teachers and no small amount of persevering industry on the part of the Scholars.

The highest aggregate marking including the entire range of subjects is taken this year by the Girls of the Wellesley School, next in order, come the Girls of the Ryerson, and third, the Boys of Wellesley School. The contest was very keen, and all did remarkably well.

Reviewing the separate branches of study the papers show the girls of the Wellesley School to stand first in Mathematics, the boys of the same School second, and the girls of the Ryerson School third. In Grammar, Composition and Hygiene the first place is taken by Wellesley girls, the second by the girls of Ryerson, and the third and fourth by the girls of Dufferin and the boys of Wellesley Schools. In History and Geography the Wellesley girls are again first, the Wellesley boys second, and the Dufferin girls third. The girls' department of Wellesley School takes first place in Reading, Spelling and Derivations, the girls of Ryerson coming second, and the girls of Dufferin third, In Writing, Book-keeping and Music the girls of Ryerson School stand first, the boys of Wellesley second, and the girls of Wellesley third.

A special examination in Canadian History and Geography for the purpose of awarding the medals kindly offered by Messrs. Kent Brothers for superior attainments in these subjects took place in the Wellesley School on June 23rd. Thirty-three pupils from the First Division of the Ryerson, Dufferin and Wellesley Schools took part in the contest. A careful examination of the papers handed in showed that Mabel Tennant of the Wellesley School had the highest number of marks, Ernest Rugg of the same School taking the second place.

A special examination was also held in Reading with a view of awarding the prizes offered by the Rev. Septimus Jones for the best Reading by pupils selected by the Teachers. Seventeen candidates presented themselves, eight Boys and nine Girls.

After a very careful and protracted examination, the first place was adjudged to Katie Stewart of the First Division, Wellesley School, the second, to Abbie Ecclestone of the same Division, and Nellie Bain of the corresponding Division in the Dufferin School, these two last being equal.

The medals presented by Mr. John McDonald to the two pupils taking the highest standing in this Division have been won by Annie Stalker and Louisa Devlyn of the Wellesley School. The contest was so close between these two girls that in an aggregate of 1551 marks the difference was only five.

The Examiners recommend that scholarships and prizes be presented to the following.

SCHOLARSHIPS. (GIRLS).

- 1. Annie Stalker, Wellesley School.
- 2. Louisa Devlyn,
- 3. Abbie Ecclestone.
- 4. Mabel Tennant,
- 5. Laura Sturrock.
- 6. Emma Smith, Ryerson

SCHOLARSHIPS. (BOYS).

- J. A. McDonald, Wellesley School. 1.
- 2. Arthur Anderson.
- 3. S. G. Beckett, Rverson
- 4. James McCuaig, Wellesley
- 5. Alex. McAllister.
- 6. John Robertson.

MATHEMATICS. PRIZES.

May Sanderson, Ryerson School. 1st Prize.

66 2nd Agnes Mullen, 66 3rd Janet Telfer, Wellesley

4th Emily Brasier, Ryerson

GRAMMAR, COMPOSITION AND HYGIENE.

| 1st Prize | e. Agnes | Mullen. | Rverson | School. |
|-----------|----------|---------|---------|---------|
|-----------|----------|---------|---------|---------|

2nd " Alice Turner, " "

3rd " Emily Brasier, " " Katie Chamberlain Wellesley School.

HISTORY AND GEOGRAPHY.

1st Prize. Katie Stewart, Wellesley School.
2nd "Florence Mills, ""
3rd "Annie Short, Ryerson "
Janet Telfer, Wellesley "

READING. SPELLING AND DERIVATIONS.

1st Prize. Katie Stewart, Wellesley School.

2nd " Alice Turner, Ryerson

3rd " Annie Duff, Wellesley "

4th " Helen Sheppard, Dufferin

WRITING, BOOK-KEEPING AND MUSIC.

1st Prize. Katie Stewart, Wellesley School.

2nd " Edward Hackborn, " "

3rd " Alice Turner, Ryerson "

4th " Emily Brasier, "

SPECIAL PRIZE.

Frank Russell of the Wellesley School is entitled to the First Boys' Scholarship, but as he is about to remove from the city he will be unable to avail himself of its advantage, and will receive a special prize instead.

Agnes Mullen of the Ryerson School received a sufficient number of marks to entitle her to the fourth Scholarship, but was ruled out as ineligible on account of having competed for a Scholarship on two former occasions, there being a regulation in force prohibiting pupils from competing oftener than twice. The Examiners desire in conclusion to express their h. happreciation of the thorough training afforded by the City Public Schools in the subjects comprised in the Public School programme. This must be attributed chiefly to the high state of efficiency of the teaching staff, combined with the acknowledged ability and energy of the Inspector.

They also desire to suggest to parents and others who take an interest in the Public Schools, that while it is but just to give honor to those who deserve it, there is great danger of attaching undue importance to the results of the Combined Examinations, when estimating the diligence, success, and ability of the Teachers. For it is quite clear that the pupils of the different Schools do not stand on an equality in regard to age and local advantages.

During the examination much valuable assistance was rendered by the Inspector, and by those Teachers who had charge of the pupils while engaged in writing their answers.

WM. ANDERSON,

Chairman of Board of Examiners.

Examination Papers.

EXAMINATION PAPERS.

COMBINED EXAMINATION.

ARITHMETIC.

FIRST DIVISION.

(The work must be shown).

- 1. What capital, put out at $3\frac{1}{2}$ per cent. per annum, simple interest, would produce \$14 interest in $4\frac{3}{4}$ years?
- 2. The amount of sunshine recorded in Jersey last year in the month of April was 33 per cent. of the greatest possible amount; and the average length of the night in that Island in that month is 10 hours 30 minutes. Find how many hours of sunshine there were in the month.
- 3. Find the difference between the amount of \$1,205, put out for two years at 5 per cent. compound interest, and the present value of the same sum in two years' time at the same rate of interest. (Compound interest).
- 4. Find the cost, at \$20 per 100 sq. ft., of laying in cement the ground floor of a room, which measures 21 ft. by 18 ft., allowing for four fire-places, each 3 ft. by $2\frac{1}{2}$ ft., and for the wellhole of the stair-case a space 9 ft. square.
- 5. If the interest on a loan for 5 months, at the rate of $3\frac{3}{4}$ per cent. per annum, be equal to the square root of \$.167281, what is the amount of the loan?
- 6. A. speculator investing in $3\frac{1}{4}$ per cents. obtains 4 per cent. for his money, after paying brokerage of $\frac{1}{8}$ per cent. At what rate does he buy in?

- 7. Supposing a tree, including branches, stem, and leaves, to be exactly equal to a cylinder, whose height is the height of the tree, and whose diameter is the diameter of the lowest part of the trunk, find the number of leaves on a tree 63 ft. high and 2 ft. in diameter at the base, having given that the trunk and branches make up $\frac{9}{10}$ of the cylinder, and that each leaf contains $\frac{1}{10}$ of a cubic inch of material.
- 8. A train is just 27 minutes in passing through the Mont Cenis tunnel, the length of which is eleven thousand two hundred and twenty metres; find the speed of the train in miles per hour. (Metre—39.39 inches).
- 9. (a) Explain the difference between proper and improper fractions.
- (b) Show how the value of the these fractions is affected (1) by adding the same number to both numerator and denominator; (2) by subtracting the same number from both numerator and denominator.

10. Simplify
$$0.\dot{6}$$
 of $3.\dot{3}$ + $\frac{1.75}{2.625}$ of 17 + 0.4 of 5.75 - $\frac{1.71428\dot{5}}{2.\dot{0}9523\dot{8}}$.

ALGEBRA.

FIRST DIVISION.

(All the work must be shown).

- 1. Find the co-efficienct of x^3 in the product of $x^3 bx^2 3abx + a^2$, and $2x^2 3ax a^2$.
 - 2. Divide $x^4 + (2b^2 a^2) x^2 + b^4$ by $x^2 + ax + b^2$.
 - 3. Find H. C. F. of $7x^2 12x + 5$, and $2x^3 + x^2 8x + 5$.

4. Simplify (a)
$$\frac{a^2 + b^2 - c^2 + 2ab}{a^2 - b^2 - c^2 + 2bc},$$

$$(b) \frac{a}{a+b} + \frac{b}{a-b} - \frac{a^2 + b^2}{a^2 - b^2},$$

5. Find the value of x in $\frac{1}{12}(2x-3)-\frac{1}{3}(3x-2)+3\frac{5}{24}-\frac{1}{8}(4x-3)=0$.

6. Divide 91 into two such parts that the quotient of the greater part, divided by the difference between the parts, may be 7.

GEOMETRY.

First Division will take 1, 2, 4, 5.

Second Division 1, 2, 3, 4.

- 1. What is meant by rectilineal figures?
- 2. Define a scalene triangle, a rhombus, an axiom, and a theorem.
- 3. Any two sides of a triangle are together greater than the third side.
- 4. Equal triangles on the same base and on the same side of it, are between the same parallels.
- 5. If a straight line be divided into two equal, and also into two unequal parts, the squares on the two unequal parts are together double of the square on half the line, and of the square on the line between the points of section.

ENGLISH GRAMMAR AND COMPOSITION.

FIRST DIVISION.

1. Name and illustrate each kind of subordinate sentence.

- 2. When must the pronoun that be used instead of who or which?
 - 3. Explain the terms weak verb, emphatic form, verbal noun.
- 4. Give four of the principal combinations or relations of the parts of speech.
 - 5. Analyze—

O fresh young year, to us be kind! What secrets do you hold in store? What pain or pleasure shall we find, That we have never found before?

6. Parse the italicized words in the following extract:

This is the state of man, to-day he puts forth
The tender leaves of hope, to-morrow blossoms,
And bears his blushing honors thick upon him.
The third day comes a frost—a killing frost,
And when he thinks, good easy man, full surely,
His greatness is a ripening nips his root,
And then he falls as I do.

7. Write, in the third person, the following speech of King Richard, taking care to make the meaning plain, and commencing with "King Richard said that"

I wish I may forget my brother John's injuries as soon as he will forget my pardon of them.

8. Correct whatever is faulty in the following sentences:

Of all other qualities of style, clearness is the most important,—Dr. Johnson.

Before six month's interest were due the debt was fully liquidated.

I wanted very much to have met him in the park.

Those two no matter who spoke or whom was addressed looked at each other.—*Dickens*.

No one but the doctor, the lady trustee, and the parents know the particulars of the dark transaction.

COMPOSITION.

Write—not more than twelve lines—on one of the following subjects:

Knowledge is power.

Order is heaven's first law.

Toronto's Semi-Centennial.

DICTATION AND DERIVATION.

FIRST DIVISION.

- 1. Write a passage, to be dictated in the class-room.
- 2. Give the derivation of the following words, with the meaning of their roots, and also of the prefixes and affixes:

Depredations, Unapproachable, Expunged, Invisible, Predestinated, Impediment, Reminiscences, Philosophy, Indissolubly. Unquestionably.

3. Give English words from Senex and Cado.

HISTORY.

FIRST DIVISION.

- 1. Trace the line of royal descent from William I. to Victoria.
- 2. Name the Tudor Sovereigns, and show how each was related to his predecessor. Give dates.
- 3. Name the rulers of the Stuart Period, main events, chief men, and leading authors and their principal works in each reign.
- 4. Trace the progress of constitutional freedom during the Stuart Period.
- 5. Compare the social condition of England at the beginning and at the end of the Stuart Period.
 - 6. Write full notes on Puritans, Titus Oates, Laud.
- 7. Mention in the order of time the English rulers, from Henry III to Elizabeth, who did most to promote the true welfare of the English nation, and state what was done by each. [Or, instead of the foregoing, write notes on Monmouth, Blake, Marlborough, Test Act, Petition of Right.]
- 8. Sketch the History of the struggle for responsible government in Canada.
- 9. Give a brief account of the principal wars from 1689 to 1754.
- 10. Compare the official power of the Queen of England with that of the President of the United States. How and for what period is the latter elected.

EXAMINATION PAPERS.

GEOGRAPHY.

FIRST DIVISION

| | Val. |
|---|------|
| 1. Mention all the countries included in the British Empire | 10 |
| 2. Define Isothermal lines, the Ecliptic, the Zodiac, the Zenith, and Equinoxes | 10 |
| 3. What are the principal industries of Canada? | 10 |
| 4. Where are the following cities situated, and what are they noted for? Geneva, Naples, Sebastopol, Hamburg, Marseilles, Manchester, Belfast and Glasgow | 10 |
| 5. Draw an outline map of the British Isles | 30 |
| 6. Give a map, complete as possible, of Ontario Province, west of the Counties of York and Simcoe | 30 |

BOOKKEEPING.

FIRST DIVISION.

- 1. Into how many classes are accounts divided?
- 2. Name some of each class.
- 3. How often is it usual to close the Ledger.

- 4. In closing the Ledger, on which side of the Merchandise Account is the Inventory placed?
 - 5. What is meant by a Trial Balance?
- 6. Write out a note, dated June 10th, 1884, in favor of W. C. Anderson, payable at his office, Toronto, three months after date, for five hundred dollars, bearing interest at seven per cent. per annum.

HYGIENE.

FIRST DIVISION.

| 1. Name the various parts of the eye-ball | Val. |
|---|------|
| 1. Italic die various parts of the eye-bait | . 0 |
| 2. Give the three main divisions in the construction of the ear. How is sound produced? | 5 |
| 3. Describe the organs and the process through which food passes before it serves to build up the human system | 5 |
| 4. Describle the heart. What are the uses of arteries and veins? | 5 |
| 5. What natural provision is made for purifying the blood. Name some of the causes that produce impurities in the blood | 5 |
| 6. Which is the purer atmosphere—the atmosphere of a large city or of an elevated country-place? What are the causes of the difference? | 5 |

MUSIC.

ALL DIVISIONS.

- 1. Explain the signs and numbers at the beginning and end of this strain, the dots under the notes, the dot after a note, the second character in the second measure, the bar joining the tails of the next two notes, the mark over the last note, the p. and f. before the second note in the last measure, and the mark over it, the mark over the last note in the measure.
- 2. What do you mean by the key-note? How do you determine what is the key of a piece of music? What is the key-note of the strain printed above? Major or minor? How do you know?
- 3. Name, in order, the letters and syllables by which you would designate the above notes.
- 4. Name the intervals between the notes of the first two measures.
 - 5. Explain Andante, Largo, Presto.
- * 6. Transpose the above strain, setting it a major third higher.
- time? Where does the accent fall in each kind?
- 8. Write on a staff the air of the first strain of "God Save the Queen," or of "Sun of My Soul," in the key of B^b major.
- * 9. What is meant by a modulation? Is there any modulation in the strain printed above? and, if so, what is the modulation?

* 10. Write on a staff the common chord in the keys of B, D, A_b and A natural (major), and A natural and B_b and B natural (minor).

* N.B.—First and Second Divisions omit Questions 6, 7, 9, and 10.

ARITHMETIC.

SECOND DIVISION.

(The work must be shown).

- 1, What capital, put out at $3\frac{1}{2}$ per cent. per annum, simple interest, would produce \$14 interest in $4\frac{3}{4}$ years?
- 2. The amount of sunshine recorded in Jersey last year in the month of April was 33 per cent. of the greatest possible amount; and the average length of the night in that Island in that month is 10 hours 30 minutes. Find how many hours of sunshine there were in the month.
- 3. Find the difference between the amount of \$1,205, put out for two years at 5 per cent. compound interest, and the present value of the same sum in two years' time at the same rate of interest. (Compound interest).
- 4. Find the cost, at \$20 per 100 sq. ft., of laying in cement the ground floor of a room, which measures 21 ft. by 18 ft., allowing for four fire-places, each 3 ft. by $2\frac{1}{2}$ ft., and for the wellhole of the stair-case a space 9 ft. square.
- 5. A watch gains 1 minute 15 seconds per day. It is set right at noon on the 12th of November. What will be the true time when it indicates noon on the following Christmas day?
- 6. If the interest on a loan for 5 months, at the rate of $3\frac{3}{4}$ per cent. per annum, be equal to the square root of \$.167281, what is the amount of the loan?

- 7. What is the value of one thousand four hundred ninety-one articles at £32, 11s. 1d. each?
- 8. A speculator investing in $3\frac{1}{4}$ per cents. obtains 4 per cent. for his money, after paying brokerage of $\frac{1}{8}$ per cent. At what rate does he buy in?

ALGEBRA.

SECOND DIVISION.

(All the work must be shown).

- 1. Find the product of $1 + x + x^4 + x^5$, and $1 x + x^2 x^3$.
- 2. Find the co-efficient of x^3 in the product of $x^3 bx^2 3abx + a^2$, and $2x^2 3ax b^2$.
 - 3. Divide $1 6x^5 + 5x^6$ by $1 2x + x^2$.
- 4. Find the H. C. F. of $x^4 + 3x^3 6x 4$, and $x^4 3x^3 + 6x 4$.
 - 5. Simplify $\frac{a-b}{b} + \frac{2a}{a-b} \frac{a^3 + a^2b}{a^2b b^3}$
 - 6. Find the value of x in:

$$\frac{1}{2}(x+1) + \frac{1}{3}(x+2) - 16 + \frac{1}{4}(x+3) = 0.$$

GEOMETRY.

First Division will take 1, 2, 4, 5.

Second Division 1, 2, 3, 4.

- 1. What is meant by rectilineal figures?
- 2. Define a scalene triangle, a rhombus, an axiom and a theorem.

- 3. Any two sides of a triangle are together greater than the third side.
- 4. Equal triangles on the same base and on the same side of it, are between the same parallels.
- 5. If a straight line be divided into two equal, and also into two unequal parts, the squares on the two unequal parts are together double of the square on half the line, and of the square on the line between the points of section.

ENGLISH GRAMMAR AND COMPOSITION

SECOND DIVISION.

- 1. How would you determine the number of verb? of a noun? of a relative pronoun?
- 2. Give the plurals of coach, variety, Mr., governor-general, 4, t; the past tense and perfect participle of do, go, see, run; positive of eldest, supreme, most.
 - 3. Analyze—

Oh! there is a charm that morning has, That gives the brow of age a smack of youth, And makes the lip of youth breathe perfume exquisite

Give us this day our daily bread.

4. Parse the italicised words in the following—

Gives not the hawthorn bush a sweeter shade, To shepherds looking on their silly sheep, Than doth a rich embroidered danopy, To kings that fear their subjects' treachery?

5. Correct whatever errors you discover in the following sentences:

Who did they refer it to? You or I? Let you and I go down to the beach and gather shells

Severe the doom that length of days impose, To stand sad witness of unnumbered woes.

My friends approve my decision, especially them who are best acquainted with the circumstances

It was Joseph, him who Pharaoh promoted.

Seats were made for the pupils without backs.

COMPOSITION

Write half a dozen lines on one of the following subjects:

The atmosphere

Pleasures of boating.

Toronto Bay.

DICTATION AND DERIVATION

SECOND DIVISION.

- 1. Write a passage, to be dictated in the class-room.
- 2. Give the derivation of the following words, with the meaning of their roots, and also of the prefixes and affixes:

Administration, Detraction,
Sincere, Descendant,
Origin, Assailant,
Igniting, Transition,
Protection. Benediction.

3. Give English words from Fero and Volo.

HISTORY.

SECOND DIVISION.

- 1. The Canadian Rebellion. Sketch causes, leading actors, chief events, the issue. Give dates.
- 2. Give an account of the Quebec Act; the British North American Act.
- 3. Give summaries and dates of the following Treaties as bearing upon Canadian interests; Utrecht, Paris, Ashburton.
- 4. Write short notes upon John Verrazani, Pontiac, Bishop Laval, Colonel Simcoe, Commodore Perry, Sir John Sherbrooke, Samuel Champlain, Annapolis, Fort Maurepas, Sackett's Harbour.
 - 5. Sketch the chief wars of the Tudor Period.
- 6. Compare the forms of government in England, Canada, and United States.
- 7. Sketch the revival of learning during the reigns of Henry Eighth and Elizabeth.
- 8. Write short notes on Witenagemot, Ordeal, Gunpowder Habeas Corpus, Sturdy Beggars, Earl of Somerset, Ridley, Spenser,
- 9. Fix the geographical position of the following places, and connect some event of history with each; Flodden, Oxford, Smithfield, St. Andrews, Linlithgow, Leipsic, Shoreham.
- 10. Give a list of eight of England's chief colonies. Describe their geographical position, and tell how and when they were acquired,

GEOGRAPHY.

SECOND DIVISION

| | Val. |
|--|------|
| 1. Name the principal rice, sugar, coffee, sago, and teaproducing countries | 10 |
| 2. Give the countries of Europe and North America within the North Temperate Zone. What is the width of the Torrid Zone, and where is it situated? | 20 |
| 3. What is the cause of the Trade Winds? What is the cause and give the course of the Gulf Stream? | 20 |
| 4. Where are the following cities situated? Cairo, Canton, Tokio, Calcutta. Give the principal islands of the Eastern Archipelago | 10 |
| 5. Draw a general map of North America, giving the countries, principal rivers. mountain ranges, gulfs, and boundaries | 40 |
| | |

BOOKKEEPING

SECOND DIVISION.

- 1. How many sides has each account? Give a short name for each
 - 2. What is meant by Resource and Liability?
 - 3, What are Personal Accounts and with whom are the kept?
- 4. What are meant by days of grace, and as a rule how many do they number?
- b. On what side of the Cash Account are the receipts of cash placed?

HYGIENE.

SECOND DIVISION.

| | Val. |
|---|------|
| 1. Name the various parts of the eye-ball | 5 |
| 2. Give the three main divisions in the construction of the ear. How is sound produced? | 5 |
| 3. Describe the organs and the process through which food passes before it serves to build up the human system | 5 |
| 4. Describle the heart. What are the uses of arteries and veins? | 5 |
| 5. What natural provision is made for purifying the blood. Name some of the causes that produce impurities in the blood. 6. Which is the pure stress here the atmosphere of a | 5 |
| 6. Which is the purer atmosphere—the atmosphere of a large city or of an elevated country-place? What are the causes of the difference? | 5 |

ARITHMETIC.

THIRD DIVISION.

(The work must be shown).

- 1. The remainder is $\frac{2}{5}$ of the divisor, the divisor is $\frac{3}{5}$ of the quotient, and the sum of the divisor and remainder is 4 less than the quotient. Find the dividend.
- 2. A watch gains 1'15" per day. It is set right at noon on the 12th of November. What will be the true time when it indicates noon on the following Christmas day?
- 3, If A can do a piece of work in 8 days, and A and B together can do it in 6 days, now long would B alone take to do it?

- 4. What capital, put out at $3\frac{1}{2}$ per cent. per annum simple interest, would produce \$14 interest in $3\frac{3}{4}$ years?
- 5. If $(2\frac{1}{2} \text{ of } \frac{3}{5}) \div (\frac{5}{8} \text{ of } 3\frac{1}{5} \text{ of an acre of land be worth}$ \$178.50, what will 7 times $\frac{7\frac{2}{3} 4\frac{1}{4}}{\frac{1}{2} \text{ of } 3\frac{5}{6}} \times \frac{7\frac{2}{3}}{31\frac{8}{9}} \text{ of } 2\frac{1}{2} \text{ acres be worth}$ at the same price?
- 6. Find the value of $(a)\frac{4}{17}$ yd. + $\frac{42}{2047}$ pole + $\frac{1}{1452}$ rood + $\frac{2}{30855}$ acre. (b) 0.00008544921875 of a ton.
- 7. The distance between two towns is 20 miles 40 rods 44 yards. How many telegraph poles will be required between them, the poles being 8 rods apart?

ALGEBRA.

THIRD DIVISION.

(All the work must be shown),

- 1. Find the sum of $a^2 ab + bc$, $b^2 bc + ca$ $c^2 ca + ab$: What is the value of your result, when a = 2. b = 3, c = 4.
- 2. Find the product of $1 + x + x^4 + x^5$, and $1 x + x^2 x$
 - 3. Divide $a^2 + ab + 2ac 2b^2 + 7bc 3c^2$ by a b + 3c.

ENGLISH GRAMMAR AND COMPOSITION.

THIRD DIVISION.

- 1. Define syntax, parsing, person, transitive verb.
- 2. Give the plural forms of country, loaf, her, t, 4; positive of sweeter, worst, best, perfect; the past tense and present participle of drink, am, spread, write.

3. How is the passive voice formed?

In each of the following sentences change the construction in regard to voice :

I wrote two letters yesterday.

The pupils were highly commended by the visitors for their diligence and good conduct.

5. Parse the italicised words in the following sentence:

Pleasantly next morning rose the bright sun on the peaceful village which on the preceding day had been the scene of this frightful tragedy.

5. Analyse—

My mother, when I learned that thou wast dead. Say, wast thou conscious of the tears I shed? I heard the bells tolled on thy funeral day, I saw the hearse that bore thee slow away.

6. Correct whatever you consider faulty in the following sentences:

Every one of the boys brought their books, done their work, and were then dismissed for the day,

Says I that's all right between you and I but I don't want no more of such compliments.

There was five of us in the boat and each of us done our best to keep Tom from setting in the bow.

There are several who could have done it as well as him or her.

DICTATION AND DERIVATION.

THIRD DIVISION.

1. Write a passage, to be dictated in the class-room.

2. Give the derivation of the following words, with the meaning of their roots, and also of the prefixes and affixes:

| Crescent, | Suspended, |
|---------------|-------------|
| Successfully, | Capitulate, |
| Accomplished, | Presiding, |
| Genealogy, | Invisible, |
| Conspicuous, | Symphonies. |

3. Give English words derived from Crux and Duce.

ENHLISH HISTORY.

THIRD DIVISION.

- 1. Name, in the order of time, the various Periods or Royal Houses, from the Roman Period downwards. Give dates,
- 2. Name the Sovereigns of the Plantaganet Line, stating how each was related to the one who went before him. Give dates.
- 3. Sketch the reign of Edward First. Mention any important constitutional changes.
 - 4. Give an account of the "Wars of the Roses."
- 5, Trace the causes which led to the beheading of Charles the First.
- 6. Who were the Lollards? the Knights Templars? the Lords Marchers? Jacobites? Chartists? In whose reigns do you read of them?
- 7. Who were the following personages? Lanfranc. Thomas Beckett, Saladin, Piers Gaveston, Sir Philip Sydney, Lord Clarendon,
- 8. Explain: Feudal Tenure, Constitutions of Clarendon, Magna Charta, Salic Law, Statute of Praemunire.

- 9. Name the most distinguished authors of the Tudor Period, and the title of one of the chief works of each.
- 10. Fix the exact geographical position of the following places, and mention some event or events of English history connected with each of them: Kenilworth, Colloden, Poitiers, Derry, Towton, Stoke-upon-Trent, Naseby, Glencoe, Magdala.

GEOGRAPHY.

THIRD DIVISION.

| | Val. |
|---|------|
| 1, Name the principal mountain ranges of Canada, and tell where they are to be found | 10 |
| 2. Name the principal rivers of Canada. What is the | |
| length of the St. Lawrence and the Ottawa? What cities are built on them? | 15 |
| 3. Compare the climates of Quebec, Ontario, Manitoba, | |
| and British Columbia. Where are the best wheat producing parts of the Dominion? | 15 |
| 4. Name the countries of Asia bordering on the Indian | |
| Ocean | 10 |
| 5. Give the principal islands of the Eastern Archipelago | 10 |
| 6. Where are the following cities to be found? Cairo, Canton, Tokio, Calcutta, Alexandria | 10 |
| 7. Where are the following islands? Madagascar, Ceylon, Formosa, Tasmania | |
| 8. What groups of islands are included in Oceanica? | 10 |
| 9. What is latitude? What longitude? What are the latitude and longitude of Ontario? | 10 |

HYGIENE.

THIRD AND FOURTH DIVISIONS.

| | Val |
|---|-----|
| 1. Why is frequent bathing necessary in order to have health? When much heated, or after eating a hearty meal, why is it not good to bathe? | 4 |
| 2. When a person habitually occupies a stooping position, what is the tendency of this upon the chest and lungs? What should be done to counteract this tendency? | 4 |
| 3. What is the best kind of clothing to be worn in winter time. In regard to health, what is the tendency of wearing thin-soled boors in damp or cold weather? | 4 |
| 4. Name some of the common and more wholesome articles of food. Many things eaten are injurious to health; name some of them? | 4 |
| 5. What are the uses of the lungs, the stomach, and the heart? | 4 |
| 6. Describe the circulation of the blood | 10 |

ARITHMETIC.

FOURTH DIVISION.

(The work must be shown.)

- 1. How much must be added to sixty millions two hundred four thousand two hundred to make two hundred fifty millions?
- 2. Divide four hundred thirty millions one hundred three thousand by five thousand eight hundred twenty-nine.
- 3. What is the value of one thousand four hundred ninety-one articles at £32, 11s. 1d. each?

4. Divide
$$2\frac{3}{4} + 3\frac{2}{3}$$
 of $1\frac{7}{5}$ by $5\frac{1}{2}$ of $1\frac{1}{3} - \frac{2\frac{1}{8}}{4\frac{7}{11}}$

- 5. Express as a decimal the difference of the two quotients of $\frac{5}{8}$ and $\frac{7}{10}$.
- 6. A ship sails 6 miles per hour; how long will it take to sail round the world, a distance of 25,000 miles?
- 7. If 20 men can move 20 cubic yards of rock in 20 minutes, how long will 8 men be in moving 8 cubic yards?

ENGLISH GRAMMAR AND COMPOSITION.

FOURTH DIVISION.

- 1. What parts of speech undergo changes of form? What are these changes called?
- 2. Give the possessive singular and plural of pony, girl, fox, woman; nominative singular of thieves, brethren, clothes; past tense and past particle of begin, strike, sit; positive degree of perfect, steadier, next.
 - 3. Define predicate, relative pronoun, intransitive verb.
- 4. In midst of all this confusion the master of the ship with calmness and decision gave his orders and brought the vessel uninjured into the harbour.

James Black, black your boots and then put on your black suit. Can you spell black?

Parse the words in italics in the above sentences.

5. Analyze the following-

The descendants of those heroes who sacrificed life and property for their country's honor will maintain the present connection with the mother land.

6. Correct anything faulty in the following sentences.

I never studied no grammar but I can speak just as good as them that has.

Which is the largest number, the subtrahend or the minuend?

Them that honor me I will honor, but them that despise me shall be lightly esteemed.

Every one of the boys brought their books and were questioned on the lesson.

He that receives no misdemeanor marks I shall consider worthy of honorable mention.

DICTATION AND DERIVATION.

FOURTH DIVISION.

- 1. Write a passage to be dictated in the class-room.
- 2. Give the derivations of the following words, with the meaning of their roots, and also of the prefixes and affixes:

| Exaggerated, | Correspondence, |
|----------------|-----------------|
| Distinguished, | Prosecution, |
| Independence, | Perpetuated, |
| Magnificent, | Chronicler, |
| Allurement, | Unfortunately. |

CANADIAN HISTORY.

FOURTH DIVISION.

I. Give the geographical boundaries of the Dominion of Canada. Name the provinces of which it consists, and the capital of each.

- 2. Describe the mode of government of the Dominion, and of each of the provinces.
- 3. Name the chief periods into which the history of Canada may be divided—giving dates.
- 4. Write an 'account of the chief Indian tribes. State particularly where they lived, and how they behaved towards the French and English colonists.
- 5. Name the French Governors-General of Canada in the order of their appointment. Give dates, and mention some historical fact connected with each Governor.

CAPT. J. T. THOMPSON.

Anspector's Report.

INSPECTOR'S ANNUAL REPORT.

To the Board of Public School Trustees of the City of Toronto:

(TENTLEMEN,

In accordance with a Resolution of your honorable Board, I respectfully submit the twenty-sixth Annual Report of the Schools under your charge.

Appended to the Report will be found Statistical Tables which give in detail all important particulars relating to teachers, pupils, attendance, absenteeism, tardiness, studies pursued, cost of maintenance, &c.

ATTENDANCE.

The total number of pupils registered during the year was 18,214. Last year it was 17,579.

The average daily attendance was 12,484. Last year it was 11,758.

667 pupils attended school less than 20 days.

| 1769 | 6.6 | 6.6 | 4.6 | betwe | en 20 | and 50 d | lays. |
|------|-----|-----|-----|-------|-------|---------------|-------|
| 3417 | 6.6 | h 6 | 6.6 | 6.6 | 50 | " 1 00 | 66 |
| 3168 | 6.6 | 4.6 | 6.6 | 6 6 | 100 | " 150 | 4.6 |
| 9193 | 66 | 6.6 | 6.6 | 6.6 | 150 | ·· 200 | 6.6 |

The number who attended school for over 100 days is 12,361, or more than 68 per cent. of the total registered number.

The comparatively large number who attended school for less than 100 days can be easily accounted for, when it is remembered that most of the scholars who leave school, do so at the close of the first term. The report would appear more favorable if the year closed in July instead of December. The attendance was lessened by contagious diseases during the latter part of the year.

The most correct idea of the relation of the average to the Registered Attendance is obtained by comparing the average of Monthly Averages with the average of Monthly Registered Numbers.

The average of Monthly Registered Nur.bers was 13,905. This shows an increase compared with last year of 624. (See Table A.)

The average of Monthly Average Numbers was 12,318. This shows an increase of 637 when compared with the corresponding number of last year. (See Table B.)

The average of Monthly Averages was 88.6 per cent. of the average of Monthly Registered Numbers.

The best average for any month in the year was 90.6, the average for December.

The largest number was registered in October, 14,480, and the smallest number in February, 13,441.

The following statement shows the Average Registered Number in each S chool during the year:—

| ver in each 8 | | | |
|-------------------|----------------|-----------|-------------|
| Sch, ools | Average | No. of | Average |
| SCH, | Registered No. | Teachers. | per Teacher |

| College A | | | |

ATTENDANCE IN THE VARIOUS

ASSES.

The registered number in attendance durir different grades was as follows:— he year in the

| First Bo | ook | | |
|----------|-----|--------|-------|
| Second | 6.6 | | 7,710 |
| | | | 4 212 |
| | | | 3 501 |
| | | •••••• | 1 941 |
| F'ifth | 6.6 | ••••• | 750 |

Of course, it should be remembered that la numbers of those who began the year, or who entered during First Book, were afterwards promoted to the eyear, in the The same remark is true concerning the other clients.

I am glad to have to report that the number pupils in the Fourth Book classes has increased during the year ably.

Fourth Book Classes had to be opened during Givins', Louisa and Niagara St. Schools.

LATENESS.

Table D. shows that the punctuality of the pupil satisfactory character. The formation of the habit of a most is a most important part of the training of child punctuality teachers give constant attention to the prompt and and our their pupils.

| Date. | Average | Cases of |
|---------|-------------|-----------|
| D 440. | Attendance. | Lateness. |
| 1875 | 6,386 | 65,364 |
| 1876 | 5,976 | 31,486 |

| 1885 | 12,484 | 9,530 |
| Table D | | |

(See Table D.)

CERTIFICATES OF HONOR.

Certificates of Honor are awarded at the Christmas Vacation to such pupils only as have not been once absent or late, and whose conduct has been uniformly good, unless the absence or lateness shall have been occasioned by sickness of not more than three weeks' continuance, to be certified in writing by the pupils' parents or guardians.

These certificates are of two grades, and named respectively First Honor Certificates, and Second Honor Certificates.

The First Honor Certificates are awarded to such pupils as have fulfilled the above-named conditions for two consecutive sessions.

The Second Honor Certificates are awarded to such pupils as have conformed to the said rules for one session during the year.

The following statement shows the number of Certificates given in the various schools at the close of 1885.

| Schools. | First | Second | Total. |

THE KINDERGARTEN.

The Kindergarten classes in Victoria and Niagara St. Schools were well attended during the year, and the effects of the training were satisfactory in the physical, mental, industrial, social, and moral development of the children in attendance. The average attendance was, Victoria St, 76; Niagara St., 48. The training Class consisted of fifteen young ladies in addition to the four paid Kindergartners in the employ of the Board. The following passed the examination at the close of the term in June:—

SECOND YEAR.

Miss Louisa Currie, Miss Edith Dawkins, Miss Annie Fortune, Miss Carrie Lawson, Miss Mabel McHenry, and Miss Myra Winchester.

FIRST YEAR.

Miss Flora Dawkins, Miss Kate Rankin, Miss Daisy Walton.

It was decided in November to open a Kindegarten class in connection with the College Avenue School, for the children of the poorer classes in the neighborhood. No class of children will receive more benefit from the Kindergarten training than the little ories whose mothers are occupied away form home in earning money, and who necessarily have to neglect their children.

As during the year 1886 the number of trained Kindergartners will be increased, I recommend that more Kindergartens be established. In order to distribute them throughout the city I would advise that one be opened in each of the following Schools: Jesse Ketchum, Bolton Avenue, and Spadina Avenue Schools. If Dufferin and Ryerson Schools were enlarged, a Kindergarten class might be opened in each of them.

When the Kindergartens have been opened the roughout the city it will be an important question for the Boar d to consider, whether the material used in the occupations by the pupils should not be supplied by the Board. The cost per pupil for all the necessary material is less than fifty cents per quarter for each child. If purchased in quantities by the Board, the cost per pupil would be considerably lessened.

In order to show that the Kindergarten has give n satisfaction in the American cities in which it has been tried, $J^{[}$ append the following reports taken from the last report by $G\epsilon^{neral}$ Eaton, Commissioner of Education for the United States:—

Oakland, Cal.

Cultivates individuality, imparts dexterity and grace, teaches the child to be industrious, persevering, cleanly, and polite, to concentrate his mind on what is before him, and to express his thoughts with ease.

The physical and mental development is wonderful and a grand opportunity is afforded for moral and religious traini¹S.

Children who have attended the Kindergarten are more attentive, more orderly, better able to comprehend wha is brought to their notice, more capable of interesting themselve, and better prepared for the public school in every way than the who have not attended.

San Francisco, Cal.

Most beneficial; the young mind is pleasantly occured and improved, and the body given free and careful exercise.

Develops the mental faculties through artistic auchechanical labor, improves the manners of the children, and this natural talent into right directions.

Develops muscular strength, self reliance, and ge ral health, teaches clearness and precision in the use of the hd, leading to skill in art and the machanics, influences the tellectual, social and ethical natures and gradually leads the yolgest child into the kingdom of righteousness, order, and beauty

Makes the little ones sociable, polite, kind, obliging, unselfish, orderly, apt in all mechanical occupations, docile, obedient, and calls into action all the finest qualities of their nature; the games are calculated to give grace and strength, and the system develops the perceptive faculties in a marked degree.

New Haven, Conn.

It is the natural method of education and is good in its effect on the physical, mental, and moral development of the child.

Cultivates patience, perserverance, sociability, and a desire for knowledge.

Wilmington, Del.

Cultivates habits of attention, observation, thoughtfulness, sociability, kindness and cheerfulness, and is also a superior preparation for advanced school work.

Chicago Ill.

Imparts manual dexterity and grace in motion, trains the eye and ear, develops the powers of perception, attention, and imagination, and stimulates the memory.

Imparts definess to the hands, and grace and ease to the whole body, teaches accuracy, invention, symmetry of form, harmony of color, and love of the beautiful; cultivates habits of neatness, kindness, forbearance, self-control, and politeness.

Harmonious development of body and mind. The child becomes strong, graceful, polite, self-dependent, skilful, thoughtful, and constructive, and the system is a superior preparation for later school work.

Indianapolis, Ind.

Makes the children graceful, polite, and cleanly; develops ideas of number and form, and teaches the use of the faculties in various ways.

Promotes natural growth of the muscles, awakens perception, cultivates taste in design, and makes children more thoughtful, sympathetic, and happy.

Des Moines, Iowa.

Develops the physical and mental natures without forcing either, and the child learns to combine the alphabet of knowing with that of doing.

Louisville, Ky.

Produces the happiest results; the natural and pleasing incentives to effort arouse and interest the dormant minds, make sensitive and skilful the feeble hands, and put body and mind into a healthier condition than former methods have done.

New Orleans, La.

Develops the muscles, enlarges the chest, and strengthens weak lungs, gives graceful and easy carriage to the body, cultivates the memory, awakens perception, teaches children to examine objects for themselves and to give expression to their ideas, and inculcates lessons of love to God and humanity.

Portland, Me.

Superior preparation, both physically and mental, for future school work, inducing orderly habits of thought, and also making the children kind and thoughtful for each other.

Baltimore, Md.

Makes the children strong, graceful, and easy in their movements, teaches them to observe closely and to express their ideas clearly, and cultivates cheerfulness, gentleness, and unselfishness.

Wonderful physical, mental, and moral improvement in the child and an elevating and refining influence in their homes.

Strengthens the body, promotes ease, grace, elasticity, and firmness of movement, stimulates the mind, cultivates gentleness, friendliness, and sociability, and is an excellent preparation for school work.

Boston, Mass.

Promotes physical health, imparts quickness and acuteness in distinguishing objects, developes the power of expression, and makes pupils happy in their relationship with one another.

Symmetrical development; the physical nature is developed at the same time that the mind is unfolded in a natural, unforced way.

Trains the child into habits of self control, makes him graceful in movement, observant and intelligent, and is beneficial in its effect on the moral nature.

Strengthens physically, awakens interest in self and surroundings, and inculcates a love for truth and the best things in life. Detroit, Mich.

Wonderful; the children of this Kindergarten are charity children, who, as a rule, are not healthy, and are very often evil in disposition, and the improvement in their physical and moral natures is marked, and, through the child, the parent and home feel the elevating influence.

Best system that can be had for the physical and mental development of children.

Most beneficial; rightly conducted, it is far in advance of the old method of teaching beginners.

Minneapolis, Minn.

Insures a healthy physical development, trains the artisticimagination, the scientific mind, and the skilful hand, engenders love for order, neatness, freedom, and justice, without taking the child from its innocent childish sphere.

Natural and harmonious developement of mind and body, and superior preparations for future abstract study.

Healthful; the children learn to observe and to be accurate, to be quick of comprehension and keen in discerning.

St. Louis, Mo.

Gives perfect control of the body, makes the child graceful and self-possessed, cultivates the senses, awakens the child's curiosity, arouses a desire for knowledge, and stimulates to free creative activity.

Excellent in its effect on more prominent habits and practices required of the pupil when he enters the primary school.

Harmonious development of the three-fold nature of the child. Through the gifts is developed his intellectual nature; through the occupations, his physical nature; and by songs and games, his spiritual or emotional nature.

Makes the child graceful, polite, skilful, self-dependent, thoughtful, constructive, and eager for knowledge.

South St. Louis, Mo.

The children taught in Kindergarten have clearer views of whatever is presented to them for study, they more readily comprehend instructions, have keener eyes to observe and readier hands to execute, and are better prepared for common schools than children otherwise trained.

Newark, N. J.

Cultivates correct habits of thought and expression, awakens the senses, makes the child graceful, polite, self-dependent, eager for knowledge, and skilful. Children attending Kindergarten for two or three years are always the healthiest and best scholars.

Brooklyn, N. Y.

Quickens the child's intellect and developes his moral nature; makes him happy, polite, and healthy, and is beneficial as a preparation for more advanced studies.

Buffalo, N. Y.

Trains all the perceptive faculties, forms correct judgment, teaches children to live and work harmoniously together, and lays a foundation for moral growth.

New York, N. Y.

Promotes general health and awakens the mental faculties naturally, bringing knowledge in a connected form before the mind.

Makes the children healthy, cheerful, and happy, and under a thorough Kindergartener developes the mental faculties in a systematic manner.

Quickens and develops the mental powers, fitting the child for ordinary school studies; also teaches use of and how to handle different farming implements.

Harmonious development of all the powers; it teaches combination of knowing with doing, and exerts a wholesome influence in the formation of character, cultivating a love of nature, a love for work, a generous regard for others, and humane treatment of animals.

Nyack-on-Hudson, N. Y.

Strengthens the body, enlarges the reasoning faculties and powers of observation, and so fits the child physically and mentally for later studies.

Oswego, N. Y.

The children are led to observe, to express themselves clearly, and to be graceful in movement. They learn to read and write more readily than those who have not had the training.

Cincinnati, Ohio.

Strengthens the powers of observation and tends to produce harmonious development of the physical and mental natures.

Imparts a fondness for mathematics, makes the child more observing, more logical in thought, self-helpful, and respectful of the rights of others.

Cleveland, Ohio.

It makes healthy, thoughtful children.

An approach to symmetrical development, physically, mentally, and morally.

Columbus, Ohio.

Develops the physical, mental, and moral powers, and lays a firm foundation for future education.

Toledo, Ohio.

Physical and mental activity are acquired; the child is easily controlled, and nervousness and dullness overcome.

Philadelphia, Pa.

Develops the child's threefold nature, brightens the dull, and strengthens the weak.

Develops physically, training the hand and eye, develops clearness of perception, and cultivates attention, thought, and understanding.

Promotes, health, grace, and ease of body, develops quickness of perception, clearness and accuracy in thought, and cultivates truthfulness, gentleness and love.

Very beneficial, producing a sound mind and a sound body; many have been sent to this Kindergarten for physical improvement only, and in securing it have been mentally and morally improved.

Providence, R. I.

Rapid, easy, natural, and harmonious development of the physical, mental, and spiritual nature of the child.

Madison, Wis.

True and natural development; children who take a two-ye. course in Kindergarten are able to make rapid progress i primary work, especially in numbers, writing, and drawing.

Milwaukee, Wis.

Imparts health and grace to the body, cultivates the reasoning and observing faculties, develops a sense of beauty in form, color, and sound, and trains the child to habits of order, punctuality, obedience, kindness, and self-control.

Washington, D. C.

Tends to awaken perception, cultivates self-control, improves habits relating to proper care of body and mind.

Just what is claimed for this system of training; the children trained by the system are more attentive, observant, obedient, and gentle than those otherwise trained, and it produces a genial awakening of all the faculties.

Improves the general health, teaches the child self-government, and leads him to choose to do what is right; it is also a superior preparation for subsequent mathematical training.

MUSIC.

Some improvement is being made in teaching this subject. The most encouraging feature in connection with the subject is the attitude of the teachers towards it. They are rapidly becoming interested in the teaching of music, and believe that they should do the work chiefly themselves. The annual concerts in connection with the closing exercises of the schools, in June, were most successful, and the pupils, under the leadership of Mr. E. W. Schuch, sang in a most creditable manner.

I repeat a former recommendation that a special teacher of music be appointed for the Classes below the Senior Third Book. One of the most important of his duties would be to guide the teachers in these Classes in the proper performance of their work.

DRILL AND PHYSICAL EXERCISES.

The Annual Review and Competitions in Drill and Calishenic Exercises took place in June. The School Games were held on the same day. A grand procession of about 8,000

ehildren marched through the principal streets before the competitions began, and the appearance, bearing, carriage, and precision of step of the girls, as well as the boys, won the admiration There can be no doubt of the wisdom of of all spectators. directing special attention to the definite physical training of the pupils in our schools. The health of the children is a matter of vital importance, and even the moral characters of the children are directly affected by a system of physical drill which gives additional bodily vigor, and at the same time leads them to make the body act with proper precision in obedience to a definite exercise of will power. Action not only aids in expressing thought, it re-acts on thought to define it. The wide spreading of the arms in expressing the sentiment of freedom deepens the feeling and thought of freedom in the mind. To make a boy change his shuffling step and bent form to a definite use of his limbs and an erect, easy, active figure, will do a good deal towards removing his carelessness and general indefiniteness of character.

The prizes for Drill were awarded as follows:

| I. | Grade | | | | Welle | esley | School. |
|------|-------|------|------|------|--------|----------|---------|
| II. | 4.6 | | | | .Jesse | Ketchum | 6.6 |
| III. | " | | | | Phœb | e Street | 6 6 |

The prizes for Calisthenics were awarded as follows:

I. Grade...Miss Keown's Class, Wellesley School.

II. "...Mr. Clark's "...Phæbe Street "...

III. "...Miss Sturrock's "..." "..."

The Boys' Battalion was reviewed by Col. Denison, D. A. G., and the several companies executed the various movements in a manner which earned for them the earnest praises of the Inspecting Officer and the Judges.

The movements of the Girls' Classes were greatly admired.

The Boys' Battalion had the honor of taking part in the reception of the Toronto Volunteers on their return from the North-West after the suppression of the rebellion, and also on the return of C. Company under command of Col. Otter. On both occasions they reflected credit on the careful training of Capt. Thompson—and Sergt.-Major Moulton, who drilled them during the absence of Capt. Thompson with his battalion in the North-West. General Middleton, during a brief visit to the city in September, inspected the boys of Ryerson, Wellesley and Dufferin Schools, and expressed his surprise at the steadiness and proficiency of the companies. He highly approved of the teaching of Prill in Schools, and stated that he would gladly aid in securing the establishment of a Public School Battalion of Cadets by the Dominion Government.

NIGHT SCHOOLS.

The total number registered during the term in each School was as follows:

| SCHOOLS. | Males. | Females. | Тотац. |
|-------------------------|--------|----------|--------|
| Parliament Street | 163 | 65 | 228 |
| Elizabeth " | 134 | 32 | 166 |
| Niagara " | 94 | 41 | 135 |
| Bathurst " | 159 | 33 | 192 |
| Jesse Ketchum | 94 | 20 | 114 |
| Mabel Street | 19 | | 19 |
| Bolton " | 54 | 25 | 79 |
| Massey Manufacturing Co | 41 | | 41 |
| Total | 758 | 216 | 974 |

The average attendance for the entire term was:

| SCHOOLS. | MALES. | Females. | TOTAL |
|-------------------------|--------|----------|-------|
| Parliament Street | 82 | 45 | 127 |
| Elizabeth " | 63 | 20 | 83 |

| Total | 428 | 131 | 439 | 136 | 386 | 143 | 271 | 116 | 242 | 111 |

TEACHERS.

There were 233 teachers in the employ of the Board at the close of the year, exclusive of the special teachers in Music and Drawing.

There are 27 male, and 206 female teachers employ

SCHOOL ACCOMMODATION.

Two new buildings were erected during the year, one containing twelve rooms, on Bolton Avenue, and one containing four rooms, on Morse Street. The Bolton Avenue School cost \$17,500, and that on Morse Street cost \$9,500. The accommodation is still far below that required by law. The overcrowding is greatest in Mabel, Givins', Hope, Bathurst, Parliament, Winchester, Rose Avenue, and Bolton Street Schools.

TORONTO TEACHERS' ASSOCIATION.

The First Semi-Annual Meeting of this Association, for 1885, was held on Friday and Saturday, February 27th and 28th, in the S. S. Building of Carlton Street Methodist Church.

PROGRAMME.—Friday, February 27th.

9.00— 9.05... Reading Minutes.

9.05— 9.15...Reading Communications.

9.15—12.00...Consideration of Synopsis of Recommendations from the various Grades.

2.00—2.45... How to teach a Language Lesson. Miss S. L. TAVLOR.

2.45— 3.00...Afternoon Recess.

3.00— 4.00... How to Teach Music to Junior Classes. Miss A. McIntyre.

8.00...Lecture by Rev. Septimus Jones.

Saturday, February 28th.

Reading Minutes. Communications.

Treasurer's Report.

Bo. Drawing Lesson. J. H. McFaul. Mass. Election of Officers.

1 Appointment of Delegates to next Provincial Convention, &c.

The following additional suggestions to those made in former years, made at the Annual Visitation of the different Grades in Toronto Public Schools, October, 1885, were adopted:

4. Doors should not be closed till 9 o'clock, so that those who are "late for line," but not "late," may be admitted for the opening exercises.

OPENING EXERCISES.

- 1. Singing, and the reading of Scripture, or the repeating of select passages of Scripture, should form part of opening exercises.
 - 2. Pupils should repeat the Lord's Prayer in concert.
- 3. As far as possible, monitors should be present at the opening exercises.

ARITHMETIC.

- 1. The pupils should bring their slates to the teacher for examination and marking as often as found desirable. The advantages of this plan are:
 - from the various Grades.
- 2.00— 2.45...How to teach a Language Lesson. Miss S. L. Taylor.
- 2.45— 3.00...Afternoon Recess.
- 3.00— 4.00... How to Teach Music to Junior Classes. Miss A. McIntyre.
 - 8.00...Lecture by Rev. Septimus Jones.

4. Hugh Sutherland,

5. James Cowan, Ryerson

6. David McGee, Dufferin

Sophia Cooper, Wellesley School, received the McDonald Gold Medal, and Jennie Orr, Ryerson School, the McDonald Silver Medal, for General Proficiency.

The Kent Medals, for the best examination in Canadian History and Geography, were awarded to Katie Chamberlain (First), and Sophia Cooper (Second). Both pupils attended the Wellesley School.

The Medal for excellence in Reading, presented by Rev. Septimus Jones, was won by Christina Steen, Dufferin School.

The following is the Prize List in the competing Classes:

FIRST DIVISION.

| | FIRST DIVISION. | |

WRITING AND MUSIC.

- 1. (Charles Meek, Wellesley School.
- 3. Henry Harris, Orphans' Home "
- 4. Lambert Stammers, Ryerson '

The Examiners close their Report as follows:

"We have observed a marked improvement this year in the character of the answers handed in. Especially we notice that pupils have acquired a somewhat remarkable facility in expressing their thoughts on paper. English Composition, to which practical educationists hitherto have not attached sufficient importance, appears now to be receiving that fair share of attention in our City Public Schools which its importance demands.

In closing, we beg to acknowledge the valuable assistance received from the Inspector and those Teachers who had charge of the pupils during the Examination."

PROGRESS OF THE PUBLIC SCHOOLS.

Table E gives a comparative statement of various items relating to the Schools since 1844. It will be seen, by reference to it, that the increase in the attendance at our schools has been very rapid.

| In | 1865 | the average | registered | No. was | 3,248, | the daily | attendance, | 2,251 |
|-----|------|-------------|------------|---------|---------|-----------|-------------|--------|
| 4.6 | 1875 | 6.6 | 6.6 | 66 | 6,447, | 4.6 | 4.6 | 5,386 |
| 6.6 | 1885 | 6.6 | 4.6 | 44 | 13.905. | 4.6 | 44 | 12.318 |

The attendance has thus been considerably more than doubled during the past ten years.

Respectfully submitted,

JAMES HUGHES,

Public School Inspector.

REPORT OF L. R. O'BRIEN, SUPERINTENDENT OF DRAWING.

To James L. Hughes, Esq., Inspector of Public Schools, Toronto:

Besides giving instruction in drawing to the Fifth Book Classes, and meeting the teachers collectively when I have had opportunity to do so, I have inspected the different Public Schools in the city where drawing is taught, and examined the work of the pupils. The teachers evince much interest in Drawing, and have shown a disposition to avail themselves of every assistance I could give, either by instruction or by suggestion. Although in a large number of the classes, indeed in the majority, much less has been accomplished than I could have hoped for, I see no reason for discouragement. Drawing is a new subject to most of the teachers, and one in which they have had no previous training, but wherever the attempt has been made they are teaching it with success.

One great difficulty has been removed by the action of the Board in supplying pencils to the pupils; another has arisen from the temptation to ignore this branch of study in favor of others, success in which told directly upon the promotions; there may also be still some want of appreciation of the practical value of Drawing in education. But there is no insurmountable difficulty, and I hope that next year we shall see much better results.

In the light of the experience of the past year, I beg respectfully to submit the following suggestions, the first of which relate to the general arrangement of the classes, while the latter ones are more especially addressed to the teachers:

I would recommend that the teaching of Drawing should commence in the Junior Second Book Classes, and that the drawing books used in the several classes should be as follows:

| In the | Junior | 2nd | Book | Classes | } | Drawing | Rook | No | 1 |
|--------|--------|--------------|------|---------|----------|---------|------|------|------|
| 4.6 | Senior | 2nd | Book | " | <u>)</u> | Diawing | DOOK | TAO. | 1. |
| 4 6 | Junior | 3rd | Book | " |) | " | 6.6 | No | TT |
| 66 | Senior | 3rd | Book | 46 . | | | | IVO. | 11. |
| 66 | Junior | 4th | Book | ٠. | | 6.6 | 6.6 | No. | III. |
| 4.6 | Senior | $4 	ext{th}$ | Book | | | . " | 6.6 | No. | IV. |
| 4.6 | Junior | 5th | Book | ٠٠. | | . " | 66 | No. | IV. |
| 6 6 | Senior | 5th | Book | 64 | | 6.6 | 6.6 | No. | V. |

In all the classes except those of the 3rd Book, the Drawing lessons have been limited to fifteen minutes. For some kind of exercises, and for rapid sketching or time drawing, 15 minutes may be long enough, but the principal lessons require some explanation from the teacher, after which the pupils should have time to work out the subject while it is fresh in their minds, and while they are interested in it. For this purpose half an hour is little enough, and I would advise that every class should have at least one Drawing lesson in the week of half an hour. For instance, instead of four lessons of fifteen minutes each, there might be one of half an hour and two of fifteen minutes.

I should be glad if the following suggestions as to the mode of instruction could be placed before the teachers in some convenient form for reference.

The work contained and suggested in any one book of the Drawing course is sufficient to occupy the pupils for a year, and should be completed within the year, reckoning from midsummer to midsummer. When promotions are made, the pupils should take the book used in the class into which they go.

All the Drawing should be free-hand, without the aid of rule, measurement, or appliance. One of the chief objects of the Drawing lessons is the training of the eye to quick and accurate perception of form, proportion, and relative space and distance. Experience shows that this faculty can be cultivated and developed to a surprising extent, but it must be continually exercised and entirely relied upon. In the Drawing books sufficient guide lines are given to aid the beginners, but in subsequent exercises in the practice-books all construction lines must be drawn free-hand by the pupils, and they should be continually led to judge for themselves what construction lines will help them to draw any given figure.

It is intended that the examples given should be first drawn in the Drawing-books, as there directed. Some of the examples, especially in Book II, are directed to be repeated more than once. It is not generally desirable that this repetition should take place in the same lesson; variety of work interests the pupils and gives fresh power to their execution. It must never be forgotten that Drawing is only the expression of some mental perception or conception, derived, as it may happen, from a present object or example, from memory, or from the imagination. In any case the excellence of the Drawing will depend upon the clearness and vigour of the perception and conception.

Drawing from memory is a most efficient factor in developing the faculty of clear perception, but the development must be gradual; as the power to perceive clearly and accurately is cultivated, so will the power to remember increase.

Time Drawings also have great value in this connection. In order to grasp the whole aspect of an object at once, it must be perceived rapidly as well as clearly, and this faculty of rapid per-

ception must be cultivated; quick drawing of objects is the most effective method, the Drawing being made within a certain specified number of minutes.

It is desirable that all exercises, such as are given in Book I, for instruction in the drawing of lines, should, as far as possible, be made to embody the idea of representation of some object or objects rather than be mere mechanical exercises. Some practice, however, in the simple drawing of lines is necessary, but care should be taken not to continue it so as to be wearisome. A few moments devoted to such practice now and then, as it is seen to be needed, may be interposed between other lessons. For this purpose a blank page of the scribbling book, or any unruled paper, may be used, as well as for occasional practice in quick sketching from memory or from objects, practice in drawing squares, triangles, curves, or simple curved figures, etc. It will be found, however, that the pupils take more interest in drawings that are to be preserved, and, therefore, all such drawings as will form a record of their progress should be donein the blank drawing-books which have been approved for the purpose, and the work in which is hereafter to be examined at the close of the year.

It is not intended that all the examples in the drawing-books should be reproduced in the blank book, or that they should be always exactly copied. The exercises may be varied and the ornamental forms enlarged. In Book I, some of the examples would be too difficult for the pupils to draw at that early stage without the lines given there to aid them. These should not be attempted in the blank book, but the simple ornaments founded upon horizontal lines or squares will form excellent practice in elementary free-hand Drawing. Any simple rectilinear objects. may also be drawn.

Pupils using Book II may draw in the blank book ellipses, ovals, or any of the ornamental forms; and these should generally be enlarged from the copies, as much larger as the pupils can manage without losing the proportions.

The models should also be drawn in the blank books as large as the paper will admit of.

Drawings from memory, and time Drawings, should also appear in the blank books. The memory Drawings should be marked as such, and on the time Drawings the time in which they are drawn should be specified.

The same general observations will apply to the work in the more advanced books of the Drawing Course. Careful attention should be given to the directions in the drawing-books, where the different subjects are treated at some length. It must be remembered that each book is a continuation of that preceding it, and that the instructions in the different books must be read as a whole. This remark is especially applicable to the model drawing in Books II and III, construction drawing in Books III and IV, and quick sketching from memory in Books IV and V.

All of which is respectfully submitted.

L. R. O'BRIEN,

Sup't of Drawing.

TORONTO, June 7th, 1886.

Examination Papers.

EXAMINATION PAPERS. COMBINED EXAMINATION.

SENIOR FIFTH BOOK.

ARITHMETIC.

(Work required.)

- 1. The difference between the interest and discount of a certain sum for one year at 5 per cent. is \$10.00. Find the sum, and also find what it would amount to in 2 years at $4\frac{1}{2}$ per cent. (Compound interest.)
- 2. An agent sells 1,000 barrels of flour at \$5.50 per bbl., and charges $2\frac{1}{2}$ per cent. commission; expenses for freight, &c., are \$500.00. With the net proceeds he buys sugar at $6\frac{1}{2}$ cts. per lb., charging $2\frac{1}{2}$ per cent. commission. How much sugar does he buy?
- 3. A and B received 1.600 cabbages to plant, but of these 10 prove worthless. A plants 5, while B plants 4, and the rows are equal. After some hours they have not enough between them to plant another row, A having 45 to spare and B 6. A then finds he has planted three rows more than B. How many did each plant, and how many cabbages in a row.
- 4. A person, by investing his property in the 3 per cents., could obtain an income of £480, but by placing half his property in 3 per cents., and half in the 5 per cents. at $102\frac{1}{2}$, he can obtain £550. What is the price of the 3 per cents.?

- 5. Divide \$192.00 among 7 persons, so that the share of each may be as much as the shares of all who come before put together.
- 6. A trader in London owes a debt of 508 pistoles to one in Cadiz: is it more advantageous to him to remit directly to Cadiz or circuitously through France, and by how much? £1 = 25.4 francs, 19 francs = 1 pistole, 4 pistoles = £3.

Give your answer in £ or decimal of a £, and give its equivalent in Canadian currency. Exchange between England and Canada being at par.

- 7. How many boards, each 10 ft. long, are required to make a fence, 5 boards high, round a field of 10 acres, width 200 yards?
- 8. A man borrows \$600 at 5 per cent. per annum, and pays back at the end of each year \$80.00 for interest and repayment of capital. How much does he owe after 3 such payments?
- 9. Find cost of boarding a floor in the shape of a trapezoid (a quadrilateral figure, having two sides parallel), whose parallel sides are 16 ft. 8 in., and 14 ft. 10 in. and the distance between them 8 ft. 4 in., at 7 cents a square foot.

ALGEBRA.

- 1. If a = 1, b = 2, c = -2, d = 3, find the numerical value of.
 - (a) $(a-b)^3 (b-c)^2 (c-d) (d-a)$.
 - (b) $| b^a c^d | \times | b^a + c^d | \dots$
- 2. Divide the sum of $-2[1-x^6(2-3x^2-x^6)]$ and $3(x^{12}+2x^8-x^6)$ by the product of x^2+x+1 and x^2-x+1 .

3. Find G. C. M. of $a^2 - 3ab - 10b^2$, $a^3 + 2a^2b - 3ab - 6b^2$, $a^3 + 8b^3$.

4. Simplify (a)
$$\frac{x^3 + y^3}{x^4 + x^2 y^2 + y^4}$$
.
(b.) $\left(\frac{x}{y} - \frac{y}{x}\right) + \left(\frac{1}{x - y} + \frac{1}{x + y}\right) \div \frac{x}{y}$

5. Solve (a)
$$x - \frac{1}{3}(x - 2) = 5\frac{3}{4} - \frac{x + 10}{5} + \frac{x}{4}$$

(b.) $\frac{2}{2x - 3} + \frac{1}{x - 2} = \frac{6}{3x - 2}$.

(c)
$$6x^2 + x - 2 = 0$$
.

6. Divide 35 into three parts, such that the first multiplied by 3, the second increased by 3, and the third decreased by 3, give equal results.

EUCLID.

- 1. When a carpenter tests the flatness of a board by laying his rule upon it, to what one of Euclid's definitions does he appeal?
- 2. Any two sides of a triangle are together greater than the third side. (Euc. I. 20.)
- 3. Describe a square that shall be equal to a given rectilineal figure. (Euc. II. 14.)
- 4. Prove that the area of a triangle is calculated by multiplying any of its sides by the perpendicular drawn to that side from the opposite angle and taking half the product.

GRAMMAR AND COMPOSITION.

- 1. Explain the terms, predicate, progressive form, strong verb, phrase.
- 2. Distinguish between a compound and a complex sentence, and give an example of each.
- 3. Give the grammatical relations of the italicized words in the following from "Evangeline":

"Still she stood, with her colorless eyes apart, while a shudder Ran through her frame, and, paratten, the flowerets dropped from her fingers.

And from her eyes and cheeks the *light* and bloom of the morning, *Then* there escaped from her lips a *cry* of such terrible anguish, That the dying heard it and started up from their pillows, *On* the pallet before her *was str tched* the *form* of an old man, Long, and *thin* and grey *were* the locks that shaded his temples; But as he lay in the morning light his face *for* a moment, Seemed to assume once more the *forms* of its earliest manhood; So are wont to be changed the *faces* of those who are dying."

- 4. Analyze the last four lines of the above.
- 5. Correct the errors in the following sentences, giving reasons for the changes you make:
- (a) Have either of you a copy of the questions that were given at last examination?
 - (b) Nobody but you and I seem to know about it.
- (c) Hold on, Tom! Here comes Smith and two or three other fellows.
- (d) A large quantity of books and papers were found on his table.
- (e) The last hitch in this celebrated case appears to be the most absurd of all its predecessors.

- (f) A rapid increase in the number of schools and of the pupils attending them are not to be expected.
- (g) He thought it was us that were laying on the grass when the horse ran away.

COMPOSITION.

Write a short composition, not exceeding ten lines, on one of the following subjects:

All work and no play makes Jack a dull boy.

Love of country.

Our brave volunteers.

SPELLING AND DERIVATION.

- 1. Write passages to be dictated.
- 2. Write words to be dictated.
- 3. Derive the following words, giving the meaning of the roots, also of the prefixes and affixes, where they occur:

Annihilate, Incorruptible,
Distilled, Magnanimity,
Exaggeration, Perfect,
Gigantic, Plastic,
Hurricane, Primeval,

Sufferance.

- 4. Give the force of the termination, dom, ly, ther, ling; also an example of each.
 - 5. What figure in o'er, 'gainst?

Give one English word derived from each of the following · Ver, lux, spiro.

HISTORY.

CANADIAN.

- 1. What were the provisions of the Constitutional Act, 1791?
- 2. Write notes on the following companies: "Associated Merchants," "Hudson Bay," "Hundred Associates," and North-West."
- 3 Name the Canadian Governors from Frontenac down to the Treaty of Paris.
- 4. Connect the following places with events in Canadian History: "Mackinaw, Queenston Heights, Chrysler's Farm, Oswego, Fort Erie, Navy Island.
 - 5. Describe the present Constitution of Canada.

ENGLISH.

- 6. Give an account of the reign of George III.
- 7. Describe the Parliamentary Reforms and Commercial Reforms in the reigns of George IV. and William IV.
- 8. Name and describe briefly the chief events of Victoria's reign.

GEOGRAPHY.

- 1. Describe the construction of a map upon Mercator's Projection.
- 2. How may the latitude of any place north of the Equator be determined by observation of the Pole-star?

- 3. Prove that the length of the polar axis is less than that of the equatorial diameter.
- 4. Give the difference of time between St. Petersburg in longitude 30° east and Toronto in 79° west longitude.
- 5. Name the chief eastern tributaries of the Mississippi in their order from north to south.
- 6. Give the position of the following cities of the United States: New Orleans, Baltimore, Vicksburg, Memphis, Cincinnati, Boston, Philadelphia, Chicago, Utica, and Pittsburg.
 - 7. Locate and describe the Sargasso sea.
 - 8. Why is the west coast of South America rainless?
 - 9. Name the islands of the Mozambique Channel.
 - 10. Give the position of each of the lakes of European Russia.

BOOK-KEEPING.

- 1. Explain the difference between single and double entry Book-keeping.
- 2. (a) Write out a receipt given for payment of professional services.
- (b) Write out a receipt for the payment of interest on a mortgage.
- 3. Define Trial Balance, Inventory, Draft, Promissory Note, Endorsement, Bill Payable, Asset, Liability, Due Bill, Order.

- 4. What is shown by the Dr. side of Stock, Merchandise, Cash, and by the Credit side of James Lowell's account, and of Bills receivable.
- 5. Give an example of a Journal Entry, and give the corresponding Day Book and Ledger Entries.
- 6. Describe the method of closing the Ledger Accounts in double entry Book-keeping.

HYGIENE.

- 1. In case of a severe cut, how may it be known whether the blood proceeds from a wounded artery or a wounded vein?
- 2, In order to arrest the hæmorrhage in the case of a wounded artery in the limb, why should pressure be made above and not below the incision?
- 3. Why is it that in passing from a dark chamber into broad sunlight sneezing very commonly occurs?
- 4. How many cubic feet of space, with perfect ventilation, should be allowed to each person in a school-room, hospital, or prison, and why should perfect ventilation be absolutely necessary?
- 5. Why is it that in passing from broad sunlight into a slightly darkened room, the power of vision is for a time very imperfect?
- 6. What several purposes are fulfilled by eating our meals slowly?

MUSIC.

- 1. How do you know the key-note of a piece of music? What is the key-note in this strain? What is the key-note when there is no sharp or flat in the signature?
- 2. What is the interval between the second and third notes in the first measure? What is the effect of the curved line in the third measure?
- 3. Name the notes in this strain in order by letters and by syllables.
- 4. Explain the uses of the dots in the second measure, and those at the end of the staff. Is every measure complete? Explain.
- 5. How are the tones and semi-tones arranged in the major-scale? in the minor scale?
- 6. Distinguish between melody and harmony; chord and unison.
 - 7. What is a major third? a minor third?

JUNIOR FIFTH BOOK.

ARITHMETIC.

1. Find the wages of a man for 3 weeks, 4 days, 8 hours, reckoning 6 days in a week and 10 hours in a day, at \$1.50 a day.

- 2. If one person were to lie in bed $8\frac{1}{2}$ hours on an average each day, and another 10 hours each day on an average; and if the former were to employ the time thus gained in reading and study for forty years; to how many years of study, of 12 hours each day, would the entire time gained be equivalent?
- 3. How many horses will be required to plough 117 acres in 35 days, if 10 horses can plough 13 acres in 7 days?
- 4. If oranges are bought at the rate of 20 for a dollar, how many should be sold for \$28.00 to gain 40 per cent?
- 5. Two persons calculate the number of turns made by a carriage wheel of which the diameter is 4 ft., one calling the circumference 3 times the diameter, the other $3^{1}/_{7}$ times, their results differ by 100 turns. Find the distance.
- 6. An agent sells 1,000 barrels of flour @ \$5.50 per bbl., and charges $2\frac{1}{2}$ per cent. commission; expenses of freight, etc., are \$500.00. With the net proceeds he buys sugar @ $6\frac{1}{4}$ cents per lb., charging $2\frac{1}{2}$ per cent. commission. How much sugar does he buy?
- 7. The difference between the interest and discount of a certain sum for one year @ 5 per cent. is \$10.00. Find the sum, and also find what it would amount to in two years @ $4\frac{1}{2}$ per cent. (Compound interest.)
- 8. How many boards, each 10 tt. long, are required to make a fence, 5 boards high, round a field of 10 acres, width 200 yards?
- 9. A man borrows \$600 at 5 per cent. per annum, and pays back at the end of each year \$80.00 for interest and repayment of capital. How much does he owe after 3 such payments?

ALGEBRA.

- 1. If a = 1, b = 2, c = -3, d = 3, find the numerical value of,
 - (a)(a-b)(b-c)(c-d)(d-a).
 - $(b) \rightarrow b^d c^b \rightarrow d.$
 - 2. Simplify, (a) a 3 [a 2 + 3b (4c a) +].

(b)
$$(a+b+c)^2 - 2(a-b)(b-c) + 2a(b^2-2c) - b^2(3+2a)$$
.

- 3. Divide the product of $x^3 + 1$, $x^6 + 2$, $x^3 1$, by the product of $x^2 + x + 1$ and $x^2 x + 1$.
- 4. Find G. C. M. of $a^2 + 2ab 15 b^2$, $a^2 7ab + 12 b_2$, $a^2 4ab + 3b^2$.
 - 5. Reduce to simplest form,

(a)
$$\frac{x^2 - 3x - 4}{x^3 - 2 \ x^2 + 4x + 7}$$

$$(b) \left(\frac{x^2}{y^3} + \frac{1}{x} \right) \div \left(\frac{x}{y^2} - \frac{1}{y} + \frac{1}{x} \right)$$

6. Solve,
$$x - \frac{x-2}{3} = 5\frac{3}{4} - \frac{x+10}{5} + \frac{x}{4}$$

7. \$11.05 consists of an equal number of 25 cent, 10 cent, and 50 cent pieces. How many of each?

EUCLID.

- 1. Define scalene triangle, acute angled triangle. circle, rhomboid.
 - 2. Bisect a given rectilineal angle. (Euc. I. 9.)

- 3. If one side of a triangle be produced, the exterior angle is greater than either of the interior and opposite angles. (Euc. I. 16.)
- 4. If from a point within a triangle two straight lines be drawn to the extremities of one of the sides, these lines are together less than the other sides, but contain a greater angle. (Euc. I. 21.)

GRAMMAR AND COMPOSITION.

- 1. Define gender, inflection, case, person.
- 2. Give the plural of shelf, cry, formula; the singular of kine, these, who; the possessive singular and plural of ox, horse, chief, and the present and past participles of die, swim, forsake.
 - 3. Analyze the following:

There are not many that can exhibit a more honorable record than he, and but few that the public will consider more worthy of confidence.

4. In the following stanza parse the words printed in italics:

When all thy mercies, oh my God!

My rising soul surveys,

Transported with the view, I'm lost
In wonder, love, and praise.

5. Correct the errors that occur in the following sentences, giving your reasons for the changes you make:

I do not like these sort of pens or those kind or pencils.

London has the largest population of any city in the world.

I would have done it as cheap as them if you had asked me.

I think it was him that done the most mischief for he throwed more stones than anybody else.

I don't see but what you have as good a right to it as her.

He must have forgot to return the book for I seen it just now laying on his table.

COMPOSITION.

Write a short composition, not exceeding eight lines in length, on one of the following subjects:

Canada our home.

A letter to a friend, describing the way in which you spent the 25th of May last.

Our brave volunteers.

SPELLING AND DERIVATION.

- 1. Write passage to be dictated.
- 2. Write words to be dictated.
- 3. Derive the following words, giving the meaning of the roots, also of the prefixes and affixes, where they occur:

Completely, Panegyries,
College, Protection,
Felicity, Theological,
Oxygen, Sufferance,

- 4. Give the force of the terminations, en, ow, let, kin; also an example of each.
 - 5. What figure in 'tis?
- 6. Give one English word derived from each of the following: Ignis, annus, lux.

GEOGRAPHY.

- 1. Describe the construction of a map upon Mercator's Projection.
- 2. How may the latitude of any place north of the Equator be determined by observation of the Pole-star?
- 3. Prove that the length of the polar axis is less than that of the equatorial diameter.
- 4. Give the difference of time between St. Petersburg in longitude 30° east and Toronto in 79° west longitude.
- 5. Name the chief eastern tributaries of the Mississippi in their order from north to south.
- 6. Give the position of the following cities of the United States: New Orleans, Baltimore, Vicksburg, Memphis, Cincinnati, Boston, Philadelphia, Chicago, Utica, and Pittshurg.
 - 7. Locate and describe the Sargassa sea.
 - 8. Why is the west coast of South America rainless?
 - 9. Name the islands of the Mozambique Channel.
 - 10. Give the position of each of the lakes of European Russia.

HISTORY.

CANADIAN.

- 1. Give an account of the Count de Frontenac.
- 2. Sketch the history of the U, E. Loyalists.
- 3. What was the condition of Upper Canada when first made a separate province?
 - 4. Explain the causes of the rebellion of 1837.
 - 5. Give an account of the Fenian Raids.

ENGLISH.

- 6. Write notes on the feudal system, and Thomas-a-Becket.
- 7. Give an account of the Conquest of Ireland.
- 8. Describe the principal events in the reigns of the Tudors.

BOOK-KEEPING.

- 1. What is the object of Book-keeping? Explain fully.
- 2. Write out a monthly account for groceries bought every Saturday from Mr. B by Mr. A, and show how it should be receipted.
- 3. Define Asset, Liability, Balance, Profit, Dr. side, giving examples.
- 4. Give the Ledger Entries for the following transactions of June 13th.
 - (a) Sold to Geo. Gillies, 3 umbrellas @ \$2.00.

- (b) Received from Jas. Drysdale, on account, \$100.00.
- (c) Bought of Jno. Boyd & Co., 60 yds. silk @ \$1.50.
- (d) Sold to Andrew Watson 24 pairs silk gloves @ 50 cts.
- (e) Paid Edward Davidson & Co., in full of account, \$500,00.
- (f) Gave to Ino. Boyd & Co. my note at 30 days \$90.00.

HYGIENE.

- 1. In case of a severe cut, how may it be known whether the blood proceeds from a wounded artery or a wounded vein?
- 2. In order to arrest the hamorrhage in the case of a wounded artery in a limb, why should pressure be made above and not below the incision?
- 3. Why is it that in passing from a dark chamber into broad sun-light sneezing very commonly occurs?
- 4. How many cubic feet of space, with perfect ventilation, should be allowed to each person in a school-room, hospital, or prison, and why should perfect ventilation be absolutely necessary?
- 5. Why is it that in passing from broad sun-light into a slightly darkened room the power of vision is for a time very imperfect?
- 6. What several purposes are fulfilled by eating our meals slowly?

MUSIC.

- 1. How do you know the key-note of a piece of music? What is the key-note in this strain? What is the key-note when there is no sharp or flat in the signature?
- 2. What is the interval between the second and third notes in the first measure? What is the effect of the curved line in the third measure?
- 3. Name the notes in this strain in order by letters and by syllables.
- 4. Explain the uses of the dots in the second measure, and those at the end of the staff. Is every measure complete? Explain.
- 5. Distinguish between r.elody and harmony; chord and

SENIOR FOURTH BOOK.

ARITHMETIC.

1. Simplify:

$$\frac{4_{2/3} \ + \ 4_{1/5} \ \text{of} \ 4^{1/}_3}{4^{1/}_5 \ - \ 2^{1/}_3 \ \div \ 1^{1/}_9} \ \div \ \frac{11_{1/5}}{^{1/}_6 \ (\ 4_{1/2} \ - \ ^{3/}_4 \ \text{of} \ 1_{1/5} \)}$$

2. A man possessing ${}^{5}/_{11}$ of an estate sold ${}^{1}/_{3}$ of his share and divided the remainder among his ten children. If the whole estate was worth \$33,000.00, what did each child receive?

- 3. In a row of 25 houses, each house has 17 windows, each window 4 panes, and each pane measures 18 inches by 9 inches. What will be the cost of glazing all these windows at 6d. per square foot.
- 4. If one person were to lie in bed $8\frac{1}{2}$ hrs. on an average each day, and another ten hrs. each day on an average; and if the former were to employ the time thus gained in reading and study for forty years; to how many years of study, of 12 hrs. each day, would the entire time gained be equivalent?
- 5. Find the simple interest and amount of \$450.50 for three months at $4\frac{1}{2}$ per cent.
- 6. In a school there are 371 boys, 233 girls, and 256 infants. What per centage of the whole school is there in each department? (Correct to two places of decimals.)
- 7. How many boards, each 10 ft. long, are required to make a fence, 5 boards high, round a field of 10 acres, width 200 yards?

ALGEBRA.

1. If a=1, b=2, c=3, d=4, e=0, find the numerical value of.

$$5 ab^2 - 3 bc^2 + 4 cd^2 - 5 de^2$$
.

- 2. From the sum of 5x 3y + 9a, 4y 6z 11b, -y 14a -5c and 5a + 5b + 5c, take -5x 6b 6z.
 - 3. Simplify, a = 3[a 2 + 3b (4c a)].
 - 4. Simplify, (a + b)(b + c) (c + d)(d + a) (a + c)(b d).

5. Multiply $x^3 - 3x^2 + 2$ by $x^3 - 3x + 2$, and divide the product by $x^3 - 6x - 4$.

6. Divide
$$x^4 + (5 + a) x^3 - (4 - 5a + b) x^2 - (4a + 5b) x + 4b$$
 by $x^2 + 5x - 4$.

GRAMMAR AND COMPOSITION.

- 1. Where should capital letters be used?
- 2. Define case, mood, proposition, sentence.
- 3. Write the plural of calf, glory, money, ox; the singular of pence, they, wolves, genera; the possessive singular and plural of chimney, sky, lass; and the comparative and superlative of many, tedious, holy.
 - 4. Parse the following:

Rain fertilizes those fields which the bounty of Providence spreads for the support of God's creatures.

5. Analyze:

The letter that was received this morning, while you were waiting, brought the news of a great victory.

6. Correct the errors that occur in the following sentences:

James, come quick, and do not walk slower than your younger brother.

Don't buy no more of those sort of pens.

She had better go and lay down while the bread is raising.

He throwed it over the fence and then run for home.

I heard that one of his brother-in-laws had bought the farm.

COMPOSITION.

Enlarge the following sentences, the whole not to occupy more than eight lines:

Bees gather honey.

In spring the fields are full of beauty.

Our volunteers fought bravely.

SPELLING AND DERIVATION.

- 1. Write passage to be dictated.
- 2. Write words to be dictated.
- 3. Derive the following words, giving the meaning of the *roots*, also of the *prefixes* and *affixes* where they occur:

Annihilate, Orient,
Dismantle, Portentous,
Fragment, Position,
Hecatomb, Monarch.

4. Give one English word derived from each of the following: Ago, phone.

GEOGRAPHY.

- 1. Name the several mountain chains of Spain in their order from north to south.
 - 2. Give the latitude of the Arctic circle.
- 3. Why is it possible that the North Star may be observed by persons situated a few degrees south of the Equator?

- 4. Describe the course of the Orange River of South Africa.
- 5. Where is the island of Heligoland, and to what European power does it belong?
 - 6. Name the chief cities of Corsica and Sardinia.
- 7. What is the superficial area in square miles of each of the following countries? England, Scotland, Ireland, France, and Spain?
- 8. Give the area of Nova Scotia and also of New Brunswick and Newfoundland.
- 9. Give the boundaries of the Sea of Japan and the position of the straits of La Perouse and of Corea.
- 10. In what county is each of the following towns of Ontario: Guelph, Barrie, Simcoe, Hamilton, Belleville, Kingston, Ottawa, Toronto, and Sarnia?

HISTORY.

- 1. Sketch the history of William of Normandy.
- 2. Describe the events that immediately preceded and succeeded the "Great Charter."
- 3. Write notes on the "Good Parliament," "Lollards," "Wars of the Roses."
- 4. Name in order the Sovereigns of the House of Tudor and the chief events in their reigns.
 - 5. Give an account of the history of Oliver Cromwell.

- 6. Under what circumstances did William III. come to the throne?
 - 7. Describe the foundation of the English Empire in India.
 - 8. Name the chief events of Victoria's reign.

HYGIENE.

- 1. What meaning is attached to the word Hygiene?
- 2. The offices of the integument of skin are chiefly protection and regulation of temperature, describe fully how each of these purposes is accomplished.
- 3. What notable difference exists between the so-called warm-blooded and cold-blooded animals when subjected to variations of temperature?
- 4. Give directions tending to the recovery of a person who has fainted, and your reasons for such instructions.
- 5. In using leaden pipes for the conveyance of drinking water what precautions should be observed? State also what difference exists between hard and soft water.
- 6. What disposition should be made of the fæcal evacuations of a patient suffering from typhoid fever, small-pox, or cholera?

MUSIC.

- 1. Explain the signs and numbers at the beginning of this strain.
- 2. How do you know the key-note of a piece of music? What is the key-note of this piece?
 - 3. Name the above notes in order by letters and by syllables.
- 4. What is the object of the dots in the second measure and in the last? Is every measure complete? Explain.
- 5. Write down the different kinds of notes used in music, with their corresponding rests.
- 6. How many semi-quavers are equal in length to one semi-breve?
- 7. Why are sharps or flats frequently placed at the beginning of a piece of music? What are accidentals?

JUNIOR FOURTH BOOK.

ARITHMETIC.

1. Add together the following numbers: twenty-two millions, six hundred thousand, five hundred and three; five hundred and sixty-three millions, seventy-six thousand and thirty-four; one hundred and eleven millions six hundred and fifty thousand and fifty; three hundred and twenty-six millions, seven thousand,

nine hundred and ninety-one; one thousand seven hundred and ten millions; one thousand seven hundred and ten; one billion three hundred thousand and five.

- 2. What vulgar fraction of a second is equal to .000001 of a day?
- 3. Find the wages of a man for 3 weeks, 4 days, 8 hours., reckoning 6 days in a week and 10 hours in a day, at \$1.50 a day.
- 4. A man possessing $^5/_{11}$ of an estate sold $\frac{1}{3}$ of his share and divided the remainder among his ten children. If the whole estate was worth \$33,000.00, what did each child receive?
- 5. A well is 18 yards 2 inches deep, and the wheel is 4 feet 2 inches in circumference. How many turns of the wheel will raise the bucket?
- 6. In a row of 25 houses, each house has 17 windows, each window 4 panes, and each pane measures 18 inches by 9 inches. What will be the cost of glazing all these windows at 6d. per square foot.

GRAMMAR AND COMPOSITION.

- 1. What is the use of English Grammar?
- 2. Define parsing, etymology, pronoun, objective case.
- 3. Give the rules for forming the plurals of nouns.
- 4. Write down the plurals of woman, sheep, shelf, lady, Mary; the comparative and superlative of good, many, beautiful; and the past tense and past participle of lie (to lie down), try, hear, swell.

- 5. Parse the words printed in italics in the following sentence:
- In John's garden grows a plant which his father recently brought from California.
 - 6. Correct any errors you find in the following sentences:
 - (a) I know he done it for I seen him do it.
 - (b) She had better go and lay down while the bread is raising.
 - (c) He throwed it over the fence and then run for home.
 - (d) Them's the boys that done all the mischief.
- 7. Alter the construction of the following sentences by changing the voice of each verb.

Mr. Smith gave his son James a new book for perseverance in study.

The lacrosse match was won by the junior club in less than half an hour.

He was accidentally wounded by a companion.

SPELLING AND DERIVATION.

- 1. Write passage to be dictated.
- 2. Write words to be dictated.
- 3. Derive the following words, giving the meaning of the roots, and of the prefixes and affixes where they occur:

Completely,

Habits,

Disastrous,

Incredible.

Exile.

Mariner,

Reduce.

HISTORY.

- 1. Give a short account of Champlain. What part did Cardinal Richelieu take in settling Canada?
 - 2. Describe the last conquest of Canada by the English.
 - 3. What is meant by the "Quebec Act?"
 - 4. Sketch the principal events of the war of 1812.
- 5. Explain what is meant by "Clergy Reserves?" and what disposition was finally made of them?
 - 6. Give an account of the Confederation of the Provinces.
 - 7. What was settled by the Washington Treaty?

GEOGRAPHY.

- 1. Name the several mountain chains of Spain in their order from north to south.
 - 2. Give the latitude of the Arctic circle.
- 3. Why is it possible that the North Star may be observed by persons situated a few degrees south of the Equator?
 - 4. Describe the course of the Orange River of South Africa.
- 5. Where is the island of Heligoland, and to what European power does it belong?
 - 6. Name the chief cities of Corsica and Sardinia.
- 7. What is the superficial area in square miles of each of the following countries: England, Scotland, Ireland, France and Spain?

- 8. Give the area of Nova Scotia and also of New Brunswick and Newfoundland.
- 9. Give the boundaries of the Sea of Japan and the position of the straits of La Perouse and of Corea.
- 10. In what county is each of the following towns of Ontario: Guelph, Barrie, Simcoe, Hamilton, Belleville, Kingston, Ottawa, Toronto, and Sarnia?

HYGIENE.

- 1. What meaning is attached to the word Hygiene?
- 2. The offices of the integument or skin are chiefly protection and regulation of temperature, describe fully how each of these purposes are accomplished?
- 3. What notable difference exists between the so-called arm blooded and cold-blooded animals when subjected to variations of temperature?
- 4. Give directions tending to the recovery of a person who has fainted, and your reasons for such instructions.
- 5. In using leaden pipes for the conveyance of drinking water what precautions should be observed? State also what difference exists between hard and soft water.
- 6. What disposition should be made of the fæcal evacuations of a patient suffering from typhoid fever, small-pox or cholera.

MUSIC.

- 1. Explain the signs and numbers at the beginning of this strain.
- 2. How do you know the key-note of a piece of music? What is the key-note of this piece?
 - 3. Name the above notes in order by letters and by syllables.
- 4. What is the object of the dots in the second measure and in the last? Is every measure complete? Explain.
- 5. Write down the different kinds of notes used in music, with their corresponding rests.
- 6. How many semi-quavers are equal in length to one semi-breve?

SECRETARY-TREASURER'S.

Financial Statements.

Annual General Statement of Receipts and Expenditure for Public School Purposes, City of Toronto, for the Year ending December 31st, 1885.

MEMBERS OF THE

PUBLIC SCHOOL BOARD.

1886

G. McMURRICH, CHAIRMAN.

Ward of St. Lawrence:

A. MEDCALE, E. WESTMAN.

Ward of St. David:

R. A. PYNE, M.D. E. P. RODEN.

Ward of St. Thomas:

T. R. WHITESIDE, R. B. HAMILTON.

Ward of St. James:

W. A. LYON. WALTER S. LEE.

Ward of St. John:

F. Somers. Geo. Boxall.

Ward of St. Andrew:

S. WILLCOCK, J. KERR.

Ward of St. George:

GEO. McMurrich. C. A. B. Brown.

Ward of St. Patrick:

H. A. E. KENT. W. W. OGDEN, M.D.

Ward of St. Paul:

GEO. VAIR, W. J. HILL.

Ward of St. Stephen:

G. DOWNARD. F. DONOVAN.

Ward of St. Matthew:

W. B. POULTON. P. MACDONALD.

Ward of St. Mark:

W. Bell. H. Meredith.

OFFICERS OF THE BOARD.

1886.

Chairman:

G. McMURRICH.

Secretary-Treasurer:

W. C. WILKINSON.

Inspector:

JAMES L. HUGHES.

Inspector's Assistant:

H. BROWNE.

Solicitor:

W. B. McMURRICH, M.A.

Drill Instructor and Absentee Officer:

CAPT. J. T. THOMPSON.

PAST CHAIRMEN

- OF THE -

Public School Board.

Inspector's Annual Report.

INSPECTOR'S ANNUAL REPORT.

To the Board of Public School Trustees of the City of Toronto:

Gentlemen,

In accordance with a Resolution of your honorable Board, I respectfully submit the twenty-seventh Annual Report of the schools under your charge.

Appended to the Report will be found Statistical Tables which give in detail all important particulars relating to teachers, pupils, attendance, absenteeism, tardiness, studies pursued, cost of maintenance, &c.

ATTENDANCE.

The total number of pupils registered during the year was 20,213, exclusive of the Kindergarten. Last year it was 18,214.

The average daily attendance was 13,642. Last year it was 12,484.

882 pupils attended school less than 20 days.

| 2072 | 6.6 | 6.6 | 6.6 | between | ı 20 | and | 50 da | ays. |
|------|-----|-----|-----|---------|------|-----|-------|------|
| 3962 | 6.6 | 4.6 | 4.6 | 6.6 | 50 | 66 | 100 | 6.6 |
| 3847 | 6.6 | 66 | 6.6 | 6.6 | 100 | 66 | 150 | 66 |
| 9450 | 6.6 | 6.6 | 6 6 | 6.6 | 150 | 6.6 | 200 | 6 6 |

The most correct idea of the relation of the average to the Registered Attendance is obtained by comparing the average of Monthly averages with the average of Monthly Registered Numbers.

The average of Monthly Registered Numbers was 15,365. This shows an increase compared with last year of 1,460. (See Table A.)

The average of Monthly Average Numbers was 13,642. This shows an increase of 1,324 when compared with the corresponding number of last year. (See Table B.)

The average of Monthly Averages was 88.8 per cent. of the average of Monthly Registered Numbers.

The best average for any month in the year was 90.8, the average for December.

The largest number was registered in October, 16,179, and the smallest number in January, 14,233.

The following statement shows the Average Registered Number in each school during the year:—

| · Schools. | Average Registered No. | No. of Teachers. | |
|-------------------|---------------------------|---------------------|--------|
| Wellesley | . 1025 | 16 | 65 |
| Dufferin | . 810 | 12 | 67* |
| Ryerson | . 779 | 12 | 65^* |
| J. Ketchum | . 779 | 12 | 65 |
| Phæbe Street | . 737 | 12 | 61 |
| Victoria " | . 655 | 11 | 60 |
| Hope " | . 828 | 12 | 69 |
| John " | . 588 | 10 | 59 |
| Niagara " | . 521 | 10 | 52 |
| Church " | . 526 | 9 | 53 |
| Louisa " | . 449 | 9 . | 50 |
| Elizabeth " | . 424 | 9 | 47 |
| Park | . 548 | 8 | 68 |
| Winchester Street | . 545 | 8 | 68 |

INSPECTOR'S REPORT.

| Sc | HOOLS. | Average Registered No. | No. of Teachers. | Average per Teacher. |
|---------------|--------|---------------------------|---------------------|-------------------------|
| Bathurst | | 621 | 10 | 62 |
| Borden | | 584 | 9 | 54 |
| Givins' | | 646 | 10 | 65+ |
| Parliament | | 430 | 6 | 72 |
| George | | 341 | 6 | 57 |
| Brant | | 399 | 6 | 66 |
| Bolton Ave | | 593 | 11 | 54 |
| Palace Street | | 235 | 4 | 59 |
| York " | | 228 | 4 | 57 |
| Rose Ave | | 335 | 5 | 67 |
| Morse S | Street | 238 | 4 | 59 |
| Cottingham | | 138 | 2 | 69 |
| Leslie | | 63 | 2 | 31 |
| Mabel | | 245 | 4 | 64 |
| Howard | | 57 | 1 | 57 |
| Dewson | | 186 | 4 | 46 |
| Boys' Home | | 96 | 1 | 96 |
| Girls' " | | 50 | 1 | 50 |
| Orphans' " | | 137 | 2 | 68 |
| College Ave | | 92 | 1 | 92 |
| Spadina " . | | 77 | 2 | 38 |

^{* 6} rooms were added to each of these during the year.

ATTENDANCE IN THE VARIOUS CLASSES.

The registered number in attendance during the year in the different grades was as follows:—

| First Book | 8,761 |
|------------|-------|
| Second " | 4,646 |

^{† 4} rooms were added to this—an eight room building.

| Third | Book | ۲., | ٠. | | | | | | | | | | | | 3, | 78 | 38 |
|--------|------|-----|----|------|------|------|------|--|------|------|------|------|------|------|--------|----|----|
| Fourth | | | | | | | | | | | | | | | 2, | 20 | 9 |
| Fifth | 16 | | ٠. | | | | | | | | | | | | | 80 | 9 |

The increase in the various grades compared with last year is as follows:—

| First : | Book | .1,051 |
|---------|------|------------|
| Second | 1 " | . 334 |
| Third | 6.6 | . 287 |
| Fourth | . " | . 268 |
| Fifth | 6.6 | . 59 |

It is to be regretted that so few pupils, comparatively, complete the public school course. The experience of Toronto is similar to other American cities in this respect.

CERTIFICATES OF HONOR.

Certificates of Honor are awarded, at the Christmas Vacation, to such pupils only as have not been once absent or late, and whose conduct has been uniformly good, unless the absence or lateness has been occasioned by sickness of not more than three weeks' continuance, to be certified in writing by the pupil's parents or guardians.

These Certificates are of two grades, and named respectively First Honor Certificates, and Second Honor Certificates.

The First Honor Certificates are awarded to such pupils as have fulfilled the above named conditions for two consecutive sessions.

The Second Honor Certificates are awarded to such pupils as have conformed to the said rules for one session during the year.

The following statement shows the number of Certificates given in the various schools at the close of 1886:—

| Schools. | First Honor. | Second Honor. | Total. |
|-------------------|-----------------|------------------|--------|
| Wellesley | 236 | 359 | 595 |
| Dufferin | 246 | 335 | 581 |
| Ryerson | 170 | 330 | 500 |
| J. Ketchum | 130 | 240 | 370 |
| Phœbe Street | 103 | 173 | 276 |
| Victoria " | 74 | 169 | 243 |
| Hope " | 68 | 165 | 233 |
| John " | 87 | 146 | 233 |
| Niagara " | 38 | 119 | 157 |
| Church " | 49 | 136 | 185 |
| Louisa " | 44 | 84 | 128 |
| Elizabeth " | 64 | 92 | 156 |
| Park | 104 | 177 | 281 |
| Winchester Street | 64 | 135 | 199 |
| Bathurst " | 115 | 148 | 263 |
| Borden " | 78 | 148 | 226 |
| Givins' " | 102 | 170 | 272 |
| Parliament " | 52 | 134 | 186 |
| George " | 52 | 87 | 139 |
| Brant " | 52 | 95 | 147 |
| Bolton Ave | 81 | 134 | 215 |
| Palace Street | 27 | 59 | 86 |
| York " | 19 | 36 | 55 |
| Rose Ave | 45 | 59 | 104 |
| Morse Street | 33 | 61 | 94 |
| Cottingham " | 15 | 40 | 55 |
| Leslie " | 8 | 16 | 24 |
| Mabel " | 53 | 87 | 140 |
| Howard " | 8 | 14 | 22 |
| Dewson " | 8 | 47 | 55 |
| College Ave | 3 | 5 | 8 |
| Spadina " | — | 22 | 22 |
| Total | 2,228 | 4,022 | 6,250 |

THE KINDERGARTEN.

The Kindergarten continues to grow in popular favor. This result is to be expected. The more thoroughly it is understood the more highly it will be valued. Education should not consist in merely communicating knowledge. Knowledge is not a power by itself. Man is the power; knowledge a means at his disposal. The growth of the being is of vastly greater importance than the storing of his mind with knowledge. The training of his character is the highest function of the school. The Kindergarten system is based on the idea that the being to be taught is infinitely greater than any knowledge. It is the broadest and most definite system of education for developing the child's possibilities industrially, physically, intellectually and morally. One of the chief advantages derived from the Kindergarten is the inspiration received from it by the primary teachers throughout the city.

Two additional Kindergartens were opened during the year, one in Bolton Avenue School and one in Jesse Ketchum School.

The attendance at the Kindergartens during the year was as follows:—

| Schools. | Registered. | Average. |
|--------------------|-------------|----------|
| 1. Victoria Street | 58 | 48 |
| 2. Niagara " | 56 | 44 |
| 3. College Ave | 40 | 27 |
| 4. Bolton " | 54 | .40 |
| 5. Jesse Ketchum | 70 | 55 |
| | | |
| Total | 278 | 214 |

I would strongly recommend that as the Kindergartens are now distributed throughout the city, the School Board should

supply the material used. The cost would be comparatively small, and the advantages many. It would be specially helpful to the poorer classes, whose children have most need of the Kindergarten training, and who are least able to pay for the material used by their children. Many of them are debarred from sending their children to the Kindergartens now on account of the fee they have to pay for material.

NIGHT SCHOOLS.

The total number registered during the term is as follows:-

| Schools. | Males. | Females. | Total. |
|-------------------|--------|----------|--------|
| Parliament Street | . 228 | 67 | 295 |
| Elizabeth " | . 118 | 46 | 164 |
| Niagara " | . 126 | 32 | 158 |
| Bathurst " | . 239 | 52 | 291 |
| Jesse Ketchum | . 111 | | 111 |
| Mabel Street | . 41 | | 41 |
| Bolton Ave | . 73 | 48 | 116 |
| | | | — |
| Total | . 936 | 240 | 1,176 |

The average attendance for the entire term was:—

| Schools. | Males. | Females. | Total. |
|-------------------|--------|----------|--------|
| Parliament Street | . 98 | 39 | 137 |
| Elizabeth " | . 64 | 29 | 93 |
| Niagara " | . 56 | 13 | 69 |
| Bathurst " | . 92 | 37 | 129 |
| Jesse Ketchum | . 46 | | 46 |
| Mabel Street | . 22 | _ | 22 |
| Bolton Ave | . 33 | 29 | 62 |
| | | | |
| Total | . 411 | 147 | 558 |

The average attendance for each month of the term was:—

| The average attenda | | | De | C | Jan | | Feb | |
|---|--|-----------------------|---|----------------------|----------------------------|----------------------|----------------------------|----------|
| | Oct. | Nov. | - | | | les. | | ales. |
| Schools. | Males. Females. | Males. | Males. | Females. | Males. | Females. | | Eemales. |
| Parliament Street Elizabeth " Niagara " | $ \begin{array}{c ccccccccccccccccccccccccccccccccccc$ | 126 4 74 3 77 1 | $ \begin{array}{c cccc} 6 & 105 \\ 2 & 64 \\ 8 & 68 \\ 32 & 115 \end{array} $ | 43 31 15 29 | 74 51 43 65 31 | 31 29 10 19 | 65 60 20 53 21 | 31 |
| Bathurst Jesse Ketchum | 64 - | $\frac{60}{26}$ | $ \begin{array}{c c} $ | 30 | 21 21 | 21 | 9 | 10 |
| Mabel Street | 518 16 | 521 1 | 63 464 | 148 | 306 | 110 | 241 | - |

The result of the Night School work has been much more satisfactory than during any former year. I would recommend that the deposit of one dollar be retained in future till the close of the term. It will be noticed that the attendance rapidly decreased after Christmas, the time the money was returned to the TEACHERS. pupils.

There were 257 teachers in the employ of the Board at the close of the year, exclusive of the special teachers in Music and Drawing.

There were 28 male and 229 female teachers employed.

They hold certificates as follows:

| hold certificati | 55 |
|----------------------|-----------|
| 1st Class Provincial | 192 |
| | |
| County Board | Trind |

In addition to the above the Board employs nine Kindergartners, two Music Teachers, one Drawing Superintendent, and one Drill Instructor.

TORONTO TEACHERS' ASSOCIATION.

The Toronto Teachers' Association held its First Semi-Annual Convention for 1886 in the Sunday School building of Elm street C. M. Church, on Friday and Saturday, 26th and 27th Feb., commencing at 9 a.m. each day.

PROGRAMME.

Friday.

| | 1 0 |
|---|---|
| 9.10-9.15 " | Calling Roll of Teachers. |
| 9.15—9.25 " | Reading Minutes of last Semi-Annual Meeting. |
| 9.259.35 " | Reading Communications and giving Notices |
| | of Meeting. |
| 9.35—12.00 " | Consideration of the Report of the Meetings of |
| | the Grades as revised by Committee. |
| 2.003.15 p.m. | The Teaching of History, Mr. G. K. Powell. |
| 3.30-4.45 " | The Teaching of Spelling, Mr. H. Clark. |
| 9.25—9.35 " 9.35—12.00 " 2.00—3.15 p.m. | Reading Communications and giving Notices of Meeting. Consideration of the Report of the Meetings of the Grades as revised by Committee. The Teaching of History, Mr. G. K. Powell. |

9.00-9.10 a.m. Opening Exercises.

Saturday.

| 9.00—9.10 a.m. | Reading Minutes. |
|----------------|--|
| 9.10—9.15 " | Treasurer's Report. |
| 9.15—10.00 " | Election of Officers. |
| 10.00-10.45 " | How to Teach Case, (lesson to a class), Mr. J. |
| | T. Slater. |
| 11.00-12.00 " | Report of Committee on Revised Provincial |

12.00—12.30 p.m. Reports of Delegates to Provincial Association. Election of Delegates to the same for 1886. General Business.

Regulations.

During the second half of each year the Association meets by grades instead of as a whole association. During the forenoon of each day of meeting the teacher selected for the grade teaches his or her own class, and the other teachers take notes. In the afternoon notes are compared, criticisms made, suggestions given and resolutions adopted regarding the methods observed.

The meetings were held as follows in October, 1886:

| Grade. | | School Visited. | Teacher of Class. | Date of Visit. | | |
|-----------|------|--------------------|-------------------|-----------------------------------|------|------|
| 5th Book | | | Wellesley | Mr. Macdonald. Miss Keown. "Worth | Oct. | 11th |
| Sen. 4th | Book | | Ryerson | " McCreight. " Killoch | { " | 12th |
| Jun. 4th | 6.0 | | Park | Mr. Martin. | 44 | 14th |
| Sen. 3rd | 4.6 | | Victoria | Miss Cornor. | 66 | 15th |
| Jun. 3rd | 4.4 | | | Mr. Stevens. | 4.6 | 18th |
| Sen. 2nd | 4.6 | | | Miss Taylor. | 66 | 19th |
| Jun. 2nd | 6.6 | | | " Semple. | 4.6 | 21st |
| Sen. 1st | 6.6 | (East) | | Clark. "Kettles. | 1 | 22nd |
| Sen. 1st | 6.6 | (West) | Bathurst | " Wallace. | | 25th |
| Jun. 1st | 4.6 | (East) | Bolton | " Hay. | 6.6 | 26th |
| Jun. 1st | 4.6 | (Centre) | J. Ketchum | " T. Niven. | 4.6 | 28th |
| •Jun 1st. | 4.1 | (West) | | Mrs. Polley. Miss Young. | 1 | 29th |

The Association met afterwards as a whole, and, after hearing the reports from the various grades, adopted the following suggestions in addition to those made in former years on the same subjects:

Topical Summary of the Resolutions adopted by the Grade Conventions of the Toronto Teachers' Association in October, 1886:

OPENING EXERCISES.

1. That in ringing the bell it is advisable to pull the rope fifteen times for the first ringing and five times for the second; the pulls to correspond with the number of minutes before opening.

- 2. The reverent attitude of pupils during devotional exercises should not be in obedience to the teacher's orders, but in response to the teacher's spirit.
- 3. Bible stories may be told occasionally to junior classes instead of being read.
- 4. All commands to the class should be given in a low tone, with a definite pause between the cautionary and the executive parts of the command.
- 5. Scripture and Prayer are to form part of the devotional exercises, both at opening and closing school.
- 6. Scripture reading at opening and closing should be regarded purely as an act of worship, and in no sense as a lesson in reading.

READING.

- 1. Give the names of letters incidentally, only.
- 2. Use the names of letters, but never ask the pupils for them.
- 3. Begin with letters which can be made of immediate use.
- 4. Teach combining of individual sounds by various plans, as having pupils represent letters, and *vice versa*, and by illustrations of distance in bringing letters together.
- 5. Pupils pass from audible sounds to whispers and lastly to unconscious recognition.
- 6. Instead of drilling on separate sounds, let the pupils practise them in combination.
- 7. Allow one child to point out letters, making a word for the others to discover.

- 8. Train in Emphasis from the very beginning, by asking definite questions, by underlining words, or by erasing words which pupils supply.
- 9. In giving eye problems (words to be read from the board) pupils should not be allowed to sound the letters; but in ear problems (words to be written on slates) they should be allowed to do so.
- 10. Before the pupils can read they should be taught Nursery Rhymes or simple gems for emphasis and inflexion; afterwards by writing simple sentences and asking questions, answered by different words in the sentence.
- 11. Children at this age are not reading to gain thought, but to express the thought of others.
- 12. Thinking and feeling come first; correct expression afterwards. The ultimate end of a Reading Lesson is to enable a child to express correctly what he feels and conceives.
- 13. Breathing exercises are recommended for correcting stammering.
- 14. Enunciation and Inflexion, taught naturally by having children personate the characters of a story or fairy tale, at the same time developing imagination and inducing thought.

Note in Senior Second Book Report.—Pupils were called on to reproduce, in their own language, a picture of the lesson previously presented. In these answers, particular attention was paid to the correction of errors. No such correction was made after a pupil read. Preparation for the next lesson was made by pupils writing sentences with new words.

- 15. Before a child tries to read he should (1) know the words, (2) be able to pronounce the words, (3) articulate distinctly, (4) know the meaning of the words, (5) the thought of the entire piece.
- 16. Sight Reading includes Word Recognition and Expression of the Thought.
- 17. Pupils should not have all mistakes corrected when made, or in the attempt to correct, the thought will not be expressed and the reading merely mechanical.
- 18. An error takes more than one correction; errors should be well looked after.
- 19. The power to inflect, articulate. &c., is to be developed in pupils by Gymnastics; which should be used in the correction and eradication of errors. Reading should be an application of the powers developed by Gymnastics.
- 20. Practice in Emphasis, &c., may be given before pupils are able to recognize words.
- 21. In order to accomplish as much work as possible in Reading, the Gymnastic exercises in Articulation, Emphasis, &c., may be used as rests between lessons.
- 22. Simultaneous reading should be resorted to to help the speed and quality of the poorer readers.
- 23. Pupils should be encouraged to read at home, from other books than their readers.

ARITHMETIC.

- 1. Different plans of number building should be followed.
- 2. Drop objects in teaching Notation and Numeration as soon as children understand "ty" as ten.

- 3. Addition tables should be drilled by practical application in examples in addition.
- 4. To prevent counting in Addition, examples should contain no possible combinations with which the pupils are not thoroughly acquainted. Such examples can be made by the teacher by beginning at the bottom of the columns. Teachers should prepare them at home.
- 5. The time allowed for test questions should have reference to dull pupils.
- 6. Examples should be worked on Blackboard only when the pupils don't know how to do them. Much time is often lost by working examples on the Board.
- 7. It was decided that 1, 2, 3, 4, 0 may be combined in any order for a multiplier, in the 8th grade.
- 8. In Multiplication time tests, it is wrong to start with three until pupils can multiply with two very rapidly.
- 9. In Addition, the quickest adders are generally most accurate.
- 10. Simultaneous answering in this and any subject should be in a very low tone, and used with great discretion.
- 11. Home-work in this subject should only be given for Review, or to ascertain how much of the new lesson has been understood.
- 12. Exercise-books.—To secure neatness the pupils should put the figures on the blue lines, and rule all lines in the Example.
- 13. Marks should be given for neatness, as well as accuracy. To encourage the children, shew the best books.

14. If possible, examine Home-work while pupils are doing other work.

GEOGRAPHY.

- 1. A good plan of teaching definitions was considered to be that on which the teacher tells the children a story, and brings in incidentally the idea of Mountain, Cape, Lake, &c.
- 2. Interesting exercises in Direction, &c., might be given in the form of games.
- 3. It was recommended to let pupils give an account of an interesting trip; naming all the rivers, cities, &c., passed; the chief interest to be in trip; the object being to see how much Geography would be learned incidentally.
- 4. Frequently take a lesson on the countries of the World by Zones—asking about the people, products, birds, animals, &c.
- 5. A Game excellent for Friday afternoons is called the "Little Traveller."
- 6. For teaching new matter in Map Geography, let all the pupils sketch the map, and then proceed by one of the following plans. 1st. Teacher gives one name at a time, and pupils locate it, writing the name of the place. 2nd. Teacher gives all the names he wishes remembered, and pupils locate. 3rd. Teacher locates and pupils find the names.
- 7. In Geography it is desirable to associate with each place its Historical, Commercial, or Zoological characteristics.

WRITING.

- 1. Writing must be taught accurately from the very beginning.
- 2. Pupils should be trained in combining the elementary forms of letters, using as many examples as their previous knowledge will admit.

- 3. In the writing lesson, the criticism of work by the pupils themselves, and the inspection of superior work by "inferior little scribes," were suggestives worthy of note.
- 4. It was considered of vital importance to have children hold the pen properly from the first stage in writing, and also to have preliminary exercises every day for the purpose of giving free and easy movement to the hand and arm.
- 5. Particular attention should be given in writing to the position of the head, body and teet, as well as the arms and fingers.

MUSIC.

- 1. In primary classes as well as higher classes, pupils should sing and read music from slates.
- 2. In singing, pronunciation of words should be accurate and definite.
- 3. In Calisthenic Songs, singing should be done softly and gestures made very definitely, so as to convey definite ideas.

DRAWING.

- 1. Children may perform difficult problems with their arms, carrying out ideas presented by the teacher's words.
 - 2. Pass from perceptions to conceptions as soon as possible.
- 3. In drawing, pupils should be taught such names as vertical, perpendicular, oblong, etc., incidentally, from the first, as they can learn names quite as readily at school as elsewhere. Not only might the pupils' talents for drawing be improved, but their language, observations and intuitions, definiteness of conceptions, and analysis of objects.

OBJECT LESSONS.

- 1. The teacher should follow a definite plan, taking—1st. Knowledge obtained by sight; 2nd. That gained by feeling; and, lastly, That found by comparison with other objects.
- 2. Children should be trained to notice characteristics by a hasty glance.
- 3. Vary the training of descriptive powers by giving an object to one child only, who describes it; or, by giving to all but one, who questions about it, and from the answers decides the object.
- 4. Slates should be used in this as in every other lesson, not only for the purpose of writing the characteristics of shape, size, appearance, uses, &c., of the object, but also for to draw it, as a child will look more closely at an object, when he is asked to draw it, than otherwise.
- 5. The primary aim in Object teaching is not to impart knowledge, but to awaken the intellectual powers and to train them to do definite work.
- · 6. Other senses need developing as well as the eyes.

LANGUAGE LESSONS AND GRAMMAR.

- 1. In Composition and Language Lessons the object in the lower classes is not so much to obtain speech grammatically correct, as to obtain on the part of the pupils easy, natural expression of thought. Mistakes made by pupils in conversation at any other time should be corrected.
- 2. In order to improve the language powers of our pupils, spare moments should be devoted to conversations on general news; pupils should be encouraged to relate any familiar tale in their own

words; any form or variety of lesson may be used whereby the imagination of the pupil is cultivated and he is led to express himself familiarly and freely.

- 3. Do not *leave* "incorrect" sentences on the board, as the *eye* will retain the impression of the *errors* more effectively than the *mind* will remember the *correct forms*.
- 4 Our chief aim in teaching Grammar should be:—1st. To enable us to understand other men's thoughts in print. 2nd. To assist us in giving expression to them in reading. 3rd. To aid us in expressing our own thoughts in writing and spelling.
- 5. The formal analysis of a passage should be regarded as a means of, but not as an end towards, arriving at the literary meaning of the passage.
- 6. In grammatical analysis the teacher should aim at bringing out the independent thought of the pupil, care being taken that the work shall partake as little of the mechanical as possible.

ALGEBRA.

That the method adopted be heartily approved, viz.—Proceed from the known to the unknown, from the particular to the general; make the class deduce principles, and when there is an inverse process, as in factors and multiples, associate and bring out the connection between the two.

HISTORY.

- 1. History should not be taught by reigns, but by topics.
- 2. Particular attention should be paid to those subjects the results of which are felt down to our own time.

EUCLID.

Definitions, Axioms, and Postulates should not be taught as the first lessons in Euclid, but when they are first required in the study of the propositions.

2. As a means of impressing the reasoning contained in a proposition, and of letting the pupils see that there is no need to slavishly follow the book, it is desirable to give an easy deduction bearing on the proposition at its close.

SPELLING.

1. The best way to prepare this lesson is by dictating the words on the day before the lesson is to be given, so that pupils may know which words they need to prepare specially.

MISCELLANEOUS.

- 1. Calesthenic Exercises should be used frequently as a rest from mental work, to strengthen the physical systems of the pupils, to improve their carriage and bearing, and to impart definiteness of intellectual activity.
- 2. Any recreation under the guidance of the teacher is better for a change between lessons than mere conversation on the part of the pupils. As an illustration of scores of intellectual recreations, the following, used during the visit of the 7th grade in George street School, may be given. Pupils were asked to think of a word rhyming with a given word, and were called on to express the thought which the word represented without actually using the word in their minds. The efforts of the pupils to express themselves clearly were very amusing, and thoroughly natural. The exercise was greatly commended because of its power in cultivating reproductive imagination, and for its giving great opportunity for improving the language of pupils.

- 3. To ensure speedy lining in the yard and prevent crowding, place every tenth pupil opposite the same number marked on the wall or fence. Always dress by the head, not the feet.
- 4. Marching of the children on the stairs with bodies erect, light footsteps, and close attention was very highly commended.
- 5. That when a class takes physical exercise of any kind, a pupil be appointed to open windows for ventilation.
- 6. All preparations for cleaning slates should be made before 9 o'clock.
- 7. One pupil should immerse and squeeze out all the sponges for the class.
- 8. It is a good plan to reserve the front row of seats for disorderly or talkative pupils.
- 9. It is preferable to call pupils by name rather than by number.
- 10. One definition from the end of the fingers is worth ten from the tip of the tongue.
- 11. It is not what we know, but what we can find when we need it, that is useful to us.
 - 12. He who lacks definiteness in movements, will be correspondingly indefinite in character.
 - 13. Plants growing from seeds and bulbs are a source of interest and information to the children.
 - 14. The ornamentation of some rooms with mottoes, pictures, mosses, ferns, brackets, etc., was specially commended, from the knowledge that the children had a large share in making all the work.

MANUAL TRAINING SCHOOLS.

The City Council, in 1836, passed a resolution directing the attention of the School Board to the desirability of establishing Schools for Manual Training in connection with the Public Schools. As this subject will be likely to attract considerable attention in the future, I think it well to discuss it at some length in this report.

Educators of all ages have been misled by the fallacy that "knowledge is power." Man is the grandest power created by God. Man gives to knowledge whatever power it seems to possess. Knowledge possesses no power of development within itself. Man is created with a germ of progressive power in his very nature, that under tavorable conditions must continue to grow forever. Yet the teachers of the past have devoted nearly all their attention to the unvarying element, knowledge, and have almost entirely neglected the systematic training of the being who acquires and uses the knowledge.

There is a class of educators who would subordinate both knowledge and development to what they call the practical in education. They assert that all education is valueless unless it aids a man in earning his livelihood. Both classes of educators are wrong, and yet each class possesses the element of truth. They are not really so antagonistic as they at first appear to be. Men are now beginning to understand that by a combination of the aims of both classes the true ideal of education is found, because in this way the glaring errors of both are discovered. We are now able to see that the human being is vastly greater and therefore more important than any knowledge that can be communicated to him, and that he is also superior to anything he can make from even the most costly material. Most educational authorities now agree that the highest function of the school is to

enlarge the pupil's sphere of usefulness, and increase his power and rate of development, physically, mentally and morally. The following propositions summarize the opinions of modern educators in regard to the aims of an educational system:—

- 1. It is well to communicate useful knowledge.
- 2. It is much better to increase the capacity for the independent acquisition of knowledge.
- 3. It is still better to develop the power of using knowledge so as to accomplish the most definite results.
- 4. It is best of all to train pupils so that they will desire to use all their knowledge and all their powers for the accomplishment of good to themselves and their fellowmen.

The question, "Should technical instruction be made a part of our Public School education?" can be answered satisfactorily only by an examination of its relationship to these four conclusions. It will aid in making an intelligent investigation into the subject to remember the following fixed educational principles:—

- 1. It is of the utmost importance to train pupils to be able to concentrate their attention on one thing at a time. There can be no education without fixed and intense attention by the pupil.
- 2. Attention may be given to the study of a book or an object, or it may be paid to oral descriptions or to black-board or objective illustrations by the teacher. In either of these cases the attention of the pupil does not arouse him to independent activity. His attitude is merely one of receptive attenion.
- 3. The most developing attention is that given by the pupil in guiding his own hands in accomplishing some definite purpose with material things. This is productive activity.

- 4. The same kind of mental occupation, continued too long, leads to inattention and consequent dullness.
- 5. Change of mental work is more restful to the mind than cessation from work, during the period when we are awake.
- 6. We learn by doing. We know most clearly what we have translated into activity. Expressing an idea in material form defines our thought. The mind guides the hand; the definite action of the hand reacts upon the mind.
- 7. To give a child knowledge beyond his ability to use it, weakens him intellectually and reduces his power as an active agent.

These are the vital principles of true education. If technical instruction can be introduced into schools without violating these principles, there is room for it on a school programme. If it be found that technical instruction aids the teacher in carrying out these principles, then it is an essential part of the work of a school room. The opinions of modern educational authorities go to show that a technical education is not only in harmony with a comprehensive scheme for the proper training of the human race, but that it is the best means for putting into practice the broadest and soundest educational theories. The experience of those who have most thoroughly tested these opinions proves them to be correct. Technical instruction is at once the most practical and the most developing part of the course of study in schools, because (1) it readily secures and retains positive and interested attention; (2) it developes creative attention in the most natural way by calling on the mind to form a definite conception of some work to be done, and by requiring the hands to carry into execution the work planned by the mind; (3) it applies knowledge as soon as it is gained; (4) it defines knowledge by applying it; and (5) it affords the best possible change and mental relaxation after a period of study. What should be the nature of a course of technical instruction in schools?

- 1. It should begin with the earliest school life of the child, because it is identical in character, if not in extent and defiiteness, with the work he has been doing during the time of his play life before going to school. He has been constantly becoming acquainted with the laws of nature, and the means of over-coming and of using them both in his indoor and outdoor sports.
- 2. It should begin very early, because the hands of young children are most easily trained, and their minds have been accustomed to deal with real things, instead of with abstractions. The minds of many children are injured by the suddenness of the transition from the realities and sense perceptions of the home and the field, to the abstractions and the obscure conceptions of the school room.
- 3. The best foundation for a technical education is the Kindergarten. Freebel recognized not only the great importance of industrial training, but the direct connection existing between mental growth and hand work.
- 4. It should include, in the ordinary public school, drawing, especially object drawing and mechanical drawing; hand training, in making simple articles in wood by the use of the jack-knife and gimlet; and an introduction to the study of the natural sciences.
- 5. In advanced public schools, and in High Schools and Collegiate Institutes, there should be manual training schools and a more thorough study of the sciences immediately useful in connection with the leading manufacturing or agricultural interests of the district in which the school is situated.

The manual training suggested would really be the only radical change necessary to be made in our present programme of upper school work in order to carry out these suggestions. A manual training school need not be—should not be—a separate institution. Practice in using tools can be carried on as a part of the regular course of school work, and forms the best means for relieving the pupils from the weariness and lassitude that result from too long a period of study. What is the aim of a manual training school? It is not to teach particular trades, but to give a training in the intelligent application of mechanical principles, and in hand skill, which will fit a boy for entering any trade. It is not to make perfect specimens of woodwork, but to aid in making more perfect citizens. A mere mechanic is too often a mere machine, whose brain needs to do very little in connection with his daily labor. A new invention may turn large numbers of such mechanics out of employment. Ordinary training by apprenticeship would not give them the ability to adapt themselves to new work, and to enter intelligently upon new departments of labor. But even systematic apprenticeship is a thing of the past, and hence the absolute necessity for a substitute for it of a better character. The different effects of apprenticeship and manual schools, on the training of boys, has been well expressed by Mr. Jacobson, of Chicago. He says, "In the manual training school the boy is the object for which the school exists. He is the material that is to be finished. Instead of being left to himself to pick up what he can, as is the case in a shop, competent and intelligent instructors devote themselves to his training. As an apprentice, the boy exists for the benefit of the shop. As a scholar in a manual school, the shop exists for the benefit of the boy."

There are really only a few hand tools to be used in the various trades. The hammer, the saw, the axe, the chisel, the plane,

the square, the brace and bit and the file include most, if not all of them. A boy who can use these dexterously, and who has had a practical training in the application of mechanical principles, will take a very short time to become proficient in any trade. It does not necessarily follow that every boy who attends a manual training school must become a mechanic. Every boy should learn drill in order that he may receive the many physical and moral advantages that result from such training, but because a boy has learned to drill, it does not follow that he must become a soldier. Neither does it follow that because a man can handle tools well he must become a mechanic. The aim of the manual training school, the object of all technical education, is not to make mechanics or expert manufacturers, but to train a race of skilful and intelligent men.

Can such a course of training be given in schools without injury to the pupils in what has been regarded as the legitimate work of the schools? Those who have tested the matter say "Yes," Dr. Woodward, Director of the St. Louis Manual Training School, says, after ten years' experience: "Not only does the work-shop not detract from the interest boys take in books, but stimulates it either directly or indirectly." Dr. Belfield, Principal of the Chicago Manual Training School, says: "An hour in a well-conducted manual training school develops as much mental strength as an hour devoted to Virgil or Legendre." The young men in his school do equally good work in their studies with the students of the High Schools of Chicago, who devote no part of their time to manual training. Mr. Goss, of Pardue University, Latayette, Indiana, says: "An hour in the shop is as valuable for intellectual training as an hour of book study." The opinions of the best European experts on this question are in harmony with these statements of American experience. Dr. Lyon Playfair says: "The true education of a

laborer is to make him an intelligent being, not a mere dexterous manipulator, so that he may have the moral dignity and intellectual force derived from a thorough understanding of the principles of the work in which he is engaged; "and again, "it is a truth incapable of being gainsaid that science must be joined to practice in the advancing competition of the world." In summing up his conclusions regarding the importance of technical education, he lays down the two following laws:

- 1. "Common sense, as well as the experience of other nations, indicates that an elementary knowledge of the principles of science and art involved in the occupations of the people should be introduced into primary schools, in order to make them a fitting preparation for secondary schools."
- 2. That a higher education in relation to the industries of the country is an essential condition for the continued prosperity of the people; for intelligence and skill as factors in productive industry are constantly becoming of greater value than the possession of native raw material or local advantages."

Technical schools should form a part of a national system of public school education for the following reasons:

- 1. The subjects taught afford the best means for training the observant powers, and for securing active and productive attention.
- 2. Because as the intellect is stored it is at the same time necessarily developed by the application of knowledge to practical purposes.
- 3. Because it affords to individuals the best opportunity for cultivating the essential elements of success, described by Herbert Spencer as "A constant progress towards a higher degree of skill, intelligence, and self-regulation."

- 4. Because it gives young men a higher respect for labor, by showing that the humblest work may be combined with a high degree of intelligence.
- 5. Because it increases the money earning power of the workingman, and therefore affords him an opportunity for bettering his surroundings at home, and for providing for himself and family, not only additional comforts, but the means of culture, such as books, pictures, music, etc.
- 6. Because it increases the value of the raw material supplied to the workingmen, and enables them by this means to increase the wealth of the nation in which they live. Mr. J. Scott Russell estimates the value in England of unskilled, moderately skilled, and highly skilled men at £25, £50, and £75 per annum, respectively.

While strongly condemning any system of training that would subordinate intellectual development to practical utility, or encourage industrial education at the expense of true culture, it should never be forgotten that the mere acquisition of knowledge is only the first step in the four-fold process of education, and that technical education affords the teacher the fullest opportunity to add the other three essential steps; ability to gain knowledge independently, power to use knowledge, and desire to use it for good purposes. We must free our schools from the charge made against them by George Eliot, that "They mostly make people like bladders—just good enough to hold the stuff poured into them." We must make our pupils investigators as well as accumulators, producers as well as receivers.

RESULTS OF THE COMBINED EXAMINATION.

The Combined Examiners in 1886 were: William Anderson, Chairman; A. McMurchy, M.A.; John A. Patterson, M.A.; G.

B. Sparling, M.A.; and W. Nattress, M.D. The following tables show the standing of the competing classes in the various subjects:

SENIOR FIFTH BOOK CLASS.

TEN PUPILS FROM EACH CLASS.

| schools. | Mathematics. | Grammar, Composition, and Hygiene. | History & Geography. | Reading, Spell- ing, and Deriv- ation. | Writing, Music, Bookkeeping & Drawing. | Total. |
|-----------------|--------------|------------------------------------|----------------------|--|--|--------|
| Marks possible | 2850 | 1800 | 2000 | 1600 | 1700 | 9950 |
| Wellesley, Boys | 1676 | 1348 | 1406 | 1185 | 11481 | 67633 |
| " Girls | 1536 | 1425 | 1393 | 1288 | 1019 | 6661 |
| Ryerson, Girls | 1212 | 1394 | 1363 | 1236 | 1030 | 6235 |
| " Boys | 1200 | 1311 | 1448 | 1044 | 1030 | 6033 |
| Dufferin, " | 1318 | 1360 | 1232 | 1164 | 952 | 6026 |
| " Boys | 989 | 1117 | 1021 | 915 | 977 | 5019 |

JUNIOR FIFTH BOOK CLASS.

TEN PUPILS FROM EACH CLASS.

| SCHOOLS. | Mathematics. | Grammar, Composition, and Hygiene. | History & Geo-graphy. | Reading, Spelling, and Derivation. | Writing, Music, Bookkeeping & Drawing. | Total. |

REPORT

OF THE

Examiners in Regard to the Combined Examinations.

The Examiners have the honor to report that on the 21st and 22nd June, they examined the pupils selected from the four highest divisions of the City Public Schools. The examinations took place in the Ryerson and Dufferin Schools, and, as usual, the answers were given in writing. The results of a careful scrutiny and comparison of the papers handed in are given above. addition to the names of the pupils entitled to receive scholarships, medals and prizes, a tabular statement is given showing the aggregate number of marks taken by every division in each of the subjects of study. This will afford a ready means of ascertaining at a glance the comparative standing of the various schools. It must, however, be borne in mind, as has been remarked on former occasions, that in estimating the respective merits of Teachers, some allowance must be made for local advantages. Speaking generally, the Examiners are happy to be able to state that abundant evidence is everywhere apparent of careful teaching, diligent study and steady progress. While much attention has evidently been given to the higher branches of the Public School Curriculum, the more elementary subjects have not been neglected. The spelling was remarkably good. The improved plan of teaching this subject by means of written, instead of oral exercises, is now generally pursued, and greatly facilitates the work. The Writing, also, was exceptionally well

done, some of the specimens, even in the Senior Fourth Book, being really elegant, but not showy. The general neatness of the answer papers was generally remarked, and the concise and well-arranged language employed in the answers exhibits a very creditable degree of progress in the elements of English Composition. Nor was the improvement confined to special cases, the competition having been remarkably close throughout. In the contest for the medals presented by Mr. John McDonald, to the two best pupils in the City Schools, Herbert Sampson, who stood first, was only nine marks ahead of Lizzie Blight and Douglas Airth, who stood second and equal.

A Special Examination of competitors for the prize presented by the Rev. Septimus Jones, for the best reader in the City Public Schools, took place at the Wellesley School on the 29th June. About fifty pupils presented themselves. The highest place in this contest was awarded to Maggie Lee of the Dufferin School. Four others were deemed worthy of a second trial, and are entitled to honorable mention in the following order:—Julia Cowan and Jennie Tector, Wellesley School; Annie Reed, Dufferin School, and Bessie Dyas, John Street School.

The Examiners would remark in conclusion that the Board of Trustees, and the citizens of Toronto generally, have good reason to feel proud of the high state of efficiency of their Public Schools. It is almost unnecessary to say that the Inspector and his well-selected staff of teachers are earnest, faithful and zealous workers; for without these qualities the highly satisfactory results brought out by the Combined Examinations could not have been realised.

WM. ANDERSON,

Chairman Board of Examiners.

PROGRESS OF THE PUBLIC SCHOOLS.

Table E gives a comparative statement of various items relating to the Schools since 1844. It will be seen, by reference to it, that the increase in the attendance at our schools has been very rapid.

| In | 1856 | the average | registered | No. w | as 2,318, t | he daily | attendance, | 1,747 |
|-----|------|-------------|------------|-------|-------------|----------|-------------|--------|
| 6.6 | 1866 | 6.6 | 4.6 | 66 | 3,139, | 46 | 6.6 | 2,399 |
| 6.6 | 1876 | 6.6 | 66 | 46 | 6,912, | 66 | 66 | 5,976 |
| 66 | 1886 | 6.6 | 66 | 6.6 | 15,365, | 6.6 | 4.6 | 13,642 |

The attendance has thus been considerably more than doubled during the past ten years.

Respectfully submitted,

JAMES L. HUGHES,

Public School Inspector.

Examination Papers.

EXAMINATION PAPERS.

COMBINED EXAMINATION.

ARITHMETIC.

SENIOR FIFTH BOOK.

- 1. Find the compound interest of \$760.50, for 4 years, at 4 per cent.
- 2. A rectangular bin which contains 480 cubic feet, has its depth, length, and breadth each increased 10 per cent. What is its capacity after this is done?
- 3. If a wheel, which revolves at the rate of 480 times in 8 minutes, make 49 revolutions in a certain time, find the number of revolutions which another wheel will make in the same period, at the rate of 36 revolutions in 7 minutes.
- 4. Copper is bought at \$76.50 per ton, payable in 6 months; how should it be sold the same day (giving eight months' credit,) so as to make the immediate gain 25 per cent., money being worth 4 per cent. per annum?
- 5. I buy two articles for \$150; if I sell both and lose 4 per cent. on what one cost me, but gain 6 per cent. on what the other cost me, I should gain on the whole 1½ per cent.: what was the price of each?

- 6. There are two substances, A and B, such that 8 cubic inches of A balance 5 cubic inches of B; if one cubic inch of each be transferred to the other scale-pan, which will be the more heavily laden? and by how much per cent.? What volume must now be cut from the one and placed with the other to restore equilibrium?
- 7. A railway company starts with a debt of half a million dollars, contracted at 6 per cent.; the net earnings of the first year amount to \$5,000, and additional money is borrowed at the same rate to pay the interest on the debt. In succeeding years their earnings increase by \$10,000 each year, and sufficient additional money is always borrowed at the same rate to pay the whole interest due. What is the position of the company at the end of the fourth year, after the interest is paid?
- 8. A man buys stock at 90½, and sells out at 90, thereby losing \$206; he then invests in stock which is at 3 per cent. premium, and sells again when it has reached 5 per cent. premium. With the proceeds he invests in the 3 per cents. at 81. Find his yearly income from the last investment.
- 9. Find the cost of a draft on Montreal for \$1,000, payable 80 days after sight, exchange being ½ per cent. premium, and interest 6 per cent.

ALGEBRA.

SENIOR FIFTH BOOK.

1. Simplify (a)
$$3a - [2b + (a - 2c) - 4c + 4 3a + (-a - 2b + c) +].$$

(b) 3
$$(a - x)$$
 $(a + x)$ — 2 $(a - 2x)^2$ — $(3a-2x)(2x-3a)$ — 4 $(3x - a)(a + x)$.

2. Divide
$$x^4 - (3a - 5b) x^3 - (6a^2 + 15ab - 8b^2) x^2 - 6ab (5a + 4b) 1x - 48a^2 b^2$$
 by $x^2 - 3ax - 6a^2$.

3. Find (a) L. C. M. of
$$36ax^3 + 12x^2 + 6xy + 18ax^2y$$
, and $60a^2x^3y - 16ax^2y - 12xy$.

(b) H. C. F. of
$$a^2 - b^2 - 1 - 2b$$
, & $a^2 - b^2 + 1 + 2a$,

4. Simplify (a)
$$\frac{12y^3 - 7y^2 - 12y}{9y^3 + 6y^2 - 24y}.$$

(b)
$$\frac{x-1}{x^2-7x+10} - \frac{x+2}{x^2-9x+14} - \frac{x-3}{x^2-12x+35}$$
.

(c)
$$\left[\frac{\frac{1}{a} + \frac{1}{b+c}}{\frac{1}{a} - \frac{1}{b+c}} \right] \times \left[\frac{1}{a} + \frac{b^2 + c^2 - a^2}{2bc} \right].$$

5. Solve (a)
$$(9 - 4x) (9 - 5x) = 36 (2 - x)^2 - 4 (5 - x) (5 - 4x)$$
.

(b)
$$\frac{2}{2x-5} = \frac{6}{3x-1} - \frac{1}{x-3}$$
.

(c)
$$\frac{x+2}{x-1} - \frac{4-x}{2x} = \frac{7}{3}$$
.

6. On drawing up a body of men in the form of a solid square, there were 59 men over, and on increasing the side of the square by one there were 20 vacancies. How many men?

GEOMETRY.

SENIOR FIFTH BOOK.

1. If from the ends of the base of a triangle two straight lines be drawn to a point within the triangle, these lines shall be together less than the sides of the triangle, but shall contain a greater angle.

- 2. In a right angled triangle the square on the hypotenuse is equal to the sums of the squares on the other two sides.
- 3. Divide a straight line into two such parts that the rectangle contained by the whole line and one part of it shall be equal to the square of the other part.
- 4. If the sides of a triangle be bisected, and a line be drawn joining the points of bisection, this line shall be parallel to the base and equal to half of it.

GRAMMAR AND COMPOSITION.

SENIOR FIFTH BOOK.

- 1. Explain fully—indirect object, apposition, complex sentence, origin of the final d or ed in the past tense, adjective used predicatively.
- 2. Give one example each of noun sentence, adjective sentence, adverbial sentence; two examples of nouns used as adjectives, and two of adjectives used as nouns.
- 3. Give the possessive plural of attorney, woman, lady, it, German, wife.
- 4. Thrice is he armed that hath his quarrel just;
 And he but naked though locked up in steel,
 Whose conscience with injustice is corrupted.

Analyze the above.

5. Parse the italicized words in the following :

Gives not the hawthorn-bush a sweeter shade To shepherds looking on their silly sheep,
Than doth a rich embroidered canopy,
To kings that fear their subjects treachery?
O yes it doth; a thousand-fold it doth.

6. Correct the errors that occur in the following sentences, giving reasons for the changes you make:

He was a man who though I did not like him, I could not help respecting.

There stands within the door, on the left side as you enter, two beautiful figures representing Mars and Minerva.

In this lies both its merit and its defect.

It appears that no one is exempt from serving on a coroner's jury, and may be fined for non-attendance.

Nothing but trials and disappointments seem to await me.

I like it the best of any machine I have seen.

Soldiers are in the plural number because they mean many.

By a telegram received this morning, the prince had arrived, and was staying at the castle.

COMPOSITION.

7. The style in which the answers to the foregoing questions are given will be regarded as a sufficient test of the candidate's proficiency in this subject.

SPELLING, DERIVATION, ETC.

ıea?

SENIOR FIFTH BOOK.

as it is

1. Write, from dictation, (Fifth Reader) the following pie highest

(a) Page 136, beginning "Equally," and ending yards."

of the sun? of

(b) Page 276, first stanza.

2. Derive the following words, giving the meanings of the *roots*, also of the *prefixes* and *affixes*, where they occur:

| accessible, | petrified, |
|----------------|------------|
| incohering, | principal, |
| fortification, | geology, |
| supplicate, | lieutenant |
| prophetic, | recede, |
| soliloquy, | monarch, |

- 3. Give the forces of the following prefixes, and an example of each: apo, sine, ob, se.
- 4. Give the meanings of the following roots, and one English word from each: gero, ludo, socius, ergon.
- 5. Distinguish genii and geniuses; cannon and canon; human and humane.
- 6. Give the meanings of configuration, accountrements, aperture, impetuous, awry.

HISTORY.

SENIOR FIFTH BOOK.

- 1. Sketch the Conquest of Canada by the English.
- 2. Give some account of the Canadian Rebellion.
- 5. Parhat three important Acts of the Canadian Parliament were assed in the year 1854?
 - $\frac{1}{Th}$ otes on New Brunswick and Prince Edward Island.

To lames and dates of accession of the several Governors-O yes of the Dominion.

- 6. Explain the title of the House of Stuart to the English throne.
- 7. Write notes on the "Petition of Right," the "Long Parliament," and "Ship Money."
- 8. Give an account of Oliver Cromwell.
- 9. What was the "Exclusion Bill," and the "Declaration of Indulgence."
- 10. Describe the Revolution of 1688.

GEOGRAPHY.

SENIOR FIFTH BOOK.

- 1. Name the rivers and islands of the east coast of England and Scotland.
- 2. Name the most important of the West India Islands, stating to what country each belongs.
- 3. Show by outline map the position of Burmah, and mark its three chief towns.
- 4. Give the boundaries of Central America.
- 5. What range of mountains traverses Central America?

 Describe this range throughout its entire length, as it is known by different names, giving the names of the highest peaks and indicating where volcanoes occur.
- 6. What is the *ecliptic*? What causes an eclipse of the sun? of the moon?

BOOK-KEEPING.

SENIOR FIFTH BOOK.

- 1. (a) What is the difference between single and double entry?
 - (b) Explain clearly the advantages of the latter.
 - (c) For what kind of business is the former suitable?
- 2. Write notes on the invoice book, cash book, sales' book, and bill book.
- 3. J. B. Dennis owes \$500.00 to Henry James, and gives him his note to-day for this amount, with interest at $5\frac{1}{2}$ per cent., the note being payable on demand. Write out the note.
- 4. Explain the difference between:
 - (a) Cash sales and account sales.
 - (b) Bills receivable and bills payable.
 - (c) Smith Dr. to Cash, and Cash Dr. to Smith.
- 5. Ascertain from the following statements:
 - (a) The net capital invested.
 - (b) The gain or loss.
 - (c) The present financial position.
 - (d) The present net capital.

May 1st. Invested in the business, \$30,000.

May 5th. Withdrew from capital, \$5,000.

| May | 30th. | Merchandise on hand, as per inventory | \$15,000 |
|-----|-------|---------------------------------------|----------|
| 66 | 6.6 | Cash on hand | 8,000 |
| 66 | 6.6 | Bills receivable on hand | 7,000 |
| 6.6 | 6.6 | Owing to us from various parties | 2,500 |
| 6 6 | 4.6 | " by us to " " | 1,500 |
| 66 | 4.4 | Bills payable outstanding | 1,500 |

HYGIENE.

SENIOR FIFTH BOOK.

- 1. How does drowning cause death? How would you proceed to resuscitate a person from drowning?
- 2. In arranging for the admission of light in a school-room, where would you place the windows, and how control the amount of light admitted?
- 3. What regulates the supply of blood to any part or organ? Explain this in the case of an ordinary *faint*, and state your treatment of such a case.
- 4. What is sleep? "The heart and lungs cease not with sleep."

 How do these organs get rest?
- 5. Prepare the sick-room for a fever patient.

MUSIC.

SENIOR FIFTH BOOK.

- 1. What are key-signatures? Give the signatures of the following keys: B flat major, C major, F major, and E minor.
- 2. Define octave, forte, staccato, pianissimo, presto, crescendo.
- 3. What is the difference between a major and a minor scale? Write the scales of C major and A minor, marking where the semitones occur.
- 4. How many kinds of time are there? Give the signature of each kind.
- 5. What forms a common chord? What is the key-chord of A major and of G minor.

DRAWING.

SENIOR FIFTH BOOK.

- 1. Marks to be assigned for work in drawing-books.
- Draw the model placed before you not less than six inches in height.
- 3. Draw an oval and an ellipse, the length of each to be not less than 6 inches

Note.—No credit will be given for any drawing in which the lines appear to be ruled or any mechanical aid used. Show, faintly, the construction lines.

ARITHMETIC.

JUNIOR FIFTH BOOK.

1. Simplify:

$$6\frac{1}{2} - \frac{3.25 + 2\frac{1}{4}}{3\frac{1}{4} - 2.25} + \frac{73.8 \times \frac{3}{19} \text{ of } .0009747}{.00018} - 6.8099.$$

- 2. A garden 76 yds. long, and 56 yds. broad, enclosed by a wall, has a border of 4 ft. wide, and within this a path 5 ft. wide, the middle being grass. Find the area of the border, grass, and path, respectively.
 - 3. If a wheel, which revolves at the rate of 480 times in 8 minutes, makes 49 revolutions in a certain time, find the number of revolutions which another wheel will make in the same period at the rate of 36 revolutions in 7 minutes.
 - 4. A rectangular bin which contains 480 cubic feet has its depth, length, and breadth each increased 10 per cent. What is its capacity after this is done?
 - 5. Find the compound interest of \$760.50, for 4 years, at 4 per cent.
 - 6. A house, the rent of which was \$841.85, was bought for \$7,965.00. The taxes (paid by the owner) were \$50, and repairs cost \$75; what rate per cent. did the owner get for his money?
 - 7. A servant's wages are fixed at 22 guineas a year; he enters his situation on the 12th of July, and leaves on Christmas Day in the same year; his master has advanced him 3½ guineas; what sum ought he to receive?
 - 8. Copper is bought at \$76.50 per ton, payable in six months; how should it be sold the same day (giving 8 months credit), so as to make the immediate gain 25 per cent., money being worth 4 per cent. per annum?

ALGEBRA.

JUNIOR FIFTH BOOK.

1. If
$$x = 3a^2 - 6ab + 5b^2 + 4d^2$$
.

$$y = 7a^2 - 8ab + d^2 + 5b^2.$$

$$z = 9a^2 + e - 5ab + 3b^2 - 3d^2.$$

$$t = 11a^2 - 4b^2 - 3ab.$$

Find the value of y - x + t - z.

- 2. If a = 1, b = -2, c = -3, find numerical value of $(2a + b c)^2 + (3a b + 2c)^2 (a 5b + 2c)^2 + (a b + c)^2$.
- 3. Simplify $3(a-x)(a+x)-2(a-2x)^2-(3a-2x)(2x-3a)-4(3x-a)(a+3x)$.
- 4. Divide $x^3 8y^3 27z^3 18xyz$ by x 2y 3z.
- 5. Find L. C. M. of $6a^2 5ab 6b^2$, $12a^2 + 5ab 2b^2$, $8a^2 14ab + 3b^2$.
- 6. Simplify (a) $\frac{12y^3 7y^2 12y}{9y^3 + 6y^2 24y}$.

(b)
$$\left\{ \left(\frac{a^2 + b^2}{b} - a \right) \stackrel{\cdot}{\cdot} \left(\frac{1}{b} - \frac{1}{a} \right) \right\}$$
$$\times \frac{a^2 - b^2}{a^3 + b^3}$$

7. Solve (a)
$$4x - \frac{8x}{7} + 2\frac{1}{21} = \frac{13}{21} - \frac{2(7-4x)}{7}$$
.
(b) $(a + x)(a - x) = (b - x)(2 + x)$.

8. How many bushels of oats, at 44 cts. a bushel, must be mixed with 120 bushels at 60 cts., that the mixture may be sold for 50 cts.?

GEOMETRY.

JUNIOR FIFTH BOOK.

- 1. Define an obtuse angled triangle, circle and rhombold.
- 2. If from the ends of the base of a triangle two straight lines be drawn to a point within the triangle, these lines shall be together less than the sides of the triangle, but shall contain a greater angle,
- 3. If two straight lines cut each other the opposite angles at the point of section shall be equal.

GRAMMAR AND COMPOSITION.

JUNIOR FIFTH BOOK.

- 1. Name the parts of speech that can be inflected. Which two of these, or their equivalents, must every sentence contain?
- 2. Explain the following terms as used in grammar: Indirect object, nominative absolute, passive voice, strong verb, attribute.
- 3. In the following, parse the words in italies:

Breathes there a man with soul so dead, Who never to himself has said, This is my own, my native land?

Give us this day our daily bread.

4. Analyze the following:

Tell me not in mournful numbers, Life is but an empty dream; For the soul is dead that slumbers, And things are not what they seem.

5. Correct the errors that occur in the following sentences, giving reasons for the changes you make:

Nobody but you and she were in the room since.

You must have forgot that you have went over that lesson before the bell rung for intermission.

Which is the farthest north—New York or Toronto?

A moral and honorable mode of action and thought are enforced as a duty.

I wish you would set still while I am writing.

Thinks I to myself he will soon find out his mistake.

COMPOSITION.

6. The style in which the answers to the foregoing questions are given, will be regarded as a sufficient test of the candidate's proficiency in this subject.

SPELLING, DERIVATION, ETC.

- 1. Write, from dictation, (Fifth Reader) the tollowing passages:
 - (a) Page 362, beginning "the sound of," and ending "sport,"
 - (b) Page 152, first stanza.

2. Derive the following words, giving the meanings of the roots, also of the prefixes and affixes where they occur.

adventure, angel,
exhausted, thermometer,
occurrence, distant,
receding, perfect,
proclamation, valiant.

3. Give the forces of the following roots, and one English word from each:

gigno, cheir,
patior, frons,
ergon, quatuor.

- 4. Give the forces of the endings: -ster, -ly, -uncle, and one example of each.
- 5. Give the meanings of invigorated, equilibrium, diurnal, requiem, ominous, menacing.

GEOGRAPHY.

- 1. Describe the great slopes of the United States.
- 2. Draw an outline map of that part of New Brunswick which borders on the Province of Quebec and on the State of Maine, mentioning and showing the position of the counties of New Brunswick thus situated and the adjoining counties in Quebec.

- 3. Where are St. Paul's Island, Townsend Bay, Metis, St. Regis, Mississippi Lake?
- 4. What are the chief products of England? Name its chief seats of commerce.
- 5. In what respect are Margate and Brighton important?
- 6. What do you mean by the term *climate?* What is the chief cause of its variation?

HISTORY.

- 1. Give an account of the Count de Frontenac.
- 2. Name in order the principal battles of the War of 1812, '13 and '14, the dates, the generals engaged, and the results.
- 3. Give the provisions of the Treaty of Paris, the Treaty of Utrecht, and the Washington Treaty.
- 4. Sketch the history of the North-West.
- 5. Give an account of the present Constitution of Canada.
- 6. Give an account of the early preaching of Christianity to the English.
- 7. Describe the Norman Conquest and the effect of the same.
- 8. What was the Great Charter and what led to it?
- 9. Name in order, with dates, the Sovereigns of the House of Tudor.
- 10. Sketch the reign of Queen Elizabeth.

BOOK-KEEPING.

JUNIOR FIFTH BOOK.

1. Write two receipts, the first for rent, the second for payment in full of an account.

2. Give definitions for:

Asset. Liability.
Creditor. Invoice.
Gain. Posting.
Journal. Cash Sales,
Bill Payable. Net Capital.

- 3. Write an order, giving James Gordon authority to purchase goods to the value of \$500.00 from D. F. Welford & Co., and to charge them to our account.
- 4. The following entries are taken from John Smith's account in our Ledger:

May 1st. To Cash, \$90.00.

May 3rd. By Merchandise, \$75.00

Explain these fully, and give the Day-Book Entries corresponding to them.

HYGIENE.

- 1. How does the blood in an artery differ from that in a vein?

 Where and how does the blood pass from one to the other?
- 2. In arranging for the admission of light in a school-room, where would you place the windows, and how control the amount of light admitted?

- 3. How does drowning cause death? How would you proceed to resuscitate a person from drowning?
- 4. How is the voice produced? What is the condition of the vocal organs in hoarseness? Name two of the most common causes of hoarseness.
- 5. A child receives a deep cut in the palm which is bleeding freely. What would be your immediate treatment?

MUSIC.

- 1. What are key-signatures? Give the signatures of the following keys: B flat major, C major, F major, and E minor.
- 2. Define octave, forte, staccato, pianissimo, presto, crescendo.
- 3. What is the difference between a major and a minor scale?

 Write the scales of C major and A minor, marking where
 the semitones occur.
- 4. How many kinds of time are there? Give the signature of each kind.
- 5. What forms a common chord? What is the key-clford of A major and of G minor.

DRAWING.

JUNIOR FIFTH BOOK.

- 1. Marks to be assigned for work in drawing books.
- 2. Draw the model placed before you not less than 6 inches in height.
- 3. Draw an oval not less than 6 inches in length.
- Note.—No credit will be given for any drawing in which the lines appear to be ruled or any mechanical aid used. Show, faintly, the construction lines.

ARITHMETIC.

SENIOR FOURTH BOOK.

1. Simplify:

$$6\frac{1}{2} - \frac{3.25 + 2\frac{1}{4}}{3\frac{1}{4} - 2.25} + \frac{73.8 \times \sqrt[3]{_{19}} \text{ of } .0009747}{.00018} - 6.3099.$$

- 2. Two men have worked, in a certain number of days, 1233 and 1096 hours, respectively, working an exact number of hours each day. Find the number of days and also the number of hours each man worked per day.
- 3. A garden 76 yds. long and 56 yds. broad, enclosed by a wall, has a border 4 ft. wide, and, within this, a path 5 ft. wide, the middle being grass. Find the area of the border, grass, and path, respectively.
- 4. It takes a man 5½ hours longer to drive to a town 8½ miles distant than to go by rail. At what rate per hour does he drive if the time by rail is 3½ hours?

- 5. A man sells a horse for \$390.00, and thus loses $2\frac{1}{2}$ per cent. What should he sell him for in order to gain $2\frac{1}{2}$ per cent.?
- For \$150.00 lent on the 1st January, 1886, I receive, on June 1st, 1886, the sum of \$152.81\frac{1}{4}\$. Find the rate per cent.
- 7. A grocer mixes 50 lbs. tea at 75c. with 75 lbs. at 50c. At what price per lb. must be sell the mixed tea so as to gain 5c. per lb.
- 8. Divide £7, 7s. 0d. among A, B, C, and D, giving A a guinea more than B, giving B a pound more than C, and giving C a florin more than D.

ALGEBRA.

- 1. If a = 3, b = 2, c = 1, find the numerical value of
 - (a) $5a^2 b^3 c^4 3a^5 b^4 c + abc$.
 - (b) ab (a + b) (c a).
- 2. Add 2a 3b + 4c 7d x + 7y, -5a + d 4c + 6b + 4x, 11a 5b, b c 3d 3y, -7b + 9d 4y, and from the sum take 3b c + 4d 2y.
- 3. Simplify (a) $5x [7 \frac{1}{3}x (5 x) 4] + 3x$.
 - (b) (3x-2)(2x-3)-5(2x+3)(3x-1)+8(6x+5).
- 4. Multiply $5c^8 3c^6 + 9c^4 10c^2 + 4$ by $9c^6 + 5c^4 13c^2 2$.
- 5. Divide $2x^9 x^7 15x^5 2x^4 3x^3 + 4x^2 + 9x + 6$ by $2x^5 + 3x^3 3x 2$.

ENGLISH GRAMMAR.

SENIOR FOURTH BOOK.

- 1. Explain the terms: nominative case, voice, apposition, predicate, sentence.
- 2. Give the plurals of German, Frenchman, step-son, attorney-at-law, ox; comparative and superlative of old, sensible, easy, spry; past tense and past participle of break, am, ring, see, mistake, and plural possessive of woman.
- 3. In the following parse the words printed in italics:

Long ago in the centre of the City of Rome there suddenly appeared a deep chasm or pit. No one knew what had caused it, and no one could fill it up.

4. Analyze-

The man whom you see in at the bar is the prisoner whose guilt those witnesses will prove.

5. Correct the errors that occur in the following sentences:

Here's Tom and his brother coming to meet us.

Will you learn George to play on the flute?

He would have went this morning if I had not forgot to wake him in time.

It wasn't him that done it I don't think.

All hands up that can answer the question.

Each of the candidates must provide their own stationery.

Nothing but balls and parties seem to have any interest for her.

SPELLING, DERIVATION, ETC.

SENIOR FOURTH BOOK.

- 1. Write, from dictation, (Fourth Reader) the following passages:
 - (a) Page 149, beginning "Besides," and ending "faces."
 - (b) Page 189, beginning "The lumber trade," and ending "civilization."
 - (c) Page 277, beginning "News of battle," and ending "gallant king."
- 2. Derive the following words, giving the meanings of the *roots*, also of the *prefixes* and *affixes*, where they occur:

agricultural, discordant, congregate, degrading, navigation, capital, transported, extract.

- 3. Give the forces of the following roots, and one English word from each: orior, struo, crux, nox, potens.
- 4. Give the meanings of:

appalled, apex, confederate, malefactor, combustion, ordnance.

HISTORY.

- 1. Give an account of the Norman Conquest.
- 2. Give an account of Thomas Beckett.

- 3. Sketch the history of Edward II.
- 4. Describe the Wars of the Roses.
- 5. Give an account of the English Reformation.
- 6. What course of events brought about the Revolution of 1688?
- 7. What were the chief events in Queen Anne's reign.
- 8. Give an account of the Seven Years' War.
- 9. Sketch the history of the younger Pitt.
- 10. Describe briefly the reign of Queen Victoria.

GEOGRAPHY.

- 1. Name the provinces of Ireland, and the chief seaport of each.
- 2. What is a watershed? Name one.
- 3. Name the seaports of the United States and of Canada.
- 4. Name the New England States, with their capitals.
- Draw a map of Vancouver Island, showing the position of the smaller islands between it and the main land, with names.
- 6. Where is New South Wales? For what is it noted. Name its capital and chief towns.

HYGIENE.

SENIOR FOURTH BOOK.

- 1. Name the ordinary impurities in water. How would you detect the presence of decaying vegetable matter? What impurities are removed by the filter?
- 2. Give the following particulars as best suited for the promotion of health, for physical growth, and for the training of the mind of a child of 14 years: Hour for rising; time for and number of meals a day; number of hours at school; number for home study; times for and amount of recreation; hour for retiring.
- 3. In utilizing windows for ventilation, give two approved methods of adjusting the sashes.
- 4. What is a disinfectant? (live the names of four of the most common ones.
- 5. How does drowning cause death? How would you proceed to resuscitate a person from drowning?

MUSIC.

- 1. What is music?
- 2. What is a scale? How many are there? Name and define each.
- 3. What is melody?
- 4. Define clef, sharp, flat, natural, and bar.

- 5. What key on the piano is used for B sharp and what for E sharp?
- 6. What are key signatures? Give the signatures of the following keys: B flat major, C major, F major, and E minor.

DRAWING.

SENIOR FOURTH BOOK.

- 1. Marks to be assigned for work in drawing-books.
- 2. Draw the model placed before you not less than six inches in height.
- 3. Draw an oval not less than four inches in length.

Note.—No credit will be given for any drawing in which the lines appear to be ruled or any mechanical aid used. Show, faintly, the construction lines.

ARITHMETIC.

JUNIOR FOURTH BOOK.

 Statement of Aid granted to Railways by Governments and Municipalities—Constructed and under construction—30th June, 1885:

SUMMARY.

| | Loan. | Bonus. | Subscription to Shares or Bonds | |
|------------------|---------------|----------------|------------------------------------|--|
| Fovernments: | \$ cts. | \$ cts. | \$ cts. | |
| Dominion | 45,023,545 33 | 110,283,505 32 | | |
| Ontario | 26,000 00 | 5,920,984 52 | | |
| Quebec | 3,722,956 00 | 4,500,954 02 | | |
| New Brunswick. | | 3,632,665 00 | 300,000 00 | |
| Nova Scotia | 50,000 00 | 2,996,549 00 | | |
| Municipalities : | | | | |
| Ontario | 300,000 00 | 8,596,541 78 | 672,500 00 | |
| Quebec | 2,434,000 00 | 310,000 00 | 1,368,000 00 | |
| New Brunswick | 3,000 00 | 233,500 00 | 80,000 00 | |
| Nova Scotia | ******** | 150,000 00 | 100,000 00 | |
| Manitoba | | 525,000 00 | | |

Find, from the above table, the total of the Loans, Bonuses, and Subscriptions, respectively; also the grand total.

2. Two men have worked, in a certain number of days, 1,233 and 1,096 hours respectively, working an exact number of hours each day. Find the number of days and also the number of hours each man worked per day.

3. Simplify
$$\frac{4\frac{2}{3} \times 5^{1}/_{5} \times 8\frac{3}{4}}{8^{2}/_{5} \times 4\frac{7}{8} \times 4^{1}/_{5}}$$

4. It takes a man $5\frac{1}{2}$ hours longer to drive to a town $82\frac{1}{3}$ miles distant than to go by rail. At what rate per hour does he drive if the time by rail is $3\frac{1}{6}$ hours?

- 5. A dishonest milkman mixes one pint of water with every two gallons of milk. How many gallons will he make in this way out of 20 gallons of milk?
- 6. A sea-captain who owned ³/₅ of a ship and cargo, gave to his wife ¹/₃ of his share, to his daughter ¹/₂ of what his wife received, to his son ²/₃ of the remainder, and equally divided what was still left between his two nieces. If the ship and cargo are worth \$3,000, find the share of each.

ENGLISH GRAMMAR.

JUNIOR FOURTH BOOK.

- 1. Write out the rule with exceptions for forming the plurals of nouns, and the rule for forming the possessive case.
- 2. Give the plurals of wife, attorney, church, fox, ox, brandy, her: the comparative and superlative of old, fertile, bad, sunny: the past tense and past participle of go. fall, do, grow.
- 3. In the following sentences parse the words printed in italics, and analyze as far as the word up:
 - The crow dropped the cheese which the fox immediately snapped up.
 - The furious roaring of the famished lion struck terror into every heart, and made the poor slave prepare for the worst.
- 4. Correct the errors that occur in the following sentences:
 - The mens' and boys' caps and the ladie's bonnets are of the latest patterns.

Tom writes awful bad; you can scarcely tell his 5s from his 3s; he does not cross his ts or dot his is, and his bs are like ls.

Our's is much larger than your's or their's.

He has went over that rough road several times; and once came very near getting his leg broke.

Has James and his friend returned from the excursion?

After he laid down he remembered that he had left it laying on the table.

I think you might have wrote and told me what you thought of those sort of bicycles.

SPELLING, DERIVATION, ETC.

JUNIOR FOURTH BOOK.

- 1. Write, from dictation, (Fourth Reader) the tollowing passages:
 - (a) Page 116, beginning "The situation," and ending "voyage."
 - (b) Page 65, beginning "I drew near," and ending "approached him."
 - (c) Page 99, first stanza.
- 2. Derive the following words, giving the meanings of the *roots*, also of the *prefixes* and *affixes* where they occur.

conjunction, descend, commit, extract, credible, recur, ascribe.

- 3. Give the forces of the following roots, and one English word from each: gravis, merx, pes, scando.
- 4. Give the meanings of:

ingenuous, chaos, incessant, phantom, exaggerated.

GEOGRAPHY.

JUNIOR FOURTH BOOK.

- 1. Name the rivers of the United States, stating in what direction each flows, and where it empties.
- 2. Name the provinces of the Dominion, and the chief city of each.
- 3. Sketch an outline map of Ontario, tracing the different lines of railway, and marking the chief towns along each.
- 4. Give the physical features of the north-east coast of South America.
- 5. Name the chief seaports on the east side of England, Ireland, and Scotland, respectively.
- 6. In going from Venice to Constantinople, by boat, what bodies of water would we sail over? What is a sea, a strait, an archipelago?

CANADIAN HISTORY.

JUNIOR FOURTH BOOK.

- 1. Give an account of the earliest explorations in Canada.
- 2. Sketch the history of Champlain.
- 3. Describe Queen Anne's War.
- 4. Explain what is meant by "Feudal Tenure" and "Seigniorial Tenure," and state the provisions of the Constitutional Act of 1791.
- 5. Connect with Canadian history the following places:
 "Mackinaw," "Stoney Creek," "Chrysler's Farm,"
 "Ridgeway," and "Batoche,"
- 6. What were the causes of the Canadian Rebellion?
- 7. State the provisions of the British North America Act.
- 8. Sketch the history of the Canadian Pacific Railway.
- 9. Describe the growth of the Canadian Public School System.
- 10. Write notes on "Hudson," "Braddock," "U.E. Loyalists," "Marquis of Lorne," and "Louis Riel."

HYGIENE.

JUNIOR FOURTH BOOK.

- 1. What is the difference between an artery and a vein? What is the chief source of blood supply?
- 2. What efforts would you make to arrest bleeding from the nose?

- 3. Give rules for bathing.
- 4. Explain clearly why tight clothing should not be worn. How would you vary the clothing with the seasons?
- 5. Give the following particulars as best suited for the promotion of health, for physical growth, and for the training of the mind of a child of 10 years: Hour for rising; time for and number of meals a day; number of hours at school; number for home study; times for and amount of recreation; hour for retiring.

MUSIC.

- 1. What is music?
- 2. What is a scale? How many are there? Name and define each.
- 3. What is melody?
- 4. Define clef, sharp, flat, natural, and bar.
- 5. What key on the piano is used for B sharp, and what for E sharp?
- 6. What are key signatures? Give the signatures of the following keys: B flat major, C major, F major, and E minor.

DRAWING.

JUNIOR FOURTH BOOK.

- 1. Marks to be assigned for work in drawing-books.
- 2. Draw the model placed before you not less than six inches in height.
- 3. Draw an ellipse not less than four inches in length.

Note.—No credit will be given for any drawing in which the lines appear to be ruled or any mechanical aid used. Show, faintly, the construction lines.

SECRETARY-TREASURER'S

Financial * Statements.

SECRETARY-TREASURER'S

Financial & Statements.

Annual General Statement of Receipts and Expenditure for Public School Purposes, City of Toronto, for the Year ending December 31st, 1886:

RECEIPTS FOR 1886.

BUILDING ACCOUNT:

| Balance from 1885 in City Treasury | \$24,511 34 | | |
|---|-------------|----------|----|
| Municipal Appropriation for Building Pur- | | | |
| poses | 38,000 00 | | |
| Proceeds of Sale of School Sites and School | | | |
| Buildings in St. Lawrence and St. Mathew's | | | |
| Wards | 4,565 82 | | |
| G. Donovan, Deposit with Tender for Masonry | | | |
| work, Brock Avenue School | 200 00 | | |
| _ | | \$67,277 | 16 |
| | | | |
| Y A | | | |

SCHOOL ACCOUNT:

| Balance from 1885 in City Treasury | \$2,623 72 | | |
|--|------------|---------|----|
| Municipal Assessment for School Purposes | 174,268 00 | | |
| Legislative Appropriation | 12,640 00 | | |
| Legislative Grant for City Model School | 150 00 | | |
| Imperial and Citzens' Insurance Companies, | | | |
| Fire at Winchester Street School | 124 75 | | |
| Fees from Non-Resident Pupils | 75 00 | | |
| Sale of Old School Desks, &c | 60 00 | | |
| Cash due Secretary-Treasurer | 20 45 | | |
| | | 189,961 | 92 |
| | | | |

Total \$257,239 08

EXPENDITURE FOR 1886.

| 1. New School Buildings, Sites, etc., as per | | | |
|---|----------|----|--------------|
| statement in detail. (See Appendix A) | \$57,537 | 99 | |
| 2. Repairs, Alterations, and Improvements at | | | |
| the several Schools, as per statement in detail. (See Appendix B) | 10,378 | 72 | |
| 3. Salaries of Officers, Teachers, and Care- | 20,010 | | |
| takers, as per statement in detail. (See | | | |
| Appendix C) | 144,308 | 78 | |
| 4. New School Furniture. (See Appendix D) | 4,761 | 83 | |
| 5. Fuel for Schools, Offices, etc. (See Appen- | | | |
| dix E) | 6,945 | | |
| 6. Insurance Premiums. (See Appendix F) | 949 | 95 | |
| 7. Printing, Stationery, School Supplies, Ap- | | | |
| paratus, Prize Books, etc. (See Appen- | E 90C | 07 | |
| dix G) | 5,396 | 81 | |
| pendix H) | 2,518 | 08 | |
| 9. Miscellaneous Expenditure. (See Appen- | | | |

Anspector's Annual Report.

INSPECTOR'S ANNUAL REPORT.

To the Board of Public School Trustees of the City of Toronto:

GENTLEMEN,

In accordance with a Resolution of your honorable Board, I respectfully submit the twenty-eighth Annual Report of the schools under your charge.

Appended to the Report will be tound Statistical Tables which give in detail all important particulars relating to teachers, pupils, attendance, absenteeism, tardiness, studies pursued, cost of maintenance, &c.

ATTENDANCE.

The total number of pupils registered during the year was 22,080. Last year it was 20,213.

The average daily attendance was 14,840. Last year it was 13.642.

873 pupils attended school less than 20 days.

| 2,115 | 44 | 66 | 66 | between | 20 | and | 50 | days. |
|-------|-----|----|----|---------|-----|-----|-----|-------|
| 4,462 | 4.6 | 66 | 66 | 66 | 50 | 66 | 100 | 44 |
| 3.933 | 6.6 | 66 | 66 | 66 | 100 | 66 | 50 | 66 |
| 0,697 | 166 | 66 | 66 | 66 | 150 | 66 | 200 | 66 |

The Average Monthly Registered Number was 16,874. This shows an increase compared with last year of 1,511. (See Table A.)

The average of Monthly Average Numbers was 14,838. This shows an increase of 1,196 when compared with the corresponding number of last year. (See Table B.)

The average of Monthly Averages was 87.9 per cent. of the Average of Monthly Registered Numbers.

The best average for any month in the year was 90.3, the average for December.

The largest number was registered in October, 17,510, and the smallest number in June, 16,096.

The following statement shows the Average Registered Number in each school during the year:

| Schools. | Average Registered No. | | Average per Teacher. |
|----------------|---------------------------|-----|----------------------|
| Dufferin | 1121 | 18 | 62 |
| Ryerson | 1060 | 18 | 59 |
| Wellesley | 1006 | 16 | 63 |
| J. Ketchum | 891 | 14 | 64 |
| Givins' Street | 912 | 16 | 57 |
| Hope " | 815 | 13 | 63 |
| Bolton Ave | 759 | I 2 | 63 |
| Phœbe Street | 688 | I 2 | 57 |
| Victoria " | 735 | I 2 | 61 |
| Bathurst " | 591 | 10 | 59 |

| Orphans' Home | 145 | 2 | 77 |
| College Ave | 111 | 2 | 55 |
| Boys' Home | 107 | I | 107 |
| Girls' " | 50 | 1 | 50 |
| Sackville Street | 84 | 2 | 42 |
| Euclid Ave | 165 | 3 | 55 |

ATTENDANCE IN THE VARIOUS CLASSES.

The registered number in attendance during the year in the different classes was as follows:

| First B | lool | k | 9,744 |
|---------|------|---|-------|
| Second | 66 | | 4,856 |
| Third | 16 | | 4,162 |
| Fourth | 66 | | 2,428 |
| Éifth | 66 | | 890 |

The increase in the various classes compared with last year is as follows:

| First B | 00 | k | 983 |
|---------|----|---|-----|
| Second | 66 | *************************************** | 210 |
| Third | " | ••••• | 374 |
| Fourth | 66 | •••••• | 219 |
| Fifth | 66 | | 81 |

I expect the increase above the second book to be proportionally more rapid in future.

CERTIFICATES OF HONOR.

Certificates of Honor are awarded, at the Christmas Vacation, to such pupils only as have not been once absent or late, and whose conduct has been uniformly good, unless the absence or lateness has been occasioned by sickness of not more than three weeks' continuance, to be certified in writing by the pupils' parents or guardians.

These Certificates are of two grades, and named respectively First Honor Certificates, and Second Honor Certificates.

The First Honor Certificates are awarded to such pupils as have fulfilled the above-named conditions for two consecutive sessions.

The Second Honor Certificates are awarded to such pupils as have conformed to the said rules for one session during the year.

The following statement shows the number of Certificates given in the various schools at the close of 1887:

| Schools. | First Honor. | Second Honor. | Total. |
|-------------------|-----------------|------------------|--------|
| Dufferin | 207 | 330 | 537 |
| Ryerson | 207 | 316 | 523 |
| Wellesley | 210 | 362 | 572 |
| J. Ketchum | 110 | 235 | 345 |

| - | | | |
| Total | 2377 | 4216 | 6593 |

THE KINDERGARTENS.

The interest in Kindergarten work continues to increase. During the year the work originally begun in Toronto has been made Provincial in character. The Education Department has instituted an examination for the granting of diplomas to those qualified as Directresses or Assistants. The training class conducted in connection with our Public Schools has been officially recognized by the Department, and I am glad to be able to report that all the ladies engaged in our work succeeded in obtaining Provincial diplomas.

The following ladies trained in our Kindergarten class passed the Provincial examination:

| | JUNE, | 1887. |
|----------------|-------|------------------|
| Directresses. | | Assistants |
| K. Berkinshaw, | | J. Armstrong, |
| R. Campbell, | • | L. Bolton, |
| L. Currie, | | F. Bain, |
| E. Dawkins, | | F. Dawkins, |
| A. Fortune, | | J. E. Glassford, |
| C. Lawson, | | M. Gowans, |
| B. Nudel, | | E. A. Hegler, |
| M. Paterson, | | C. Howard, |
| K. Rankin, | | M. Johnstone, |
| M. Winchester. | | D. Nunn, |
| | | E. Readman, |
| | | D. Walton, |
| | | H. Walton. |

DECEMBER, 1887.

| Directresses. | Assistants. |
|------------------|------------------|
| F. Dawkins, | H. Breckenridge, |
| J. E. Glassford, | M. Duff, |
| D. Walton, | J. Hunt. |

The Board of Trustees having decided to open three new Kindergartens, they will now be distributed fairly throughout the city, and I strongly urge my former recommendation that the material used by the pupils be supplied by the School Board instead of by the individual children. This plan would be much more convenient and economical; and the children of the poorest classes, those who need the Kindergarten training most, would be able to attain the Kindergartens. Many of them cannot do so at present.

The attendance at the Kindergartens during the year was as follows:

| Schools. | Registered. | Average. |
|--------------------|-------------|----------|
| 1. Victoria Street | 59 | 48 |
| 2. Niagara " | 58 | 49 |
| 3. College Ave | 40 | . 28 |
| 4. Bolton Ave | | 49 |
| 5. Jesse Ketchum | 7,1 | 53 |
| | | |
| Total | 294 | 227 |

NIGHT SCHOOLS.

The total number registered during the year is as follows:

| Schools. | Males. | Females. | Totals. |
|-------------------|--------|----------|---------|
| Parliament Street | 184 | 65 | 249 |
| Elizabeth " | 94 | 64 | 158 |
| Niagara " | 109 | 35 | 144 |
| Bathurst " | 214 | 53 | 267 |

| J. Ketchum | 82 | 34 | 116 |
|-------------------|------|-----|------|
| Brock Ave | 33 | | 33 |
| Bolton " | 104 | 64 | 168 |
| Givins' Street | 81 | 14 | 95 |
| John " | 90 | 59 | 149 |
| Winchester Street | 70 | 43 | 113 |
| | | | |
| Total | 1061 | 431 | 1492 |

The average attendance for the year was:

| | July July | 11 260 1 | |
|-------------------|------------|----------|---------|
| Schools. | Males. | Females. | Totals. |
| Parliament Street | 9 6 | 38 | 134 |
| Elizabeth " | 60 | 34 | 94 |
| Niagara " | 46 | 15 | 61 |
| Bathurst " | 92 | 24 | 116 |
| J. Ketchum | 46 | 16 | 62 |
| Brock Ave | 20 | | 20 |
| Bolton " | 43 | 36 | 79 |
| Givins' Street | 59 | 9 | 68 |
| John " | 53 | 28 | Sī. |
| Winchester Street | 39 | 25 | 64 |
| | | | |
| Total | 554 | 225 | 779 |

The average attendance for each month was:

| | | Jan. | | Feb. | | Oct. | | Nov. | | Dec. | |
|---|----------------------|----------------------|----------------------|--------------|------------------------|----------------------|------------------------|----------------------|------------------------|----------------------|--|

| Bolton "Givins' Street | 21 | 21 | 9 | 28 | 66 65 | 47 | 62 62 | 46 | 58 51 | 40 | |
| John " Winchester Street | | | | | 56 42 | 28 18 | 56 45 | 29 28 | 46 31 | 26 29 | |
| Total | 306 | 110 | 244 | 104 | 670 | 241 | 675 | 255 | 567 | 231 | |

It will be noticed that the above statistical table includes the last two months of the term 1886-7 and the first three months of the terms 1887-8. The wisdom of retaining the deposit of one dollar required from male students, till the end of the term, was fully demonstrated this year. Last year the average attendance decreased from 521 in November to 244 in February; this season the numbers for the corresponding months were 675 and 468 respectively.

TEACHERS.

There were 288 teachers in the employ of the Board at the close of the year, exclusive of the special teachers in Music and Drawing.

There were 30 male and 258 female teachers employed.

They hold certificates as follows:

| 1st Class Provincial | | 55 |
|----------------------|----|----|
| 2nd " " " | 22 | 23 |
| County Board | · | 0 |

In addition to the above the Board employs ten Kindergarners, two Music Teachers, one Drawing Superintendent, and one Drill Instructor.

TORONTO TEACHERS' INSTITUTE.

The Toronto Teachers' Institute held its First Semi-Annual Convention for 1887 in the Sunday School building of the Carlton street C. M. Church, on Friday and Saturday, 25th and 26th February, commencing at 9 a.m. each day.

PROGRAMME.

Friday.

9.00—9.10 a.m. Opening Exercises.

9.10—9.15 " Calling Roll of Teachers.

9.15—9.23 "Reading Minutes of last Semi-Annual and Special Meeting.

| 9.25-9.35 | 66 | Reading communications and giving Notices |
|-----------|----|---|
| | | of Motions. |

2.00—4.45 p.m. A Round Table Conversation on Arithmetic.

Saturday.

| 9.00-9 | 0 I | a.m. | Reading Minutes. |
|----------|-----|------|--------------------|
| 0.10-0.1 | 15 | 66 | Treasurer's Report |

10.00-10.45 "Music, (Lesson to a class), Mr. A. T. Cringan.

11.00-12.00 " Alcohol, Mr. W. Cassidy.

12.00-12.30 p.m. Reports of Delegates to Provincial Association and General business.

The meetings by grades held during the month of October were as usual of a most interesting and instructive character. The teachers of the classes named below taught their classes as usual during the forenoon, while the visiting teachers made notes of the proceedings. The afternoons were devoted to a discussion of the methods practised during the forenoon.

The meetings were held as follows in October, 1887:

| GRADE. | | School Visited | Teacher of Class. | Date of Visit. | | |
|------------|-------|----------------|-------------------|-----------------|------|------|
| 5th Book. | | | Dufferin | Mr. Byfield. | Oct. | 10th |
| Sen. 4 h B | look. | | J. Ketchum | Miss Sykes. | 6.6 | llth |
| Jun. 4th | 66 | | John | Miss Rogers. | 6.6 | 13th |
| Sen. 3rd | 66 | | George | Mr. Clark. | 6.6 | 14th |
| Jun. 3rd | 66 . | | Parliament | Mr. Armstrong. | 6.6 | 17th |
| Sen. 2nd | 66 | | | Miss Sanderson. | 6.6 | 18th |
| Jun. 2nd | " | | Phœbe | Miss McKee. | 66 | 20th |
| Sen. 1st | | East) | | Miss Grav | 6.6 | 21st |
| Sen. 1st | | West) | | Miss Eagle. | 6.6 | 24th |
| Jun. 1st | | | Victoria K'g'n | | 66 | 25th |
| Jun. 1st | | | J. Ketchum " | | 66 | |
| Jun. 1st | | | | Miss Hawkins. | 66 | 28th |

Synopsis of Recommendations from Grade Conventions, Toronto Teachers' Association, October, 1887.

LINING, ETC.

- 1. Marking time is only a preliminary process to marching.
- 2. The lines should all move off together from the "Halt" at the word "March." No stamping should be allowed in marching.
 - 3. Position in class should be erect during all school exercises.
- 4. Pupils should sometimes stand while working on slates and sit down when work is done.

OPENING EXERCISES.

- 1. Scripture readings might profitably relate to S. S. Lesson, with Golden Text repeated each day.
- 2. Other ways of reading might be adopted, as, the teacher alone or alternately with pupils, or boys and girls alternately.
 - 3. Pupils should have their own Bibles.
- 4. Kindergarten "Good morning" songs are appropriate for junior classes.

ARITHMETIC.

1. Time tests should be given each day at such time as the teacher deems best.

They should be varied.

Individual habits should be occasionally tested.

Executive activity is the chief aim of "time tests."

2. Six methods of taking answers-

- (a) One pupil read, and those having the same answer raise hands.
- (b) Pupils stand when work is finished; those having correct answers sit down.
 - (c) Pupils stand when agreeing with answer read. By reversing these, three others may be had.
- ...3. Arithmetic should be practical in lower classes.
- 4. Addition, both the mental and mechanical part, should be done with great quickness.
- 5. A great number of short practical examples should be given rather than difficult or complicated ones, so as to secure variety, keenness, definiteness.
- 6. In multiplication time tests it is best to let the pupils continue the work for a specified time, instead of giving a certain amount of work to be done as quickly as possible.
- 7. Among other methods of marking home work the following are suggested:
 - (a) By the teacher passing among the pupils while working, and marking books.
 - (b) Pupils might exchange and mark books.
- 8. Best books might be exhibited as examples and for encouragement in the recognition of good work.
- 9. Principles of home work should be explained before work is given.
- 10. Pupils should be trained to multiply and divide up to three figures without writing multipliers or divisors.
- 11. Slats of wood, etc., may profitably be used in teaching simple rules.

12. In teaching addition, to prevent counting, the larger digits should be used first.

WRITING.

- 1. Arm, hand and finger gymnastics should be practised for several minutes each day.
 - 2. Pupils should be trained to criticise their own work.
- 3. Teachers should insist on pupils holding pen properly at all times. Pen holder should point over right shoulder.
- 4. Left hand should be used to steady the book, support the body, and relieve the right arm. Feet should be firmly set on the floor.

SPELLING.

- 1. Pupils should be required to learn only such words as they are unable to spell.
 - 2. In assigning a lesson-
 - (a) Dictate words from a lesson previously read.
 - (b) Words may be written on the board.
 - (c) Repeated writing on different days of words likely to be mis-spelled is the best way to correct bad spelling.

GEOGRAPHY.

- 1. The law of association of ideas of much use; stories, historical facts, pictures, objects should be associated with the names of places.
- 2. Pupils should investigate for themselves under direction of the teacher,—pupils can locate places named by the teacher, or both name and locate.

- 3 In map drawing, construction lines should be used only at beginning.
- 4. Map of school room and building should be the only map drawing for 9th division.

READING.

- 1. Gymnastic exercises in pronunciation, inflection, emphasis, etc., should frequently be practised.
- 2. In junior classes especially, phrase-reading should be largely made use of, to make proficient in articulation, emphasis, and expression.
 - 3. Exercises most needed should be most used.

KINDERGARTEN WORK.

- 1. In this work there is definiteness without formality.
- 2. The development of body, intellect, and moral discernment, is simultaneously effected.
 - 3. Social life is begun on a true basis.
 - 4. Original invention is encouraged.
 - 5. Individuality and imagination are developed.
- 6. Neatness, care, system, order, without unnecessary restraint, are prominent features, as well as the good alternation of play and work.
 - The following additional results may be noted—
 Manual training is begun.
 The senses of hearing, seeing, etc., are developed.
 The pupils gain self-control, power to get knowledge, and power to use knowledge.

MISCELLANEOUS.

- r. Prizes should not be offered where all are expected to compete and only two or three can win; but the best efforts of all pupils should, as far as possible, be recognized and rewarded.
- 2. Pupils who get full marks should be marked No. 1 on their monthly reports to parents, e.g., if five get full marks each will be No. 1, and the sixth will be No. 6, etc.
- 3 Pupils should not rise to receive visitors, unless addressed by the latter.
- 4. Teachers should prepare work so that there should be no hesitation or indefiniteness in starting to work.
 - 5 Teachers might exchange questions with profit.
- 6. In addition to marks received at examination, length of time in a room, and ability to acquire knowledge, should be considered in making promotions.
- 7. The school-room should be decorated by the children themselves as far as possible.
 - 8. Commands should be brief, decided, and definite.
- 9 The powers of imagination and originality should be cultivated in all classes.
 - 10. Special lessons should be given to develop special senses.

MANUAL TRAINING AND INDUSTRIAL EDUCATION.

I. THE ADVANTAGES OF INDUSTRIAL EDUCATION.

I.—Socially.

- (1.) It gives to every man what he is clearly entitled to receive; such an education as will best fit him for the proper performance of his duties in whatever sphere he may labor. The great majority of our pupils will have to earn the means of livelihood and culture for themselves and their families by using their hands. It is therefore of the utmost importance to give them a careful and definite training calculated to develop hand-skill and power. Every man, whatever his position in life, will find it to his advantage to have such a training. I do not urge this as the highest aim of an educational system, but claim that it should be one of the aims of a broad and thorough system of public education. It is a narrow view that aims to make the practical or utilitarian idea the predominant feature of an educational system; it is a still narrower view that excludes all that is distinctively utilitarian, especially when it is educational as well as practical.
- (2.) The system of apprenticing has been discontinued. It was not in harmony with modern tastes or customs, and as Adam Smith long ago showed, it was opposed to the principles of political economy. He said, "It interfered with the property which every man has in his own labor, encroached on the liberty of employer and employee, restrained competition, continued for an unnecessary length of time, and failed to allow the rewards of faithful labor to be enjoyed as they were earned." Undoubtedly the best way to make up for the lack of training by apprenticeship is by means of a comprehensive system of industrial and manual training.

- 3. Improving the mechanical skill of the industrial classes must add largely to the wealth and prosperity of a nation. It does so in two ways, by saving time, and by increasing the value of the articles produced.
- 4. The great increase in the use of delicate and intricate machinery in manufacturing, demands a more thorough industrial and technical training on the part of those who are to use the machines.
- 5. The number and variety of artistic manufactures are constantly increasing, and consequently workmen and workwomen specially need skilful fingers that can adapt themselves to any work they may be called upon to perform.
- 6. The wealthier classes are calling for a higher style of ornamental woodwork in their houses, and for furniture more artistic in construction and design. Machine-made articles are turned out in large numbers, exactly similar in design. Those who can afford to do so are trying to get special articles of which no one can procure copies or reproductions. They have to pay higher prices for them, but they gladly do so. The demand for such work is rapidly increasing. Tradesmen and mechanics of all classes are compelled to vary their workmanship continually. Those who best succeed in doing so, earn most money, and earn it most easily. All workmen would be aided in doing so by systematic manual training.
- 7. It will increase the prosperity of the working classes, and will elevate their social position. If a workman can by a higher degree of skill produce a more valuable article than he could otherwise do from a certain amount of raw material, he increases his own value to his employer, and will receive higher wages.

8. Working in school will give pupils a greater respect for work. Many children are allowed to grow up with a contempt for work. They usually become in some way a burden to society. Gaol statistics show that three fourths of the young men who fall into criminal courses are unable to work at any trade. The only way to make children realize that "all labor is noble and holy" is to train them all, rich and poor alike, to be able to work with their hands. This will not necessarily make them all mechanics.

2.—Educationally.

- (1.) The power to give attention properly is acknowledged to be the foundation of intellectual progress. Attention may be receptive, investigative, or executive in its character. It is receptive when the pupil is receiving knowledge communicated by another, it is investigative when the pupil searches independently for knowledge; it is executive when the pupil is working out or applying principles which he already understands. Executive attention is by far the most important kind of attention, and this is one of the powers specially developed by manual work, when the pupil is guiding his own hands in accomplishing some definite purpose with material things.
- (2.) Original power is developed by working with real things more readily than in any other way. This was one of the chief intellectual aims of Froebel in founding the Kindergarten. The importance of this power cannot be over estimated. Its cultivation improves every department of art and manufacture, but its best influence is seen in the strengthening of true independence of character.
- (3.) "We learn by doing." We know most clearly what we have translated into activity, or represented in material form. The expression of an idea in material form defines our thought.

mind guides the hand, the definite action of the hand re-acts upon the mind.

- (4.) It applies knowledge as it is gained. Giving a child knowledge beyond his ability to use it, weakens him intellectually, and reduces his power as an active agent. School work has unquestionably been weak in this respect in the past. It has aimed to give the pupil knowledge, and sometimes to give him power to gain knowledge. This leaves the most important step out of the circle of intellectual activity. The child should be trained to observe, think, decide, and execute his decisions. He must do all these in manual work. No mind but his own can guide his hand. In order to guide his hand, his mind must complete the circle of intellectual process. The repetition of this completed mental process, many times a day, defines and strengthens all his intellectual powers, and most important of all, it strengthens his will activity.
- (5.) Children should deal chiefly with real things during the first year of school life. They have been learning very rapidly before they come to school, by handling the various real things with which they have come in contact, they should continue to do so for a time after they come to school. The school should make this work definite and systematic by supplying the child with the materials best calculated to develop his intellectual as well as his industrial powers.
- (6.) The moral effects of such training are good. Improving a workman's position will make him more contented and happy. It will better the relationship between master and workmen, and improve the character of the work done. Success will induce a workman to make greater efforts and will enable him to surround himself and his family at home with many of the things that lead to culture and refinement. Manual training has also a direct

moral influence in moulding the characters of the children. They are naturally destructive in their tendencies, but the same instinct which leads them to be destructive, will, if they are properly guided make them take delight in work of a productive character. It is a most important part of a child's moral training to make him constructive instead of destructive; and making things, under the guidance of a skilled teacher is the best means of accomplishing this desirable end.

- (7.) Hand-work affords a desirable change from the ordinary routine of school work. Change of work gives the best rest during waking hours. Lengthening the time devoted daily to study does not necessarily increase the amount of work accomplished, but on the contrary, if continued beyond the proper limit, it retards intellectual progress and dwarfs intellectual growth.
- (8.) It satisfies the child's natural desire for activity, and directs it into proper channels. Evil is the result of power misused. It is therefore vitally important to have the natural instincts of childhood directed to right and productive purposes. "Self activity is the way to morality."
- (9) It arouses and stimulates powers that without its instrumentality would lie dormant or be used for wrong purposes. This is one of its most important educational effects.

Whatever form of manual or industrial training may be adopted I urge that the chief reasons for giving it a place on the school programme should be educational rather than practical. Hand-work merits recognition in school chiefly as a means of intellectual and moral culture.

- II. Principles that should guide School Boards in deciding what Form of Manual or Industrial Training to introduce, and the time for teaching it.
 - 1.—It should begin early.

- (a.) Because it is identical in character if not in extent and definiteness with the work the child has been doing in his play life before going to school.
- (b.) Because the hands of young children are easily trained. It would be a great mistake to postpone the work to a time when the fingers had to a certain extent lost their marvellous susceptibility to training and adaptation to varied kinds of work.
- (c.) Because this kind of work helps to bridge over the gulf, commonly, existing between the conditions of the child in the home and in the school. The minds of most children are injured by the suddenness of the transition from the realites and sense perceptions of the home, the garden and the field to the abstractions and obscure conceptions of the school room.
 - 2. The material used should be inexpensive.
- 3. It should be suitable for use by boys as well as girls. All classes of society and both sexes should share in its benefits.
- 4. It should be interesting in character, and calculated to make pupils take delight in it.
- 5. The products of the work should as far as possible be available for use.
- 6. The work should tend to develop general industrial skill, instead of skill in some particular industry.
- 7. The work should be so conducted as to produce the best results in regard to general education.
- III. MISTAKES COMMONLY MADE IN REGARD TO INDUSTRIAL WORK IN SCHOOL.
- r. Girls alone have received the training. Sewing is the only work generally adopted in Public Schools. Boys need the

training as much as girls both intellectually and industrially. Girls usually get more hand training at home than boys do; it is clearly wrong to neglect the boys both at home and at school.

- 2. Attempts have been made to teach special trades. This is unfair, because it leaves the girls out of consideration; it is also unjust because it pre-disposes the pupils towards certain trades. The school has no right to do this. It should fit a boy for greater success in any department of life work, but it should in no way place limitations around him.
- 3. Manual training is not given early enough in the school course. It should not be reserved for a favored few. In order that all may receive a share of its advantages it must begin in the lowest grades.

IV. VARIOUS AGENCIES FOR SPECIAL INDUSTRIAL TRAINING.

- I. Technical Schools. Throughout Europe, especially in Germany, France, England and Switzerland, Technical Schools have long been conducted for higher scientific education, usually with the direct aim of its application to some special department of manufacture or for the purpose of qualifying the students for higher success in some particular field of human labor. The School of Technology in Toronto may serve as an illustration of this class of schools. They are clearly beyond what is included in a Public School Course as that term is understood in Ontario.
- 2. Manual Training Schools. The name "Manual Training School" was first used by Dr. Woodward, director of the Manual Training School of Washington University, St. Louis. The name was chosen from a number of others which I give, as they serve to show the general aim of these schools: "Mechanical School, Hand and-Head-Work School, Technical School, Industrial School, Trade School, Hand-Trade School, Skilled Labor School, School of Industrial Arts, or Manual Training School."

These schools aim to give a systematic and thorough course of practical work with the tools for working in wood and iron, with a corresponding course of study in related subjects. The following course of study in St. Louis Manual Training School may be taken as a specimen of all. Toledo adds a special course for young women in Domestic Economy including boiling, broiling, baking, frying, marketing, garment cutting and making, millinery, etc.

St. Louis Manual Training School Course of Study.

FIRST YEAR CLASS.

Arithmetic completed. Algebra, to equations.

English Language, its structure and use. Study of selected pieces. History of the United States.

Latin Grammar and Reader, may be taken in place of English History.

Huxley's Introduction to Science. Physical Geography.

Botany.

Drawing, mechanical and free-hand. Penmanship.

Carpentry and Joinery. Wood-carving. Wood-turning.

SECOND YEAR CLASS.

Algebra, through quadratics. Geometry begun.

Natural Philosophy. Experimental work in the physical laboratory. Principles of mechanics.

English Composition and Literature. Rhetoric. English History.

Latin (Cæsar), may be taken in place of rhetoric or history.

Drawing.—Line-shading and tinting, machines, development of surfaces, free-hand detail drawing, isometric projections.

Forging.—Drawing, upsetting, bending, punching, welding, tempering; pattern-making, moulding, soldering.

THIRD YEAR CLASS.

Geometry continued. Plane Trigonometry. Mensuration.

English Composition and Literature. History. Elementary

Political Economy.

French or German, may be taken in place of English and History, or in place of the Science study.

Physiology. Elements of Chemistry. Book-keeping. Students who have taken Latin, and who intend to enter the Polytechnic School after completing the course in this School, will take history in place of physiology, chemistry, and book-keeping.

Drawing.—Brush-shading, shadows, geometrical problems, architecture, machines.

Work in the Machine Shop.—Bench work and fitting, turning, drilling, planing, screw-cutting, etc. Study of the steam engine.

Manual Training Schools are in operation in St. Louis, Chicago, Toledo, New York, Boston, Baltimore, Philadelphia, Cincinnati, Cleveland, Omaha, Denver, New Haven, New Orleans and a few other places.

I have had the pleasure of visiting those in St. Louis and Chicago. They are magnificent institutions doing a great work, but they are beyond the range of *Public School work. They are the High Schools and Universities of hand training. Several of the above named schools are in connection with Universities. The fact that in such a city as St. Louis, or Chicago, there is only one Manual Training School, shows that the work is not within the educational limitations of Public School Boards in Ontario. It should very properly be made a department of High School and University work, without loss, but with much advantage, to the departments of culture.

^{*&}quot; Public Schools" are understood in Ontario to mean the Schools below the High Schools.

3. - Workshop Schools.

These are rooms in connection with the ordinary Public's Schools in which pupils are trained systematically in the use of the hammer, saw, plane, chisel and other working tools.

4.—General Agencies.

By these I mean drawing, sewing, knitting, modeling and similar occupations that may be carried on in the ordinary school-room as part of the regular programme of school work.

V. Manual and Industrial Training already done in Toronto.

I — The Kindergarten work. -

The Industrial work of the Kindergarten is by no means its most important department. However, the industrial work of the Kindergarten is very comprehensive and thorough and it should form the basis of all manual and industrial training. This work is now done efficiently in our Public School Kindergartens.

2.— Needlework.

Our programme in this subject is progressive and comprehensive. It is as follows:—

| Sr. I. | Jr. II. | Sr. II. |
|--|--|--|
| Threading Needles and Sewing on Card-board. | Sewing on Buttons, Folding, Tacking Seam- ing as in Patchwork, | Hemming as in a Handkerchief. |
| Jr. III. | Sr. III. | Jr. IV. |
| Running, Hemming as in a Gored Apron. Knitting 2 Needles a Plain Strip. | Felling as Scrap Bag, or Toilet-Bag. Knitting 4 Needles as a Ribbed Cuff. | Sewing a Band as in a |
| Sr. IV. | Jr. V. | Sr. V. |
| Mending, Patching, Darning. Knitting a Ribbed Mit. | Button-Holing, Stitch- ing. Cutting Plain Gar- ments. | Cutting and Making Children's Dresses from Patterns. |

Boys as well as girls take part in this work in the junior classes.

3.—Drawing.

The course in this subject is graded from the Kindergarten to the highest class, and is of great educational value in training the hand to execute the purposes of the mind in a definite manner.

4.—Modelling of Maps, &c.

The making of relief maps is a most valuable exercise practice for teaching geography and training the hand. Our pupils make maps with putty, plaster, wax, &c.

5. - Whittling and Gimlet work.

A considerable amount of training may be accomplished with even these primitive tools. The articles shown at the Industrial Exhibition, manufactured by our pupils show that there is scope for much practical work with the ordinary jack-knife. Such work is extensively practiced in the Public Schools of France. In addition to rude carving, our boys might be trained to make very good joints with their knives alone. They have in some classes cut good raised maps, and in others the boys have made the wooden needles used in their knitting, while in others the simple article of school apparatus and appliances have been made in this way. In several places pretty brackets, flower racks, &c., have been cut from the wood of old cigar boxes. There is a vast field for this department of hand-work in the second and third book classes.

6.—Paper Cutting and Pasting.

In addition to Kindergarten cutting and pasting we have tried successfully; (a) cutting maps from colored paper and pasting them on sheets; (b) cutting out pictures from periodicals, &c.,

and pasting them in scrap books; (c) cutting various forms from paper. All these aid in giving power and skill to the fingers.

7.—Drill and Calisthenics.

These have a most important influence on industrial training by strengthening the body and training the muscular system to respond definitely to the commands of the mind.

VI. RECOMMENDATIONS.

I strongly recommend.

- 1. That the Kindergartens be extended throughout the city as rapidly as Kindergartners are trained. Every child will thus obtain industrial training at the time when it will be most effective in contributing to the thorough and natural education of both hand and head.
- 2. That some of the Kindergarten occupations be continued in the regular primary classes, especially; (a) the sewing on cardboard, including as it does such valuable lessons on form and designing; (b) paper folding and pasting; (c) paper cutting and pasting; (d) modeling in clay. The last could easily be carried out in the senior first and junior second book classes, and might with great profit be continued much higher. It is in harmony with the well-known instinctive tendency of children to mould moistened earth into varions forms. Making "mud pies" is the working out of a natural plan for the development of the child's intellectual and industrial powers. Modelling is an inexpensive occupation, and it may be practised in the regular school rooms without soiling the desks, by placing a piece of brown paper on each desk to protect it.
- 3. That, in order to make the needle-work department of our school work more thorough, a special instructor be appointed to

teach cutting and fitting in the higher classes, to train the teachers so as to fit them for a better performance of their duties in this department of their work, and to direct and inspect the needle work, as the special masters already do in the subjects of drawing and music. Much practical as well as educational benefit would result from the employment of such a teacher. The difficulty of obtaining material for the girls to practise cutting out and fitting has really been solved already in our city. on hand a grant of two hundred dollars from the City Council to purchase material for the manufacture of garments for the inmates of the numerous charitable institutions of the city. There is no doubt that this amount will be largely increased by private donations as soon as our work is more systematically conducted and more fully understood by the citizens generally. The moral effects of working with a definite aim for deserving children, are exceedingly important in the training of young people. A single lesson in applied morality is more effectual in the development of character than a score of theoretical lessons. The latter may be positively injurious; the former must be beneficial.

The advantages, socially, financially, and morally of having skilled mothers and daughters in the homes of our city, must be clear to all.

- 4. That we systematize and extend the work of carving in wood, whittling, cutting and pasting, plaiting straw, &c., by fixing a definite programme for each class. These occupations form admirable exercises for providing productive resting periods, so necessary for relaxation after mental concentration on abstract study.
- 5. That a course of training in the use of wood working tools be given to the pupils in Dufferin, Jesse Ketchum, Ryerson, and Wellesley Schools. An inexpensive shop might be erected in

connection with each school. The work might be done from 3 to 4 p. m. without materially interfering with the programme of study. In my opinion most boys would voluntarily remain after 4 o'clock if they were permitted to do so. The instructors might be employed in attending to school repairs throughout the city while not occupied in teaching. This work might be extended gradually to other schools.

- 6. In regard to practical lessons in cookery, while I recognize their great advantages in promoting health and economy in the homes of all classes of the community, I am not in a position to speak definitely in favor of their establishment until I have seen them in operation as a part of a Public School system similar to our own, and have found the outlay necessary for furnishing the appliances, as well as the expense of carrrying on the lessons.
- 7. In conclusion I repeat the opinion that the aim of all the industrial and manual training done in our schools should be to qualify for more thorough and successful work in any employment, instead of fitting the pupils for some particular trade. We shou'd train the hands as the executive agents of intelligent minds.

I strongly recommend the defining of our programme of general manual work for all classes and both sexes in the lower classes, as of much greater importance than any kind of manual training given to a comparatively small number of pupils in the higher grades.

Respectfully submitted,

JAMES L. HUGHES,

Public School Inspector.

REPORT OF EXAMINERS.

The Board of Examiners appointed to conduct the Combined Examination of the City Public Schools for the present year have the honor to report that on the 17th and 20th of June they examined the pupils selected from the four highest Divisions numbering in all 330. The examinations took place at the Dufferin and Ryerson Schools, and as usual were in writing. The following tabulated statement exhibits the standing of the competing classes in the various subjects included in the Public School Curriculum:

SENIOR FIFTH BOOK CLASS.

TEN PUPILS FROM EACH CLASS.

| S HOOLS. | Mathematics. | Grammar, Composition, and Hygiene. | History and Geo-graphy. | Reading, Spell- ing, and Deriv- ation. | Writing, Drawing, Music and Book-keeping. | Total. |
|------------------|--------------|------------------------------------|-------------------------|--|---|--------|
| Marks possible | 2850 | 1800 | 2000 | 1600 | 1700 | 9950 |
| Wellesley, Girls | 1582 | 1190 | 1394 | 1226 | 1011 | 6403 |
| " Boys | 1602 | 1176 | 1372 | 1187 | 1055 | 6392 |
| Ryerson, Girls | 1261 | 1228 | 1137 | 1062 | 958 | 5646 |
| Dufferin, Mixed | 1349 | 1178 | 1052 | 1059 | 894 | 5532 |
| Ryerson, Boys | 1120 | 1001 | 1135 | 1016 | 821 | 5093 |

JUNIOR FIFTH BOOK CLASS.

TEN PUPILS FROM EACH CLASS.

The following are the names of the pupils of the Senior Divisions of Wellesley, Dufferin and Ryerson Schools who obtained the highest number of marks for general proficiency, and to whom were awarded the scholarships granted by the Board of Trustees of the Toronto Collegiate Institute. These scholarships entitle their recipients to two years' free tuition in that institution.

Boys.

| | | Marks | | |
|----|-------------------|-------|-----------|--------|
| I. | David Wickson, | 759 | Wellesley | School |
| 2. | Wm. E. Young, | 704 | Ryerson | 66 |
| 3. | Robert H. Glover, | 690 | 66 | 66 |
| 4. | George Rudlen, | 669 | Wellesley | 66 |
| 5. | Wm. Cobban, | 666 | 4.6 | 66 |
| 6. | Charles Carter, | 662 | 46 | 66 |
| | | | | |

Girls.

| | | Marks | | |
|----|------------------------------------|-------------|-----------|---------|
| I. | Ethel Dyke, | 729 | Wellesley | School, |
| 2. | Jesse Milne, | 687 | Ryerson | 66 |
| 3. | Ethel Macklin, | 6 80 | Wellesley | 66 |
| 4. | { Maggie Lee, Emily Parkinson, | 673 | Dufferin | " |
| | Emily Parkinson, | 673 | " | 46 |
| 5. | ∫ Helen Hughes, | 667 | Wellesley | 66 |
| | { Helen Hughes, Isadore McFarlane, | 667 | Ryerson | 66 |
| | | | | |

The Gold Medal provided by Mr. John Macdonald for the pupil taking the highest aggregate number of marks in the entire range of subjects of the examinations was won by Daniel Wickson of the Wellesley School, who also takes the first Boys' Scholarship. Ethel Dyke, of the same school, who takes the first Girls' Scholarship, takes the second place in the city schools and is therefore entitled to the Silver Medal, also presented by Mr. Macdonald.

The Medals presented by Messrs. Kent Brothers for the best answers in Canadian History and Geography, as the result of a special examination in these subjects, were carried off by Emma Schilling (1st), and Joseph Meek (2nd), both of the Senior Fifth Class, Ryerson School.

At the special examination in Reading for the Medal presented by the Rev. Septimus Jones for the best reader in the city schools, fifty pupils presented themselves. The successful competitor was Mary Seager of Jesse Ketchum School.

The following are the names of pupils to whom prizes were awarded for special excellence in the various subjects. Those who receive scholarships in the highest divisions and those who obtain prizes for general proficiency in the others are excluded from the competition for prizes for superior proficiency in the groups of subjects taken separately:

SENIOR FIFTH BOOK.

MATHEMATICS.

- 1. Maggie Moffatt, Wellesley School.
- 2. Robert Wightman, " "
- 3. Alphoretta Wismer, Dufferin "
- 4. Florence Haynes, " "

GRAMMAR, COMPOSITION AND HYGIENE.

- 1. Martha Williams, Dufferin School.
- 2. Emma Schilling, Ryerson "
- 3. Alfred Rolls, Wellesley "
- 4. Clara Nasmith, " "

HISTORY AND GEOGRAPHY.

- 1. Theresa Palmer, Wellesley School.
- 2. Joseph Meek, Ryerson,
- 3. Nellie Jose,
- 4. Maud Milligan, Wellesley

READING, SPELLING AND DERIVATION.

- I. Clara Nasmith, Wellesley School.
- 2. Theresa Palmer,
- 3. John Phillips, Dufferin
- 4. Daniel Scott, Wellesley

WRITING, DRAWING, MUSIC, BOOK KEEPING.

- I. Sherlock Faircloth, Wellesley School.
- 2. Daniel Scott,
- 3. George Hendry,
- 66 4. Theresa Palmer,

JUNIOR FIFTH CLASS.

GENERAL PROFICIENCY.

- 1. Christina McLennan, Wellesley School.
- 2. Laura Hamilton.
- 3. Amanda Rimington,
- 4. { Allen Lucas, Mary Newton, Dufferin

MATHEMATICS.

- 1. Ida Sullivan, Wellesley School.
- 2. Fred Mann, Ryerson
- 3. Agnes McCollum, Wellesley School.

4. { Mary Scott, Jesse Ketchum " Ida Patterson, Ryerson "

GRAMMAR, COMPOSITION AND HYGIENE.

- 1. John Macdonald, Wellesley School.
- 2. Charles Lawrie, Dufferin "
 3. { Albert McMillan, Wellesley " Daisy Stocks, Jesse Ketchum "

HISTORY AND GEOGRAPHY.

- 1. Florence Parker, Wellesley School.
- Albert McMillan, " "
 Sidney B. Wood, " "
 John Macdonald, " "

READING, SPELLING AND DERIVATION.

- 1. Rose Lucas, Wellesley School.
- 2. Zoe Smiley, Jesse Ketchum School.
- 3. Annie Burns, Ryerson
- 4. Phobe Peake, Wellesley

WRITING, MUSIC, DRAWING, BOOK-KEEPING.

- 1. Annie Reed, Dufferin School.
- 2. Carrie H. Gilbert, Wellesley School.
- 3. { Rose Lucas, " " Agnes McCollum " "

SENIOR FOURTH CLASS.

GENERAL PROFICIENCY.

1. Lilian Carruthers, Wellesley School.

2. Georgie Cowan, 3. Georgina McDougall, 4. James L. Murray, Bolton Ave. " 5. Fannie Richardson, Dufferin MATHEMATICS. 1. Ernest Burns, Dufferin School. 2. Bertie Dyke, Wellesley 3. Edward Little, John St. 4. Ethel Watson, Ryerson GRAMMAR, COMPOSITION AND HYGIENE. I. Bertha Ashenfelter, Wellesley School. 2. Allan Coulter, Jesse Ketchum 3. Bertie Dyke, Wellesley 4. { Emma Breckon, Givins' St. Minnie Davidson, Wellesley HISTORY AND GEOGRAPHY. 1. Annie Boyle, Wellesley School. 2. Orlando Jolliffe, Jesse Ketchum School. 3. { Robert Angus, Dufferin Susie Kerrigan, " READING, SPELLING AND DERIVATION. 1. Bertha Ashenfelter, Wellesley School. 2. Amy Craig, Dufferin 66 3. Mary Seagar, Jesse Ketchum 4. { Gracie Hunter, Wellesley Helen Mulvaney, Dufferin

WRITING, DRAWING AND MUSIC.

- 1. Edward Fenne'l, Dufferin School.
- Jessie Dowd, Wellesley
 Addie Saunders. "
- 4. Arthur Jenkins, Ryerson

JUNIOR FOURTH CLASS.

GENERAL PROFICIENCY.

- 1. Stella Bleything, Dufferin School.
- 2. Wm. W. Kitchen, Wellesley
- 3. Dollie McKay,
- 4. Maggie Yellowlees, Ryerson
- 5. Colin Campbell, Dufferin

· MATHEMATICS.

- 1. Albert Payne, Park School.
- 2. Henrietta Jerreat,"
- 3. Maud Hicks, Borden St. "
- 4. Ontario Roome, Louisa St. School.

GRAMMAR, COMPOSITION AND HYGIENE.

- 1. Maud Hicks, Borden St. School.
- { Lucy Jones, Dufferin "Aggie Malcome, Borden St. School.
- 4. Bella Geddes, Dufferin

HISTORY AND GEOGRAPHY.

- 1. Clara Tomlinson, Dufferin School.
- 2. Emma Savacool, John St.
- 3. Wm. Leckie,

Gertrude Brown, Wellesley " Charles McIntosh, Victoria St. School.
Emily Perryman, Wellesley
Frank Smith, Ryerson
"

READING, SPELLING AND DERIVATION.

- 1. Florence Cook, Phæbe St. School.
- 2. Rosie Culp, Ryerson
- 3. Lillie Norman, Phœbe St.
- 4. Lucy Jones, Dufferin

WRITING, DRAWING AND MUSIC.

- 1. Lucy Jones, Dufferin School.
- 2. Edna Snarr, Wellesley
- 3. Mary Grant, Givins' St.
- 4. { Maud Blain, Dufferin School. Emily Perryman, Wellesley School.

At the request of the Women's Christian Temperance Union, prizes were offered for the best written compositions on the subject of Temperance, open to all pupils of the Senior Fifth Class. Three ladies of the Union examined the papers submitted by the competitors and adjudged the highest place to William L. Richardson, of the Wellesley School, and the second place to Emily Parkinson, of the Dufferin School.

The Examiners, in concluding their report, desire again to express their high appreciation of the excellent educational work done in our City Public Schools as brought out by the examinations just closed. The results of free public school education long ago predicted by Canada's great Educationist have been perhaps more fully achieved in Toronto than anywhere else, the children

of the rich and the poor alike enjoying, free of cost, the inestimable blessing of a thoroughly sound moral and intellectual training. As Dr. Ryerson once said, "The indigent are no longer doomed to the double misfortune of poverty and ignorance."

WM. ANDERSON,

Chairman of Board of Examiners

MR. CRINGAN'S REPORT ON MUSIC.

To the Chairman of the Public School Board, Toronto:

SIR,—Since my appointment as teacher of music in the Junior Classes I have been much pleased with the progress which has been made by the pupils, and the interest with which they have entered into the study of music. At first considerable difficulty was experienced in securing good quality of tone, but this is being gradually overcome, and in many classes, shouting and forcing of voice has been displaced by purity and sweetness of tone, none being more delighted with the improvement than the pupils themselves.

Considering the fact that many of the teachers have had no previous musical training, the results have been exceedingly gratifying, as in many classes the pupils can read from musical notation as easily as from an ordinary English text book.

I have to acknowledge my indebtedness to the regular teachers for their hearty co-operation in the work, without which my efforts would have been almost fruitless owing to the interval between my visits being necessarily a long one.

At the classes for teachers held during March, April and May the average attendance was one hundred and forty-six (146), the total number of teachers in the junior divisions at that time being one hundred and eighty (180).

I would recommend that a series of text books be adopted for use in the schools, as the authorized text book in music is too high-priced to be within reach of the average pupil. I would

further recommend that a choir be formed to practise the music to be sung at the annual closing in June.

Respectfully submitted,

ALEX. F. CRINGAN.

Examination Papers.

EXAMINATION PAPERS.

COMBINED EXAMINATION.

ARITHMETIC.

SENIOR FIFTH BOOK.

- 1. A bridge is supported by four cables, composed of 6,300 wires, each 3,578 feet long. How many feet would all these wires extend if laid end to end? How many yards? How many miles?
- 2. What sum of money paid at the beginning of the year would be equal to a salary of ± 386 3s od per annum, paid quarterly, allowing discount at the rate of 5 per cent. per annum?
- 3. By buying a house at 10 per cent. less than it cost to build, and selling at a profit of 25 per cent., I gained \$675.00. Find the cost of building, and the selling price.
- 4. Find the compound interest on \$4000.00 for 1 year and 3 months, interest being paid quarterly at 4 per cent. per annum.
- 5. The salary of a college professor is \$3500 a year, and is paid by the income from bonds yielding a semi-annual dividend of 134 per cent.; what did they cost at 941/6, brokerage 1/8 per cent.?

- 6. A vessel steaming at the rate of 11 knots (each 2,000 yards) an hour, fires a gun for her consort. The report is heard by the crew of the latter vessel 12 seconds after the flash is seen. At what rate (miles per hour) must they steam to overtake the first vessel in 3 hours if sound travels 1100 feet per second?
- 7. A merchant sold 88 yards of different kinds of cloth for \$198.00. The prices per yard were \$1.75, \$1.90, \$2.50, \$3.00. Find the number of yards of each kind of cloth sold.
- 8. How many square feet of lumber will it take to cover the gable of a barn 56 feet wide, if its height above the level of the eaves is $14\frac{2}{3}$ feet?
- 9. Find the convex surface and the entire surface of a cone, the slant height of which is 24 inches, and the diameter of the base 20 inches.

ALGEBRA.

SENIOR FIFTH BOOK.

- 1. If a = 1, b = -1, c = 2, d = -3, find the numerical value of $\frac{(a-b)(b-c)(c-d)}{(b-a)(c-b)(d-c)}$
- 2. Simplify $\{(a+b)x+(a-b)y\} \{(a-b)x-(a-b)y\} + (a+x)(b-y)-(b-y)x$.
- 3. Find the H. C. F. of $4x^4 + 9x^3 + 2x^2 2x 4$, and $3x^3 + 5x^2 x + 2$.
- 4. Simplify (a). $\frac{6a^3 22a^2b + 12ab^2}{27a^3 27a^2b + 6ab^2}$ (b). $\frac{1}{4ab a^2 4b^2} \frac{1}{3a^2 7ab + 2b^2}$ (c). $\left(1 + \frac{x}{1-x}\right) \times \left(1 \frac{x}{1+x}\right) \times \left(1 x^2 + \frac{1-x^2}{x}\right)$

5 Solve (a)
$$3x-3(x-1)(9x-1)=23-(1-6x)(1-33x)$$
,

(b)
$$\frac{2}{2x-3} = \frac{6}{3x+2} - \frac{1}{x-2}$$

(c)
$$15x^2 + 7x - 4 = 0$$
.

6. The length of a field is twice its breadth; another field, which is 50 yards longer and 30 feet broader, contains 6,800 square yards more than the former; find the size of each.

GEOMETRY.

SENIOR FIFTH BOOK.

- I. If two triangles have two angles of the one equal to two angles of the other, each to each, and the sides adjacent to the equal angles in each also equal, then shall the three sides be equal each to each, and also the third angle of the one equal to the third angle of the other. (I. 26)
- 2. Equal triangles upon equal bases in the same straight line, and on the same side of it, are between the same parallels.
- 4. If a straight line be divided into two equal parts, and also into two unequal parts, the rectangle contained by the unequal parts, together with the square on the line between the points of section, are equal to the square on half the line. (II. 5.)
- 4. To divide a straight line into two parts, so that the rectangle contained by the whole and one part shall be equal to the square on the other part. (II. 11.)
- 5. Show, algebraically or otherwise, that in such a case the rectangle contained by the two parts is equal to the rectangle contained by the whole line and a line equal to the difference of the two parts.

ENGLISH GRAMMAR AND COMPOSITION.

SENIOR FIFTH BOOK.

- 1. What are the accidents of a noun?
- 2. Explain peculiarities in songstress, children, bridegroom.
- 3. How are better, worse, more, formed?
- 4. Derive what, which, not.
- 5. Account for the forms are, was, been, in the verb to be.
- 6. Classify conjunctions, giving an example of each kind.
- 7. Define sentence, clause, phrase.
- 8. Analyse:—"Come, then, in the early morning; when the mist in maiden shape is still dreaming beside the spinney; I will show you the pool where the silver monarch lurks, clad in shining armor with studs of gold. Now lay out gently a skittering coachman beneath his bank, and be sure that he will not refuse it."
- Parse words in italics in the following sentence:—"The day being fine, either he or you must row the course once before noon.
- 10. Write an essay of not more than ten lines on one of the following subjects:

School is a miniature world.

Our dumb friends.

SPELLING, DERIVATION, ETC.

SENIOR FIFTH BOOK.

- 1. Write from dictation (The High School Reader):
 - (a) Page 223, beginning "Such was," and ending "rival."
 - (b) Words to be dictated.
- 2. Derive the following words, giving the meanings of the *roots*, also of the *prefixes* and *affixes*, where they occur:

abhorrence, disaster,
conspirator, phantom,
inanimate, philosophy,
magnificent, remote,
proclamation, rival,
bible, abstract,

transgress.

- 3. Give the forces of the following prefixes, and an example of each: ultra, retro, para, peri.
- 4. Give the meanings of the following roots, and one English word from each: rodo, mollis, monos, eu.
- 5. Give the meanings of accessible, elf, mercenary, sultry, male-volence.

HISTORY.

SENIOR FIFTH BOOK.

- I. Give an account of "Queen Anne's War."
- 2. Name the principal discoverers connected with Canadian Ilistory, and give a particular account of any two.
- 3. Give the history of the "fisheries" question.

- 4. Sketch the history of Canada under Lord Dufferin.
- 5. What was the title of the House of Hanover to the throne? Give the names of the sovereigns of that family, and the dates of their accession.
- 6. Give an account of the founding of the East Indian Empire.
- 7. Sketch the career of the younger Pitt.
- 8. Give an outline of the reign of Victoria the Good.

GEOGRAPHY.

SENIOR FIFTH BOOK.

- Show, by diagrams, the relative positions of the sun, moon, and earth: (a) During an eclipse of the sun. (b) During an eclipse of the moon. (c) At the time of neap tide.
- 2. When it is 2 p.m., local time, at Toronto, what is the local time at a point 35 degrees west of Toronto?
- 3. Draw a map of Europe, marking the chief countries, their capitals and principal rivers.
- 4. Give the boundaries of New Brunswick and of the County of York (Ontario.)
- 5. What and where are the following: St. Maurice, Trinidad, Cincinnati, Muscat, Hong Kong, Tasmania, Calgarry.
- 6. In the Dominion of Canada from whom do the following receive their appointments: The Governor-General, Members of the Senate, the Lieutenant-Governors of the Provinces, the Judges?

7. Where do the following rivers empty, and what is the chief city on each: Ohio, Tigris, Delaware, St. John, Mersey, Potomac, Ganges?

BOOK-KEEPING.

SENIOR FIFTH BOOK.

- What is the object of Book-keeping. Name all the books used in keeping a set of connected accounts.
- 2. Describe, fully, the method of closing the Ledger.
- 3. On March 2nd we have on hand \$3,000 00 cash. On the the same day we pay for goods \$2,834.16, also rent of store. \$11 00, and for sundry expenses, \$13.84. On March 3rd we received for cash sales, \$14.21, and on March 4th received for cash sales, \$9.00. March 5th paid Thomas Peavey, \$20.00, and received for cash sales, \$35.50. Make out a statement of these cash transactions, with Dr. and Cr. columns, and show the balance on hand on March 6th.
- 4. Define a Promissory Note, a Demand Note, a Collateral Note, an Individual Note, a Negotiable Note.
- 5. Henry James owes me on account \$1,500; he fails, and I receive from him: cash, \$350, his note for \$250, and balance the account. Write Journal and Ledger entries.

HYGIENE.

SENIOR FIFTH BOOK.

I. Why give emetics in poisoning? Name some emetics. What is an Antidote?

- 2. Treat a case of suffocation from Common Burning Gas.
- 3. What is meant by food "going the wrong way?" Why is this not a frequent occurrence? How else may choking be caused?
- 4. Disinfect a sick room after a case of Scarlatina.
- 5. Causes and treatment of Croup.

MUSIC.

SENIOR FIFTH BOOK.

- 1. What is meant by accent in music?
- 2. Define key-signature, tonic, minor-third.
- 3. What are the key-signatures of A major and B minor?
- 4. What is melody?
- 5. Define modulation.

ARITHMETIC.

- 1. State and prove by means of an example, the rule for multiplication of fractions.
- 2. A bridge is supported by 4 cables, each composed of 6,300 wires, each 3,578 feet long. How many feet would all these wires extend if laid end to end? How many yards? How many miles?
- 3. A person picks up 20 stones placed in a straight line a yard apart, carrying each one separately to the end of the line; what distance does he travel?

- 4. One-fourth of a garden, containing 4 acres is planted with potatoes, four-sevenths with cabbages, one-twelfth with various other vegetables, and the remainder is occupied by paths. What is the length of the paths if they have an average breadth of 5 feet?
- 5. What sum of money paid at the beginning of the year, would be εqual to a salary of £336 3s. od. per annum, paid quarterly, allowing discount at the rate of 5 per cent. per annum?
- 6. By buying a house at 10 per cent. less than it cost to build, and selling at a profit of 25 per cent., I gained \$675.00. Find the cost of building and the selling price.
- 7. Find the compound interest on \$4,000.00 for 1 year, 3 months, interest being payable quarterly, at 4 per cent. per annum.
- 8. The united area of the faces of a cubical block of granite is 3,750 square feet. Find the side of the cube.

ALGEBRA.

- If a = 1, b = -1, c = 2, d = -3, find the numerical value of $\frac{(a-b)(b-c)(c-d)}{(b-a)(c-b)(d-c)}$
- 2. Simplify $\{(a+b) x + (a-b) y\} \{(a-b) \cdot x (a+b) y\} + (a+x) (b-y) (b-y) x.$
- 3. Multiply $4x^2 12xy 9y^2 + 8xz 12yz + 16z^2$ by 2x 3y 4z.
- 4. Find the H- C. F. of $4x^4 + 9x^8 + 2x^2 2x 4$ and $3x^3 + 5x^2 = x + 2$.

5. Simplify
$$\frac{6a^3 - 22a^2b + 12ab^2}{27a^3 - 27a^4b + 9ab^2}$$

6. Simplify
$$(x^2 + 1 + \frac{1}{x^2}) \div (\frac{1}{x} - 1 + x)$$
.

7. Solve
$$\frac{1}{3}(2x-3) - \frac{3x+3}{4} = \frac{5x-4}{6} - \frac{1}{12}(7x+6)$$
.

8. Divide the No. 208 into two parts, such that the sum of the fourth of the greater and the third of the maller is less by 4 than four times the difference of the two parts.

GEOMETRY.

- 1. Define plane rectilineal angle, circle, and rhombus.
- 2. If two triangles have two sides of the one equal to two sides of the other, each to each, and have also the angles contained by these sides equal to one another, they shall also have their bases or third sides equal, and the two triangles shall be equal, and their other angles shall be equal, each to each, namely those to which the equal sides are opposite. (I, 4.)
- 3. Draw a straight line perpendicular to a given straight line of an unlimited length from a given point without it. (I, 12.)
- 4. Make a triangle of which the sides shall be equal to three given straight lines, but any two whatever of these shall be greater than the third. (I, 22.)

ENGLISH GRAMMAR AND COMPOSITION.

JUNIOR FIFTH BOOK.

- 1. Define Suffix, Prefix, and Radical Change.
- 2. Give one example each of Abstract, Collective, and Class Noun.
- 3. What are the different ways of forming Gender in Nouns?
- 4. Compare forth, old, pleasant, beautiful.
- 5. Give rules for the use of what (interrog.), what (relative), such (demonstr.), such (adverb).
- 6. Write the 1st sing, past indicative Active of the verb to hunt, in the Indefinite, Progressive, Perfect, Continuous (or Perfect and Progressive), and Emphatic Forms.
- 7. Classify Adverbs, giving one example of each kind.
- 8. Analyse:—" And still, when he arranges his tackle for a holiday on the streams which wind among the red woods of Santa Cruz, he sees the reflected trees and the granite dome trembling in the water, as the trout leap up to his fly; he again hears Yang's ejaculations and commands."
- 9. Parse words in italics in the following sentence:
- "John and James, the clever twins, have carried off all the honors at the University that they could possibly win.
- 10. Write an essay of not more than ten lines on one of the following subjects:—

Advantages of "beginning young."

Love of animals.

SPELLING, DERIVATION, ETC.

JUNIOR FIFTH BOOK.

- 1. Write, from dictation, (The High School Reader):
- (a) Page 106, beginning, "All orders of men," and ending, "died for them."
- (b) Words to be dictated.
- 2. Derive the following words, giving the meanings of the *roots*, also of the *prefixes* and *affixes* where they occur:

benevolent, redemption,
committed, lucifer,
theological, sentiment,
reclining, describe.
providence,

3. Give the meanings of the following roots, and one English word from each:

ango, frons, ballo, phos, loquor, salus.

- 4. Give the forces of the endings: -let, dom, ous, and one example of each.
- 5. Give the meanings of boisterous, gaudy, ludicrous, melancholy, visage, Paraclete.

GEOGRAPHY.

JUNIOR FIFTH BOOK.

What are the boundaries and what is the width in degrees of the Torrid Zone? In what zones is the sun never vertical?

Explain the following geographical terms: Solar System, Longitude, Tropics, Isothermal Lines.

Draw a map of South America.

Name the Counties of Ontario bordering on the St. Lawrence, and the States of the American Union bordering on the Pacific Ocean.

What and where are the following: Trinidad, Miramichi, Guernsey, Andorra, Bulgaria, Venice, Said.

Give the boundaries of France.

Name the British possessions in India.

HISTORY.

- 1. Connect Cardinal Richelieu with the history of Canada.
- 2. Name the principal Acts of Parliament that find a place in the history of Canada, and give the provisions of any two of them
- 3. Give the circumstances and dates of any four battles in Canadian History.
- 4. Sketch the history of Nova Scotia.
- 5. Give an account of the Norman Conquest.
- 6. Write notes on "Henry I.," "Thomas Becket."
- 7. What was the title of Henry Tudor to the throne? Name the sovereigns of that dynasty and their dates.
- 8. Describe the reign of Queen Elizabeth.

BOOK-KEEPING

JUNIOR FIFTH BOOK.

- 1. What is a business transaction. Give an example.
- Define Debtor and Creditor. In the example given in your answer to Question 1, name the Debtor and the Creditor respectively.
- 3. On March 2nd we have on hand \$3,000.00 cash. On the same day we pay for goods, \$2,834.16, also rent of store, \$11.00, and for sundry expenses, \$13.84. On March 3rd we received for cash sales, \$14.21, and on March 4th received for cash sales, \$9.00, March 5th paid Thomas Peavey, \$20.00, and received for cash sales, \$35.50. Make out a statement of these cash transactions, with Dr. and Cr. columns, and show the balance on hand on March 6th.
- 4. Explain the meaning of Ledger, Note, Receipt, Liability.

HYGIENE.

- 1. Explain how sounds are produced. Describe the Tympanum.
- 2. What is the danger in introducing a *pin* to remove any accumulation from the external ear?
- 3. How are the eye-balls kept moist? Name the parts of the eye that are effected when those organs have become tired from over-work.
- 4. Where are the vocal cords? State their function.
- 5. Name some causes for loss of voice.

MUSIC.

JUNIOR FIFTH BOOK.

- 1. What is music? What is melody?
- 2. Define Staccato, Adagio, Presto, Allegro.
- 3. What are leger lines?
- 4. What is an interval in music?
- 5. What are the key-signatures of A major and B minor?

ARITHMETIC.

SENIOR FOURTH BOOK.

- I. A bridge is supported by 4 cables, each composed of 6,300 wires, each 3,578 feet long. How many feet would all these wires extend if laid end to end? How many yards? How many miles?
- 2. A man built a house for \$5,000. He employed, for a certain number of days, 3 carpenters at \$2.75 per day, 2 painters at \$2.25, 1 mason at \$3.50, and spent for lumber \$1500, for stone \$250, for hair, lime, and sand, \$250, for paints, oil, and paper, \$250, for locks, hinges; and nails, \$50.50, for plumbing, \$262. How many days were the workmen employed?
- 3. If 9 lbs of rice cost as much as 4 lbs. of sugar, and 14 lbs. of sugar are worth as much as 1½ lbs. of tea, and 2 lbs. of tea are worth 5 lbs. of coffee, find the cost of 11 lbs. of coffee if 2½ lbs. of rice cost 5d.

- 4. A starts from Plymouth by road at the rate of $3\frac{1}{2}$ miles per hour, to walk to London (346 miles), and is followed after 24 hours by B on horseback, going at the rate of $10\frac{1}{2}$ miles per hour. At what distance from Plymouth, and in what time, will A be overtaken?
- If 11 horses require 5½ tons of hay in 5 weeks, what weight would be required by 99 horses in 7 days.
- 6. One fourth of a garden containing 1³/₄ acres is planted with potatoes, four-sevenths with cabbages, one-twelfth with various other vegetables, and the remainder is occupied by paths. What is the length of the paths if they have an average breadth of 5 feet.
- 7. A fruiterer bought oranges at 1s. per score, and sold them at 1s. per dozen; what was his gain per cent.?
- 8. In what time will the interest on \$370.00 be \$123.33 $\frac{1}{3}$, at $3\frac{1}{3}$ per cent. per annum.

ALGEBRA.

SENIOR FOURTH BOOK.

- 1. If a = 2, b = 3, c = 4, d = 5, e = 0, find the numerical value of $4a^3 b^2 c 5b^{3} c^2 d + 7c^3 d^2 e abcde$.
- 2. Find the sum of $3a^2b + 2ab^2 5a^2b^2$, $7a^2b 8ab^2 + 4ab^3$, $ab^2 + 7a^2b^2 b^4$, $a^3 a^2b 2ab^2 2a^2b^2$, $-a^3 4ab^3 + 4b^4$, $5a^3 9a^2b^2 + 7ab^2$, $-9a^2b ab^2 3b^4$, 11 ab^2
- 3. From $8a^9 7a^8b + a^4b^5 2a^6b^3 11a^3b^6 a^2b^7 8$ take $2a^6b^3 a^7b^2 + a^4b^5 + 8a^9 + 7a^8b a^3b^6 x a^2c^7$.
- 4. Multiply $4x^2 12xy + 9y^2 + 8xz 12yz + 16z^2$ by 2x 3y 4z.
- 5. Divide $6x^7 + 8x^6 9x^5 16x^4 4x^3 x^2 10x + 20$ by $3x^3 + 4x^2 5$.

ENGLISH GRAMMAR AND COMPOSITION.

SENIOR FOURTH BOOK.

Define Stem, Inflexion, Accident.

What classes of Nouns add -es to the singular to form the plural?

Frame short sentences, showing the use of a, an, my, and mine, respectively.

What Adjectives are compared by more and most?

Illustrate and explain the difference between a Transitive and Intransitive Verb.

What is a Mood? Enumerate the Moods of a Verb.

Write the Principal Parts of sing, will, buy.

Analyse:—"The great king gave his servant a thousand pounds for past services, and the servant received them with thankfulness."

Parse the words in italics in the foregoing sentence.

Write an essay of not more than eight lines on one of the following subjects:—

Truth will prevail.

It is never too late to mend.

SPELLING AND DERIVATION.

SENIOR FOURTH BOOK.

1. Write from dictation, (Fourth Reader):-

(a). Page 158, beginning "Meanwhile," and ending "by turns."

- (b). Page 240, first stanza.
- (c). Words to be dictated:-

ammunition, perceive, separated. sacrilegious, fugitive, worshipping, causes, pinnacle, incredible, obliged, galloped, vengeance, inaccessible. piteous, stirrup, judgment, lily, latitude. completely, military.

2. Derive the following words, giving the meanings of the *roots*, also of the *prefixes* and *affixes* where they occur:

acclammation, fugitive, occurrence, facilitate, transmuted, domestic, infinite, merchant.

- 3. Give the meanings of the following roots and one English word from each:—emo, frango, seco, ordo, cor, grex.
- 4. Give the meanings of:

ooze, dolorous, incredible, niche, disparity, chivalrous, venom.

HISTORY.

SENIOR FOURTH BOOK.

- 1. Give an account of the Danish Invasion.
- 2. Sketch the history of the Great Charter.
- 3. Write notes on "John Wycliffe," "Wars of the Roses," "Wat Tyler."

- 4. Name the sovereigns of the Tudor dynasty, with their dates.
- 5. Explain how the Crowns of England and Scotland became united.
- 6. Give an account of the Revolution of 1688.
- 7. Explain how the union of England and Ireland was brought about.
- 8. Sketch the history of Queen Victoria.

GEOGRAPHY.

SENIOR FOURTH BOOK.

- 1. Explain the terms latitude and longitude. What is the highest degree of each? What is the latitude of the Tropic of Cancer and of the Antarctic Circle?
- 2. Name the counties of Ontario bordering on the River St.

 Lawrence, and the boundaries of the County of York.
- 3. What and where are the following:—Buffalo, St. John's, Leith, Gothland, Calcutta, Rhone, Port Arthur?
- 4. Draw a map of the British Islands, marking the chief rivers and a town or city on each.
- 5. Name the chief tributaries of the Mississippi and of the St. Lawrence—five of each.
- 6. Give the countries of Europe bordering on the Mediteranean Sea, with their capitals.

HYGIENE.

SENIOR FOURTH BOOK.

- 1. Show by diagram the course of the blood from the right auricle of the heart to the left ventricle.
- 2. What changes take place in the blood while in the lungs?
- 3. Disinfect a sick room after a case of measles.
- 4. How does water get its impurities? How can you remove those impurities?
- 5. What are the impurities in the air of an ill-ventilated room?

MUSIC.

SENIOR FOURTH BOOK.

- 1. How many different kinds of notes are used in music, and name them?
- 2. Define chord, measure, clef, stave.
- 3. What is a chromatic scale?
- 4. What is an interval in music?
- 5. What effect has a dot placed after a note? What when placed under it?

ARITHMETIC.

JUNIOR FOURTH BOOK.

1. A bridge is supported by 4 cables, each composed of 6,300 wires, each 3,578 ft. long. How many feet would all these

wires extend if laid end to end? How many yards? How many miles.

- Define a complex fraction, a decimal fraction. Give an example of a complex fraction, reduce it to a simple fraction and also to a decimal.
- 3. 1,000 lbs. of cheese cost 12½c. per lb., 371 lbs. 12 oz. are sold at 18c per lb., 482 lbs. at 16c per lb., and the remainder at 15c. per lb. Find the gain.
- 4. Three steamers leave Halifax on the same day; the first returns every two weeks, and leaves again the same day; the sec ond returns every three weeks, and leaves the same day; the third returns every 35 days. When will they all be in Halifax together again?
- 5. A person picks up 20 stones placed in a straight line a yard apart, carrying each one separately to the end of the line.

 What distance does he travel?
- 6. A man built a house for \$5,000. He employed for a certain number of days 3 carpenters at \$2.75 per day, 2 painters at \$2.25 per day, 1 mason at \$3 50, and spent for lumber, \$1,500; for stone \$250; for hair, lime, and sand, \$250; for paints, oil, and paper, \$250; for locks, hinges, and nails, \$50.50; for plumbing, \$262. How many days were the workmen employed?

ENGLISH GRAMMAR AND COMPOSITION.

JUNIOR FOURTH BOOK.

1. Define adjective, adverb, conjunction.

- 2. What parts of speech are the words in italics in this sentence?

 "That is not true, that I second that second resolution, that was proposed a second ago."
- 3. Give the feminines of abbot, marquis, widower, lad, gander.
- 4. Give the plurals of child, hose, cargo, roof, datum.
- 5. What parts of speech are Infinitives and Participles allied to, and how?
- 6. Define an auxiliary verb. Give examples of the auxiliary use of do, be, have.
- 7. Analyse: William the Norman became King of England by eonquest; Queen Victoria received the crown by inheritence.
- 8. Parse words in italics in the foregoing sentences.
- 9. Correct errors in the following sentences:-

You was laying on the turf.

I and you and he will go a short walk.

I seen the book some place in the house.

Was anyone ever a hundred years old.

Anspector's Augual Report.

INSPECTOR'S ANNUAL REPORT.

To the Toronto Public School Board :

GENTLEMEN,

In accordance with a Resolution of your honorable Board, I respectfully submit the twenty-ninth Annual Report of the Schools under your charge.

Appended to the Report will be found Statistical Tables which give in detail all important particulars relating to teachers, pupils, attendance, absenteeism, tardiness, studies pursued, cost of maintenance, &c.

ATTENDANCE.

The total number of pupils registered during the year was 25,066. Last year it was 22,080.

The average daily attendance was 16,567. Last year it was 14,840.

1,018 pupils attended school less than 20 days.

| 2,447 | 66 | 6.6 | 6.6 | between | 20 | and | 50 | days |
|--------|-----|-----|-----|---------|-----|------|-----|------|
| 5,341 | 66 | 6.6 | 6.6 | 6.6 | 50 | 66 | 100 | 6 6 |
| 4,530 | 6.6 | 6.6 | 66 | 6.6 | 100 | 6.6 | 150 | 6.6 |
| 11,730 | 66 | 66 | 6.6 | 6.6 | 150 | 66 6 | 200 | 6.6 |

The Average Monthly Registered Number was 19,650. This shows an increase compared with last year of 2,776. See Table A.)

The average of Monthly Average Numbers was 16,580. This shows an increase of 1,742 when compared with the corresponding number of last year. (See Table B.)

The average of Monthly Averages was 89.8 per cent. of the Average of Monthly Registered Numbers.

The best average for any month in the year was 91.5, the average for December.

The largest number, 20,043, was registered in October, and the smallest number, 17,837, in June.

The following statement shows the Average Registered Number in each school during the year:

| | Average | No. of | Average |
|----------------|----------------|-----------|--------------|
| Schools. | Registered No. | Teachers. | per Teacher. |
| Dufferin | 1099 | 18 | 61 |

ATTENDANCE IN THE VARIOUS CLASSES.

The registered number in attendance during the year in the different classes was as follows:

| First Book | 10,775 |
|------------|--------|
| Second " | 5,916 |
| Third " | 4,634 |
| Fourth " | 2,731 |
| Fifth " | |

The increase in the various classes compared with last year is as follows:

| First I | 3ook | · | 1,031 |
|---------|------|---|-------|
| Second | 6.6 | | 1,060 |
| Third | 6.6 | | 472 |
| Fourth | 6.6 | | 303 |
| Fifth | 6.6 | | 120 |

CERTIFICATES OF HONOR.

Certificates of Honor are awarded, at the Christmas Vacation, to such pupils only as have not been once absent or late, and whose conduct has been uniformly good, unless the absence or lateness has been occasioned by sickness of not more than three weeks' continuance, to be certified in writing by the pupils' parents or guardians.

These Certificates are of two grades, and named respectively First Honor Certificates, and Second Honor Certificates.

The First Honor Certificates are awarded to such pupils as have fulfilled the above-named conditions for two consecutive sessions.

The Second Honor Certificates are awarded to such pupils as have conformed to the said rules for one session during the year.

The following statement shows the number of Certificates given in the various schools at the close of 1888:—

| Dufferin 248 349 597 Ryerson 197 270 467 Wellesley 262 323 585 Jesse Ketchum 138 260 398 Givins' Street 125 210 335 Manning Ave 102 167 269 Bolton 160 230 390 Phæbe Street 130 185 315 | l. |

THE KINDERGARTENS.

This department has continued to grow in extent and interest. The most important step of the year was the appointment of Miss Currie, as Assistant Supervisor. The training classes have been conducted by Mrs. Hughes. The class of 1888-89 contains 28 new students, making in all a class of 64 members. The appreciation of the Kindergartens by the parents is shown by the fact that they reluctantly consent to the removal of their children from the Kindergartens to the primary classes when advised to do do.

I strong recommend that the material used by the children in the Kindergartens be purchased by the Board, and supplied free.

The attendance at the Kindergartens during the year was as follows:

| | Schools. | Average Registered No. | |
|-----|-----------------|---------------------------|------|
| 1. | Victoria Street | 63 | 53 |
| 2. | Niagara " | 72 | 51 |
| 3. | College Ave | 42 | . 28 |
| 4. | Bolton " | 78 | 60 |
| 5. | Jesse Ketchum | 64 | 47 |
| 6. | Lansdowne | 85 | 70 |
| 7. | Rose Ave | 73 | 59 |
| 8. | Park | 78 | 59 |
| 9. | Gladstone Ave | 64 | 50 |
| 10. | Wellesley | 55 | 46 |
| • | | | |
| | Total | 674 | 523 |

NIGHT SCHOOLS.

Thirty-one Night School classes were conducted during the year. The attendance was, on the whole, very satisfactory. The conduct was excellent, and the diligence shown by the students was very commendable. The retention of the dollar, deposited as a guarantee of good conduct till the end of the term, has produced very beneficial results.

I am of opinion that two advanced Night Schools might be established with great advantage to the students, one in the eastern and another in the western part of the city. Admission to these schools should be granted to those students who pass the best examinations in the regular classes.

Average registered numbers :—

| Schools. | Males. | Females. | Total. |
|-------------------|--------|----------|--------|
| Parliament Street | 154 | 46 | 200 |
| Elizabeth " | 84 | 53 | 137 |

TEACHERS.

There were 326 teachers in the employ of the Board at the close of the year, exclusive of the special teachers in Music and Drawing.

There were 31 male and 294 female teachers employed.

They hold certificates as follows:

| 1st | Clas | s | | | | | 68 |
|-----|------|---|------|------|------|------|-----|
| 2nd | 6.6 | | | | | | 258 |

In addition to the above the Board employs 20 Kindergartners, 2 Music Teachers, 1 Drawing Superintendent, 1 Drill Instructor, and 1 Kindergarten Supervisor.

TORONTO TEACHERS' INSTITUTE.

The Toronto Teachers' Institute held its First Semi-Annual Convention for 1888 in Wellesley School, on Friday, March 9th, and in Carlton Street Methodist Church, on Thursday, March 29th, commencing at 9 a.m. each day.

PROGRAMME.

Friday, March 9th-Wellesley School.

| 9.00— 9.10 a.m. | Opening Exercises. |

| | of the Grades as collated by the Execu- |
| | tive Committee. |
| 10.45—12.00 noon. | Address on "Order," Mr. J. L. Hughes. |
| 2.00— 3.00 p.m. | Children's Voices, Mr. A. T. Cringan. |
| 3.00- 4.00 " | Election of Officers. |
| 4.00-4.15 " | Election of Delegate to Ontario Teachers' |
| • | Association, and General Business. |

The grade conventions were held in October as follows:

| GRADE. | School Visited. | Teacher of Class. | Date of Visit |
|-------------------|---------------------|------------------------------|------------------|
| 5th Book | | (miss spouldi. | Oct. 11th |
| Sen. 4th Book | | Mr. Crane. Mr. Ferrier. | " 12th " 15th |
| | Louisa Brock Ave | Miss Cameron. | " 16th |
| | Victoria | Miss Dickinson. | · 18th |
| | Church | Miss Sims. | " 19th |
| Jun. 2nd " | Dufferin | Miss Gray. Miss Slater. | " 22nd |
| Sen. 1st " | Wellesley | Miss Sanders. | " 23rd |
| Jun. 1st " (East) | Bolton Ave | Miss Laidlaw. Miss Phillips. | " 25th |
| Jun. 1st " (West) | Givins' | Miss Bailey. Miss Woolley. | " 26th |

These meetings were attended by all the teachers of the several grades, and much interest was shown in the teaching exercises and the discussions in regard to them. The forenoons were devoted to watching the teaching in the regular classes,

and the afternoons to the consideration of the methods practised during the morning. There are no other agencies so directly useful, as the Grade Conventions, in disseminating improved plans and methods throughout the schools.

The Second Semi-Annual Meeting for 1888 was held in the Methodist Tabernacle, corner Spadina Avenue and College Street, on Saturday, October 27th, commencing at 9 a.m.

PROGRAMME.

- 1. Opening Exercises.
- 2. Calling Roll of Teachers.
- 3. Reading Minutes of last Semi-Annual Meeting.
- 4. Reading Communications and giving Notices of Motions.
- 5. Reports of Committees.
- 6. Reports of Meetings of the Grades.
- 7. General Business.

Statistical and Reserence Tables.

RESULTS OF COMBINED EXAMINATIONS.

The examiners for the year 1888 were: Mr. Wm. Anderson, Jno. A. Patterson, M.A.; G. B. Sparling, M.A.; W. Nattress, M.D.; W. S. Jackson, and Archibald MacMurchy, M.A., Chairman.

The following tables show the standing of the classes in the various subjects:—

SENIOR FIFTH BOOK CLASS.

TEN PUPILS FROM EACH CLASS.

| SCHOOLS. | Mathematics. | Grammar, Composition, and Hygiene. | History and Geography. | Reading, Spell- ing, and Deri- vation. | Writing, Music, Bookkeeping, and Drawing. | Total. |

REPORT OF THE EXAMINERS.

The Examiners have the honor to report that on June 18th and 19th they examined the pupils selected for the purpose from the four highest classes of the City Public Schools. The Examinations were held in the Dufferin and Ryerson Schools, written answers being given in every subject, with the exception of Reading. The results of the Examiners' reading and judgment on these answers as handed in, are given above. The names of the pupils entitled to receive Scholarships, Medals, and Prizes, are given as heretofore, and also a Tabular Statement of the aggregate number of marks obtained by each class examined, from which the comparative standing of the Schools may be readily ascertained, in so far as the result of the efforts of these selected pupils is in accordance with the actual state of the Schools thus examined.

In forming an estimate of the relative rank of the different Schools, the element of local advantage or disadvantage must not be forgotten.

Unmistakable evidence has been given to the Examiners in reading the answers of the pupils, of diligence and industry on their part, and of active and conscientious discharge of duty on the part of the teachers. Good work has been shown in all the subjects found on the Public School programme, especially so in penmanship, in spelling, and in neatness of writing answers to the questions proposed.

The special prize presented by the Rev. Septimus Jones, to the best reader in the City Public Schools, was won by Christina McGregor, of the Wellesley School.

It affords the Examiners much satisfaction to state that the Public Schools of the city are doing worthily a noble work. The Examiners, in the performance of their duty, received very effective aid from the Inspector and the staff of teachers in the Schools named

ARCHIBALD MACMURCHY,

Chairman Board of Examiners.

Examination Papers.

EXAMINATION PAPERS.

COMBINED EXAMINATION.

ARITHMETIC.

SENIOR FIFTH BOOK.

- 1. During the six years ending 1886, there were in the United States 3903 strikes and 2182 lockouts, and the total number of employees involved in them was 1,478,172; the direct loss of the employers was \$34,164,914.00 and of the employees \$59,948,882.00.—United States Labor Bureau.
- Which lost most and by how much? What was the total loss?

 What was the loss of each employee? What was the average number of employees involved in each strike or lock-out? What was the average loss from each strike or lock-out?
- 2. In deep sea sounding it was recently found that it took 24' 10" for the weight at the end of the sounding apparatus to reach bottom in 2096 fathoms of water. Express this depth in miles and decimal of a mile, and give the rate at which the weight sank in miles per hour.
- 3. If 6 compositors in 16 days of 10½ hours each can set in type 720 pages each of 60 lines with 40 letters in a line, in how many days of 7 hours each will 9 compositors set 960 pages each of 45 lines with 50 letters in a line?

- 4. In the early part of the year the Government offered to take French broze pennies from the public at the rate of 13 for a shilling. The Government would be able to exchange them again at the rate of 252 for a sovereign. What would the exchange again or lose on every million pennies so received.
- 5. For how much must a four months' note, without interest, be made so that it may yield \$1,000.00 when discounted at a bank at 6 per cent.
- 6. In 5 months at 4 per cent. a man pays a certain interest; had he borrowed \$400,000 and paid five per cent. on the whole sum his interest would have been $$20^{10}/_{12}$. Find the interest which he paid.
- 7. What sum must be invested at the beginning of each year for 3 years to pay off a debt of \$600.00 due at the end of 5 years, interest reckoned at 5 per cent.?
- 8. If oranges 2 inches in diameter are worth 75c. a dozen, how much are oranges $2\frac{1}{2}$ inches in diameter worth?
- 9. If 5 men can mow a square meadow in 4 days, find the time 9 men will take to mow a square meadow half as long again as the former.
- 10. A person invests £3500 in railroad ordinary stock at $87\frac{1}{2}$. The railroad pays a dividend at the rate of 2 per cent. for the first half year, and the price of the stock rises to 91. He sells half his stock and buys 6 per cent. preference shares at 117. The next half-yearly dividend is at the rate of 6 per cent. per annum on the ordinary stock. How much did he lose by changing? and what was his whole income for the year?

ALGEBRA.

SENIOR FIFTH BOOK.

- 1. If a = 1, b = 2, c = 3, d = 4, e = 2, find the numerical value of $(a + 2b + 3c)^2 (3c 2b a)^2 + (c e)(c b)$.
- 2. Simplify 3a [2a 2 + a 4 (3 2a) + 5a 4]
- 3. Find the L. C. M. of $2a^2-7ab+3b^2$, $4a^2+4ab-3b^2$, $2a^2-3ab-9b^2$
- 4. Reduce to lowest terms $\frac{4x^2 xy 3y^2}{12x^3 12x^2y + 4xy^2 4y^3}$
- 5. Simplify $\left(\frac{x^2+y^2}{x^2+y^2} \frac{x^2-y^2}{x^2+y^2}\right) = \left(\frac{y^2+y^2}{x^2+y^2} \frac{x-y^2}{x^2+y^2}\right)$
- 6. Resolve into factors $4a^2b^2 (a^2 + b^2 c^2)^2$
- 7. Solve $\frac{5x+3}{8} \frac{1}{3}(3-4x) \frac{31}{2} \frac{9-5x}{6} \frac{1}{2}x$
- 8. Solve $\frac{2x-3}{2x+1} \frac{x-3}{3x+2} = 1$
- 9. John, James and Henry have each the same amount of pocket money; John would spend his in 76 days, James his in 95 days and Henry spends 12c. per day more than James; their united spendings for 20 days would amount to the entire pocket money each possessed; find this amount.

SENIOR FIFTH BOOK.

GEOMETRY.

1. What definition does a carpenter practically apply when he tries the flatness of a board by a straight edge?

- 2. The straight lines which join the extremities of two equal and parallel straight lines are themselves also equal and parallel. (1.33).
- 3. If a straight line be divided into two equal and also into two unequal parts, the squares on the two unequal parts are together double of the square on half the line and of the square on the line between the points of section. (11.9).
- 4. Construct a triangle whose angles are as 1:2:9.

ENGLISH GRAMMAR AND COMPOSITION.

- 1. Define inflexion. Name the different kinds. Discuss the increase or loss of them in English, and the results therefrom to the language.
- 2. Explain the formation of drake, gander, lass, children, kine.
- 3. Account for the ss in less, the th in farther and other, the l in could and would.
- 4. What is the origin of -ed in the past tense of weak verbs?

 What were the old forms of the suffix -ing in the verbal noun and in the present participle?
- 5. Mention each possible syntax for the infinitive mood Give an example of each.
- 6. Define co-ordinate, principal and subordinate clauses. What is meant by a phrase in analysis?

7. Analyse:--

I know where a garden grows

Fairer than aught in the world beside,

All made up of the lily and rose

That blow by night, when the season is good;

And I almost fear they are not roses.

- 8. Parse the italicised words in the foregoing passage.
- 9. Paraphrase:-

My heart leaps up when I behold
A rainbow in the sky;
So was it when my life began;
So is it now I am a man;
So be it when I shall grow old,
Or let me die!
The child is father of the man,
And I would wish my days to be
Bound each to each by natural piety.

10. Write a letter of application for some vacant situation, stating imaginary qualifications, etc., of applicant.

SENIOR FIFTH BOOK.

SPELLING AND DERIVATION.

1. Write, from dictation, (The High School Reader), page 289, beginning "The bold," to the end of the paragraph.

2. Derive the following words, giving the meanings of the roots, also of the prefixes and affixes where they occur:—

Circuitous, Melancholy,
Exhausted, Mariner,
Promotion, Monarch,
Multiplied, Thermometer,
Capital, Angel,
Carnage, Bayonet.

- 3. Give the forces of the following affixes and an example of each: -kin, -ly, -ule, -ling.
- 4. Give the meanings of the following roots and one English word from each: -pello, opus, ballo, polis.
- 5. Give the meanings of cathedral, jaded, palette, transpired, unslaked.
- 6. What figures in 'tis, o'er?

SENIOR FIFTH BOOK.

HISTORY.

- 1. Connect Cardinal Richelieu with Canadian History.
 - . Write notes on the "Quebec Act," and the "United Empire Loyalists."
- 3. Give a short account of the war of 1812.
- 4. Describe the Fenian Raids and what had they to do with the Washington Treaty?
- 5. Describe the Federal Constitution of Canada.

- 6. What was the title of the Stuart family to the English throne?
- 7. Write notes on "Ship Money," the "Long Parliament."
- 8. Sketch the history of England from the death of Oliver Cromwell to the Restoration of 1660.
- 9. Give an account of the closing years of the Stuart Dynasty.

GEOGRAPHY.

- 1. Name in order, beginning at the North, the States of the American Union bordering on the Atlantic Ocean.
- 2. Draw a map of the British Islands, marking the chief rivers and towns.
- 3. Give the position, general course and outlet of the following rivers: Rhone, Elbe, Grand, St. John, Saskatchewan, Delaware.
- 4. Name the boundaries of France.
- 5. Explain the causes of the Gulf Stream and describe its course.
- 6. What and where are Valentia, Sebastopol, Brooklyn, Vosges, Mesina?
- 7. Why is it warmer in summer than in winter? In the earth's daily motion, at what rate does an object at the equator travel? What is the width in degrees of the Torrid Zone and of each Temperate Zone?

BOOK-KEEPING.

- 1. Explain the terms debit, credit, sundries, stock, endorsation.
- 2. Journalize the following:

June 4th, 1888, Sold John Wright goods, \$600. Received in payment cash \$300 and Frank Smith's note drawn in favor of John Wright for 60 days from above date for the balance.

- 3. Write out in full and complete Frank Smith's note as handed over by John Wright.
- 4. Write out a bills payable for \$500 for 30 days. (Pupil will use his own name and that of James Nash.)
- 5. What accounts would be affected, and how, by the following entries:
 - (a) Sold John Smith, Mdse. on account, \$400.
 - (b) Bot. of Caldicott, Burton & Co., Mdse., \$1200. Paid cash, \$600, and gave my note for 60 days for balance.
 - (c) Goods valued at \$300, slightly damaged by water, sold for cash at half price.
- 6. How are personal accounts closed in the ledger?

SENIOR FIFTH BOOK.

HYGIENE AND TEMPERANCE.

1. What is meant by artificial respiration? For what cases is it particularly useful to exercise artificial breathing?

- 2. Explain the terms nervousness, wakefulness, unconsciousness. (five causes which produce these conditions of the system.
- 3. State the arguments you would use to convince the moderate drinker that total abstinence is his only safeguard.

MUSIC.

- 1. Explain the signs and marks at the beginning of the strain.
- 2. What is the object of the dots in the second measure and in the last? Is every measure complete? Explain.
- 3. Define key, signature, scale, clef, key-note, rest and bar.
- 4. Distinguish between melody and harmony, and between chord and unison.
- 5. What is the difference between a major and a minor scale?
 Write the scales of C major and A minor, marking where
 the semitones occur.
- 6. What forms a common chord? What is the key-note of A major?

JUNIOR FIFTH BOOK.

ARITHMETIC.

1. During the six years ending 1886, there were in the United States 3903 strikes and 2182 lockouts, and the total number

of employees involved in them was 1,478,172; the direct loss of the employers was \$34,164,914.00, and of the employees \$59,948,882.00—United States Labor Bureau.

- Which lost most and by how much? What was the total loss?

 What was the loss of each employee? What was the average number of employees involved in each strike or lockout? What was the average loss from each strike or lockout?
- 2. In a deep sea sounding it was recently found that it took 24/10/1 for the weight at the end of the sounding apparatus to reach bottom in 2096 fathoms of water. Express this depth in miles and decimal of a mile, and give the rate at which the weight sank in miles per hour.
- 3. A watch which gains 5 seconds in every 3 minutes was set right at 6 a.m. What was the correct time when the watch indicated 3.15 p.m. on the same day?
- 4. If 6 compositors in 16 days of 10½ hours each can set in type 720 pages each of 60 lines with 40 letters in a line, in how many days of 7 hours each will 9 compositors set 960 pages each of 45 lines with 50 letters in a line?
- 5. In the early part of the year the Government offered to take
 French bronze pennies from the public at the rate of 13 for
 a shilling. The Government would be able to exchange
 them again at the rate of 252 for a sovereign. What would
 the exchequer gain or lose on every million pennies so
 received?
- 6. What principal will produce in two years at 6 per cent. compound interest \$650.14.

- 7. For how much must a four months' note without interest be made so that it may yield \$1000.00 when discounted at a bank at 6 per cent.?
- 8. Find the square root of $37^{212}/_{841}$
- 9. If 5 men can mow a square meadow in 4 days, find the time 9 men will take to mow a square meadow half as long again as the former.

JUNIOR FIFTH BOOK.

ALGEBRA.

- 1. If a = 1, b = 2, c = 3, d = 4, e = 2, find the numerical value of $(a + 2b + 3c)^2 (8c 2b a)^2 + (c e)$.
- 2. Simplify 3a [2a 2 + a 4 (3 2a) + 5a 4].
- 3. Divide $6x^8 94^7 2x^6 + 16x^5 30x^4 + 19x^3 2x^2 4x + 10$ by $3x^4 4x^2 + 2x 5$.
- 4. Find the L. C. M. of $x^2 + 2x 8$, $x^2 5x + 6$, $x^2 x + 12$.
- 5. Reduce to lowest terms $\frac{4x^2 xy 3y^2}{12x^3 12x^2y + 4xy^2 4y^3}$
- 6. Simplify $\frac{y}{x^2 + xy} + \frac{x}{xy + y^2} + \frac{2}{x + y}$
- 7. Solve $\frac{5x+3}{8} \frac{1}{3}(3-4x) = \frac{31}{2} \frac{9-5x}{6} \frac{1}{2}x$
- 8. A and B have equal sums of money. A gains \$300 and B loses \$100, and then three times A's money is equal to five-times B's. How much had each at first?

JUNIOR FIFTH BOOK.

GEOMETRY.

- 1. Define square, circle, and parallel straight lines.
- 2. Show how to bisect a given rectilineal angle. (1. 9.)
- 3. If a straight line falling on two other straight lines make the alternate angles equal to each other the two straight lines are parallel to each other (1. 27).

JUNIOR FIFTH BOOK.

ENGLISH GRAMMAR AND COMPOSITION.

- 1. Give the general rule for forming the plural of nouns, with its chief modifications. How are the plurals of foreign words treated in English?
- 2. When are the positive, comparative and superlative degrees of adjectives used? Compare old, fore, pleasant.
- 3. Distinguish between the reflexive, and emphatic use of the compounds of self. Give Examples.
- 4. Name the tense-forms of the following verbs: I have loved, I was loving, I did love, I shall have been loving, I will love, I had been loved, I was loved, I shall have been loved.
- 5. Write rules for the predicative adjective; the inflected subjunctive; the nominative absolute; giving one example of each.
- 6. Define simple, compound, and complex sentences. Distinguish between a sentence and a clause.

7. Analyze:-

We left behind the painted buoy
That tosses at the harbour mouth,
And madly danced our hearts with joy,
As fast we fleeted for the South;
We know the merry world is round,
And we may sail forever.

- 8. Parse:—Neither he nor I am going. Day having broken, let us walk two miles.
- 9. Compose a letter of condolence to an intimate friend, who has met with a severe accident.
- 10. Write an imaginary description (not more than 12 lines in length) of one of the following events:—
 - (a) An eruption of Mount Vesuvius.
 - (b) A collision between two steamers.
 - (c) A military review.

JUNIOR FIFTH BOOK.

SPELLING AND DERIVATION.

- 1. Write from dictation (High School Reader) :-
 - (a) Page 83, beginning "when," and ending "actions."
 - (b) Page 91, beginning "I made," and ending "this paper."
- 2. Derive the following words, giving the meanings of the roots, also of the prefixes and affixes where they occur:—

Corruption,

Symphonious,

Infinitely,

Magnify,

Impending,

Merchant,

Occurred,

Regal.

- 3. Give the meanings of the following roots, and one English word from each: Bene, Ludo, oculus, orthos, thermos.
- 4. Give the forces of the prefixes, anti-, ante-, trans-, and one example of each.
- 5. Give the meanings of

Angler, Ludicrous, Fatal, Obsequies, Irksome, Ponderous, Ingredients, Ravenous.

JUNIOR FIFTH BOOK.

GEOGRAPHY.

- Name the States of the American Union bordering on Lake Erie and on Lake Michigan.
- 2. Draw a map of Asia.
- 3. Explain the causes and describe the course of the Gulf Stream.
- 4. When the sun is vertical at the Tropic of Capricorn, how far north do its rays extend? What is the width of each Temperate Zone in degrees?
- Give the source, direction and outlet of the following rivers:
 Orinoco, Grand, Ohio, Saskatchewan, Tiber, Mersey.
- 6. What and where are the following: Cevennes, Trafalgar, Categat, Valentia, Cleveland, Liverpool?

JUNIOR FIFTH BOOK.

HISTORY.

- 1. State the provisions of the "Quebec Act," "Rebellion Losses Bill," and the "Union Act."
- 2. Give an account of the Rebellion of 1837.
- 3. What was "The Trent Affair"?
- 4. What causes led to the Confederation Act?
- 5. Sketch the history of Prince Edward Island.
- 6. Give an account of the Norman Conquest.
- 7. Describe the first conquest of Ireland.
- 8. Sketch the Wars of the Roses.
- 9. Give an account of the Reformation.

JUNIOR FIFTH BOOK.

BOOK-KEEPING.

- 1. Explain the meaning of Cr., Dr., Resource, Insolvent, Net Gain, Balance, Closing an Account.
- 2. Write out an account for groceries, containing not less than six items, and receipt it.
- 3. Give Ledger entries for the following:
 - June 18th, Received from James Douglas, cash on account, \$100.00.
 - " 19th, Paid Alfred Dickson in full of account, \$75.50.
 - " 19th, Bought of Cameron & Campbell merchandise to the amount of \$504.00.

JUNIOR FIFTH BOOK

HYGIENE AND TEMPERANCE.

- 1. Describe the external ear.
- 2. What organ is contained within the larynx? Describe its structure.
- 3. Give a description of the arrangement by which only a sufficient amount of light is allowed to enter the posterior chamber of the eye.
- 4. What effect has the indulgence in alcoholic stimulants upon the heart?

JUNIOR FIFTH BOOK.

MUSIC.

- 1. Explain the signs and numbers at the beginning of the strain.
- 2. What is the object of the dots in the second measure and in the last? Is every measure complete? Explain.
- 3. Define key, signature, scale, clef, key-note, rest and bar.
- 4. Distinguish between melody and harmony, and between chord and unison.

SENIOR FOURTH BOOK.

ARITHMETIC AND MENSURATION.

- 1. During the six years ending 1886, there were in the United States 3903 strikes and 2182 lockouts, and the total number of employees involved in them was 1,478,172; the direct loss of the employers was \$34,164,914.00, and of the employees \$59,948,882.00.—United States Labor Bureau.
- Which lost most and by how much? What was the total loss?

 What was the loss of each employee? What was the average number of employees involved in each strike or lockout? What was the average loss from each strike or lockout?
- 2. How many pins at 250 to the oz. will a ship hold which carries 500 tons?
- 3. A man spends in three months as much as he earns in two months. What does he save out of an annual income of £360 15s.
- 4. I pay \$3.75 for an article of which the original price was \$4.00. How much per cent. was the price reduced?
- 5. Find the simple interest on $\$512\,00$ for two years, four months, at 6 per cent.
- 6. A street $\frac{3}{8}$ of a mile long contains $1\frac{1}{2}$ acres. Find its breadth.
- 7. A watch which gains 5 seconds in every 3 minutes was set right at 6 a.m. What was the correct time when the watch indicated 3.15 p.m. on the same day?

SENIOR FOURTH BOOK.

ALGEBRA.

- 1. If a = 1, b = 2, c = 3, d = 4, e = 0, find the numerical value of
 - (a) $2a^4b^3 = 3b^3c^2 + 4c^2d 5bce$.
 - (b) 2(d-b)(b-d) + 3(3a-b)c 4d.
- 2. Add $7a^4 3a^3b 5ab^3 + 2b^4$, $a^3b 6a^2b^2 + 4ab^3$, $-11a^4 + 7a^2b^2 + ab^3 5b^4$, $a^48 a^3b 2a^2b^2 7ab^3$ $-b^4$, $3a^4 + 2a^3b$, $5a^3b - a^2b^2 + 7ab^3 + 6b^4$, $3a^3b + 7a^2b^2 + 4b^4$, a^2b^2
- 3. Simplify 3a [2a 2(3a + 4) 3 + 5 2(2a 3)]
- 4. From $5a^6 + 7a^4 3a^2 4a^5 2 + 6a$ take $-4a^5 + 6a + z + a^2 7a^4 + 4a^6 1$.
- 5. Multiply $a^2 + 4b^2 + 9c^2 2ab + 6bz + 3ac$ by a + 2b 3c.
- 6. Divide $6x^8 9x^7 2x^6 + 16x^5 30x^4 + 19x^3 2x^2 4x + 10$ by $3x^4 4x^2 + 3x 5$.
- 7. How many inches in a yard and b feet?

SENIOR FOURTH BOOK.

ENGLISH GRAMMAR AND COMPOSITION.

1. Frame a sentence containing *such* as a pronoun, adjective, and adverb.

- 2. Define gender. What is the meaning of common and neuter gender? Give examples.
- 3. Classify pronouns. When are as and else pronouns?
- 4. State and prove to which conjugations the following verbs belong:—Fight, build, set, be, sit, may, go.
- 5. "A conjunction is a word used to join clauses, phrases, or single words together." Give examples in proof of this definition.
- 6. Write rules for the subject, indirect object, and relative pronoun, giving examples.

7. Analyse:—

We know that the planet Mars closely resembles our own earth in every known particular; it has air, land, and sea, and its polar regions are covered with snow.

8. Parse :-

The merchant had become a bankrupt. Show me your book. Sleeping people dream.

- 9. Compose a letter (not to occupy more than 10 lines) describing one of the following events:
 - (a) A dwelling-house on fire by night.
 - (b) A trip to Niagara.
 - (c) A lacrosse match.

SENIOR FOURTH BOOK.

SPELLING AND DERIVATION.

- 1. Write from dictation, (Fourth Reader):
 - (a) Pages 236-7, beginning "The French," and ending "the trial."
 - (b) Page 244, beginning "A home," to the end of the sentence.
- 2. Derive the following words, giving the meanings of the roots, also of the prefixes and affixes where they occur:—

Agriculture.

Annals,

Committed.

Exempt,

Incredible.

Populace.

Translucent,

Satisfy.

- 3. Give the meanings of the following roots, and one English word from each: Bibo, crux, fortis navis, tres, potens.
- 4. Give the meanings of

Alacrity,

Fugitive,

Counsellor,

Petrified,

Deliberation.

Target.

Ebriety.

SENIOR FOURTH BOOK.

HISTORY.

 Name the dynasties or lines of monarchs from the Norman Conquest to the present time. Give the dates at which they began, and the first and last monarchs of the first dynasty.

- 2. Sketch the reign of Queen Victoria.
- 3. Write a short account of any two of the following:—Cardinal Wolsey, Shakespeare, Lord Nelson, Thomas a Becket.
- 4. When and between whom were any five of the following battles fought: Hastings, Bannockburn, Cressy, Bosworth Field, Blenheim, Plassy, Naseby? State who were the victors in each of the five that you name.
- Name in order the sovereigns of the Stuart dynasty, and give a brief sketch of the reign of any one of them.

SENIOR FOURTH BOOK.

GEOGRAPHY.

- 1. Name the counties of Ontario bordering on Lake Ontario.
- 2. Draw a map of Africa.
- 3. Give the source and outlet of each of the following rivers:—
 Indus, Euphrates, Detroit, Saguenay, Ottawa.
- 4. What and where are the following:—Aden, Bombay, Altai, Java, Sebastopol?
- 5. What is the latitude of the Tropic of Cancer and of the Arctic Circle? When is the sun vertical at the Tropic of Capricorn?

6. Name the Provinces of the Dominion of Canada with their capitals.

SENIOR FOURTH BOOK.

HYGIENE AND TEMPERANCE.

- 1. Explain the terms mastication, deglutition, chylification, absorption.
- 2. Designate the proper places for the admission of pure air and the escape of the vitiated air in a school-room.
- 3. What effect has plenty of physical exercise (1) on the muscles of the body (2) on the fat?
- 4. As the stage of excitement from over indulgence in alcoholic stimulants passes off what change takes place in the temperature of the body? To what disease does this change predispose the victim?

SENIOR FOURTH BOOK.

MUSIC.

1. How many kinds of notes are there in music? Give their names.

- 2. Define clef, staff or stave, bar and measure.
- 3. What effect has a dot when placed beside a note, and when placed over it?
- 4. How do you know the key-note of a piece of music? What is the key-note when there is no sharp or flat in the signature?
- 5. Distinguish between the different kinds of scales.
- 6. What is melody and wherein does it differ from harmony?

JUNIOR FOURTH BOOK.

ARITHMETIC AND MENSURATION.

- 1. During the six years ending 1886, there were in the United States 3903 strikes and 2182 lockouts, and the total number of employees involved in them was 1,478,172; the direct loss of the employers was \$34,164,914.00, and of the employees \$59,948,882.00.—United States Labor Bureau.
- Which lost most and by how much? What was the total loss?

 What was the loss of each employee? What was the average number of employees involved in each strike or

- lockout? What was the average loss from each strike or lockout?
- 2. In deep sea sounding it was recently found that it took 24 10 1/1 for the weight at the end of the sounding apparatus to reach bottom in 2096 fathoms of water. Express this depth in miles and decimal of a mile and give the rate at which the weight sank in miles per hour.
- 3. Find the least number which will exactly contain the first ten odd numbers.
- 4. A street $\frac{3}{8}$ of a mile long contains $1\frac{1}{2}$ acres. Find its breadth.
- 5. If 25 men reap a field in $3^{1}/_{5}$ hours, how many men could reap the same field in $6\frac{2}{3}$ hours.
- 6. How many pins at 250 to the oz. will a ship hold which carries 500 tons?

JUNIOR FOURTH BOOK.

ENGLISH GRAMMAR AND COMPOSITION.

- 1. What parts of speech are gold, common, direct, one, early, along?
- 2. Give the feminine forms of actor, fox, servant, bachelor; and the plurals of potato, fly, deer, brother.

- 3. Compare gay, free, little, much.
- 4. Why are the personal pronouns so called? Distinguish between the use of the first, second, and third persons.
- 5. When should who, which, and what, respectively, be used as interrogative pronouns?
- 6. Define transitive and intransitive verbs. Turn "He broke the stick" into the passive construction.
- 7. How may the grammatical subject be enlarged in analysis?

 Shew how analysis differs from syntax.
- 8. Analyse: --

Every language has its own history, and this may be discovered in two ways: by the first way one language is compared with others; by the second, we study its literature in order of time.

- 9. Parse the words in italics in the foregoing question (8).
- 10. Write an essay of not more than ten lines on one of the following subjects:—
 - (a) All work and no play make Jack a dull boy.
 - (b) There is no place like home.
 - (c) God save the Queen.

JUNIOR FOURTH BOOK.

SPELLING AND DERIVATION.

- 1. Write from dictation (Fourth Reader):
 - (a) Page 43, first six lines.
 - (b) Pages 64-5, beginning "When" and ending "him."

2. Derive the following words, giving the meanings of the roots also of the prefixes and affixes where they occur:-

Transporting, · Similar,

Complete,

Dismiss.

Current.

Provide.

Describe.

Brief.

- 3. Give the meanings of the following roots, and one English word from each: Fido, seco, gravis, credo, pater, domus.
- 4. Give the meanings of

Orchestra.

Vagrant,

Aqueous.

Ere.

Glen.

Stratagem.

JUNIOR FOURTH BOOK.

GEOGRAPHY.

- 1. Draw a map of South America.
- 2. What and where are the following: Corsica, Glasgow, Londonderry, Severn, Minorca?
- 3. For what are the following cities noted: Sebastopol, Liverpool, Sheffield, Oporto, Glasgow?
- 4. Name the countries of continental Europe bordering on the western coast, with their capitals, commencing at the north.
- 5. What are the boundaries of Great Britain?
- 6. Give the general direction and outlet of each of the following rivers: Liffy, Rhone, Severn, Elbe, Danube.
- 7. Name four islands near the coast of England.

JUNIOR FOURTH BOOK.

HISTORY.

- Give an account of some of the early English and French discoverers and voyagers to North America,—distinguishing them.
- 2. Sketch the history of Count de Frontenac.
- 3. Write notes on Braddock and Pontiac.
- 4. Explain what is meant by the Clergy Reserves.
- 5. Sketch the history of Toronto.
- 6. Give an account of the administration of Lord Dufferin.
- 7. Name the Governors-General of the Dominion of Canada.

JUNIOR FOURTH BOOK.

HYGIENE AND TEMPERANCE.

- 1. What are the advantages in having the food thoroughly chewed before swallowing?
- 2. Describe the process of digestion as carried on in the stomach.
- 3. How would you temporarily arrest rapid loss of blood from a wound in the foot?
- 4. What percentage of absolute alcohol is contained in good brandy? What is the average in ales or beers?

JUNIOR FOURTH BOOK.

MUSIC.

- 1. How many kinds of notes are used in music? Give their names.
- 2. Define clef, staff or stave, bar and measure.
- 3. What effect has a dot when placed beside a note, and when placed over it?
- 4. How do you know the key-note of a piece of music? What is the key-note when there is no sharp or flat in the signature?

Anspector's Annual Report.

INSPECTOR'S ANNUAL REPORT.

To the Toronto Public School Board:

GENTLEMEN,

In accordance with a Resolution of your honorable Board, I respectfully submit the thirtieth Annual Report of the Schools under your charge.

Appended to the Report will be found Statistical Tables which give in detail all important particulars relating to teachers, pupils, attendance, absenteeism, tardiness, studies pursued, cost of maintainance, etc.

ATTENDANCE.

The total number of pupils registered during the year was 28,287. Last year it was 25,066.

The average daily attendance was 18,926. Last year it was 16,567.

1094 pupils attended school less than 20 days.

| 2714 | " | 66 | 66 | between | 1 20 | and | l 50 | days. |
|-------|-----|-----|-----|---------|------|-----|------|-------|
| 5446 | 6.6 | 6.6 | 66 | 66 | 50 | 61 | 100 | 66 |
| 4854 | 66 | 6.6 | 6.6 | 66 | 100 | 6.6 | 150 | " |
| 14179 | 46 | 66 | 66 | 66 | 150 | 66 | 200 | 66 |

It is very satisfactory to note that the increased attendance is chiefly made up of those who attended School between 150 and 200 days. The number who attended over 150 days last year was 11,730; this year it was 14,179, an increase of 2449.

The Average Monthly Registered Number was 21,218. This shows an increase compared with last year of 1568. See Table A.)

The average of Monthly Average Numbers was 18,924. This shows an increase of 2,344 when compared with the corresponding number of last year. (See Table B).

The average of Monthly Averages was 89.3 per cent of the Average of Monthly Registered Numbers.

The best average for any month in the year was 91, the average for January.

The largest number, 22,503, was registered in October, and the smallest number, 19,961, in February.

The following statement shows the Average Registered Number in each school during the year:

| | Average | No. of | Average |
|----------------|----------------|-----------|--------------|
| Schools. | Registered No. | Teachers. | per Teacher. |
| Dufferin | 1160 | 20 | 58 |
| Ryerson | 1038 | 18 | 57 |
| Wellesley | 1035 | 18 | 57 |
| Jesse Ketchum | 1008 | 18 | 56 |
| Parkdale | 689 | 14 | 49 |
| Givins' Street | 867 | 14 | 6 I |
| Landsdowne | 989 | 18 | 52 |
| Manning Avenue | 663 | I 2 | 55 |
| Bolton Avenue | 97.7 | 16 | 61 |
| Phœbe Street | 657 | 1.1 | 60 |
| Victoria " | 724 | I 2 | 60 |
| Park | 809 | 18 | 45 |
| John Street | 571 | . 10 | 57 |
| Niagara Street | 642 | 10 | 64 |

| | Average | No. of | Average |
|---------------------------|----------------|-----------|----------------|
| Schools. | Registered No. | Teachers. | per Teacher |
| Borden " | 580 | 10 | 58 |
| Church " | 527 | 9 | 58 |
| Elizabeth " | 400 | 9 | 44 |
| Louisa " | 413 | 9 | 46 |
| Bathurst " | 525 | 8 | 66 |
| Clinton " | 426 | 8 | 53 |
| Duke " | 450 | 8 | 56 |
| Gladstone Avenue | 671 | I 2 | 56 |
| Rose Avenue | 669 | I 2 | 56 |
| Sackville Street | 439 | 8 | 55 |
| Winchester " | 481 | 8 | 60 |
| Queen Victoria | 477 | ΙI | 43 |
| Brant Street | 373 | 6 | 62 |
| Parliament Street | 343 | 6 | 57 |
| Brock Avenue | 306 | 8 | 38 |
| Cottingham Street | 246 | 6 | 4 I |
| Dewson Street | 301 | 8 | 37 |
| Dovercourt | 238 | 4 | 59 |
| Morse Street | 405 | 8 | 51 |
| Palmerston Avenue | 224 | 7 | 32 |
| York Street | 231 | 4 | 58 |
| Leslie Street | 94 | 2 | 47 |
| Mabel Street | 120 | 2 | 60 |
| Howard Street | 55 | I | 5.5 |
| Island | II | I | 11 |
| Perth Street | 72 | 2 | 3 ⁶ |
| Orphans' Home | 138 | 2 | 69 |
| College Avenue | 126 | 3 | , 42 |
| Boys' Home | 7 I | 2 | 35 |
| Girls' Home | 63 | I | 63 |
| Sackville Street Branch . | 57 | I | 57 |

| 1 | Average | No. of | Average |
|---------------|----------------|-----------|-------------|
| SCHOOLS. | Resistered No. | Teachers. | per Teacher |
| Euclid Avenue | 45 | I | 45 |
| St. Anne's | 90 | 2 | 45 |
| Grace Street | 378 | 8 | 47 |
| Kew Beach | 18 | 7 | 18 |

It should be remembered that Queen Victoria, Brock Ave., Cottingham, Dewson, and Morse Street Schools were enlarged during the year. As the attendance is averaged throughout the year, it appears much smaller per teacher than it really is.

ATTENDANCE IN THE VARIOUS CLASSES.

The registered number in attendance during the year in the different classes were as follows:

| First Book | 12,148 |
|------------|--------|
| Second " | 6,140 |
| Third " | 5,589 |
| Fourth " | 3,371 |
| Fifth " | 1,039 |

The increase in the various classes compared with last year is as follows:

| First Book | ,373 |
|------------|----------|
| Second " | 224 |
| Third " | 955 |
| Fourth " | 640 |
| Fifth " | 29 |

MEDALS AND CERTIFICATES OF HONOR.

Certificates of Honor and Medals shall be awarded, at the Christmas examination, to such pupils as have not been once absent or late, and whose conduct has been uniformly good. Pupils whose absence has been occasioned by their own sickness, of not more than three weeks' continuance in each session, certified in writing by their parents or guardians; or who have been kept out of school on account of contagious diseases in their families, shall receive certificates. These certificates shall be of two grades, and named, respectively, 1st Honor and 2nd Honor, and the Medals of two kinds — Bronze and Silver.

The 2nd Honor certificates shall be awarded to such pupils as have conformed to the said rules for one year.

The 1st Honor certificates shall be awarded to such pupils as have conformed to the above conditions for two years.

Bronze Medals shall be awarded to such pupils as have conformed to the above conditions for four years.

Silver Medals shall be awarded to such pupils as have conformed to the above conditions for eight years.

The following statement shows the number of Medals and Certificates awarded at the Christmas vacations in the several Schools:—

| | MEDALS: | | CERT | IFICATES: |
|----------------|---------|---------|------------|------------|
| Schools. | Silver. | Bronze. | 1st Honor. | 2nd Honor. |

It has been decided to open six new Kindergartens in Dewson Street, Crawford Street, Louisa Street, Brant Street, Huron Street, and Palmerston Avenue Schools; one in each

The Training Class in connection with the Public School Kindergartens, conducted by Mrs. Hughes and Miss Currie, was very successful. The following is a list of those ladies trained in the Toronto Public School Kindergartens who passed the Government Examinations successfully in July, 1889.

The following comparative statement shows the progress of the Night Schools, since their establishment in 1880.

| Year. | No. Teachers | Registered Number | Average Attendance | Expenditure |
|-------|--------------|----------------------|-----------------------|----------------|
| 1880 | 10 | 1292 | 600 | \$ 2096 |
| 1881 | 14 | 1165 | 419 | 1833 |
| 1882 | 14 | 862 | 310 | 1683 |
| 1883 | 15 | 922 | 406 | 1785 |
| 1884 | 16 | 1424 | 512 | 1703 |
| 1885 | 17 | 974 | 507 | 2687 |
| 1886 | 18 | 1176 | 558 | 2518 |
| 1887 | 26 | 1492 | 779 | 3111 |
| 1888 | 31 | 1211 | 857 | 3645 |
| 1889 | 37 | 1233 | 852 | 4254 |

I would respectfully repeat the recommendation made last year, that two special classes be opened for more advanced students, one in the eastern and one in the western part of the City. Admission to these classes should be by promotion from the regular Night Schools. If good teachers are placed in such Classes they cannot fail to be of great advantage to those who wish to make progress beyond the work possible in one of the ordinary Night School Classes. In the regular classes the teacher cannot afford to give the necessary special attention to the few advanced students without neglecting the rest of the publis. I fully endorse the suggestion of Mr. Baird, Chairman of the Night School Committee, that a class should be continued throughout the year for those who are earnestly desirous of prosecuting their studies vigorously so as to make up for their lack of education. There are a number of young men who began to learn to read and write in our Night Schools after they had reached the age of maturity, and who are making strenuous efforts to improve themselves. They cannot do so to the fullest extent without a teacher to guide them in their work They are worthy of the best encouragement the School Board can give them. An earnest sympathetic teacher could be of great advantage to such men. The term of the ordinary Night School is too short for such students; and the teacher in a regular class has not time to give them the special teaching they need.

TEACHERS.

There were 391 teachers in the employ of the Board at the close of the year.

There were 33 male and 358 female teachers employed. They hold certificates as follows:

| ıst | Clas | s | | | | | | 66 |
|-----|------|---|---|------|------|------|------|---------|
| 2nd | 66 | | - | | | | | 325 |

In addition to the above the Board employs 32 Kindergartners, 2 Music Teachers, 1 Drawing Superintendent, 1 Drill Instructor, 1 Writing Master, and 1 Kindergarten Supervisor.

RESULTS OF COMBINED EXAMINATIONS.

The Examiners for the year 1889 were: Mr. G. B. Sparling, M. A., Mr. W. S. Jackson, W. T. Nattress, M. D., Mr. F. F. Manley, M. A. and J. A. Wismer, B. A. and Archibald MacMurchy, M. A., Chairman.

Their report of the results of the examination is as follows:

The Examiners beg to report that on June 14th and 17th, 393 pupils presented themselves from the various classes of the City Public Schools as follows:

| Senior | 5th Book | Class | 50 |
|--------|----------|-------|-----|
| Junior | 66 | | 80 |
| Senior | 4th Book | Class | 128 |
| Tunior | 66 | " | 135 |

These pupils were examined in the following subjects:—Arithmetic and Mensuration, Algebra, Geometry, Grammar, Composition, Hygiene, History, Geography, Reading, Spelling, Derivation, Writing, Music, Book-keeping and Drawing. The Examinations were held in the Dufferin and Ryerson Schools and the Examiners beg to acknowledge the valuable assistance rendered to them by the Inspector and the teachers.

A list of the pupils recommended to receive Scholarships, Medals and Prizes is submitted. Also tables showing the aggregate credits obtained.

The Examiners desire especially to commend the papers given in by the pupils in History, Euclid, Spelling, Map-Drawing,

Algebra, Composition, and Writing. They have observed with satisfaction that the difference between the aggregate marks obtained by the same classes in different schools has in several instances been considerably lessened; for instance in the Senior Fifth Book Class the highest aggregate is 72 per cent. — a good record—and the lowest aggregate is only 11 per cent. less. In conclusion, the Examiners have pleasure in referring to the satisfactory character of the results and the general excellence of the work submitted by the pupils, which could have been secured only by patience and diligence on the part of intelligent and conscientious workers in the Schools.

Respectfully submitted

ARCHIBALD MACMURCHY, M. A.

Chairman Board of Examiners.

The following tables show the comparative standing of the various classes examined.

SENIOR FIFTH BOOK CLASS.

Examination Papers.

EXAMINATION PAPERS.

COMBINED EXAMINATON.

ARITHMETIC AND MENSURATION.

SENIOR FIFTH BOOK.

- 1. Add together .6183, 151.65, 9 00074, 58.0961.
- 2. Subtract 1.30695 from 201.01003.
- 3. Multiply 709.285 by 1.0069.
- 4. Divide 1.175975723 by 18.07.
- 5. A mail train leaves London for Edinburgh (400 miles) at 10.20 a.m., and travels 36 miles per hr.; an express leaves London for Edinburgh at noon, and travels 45 miles per hour; when will it overtake the mail, and how much sooner will it reach Edinburgh?
- 6. Cannons are fired at intervals of ten minutes in a town which a passenger train is approaching at the rate of 35 miles per hour, If the sound travels at the rate of 1,142 ft. per second, find at wha intervals the reports will be heard by the passengers.
- 7. What is the length of the edge of a cubical cistern which con-

- tains as much water as a rectangular one, the edges of which are 154 ft. 11 in., 70 ft. 7 in., 53 ft. 1 in.
- 8. A man's income consists of a fixed salary of £510 per annum, of dividends on shares paying 5 per cent. per annum, and of rents: if his dividends form ½ of his total income and the rents ½, find the amount of capital he has invested in shares.
- 9. The capital of a firm has been contributed by three partners as follows: A \$1200, B \$1800, C \$3000; and it is agreed that the active partners, A and B, shall receive 20 per cent. and 13½ per cent. respectively of the profits for managing the business. The gross profits are \$1500; find the share of each partner.
- 10. A broker sold mining stock at 60, railroad stock at 65, steamboat stock at 80, and bank stock at 88. Altogether, he sold 243 shares, and received an average price of \$75 per share. How many shares of each did he sell?
- 11. How much canvas will be required to make a conical tent, the perpendicular height of which is to be 10 ft., and the diameter on the ground 19 ft. 10 in.
- 12. The inner diameter of a circular water-pipe is $3\frac{1}{2}$ inches. Find the inner diameter of a pipe which carries 9 times as much water at the same pressure.

ALGEBRA.

SENIOR FIFTH BOOK.

- I. If s = a + b + c, find value of $(2s-a)^2 + (2s-b)^2 (2s + c)^2, \text{ when } a = 3, b = -4,$ c = 5.
- 2. Divide $x^9 3x^8 31x^7 + 25x^6 + 3x^5 22x^4 \times 44x^3 2x^2 15x + 10 \text{ by } x_4 7x^3 + 3z 2.$
- 3. H. C. F. of $3a^2 4ab 4b^2$, $a^3 2a^2b + ab^2 2b^3$, $a^3 ab^2 2a^2b + 2b^3$.
- 4. Simplify $\frac{a^2 + b^2 c^2 + 2ab}{a^2 b^2 c^2 2bc} \times \frac{a^2 a(b + c)}{a^2 b^2 c^2 + 2bc}$
- 5. Simplify

$$\frac{x^2yz}{(x-y)(x-z)} + \frac{y^2xz}{(y-z)(y-x)} + \frac{z^2xy}{(z-x)(z-y)}$$

6. Resolve into factors (1) $a^8 - 1$.

(2)
$$x^4 + 4$$
.

7. Solve
$$\frac{3x+1}{2x+3} - \frac{x+2}{6x+9} + \frac{1}{3x} = \frac{4}{3}$$

- 8. Solve $x^2 2ax = 16a 8x$
- 9. The circumference of the front wheel of a carriage is a feet; that of the hind wheel b feet. What distance will the carriage have travelled when a front wheel has made n revolutions more than the hind wheel?

EUCLID.

SENIOR FIFTH BOOK

- 1. Distinguish between a rhombus and a square.
- 2. If a straight line falling on two other straight lines makes the

alternate angles equal to one another, the two straight lines shall be parallel to one another.

[I XXVII.]

3. In any right angled triangle the square which is described on the side subtending the right angle is equal to the square described on the sides which contain the right angle.

[I XLVII.

- 4. If a straight line be divided into any two parts, the rectangle contained by the whole and one of the parts is equal to the rectangle contained by the two parts together with the square on the aforesaid part.

 [II III.
- 5. If one angle of a triangle is equal to the sum of the other two, the triangle can be divided into two isosceles triangles.

SENIOR FIFTH BOOK.

ENGLISH GRAMMAR AND COMPOSITION.

- 1. Explain the terms Stem and Root, showing how each are used in the formation of words.
- 2. Show the force of the suffixes in darling, sweetheart, freedom, murderer, spinster, vixen.
- 3. What is the Nominative Absolute? What is its duty in a
- 4. Account for the forms woman's, cherubim, better, is, O dear.
- 5. Give the syntax of each of the following Infinities; to see is to believe; it is pleasant to play cricket; I know him to be mistaken; you came to see me; hard to believe.
- 6. Show the difference between a Conjunction and a Preposition.

When can a conjunction join phrases or single words together?

- 7. Analyse:—The words of classical origin, which are found in our dictionary, are about twice as many as pure English terms; but the best writers use less than a tenth of the total, while, in ordinary conversation, our vocabulary contains from three to five thousand words.
- 8. Parse italicised words in the above sentence.
- 9. Paraphrase --

Nature, exerting an unwearied power,

Forms, opens, and gives scent to every flower,

Spreads the fresh verdure of the field, and leads

The dancing Naiads thro' the dewy meads;

She fills profuse ten thousand little throats

With music, modulating all their notes,

And charms the woodland scenes and wilds unknown

With artless airs and concerts of her own.

10. Write a formal acceptance of an invitation to pass Dominion Day at a country house.

SPELLING AND DERIVATION.

SENIOR FIFTH BOOK.

- 1. Write, from dictation (The High School Reader), pages 287-288, beginning, "Onward," and ending "render."
- 2. Derive the following words, giving the meanings of the *roots*, also of the *prefixes* and *affixes* where they **o**ccur.

Atmosphere, Hurricane, Combination, Domestic,

Contederate, Frugal,
Circumstance, Prophet,
Catastrophe, Malevolence
Appetite, Symphonious.

- 3. Re-write the following words correctly: Awful, murmer, ball-ence, comittee, embarassed.
- 4. Give the forces of the following affixes and an example of each:
 -let, -ette, -ow.
- 5. Give the meanings of the following roots, and one English word from each: Augeo, nascor, eu, monos.
- 6. Give the meanings of ominous, talisman, pennon, assiduity demagogue..

HISTORY.

SENIOR FIFTH BOOK.

- I. Explain the Septennial Act, giving reasons for the necessity of its enactment.
- 2. Who was the "First great Commoner?" Explain the circumstances which forced him into power, and give a brief account of his rule.
- 3. Why are the years 1757 and 1759 memorable in English and Canadian History respectively?
- 4. State the causes which led to the War of American Independence.
- 5. Give the chief provisions of Disraeli's Reform Bill.

- 6. Give a brief account of five great English writers in the Victorian era.
- 7. What important changes took place in Canada in 1841?

GEOGRAPHY.

SENIOR FIFTH BOOK.

- Ten marks will be allowed for neatness and style of answering.
- I. Explain the different Phases of the Moon, and the causes of a Solar and of a Lunar Eclipse.
- 2. Explain the causes of the succession of the seasons and define the terms Ecliptic and Degree.
- 3. From what parts of the arth do we obtain coffee, sugar, rice, tea and tobacco?
- 4. Draw a map of Lake Ontario, marking the cities and chief towns on its edge and the rivers that flow into it.
- 5. Name the canals connecting any of the lakes between Canada and the United States, and the canals connecting the River St. Lawrence with any other river. Explain fully why these canals were made.
- 6. What and where are the following: Trafalgar, Queenston Heights, Potomac, Oporto?

BO K-KEEPING.

SENIOR FIFTH BOOK

Candidates may answer any five of the following questions:

1. Explain how Double Entry book-keeping differs from Single Entry, and state its advantages.

- 2. Explain fully: Protest, Bill of Exchange, Lier, Staples, Gazette Printing Co. (Limited).
- 3. Explain how to deposit \$100 in the Bank of Toronto; how to use the Letter-Book; and write a cheque on the Dominion Bank, Toronto, for \$100.
- 4. Journalize the following :-
 - June 1st, 1889, bought of Smith & Co., Toronto, on my note at 30 days, 1,000 lbs. lard at 10 cts. per lb.; 25 bbls. extra flour at \$6.50 per bbl.
 - June 2nd, 1889, sold Jones & Co., Stratford, on their acceptance at ten days, 5 pcs. linen, 150 yds. each, at 75 cts. a yard; 75 yds. tweed at \$1.50 a yard.
 - June 15th, 1889, renewed Jones & Co's acceptance, due to-day, for one month, and charged \$3.75 interest for that time,
- 5. You have been in the wholesale dry goods business for a year:

 Explain how to find your Net Gain or Loss, and your Net
 Worth.
- 6. Molson & Co., Montreal, draw on you at 10 days' sight for \$200, in favor of the Dominion Bank, Toronto. Write the draft and accept it.

HYGIENE AND TEMPERANCE.

SENIOR FIFTH BOOK.

- 1. What is an emetic? Select one and say how you would administer it.
- 2. What treatment would you advise for a boy with a piece of bolted food stuck in his throat?

- 3. Name the nerves of special sense.
- 4. Describe briefly the restoration of a patient from gas suffocation.
- 5. Describe the physical condition of a man "dead drunk." By what internal diseases is such a condition liable to be followed?

MUSIC.

SENIOR FIFTH BOOK.

- 1. Name the key note of the above example. What is the tune of which it forms a part?
- 2. How many semi-tones occur in it, and where are they? What should the time-signature be? Write the sol fa syllables in proper order-
- 3. Write the value of a dotted half note () in sixteenth notes.
- 4. Write rests of corresponding value to the following notes:

5. What is the key-note of the following scale passage.

6. What is the key-note of the minor scale having a signature of four sharps? Where do the semi-tones occur ascending and descending in the melodic minor scale?

ARITHMETIC AND MENSURATION.

JUNIOR FIFTH BOOK.

- 1. Add together .6183, 151.65, 9.00074, 58.0961.
- 2. Subtract 1.30695 from 201.01003.
- 3. Multiply 709.285 by 1.0069.
- 4. Divide 1.175975723 by 18 07.
- 5. A mail train leaves London for Edinburgh (400 miles) at 10.20 a.m., and travels 36 miles per hr.; an express leaves London for Edinburgh at noon, and travels 45 miles per hour; when will it overtake the mail, and how much sooner will it reach Edinburgh?
- 6. Cannons are fired at intervals of ten minutes in a town which a passenger train is approaching at the rate of 35 miles per hour. If the sound travels at the rate of 1,142 ft. per second, find at what intervals the reports will be heard by the passengers.
- 7. I have to be at a certain place at a certain time and I find that if I walk at the rate of 4 miles per hour I shall be 5 minutes too late, and if at the rate of 5 miles per hour I shall be 10 minutes too soon. What distance have I to go?
- 8. A merchant offers a certain lot of goods for \$587.25 and 90 days credit. What will be an equivalent cash offer, money being worth 5 per cent.
- 9. A man pays \$375 a year rent for a house worth \$5400. Will he

gain or lose? and how much in 4 years if he borrows money at 7 per cent. to purchase the house? (Simple interest.)

10. A contractor borrowed a sum of money for three months, 18 days, at 6 per cent. Not having sufficient funds to meet the whole obligation at maturity, he gave his cheque for \$3054 and agreed to continue the remainder at 8 per cent. per annum until paid. The sum paid by cheque was 60 per cent. of the debt and accrued interest. The remainder was paid 1 month, 24 days later, with interest. Find the amount of the second payment.

ALGEBRA.

JUNIOR FIFTH BOOK.

1. Simplify:

(1)
$$2[a-2 \{a+4(a-3)-5\}-6]$$

(2) $-[-\{-(a-b-c)\}]$

- 2. Subtract $3x^3 7x + 1$ from $2x^2 5x 3$, then subtract the difference from 1, and add this last result to $2x^2 2x^3 4$.
- 3. B sold a oxen at x dollars each, and b sheep at y dollars each; how many horses can he purchase with the money at c dollars each?
- 4. Divide $12a^8 + 9a^7 8a^6 + 4a^5 + a^4 11a^3 14a^2 + 22a 15$ by $4a^4 + 3a^3 2a + 3$.
- 5. Find H. C. F. of $6x^2 5x 6$, $2x^2 + 5x 12$, $4x^2 8x + 3$.
- 6. Resolve into factors:
 - (1) $b^2 a^2 + c^2 + 2bc$.
 - (2) $a^4 + a^2b^2 + b^4$.

7. Solve

$$\frac{x-4}{3} - \frac{1}{9} (5x-32) + \frac{x+9}{28} = -\frac{1}{35} (2x+3).$$

- 8. Two-fifths of A's money is equal to B's, and seven-ninths of B's is equal to C's; in all they have \$770. What amount has each?
- 9. A man has a hrs. at his disposal. How far may he walk at the rate of b miles an hour that he may ride back within the time at c miles an hour?

EUCLID.

JUNIOR FIFTH BOOK.

- T. Define (a) an obtuse angle, (b) a circle, (c) a rhombus.
- 2. From the greater of two given straight lines to cut off a part equal to the less. [I III.
- 3. If one side of a triangle be produced, the external angle shall be greater than either of the interior opposite angles. [I XVI
- 4. Any two sides of a triangle are together greater than the third side.

 [I XX.

ENGLISH GRAMMAR AND COMPOSITON.

JUNIOR FIFTH BOOK.

- 1. State the different methods of inflecting words, with one example of each. What parts of speech may be inflected?
- 2. Define Collective nouns. When should they be followed by Singular or Plural Verbs?
- 3. Give the plural of Mr. Jones, court-martial, governor-general, grotto, phenomenon.; and the feminine of negro, hero, lad, beau, executor.

- 4. What is the Nominative of Address? State its duty in a sentence.
- 5. Define accurately what the word hunting is in the following phrases: Gone a-hunting, a hunting morning, to be hunting, fond of hunting foxes.
- 6. Classify Adverbs according to meaning. How may all Parts of Speech be classified according to form?
- 7. Analyse:-

The stag at eve had drunk his fill, Where danced the moon on Monan's rill And deep his midnight lair had made In lone Glenartney's hazel shade; But, when the sun his beacon red Had kindled on Benvoirlich's head, The deep-mouthed bloodhound's heavy bay Resounded up the rocky way.

- 8. Parse italicised words in the above passage.
- 9. Write an imaginary description (not to occupy more than 12 lines) of
 - (1) A village destroyed by inundation, or
 - (2) A day at the sea-side.

SPELLING AND DERIVATION.

JUNIOR FIFTH BOOK.

- 1. Write, from dictation (The High School Reader), page 154, beginning, "My merits," to end of lesson.
- 2. Derive the following words, giving the meaning of the roots also the prefixes and affixes where they occur:

Benevolent, Circuitous, Carnage, Thermometer. Inexhaustible, Manufacture, Principal. Transaction.

- Give a rule that will assist in spelling words ending in -eive or -ieve.
- 4. Give the meanings of the following roots, and one English word from each: Dies, pando, socius, eu, theos.
- 5. Give the forces of the affixes: -ly, -let, -ow, and one example of each.
- 6. Give the meanings of

Azure, Hauberk, Obliterated. Ravenous, Chasms, Legible, Procrastination, Ubiquitous.

GEOGRAPHY.

JUNIOR FIFTH BOOK.

- Ten marks will be allowed for neatness and style of answering.
- Name the different Zones and give the width of each in degrees.
- 2. Explain the causes and describe the course of the Gulf Stream
- 3. Draw a map of Lake Ontario, marking the cities and chief towns on its edge and the rivers that flow into it.
- 4. Name the canals connecting any of the lakes between Canada and the United States, and the canals connecting the River St. Lawrence with any other river. Why were these canals made?
- 5. What counties of Ontario, border on the Ottawa River? What States of the Union border on the Gulf of Mexico?

6, What and where are the following: Waterloo, Saguenay, Belle Isle, Quito, Canton?

HISTORY.

JUNIOR FIFTH BOOK.

- 1. Give the chief provisions of Magna Charta.
- 2. Why is De Montfort's Parliament memorable in English history, and give its date?
- 3. Outline the chief events in the reign of Elizabeth.
- 4 Give an account of the wonderful literary activity of the Elizabethan era, naming the great writers.
- 5. Give an account of Lord Elgin's administration in Canada.
- 6. Give a brief account of the Confederation of the British American Provinces.
- 7. Give an account of the rebellion in the North-West Territory.

BOOKKEEPING.

JUNIOR FIFTH BOOK

Candidates may answer any five of the following questions:

- Rule the necessary lines and write a specimen entry in each of the four principal books used in Single Entry Bookkeeping.
- 2. You have been in the retail grocery business for a year: Make out a statement showing your probable Resources and Liabilities, your Net Worth, and your Net Gain or Loss.
- 3. On June 5th 1889, you buy of A. M. Reid, dealer in groceries and provisions, 225 Queen St. West, Toronto, the following:—1½ lbs tea @ 60 cts. per h; 2¾ lbs butter @ 20 ctsper h; 1½ pts. molasses @ \$1.10 a gallon; ½ h pepper

- @ 12 cts per lb; 2 1/4 lbs. cheese @ 20 per lb. Make out the bill and receipt it.
- 4. Write to Redpath & Co., Montreal, ordering 15 bbls granulated sugar to be sent here by freight on the C. P. R., also their answer enclosing invoice. Form of invoice must be shown.
- 5. Explain, Draft, Voucher, Discount, Tariff, Days of Grace.
- 6. Explain how to deposit \$100 in the Bank of Toronto; how to use the letter-book; and write a check for \$100 on the Dominion Bank, Toronto.

HYGIENE AND TEMPERANCE.

JUNIOR FIFTH BOOK.

- I. What are the most common defects in the eyesight? How can these defects be remedied?
- 2. Trace the course of a sound-wave to the brain.
- 3. Name all the organs which enter into the formation of articulate speech.
- 4. What effect has the indulgence in alcoholic stimulants upon the small blood-vessels of the body?

MUSIC.

JUNIOR FIFTH BOOK.

1. Name the key note of the above example.

- 2. How many semi-tones occur in it, and where are they? What should the time-signature be? Write the sol fa syllables in proper order-
- 3. Write the value of a dotted half note () in sixteenth notes.
- 4. Write rests of corresponding value to the following notes:

ARITHMETIC AND MENSURATION.

SENIOR FOURTH BOOK.

The work must be shown.

- 1. Add together 3^{11}_{12} , $1^{\frac{5}{8}}$, $4^{\frac{11}{16}}$, $2^{\frac{1}{3}}$.
- 2. Subtract $15\frac{29}{36}$ from $17\frac{20}{27}$.
- 3. Multiply together $1 \frac{5}{16}$, $3 \frac{5}{9}$, $\frac{3}{14}$.
- 4. Divide $8\frac{25}{29}$ by $1\frac{56}{87}$.
- 5. Divide 1,175975723 by 18.07.
- 6. A certain city is 5 miles squaee. How many square feet of land are there to each person, if the population is 211,200?
- 7. A boy commenced work on Tuesday, April 7th, 1885, at 60 cents a day. He worked until the evening of September 17th, 1885, except during a sickness which lasted from June 27th, to July 8th, inclusive. On August 3rd his wages were increased to 75 cents a day. He paid \$1.26 a week for his board, etc., and sent the rest of his money to his mother. How much did he send her?

- 8. Two boys buy apples at a cent each. One sells them at 3 for 4 cents, and the other at 4 for 5 cents. What per cent does each boy gain?
- 9. What must be paid for a loan of \$1,800 for 3½ months at 1¼ per cent. a month?

ALGEBRA.

SENIOR FOURTH BOOK.

- 1. In a school, consisting of 4 classes there are 250 pupils. In the 4th Class x pupils, in the 3rd Class y pupils, in the 2nd Class 63. How many in the 1st Class?
- 2. Find the sum of $3a^5 + 7a^2 3a$, $4a^4 3a^3 5$, $4a^3 6a^2 + 2$, $-4a^5 5a^4 + 6a$, $2a^4 5a^3 + 2a^2 3a$, $2a^3 3a^2 + 1$, $a^5 2a^3$, 2.
- 3. If a=1, b=2, c=3, d=4, e=6, find the numerical value of
 - (1) $3a^4b^3c^2 5b^3c^2d 8cde + 2ab$.
 - (2) dc.
- 4. Subtract $3x^3 7x + 1$ from $2x^2 5x 3$, then subtract the difference from 1, and add this last result to $2x^2 2x^3 4$.
- 5. Multiply together $x^2 + xy + y^2$, $x^2 xy + y^2$, $x^4 x^2y^2 + y^4$, $x^8 x^4y^4 + y^8$.
- 6. Divide $12a^8 + 9a^7 8a^6 + 4a^5 + a_4 11a^3 14a^2 + 22a 15$ by $4a^4 + 3a^3 2a + 3$.
- 7. Simplify $(3a 2b)^2 2(a 2b)(a + 2b) + 6(2a 2b)b$.

ENGLISH GRAMMAR AND COMPOSITION.

SENIOR FOURTH BOOK.

- 1. Distinguish the respective meanings of brother, cloth, penny, in the plural.
- 2. What adjectives are compared by -er, -est? How are others compared?
- 3. Name the relative pronouns. Why are they so called?
- 4 State the voice, and tense-form of these verbs: I am hunting,
 I had hunted, I shall have been hunted, I were hunted, to be
- 5. What is an interjection? Is it right to call it a part of speech? Why?
- 6. Define sentence, clause, and phrase. Give one example of each.
- 7. Combine the following separate sentences (1) into one simple sentence, (2) into one compound sentence, (3) into one complex sentence:

John was a boy. John was good. John was honest. John caught a trout. The trout was big. The trout was fat. The trout weighed ten pounds.

8. Analyse:

The owls have left the fire, and a deep silence broods over the *cold*, still forest; as he looks *half* sadly at the calm yellow moon, *that is gilding* the sombre tops of the pines and hemlocks, he thinks to *himself* that it is not all loss and *dross*.

- 9. Parse italiicised words in the above passage.
- 10. Write an essay (of not more than 10 lines) on either of the following subjects:
 - (1) An honest man's the noblest work of God.
 - (2) The pleasures of the country.

SPELLING AND DERIVATION.

SENIOR FOURTH BOOK.

- 1. Write from dictation, (Fourth Reader):—
 Page 253, Beginning "Filled," and ending "horseback."
- 2. Derive the following words, giving the meanings of the roots, also of the prefixes and affixes where they occur:—

Acclamation, Succession, Nominal,
Transparent, Complete, Superhuman;
Navigator, Describe.

- 3. Give the meanings of the following roots, and one English word from each :—Audio, Deus, Latus, Omnis, Orior, Unus.
- 4. Give the meanings of

Annals, Malefactor, Veteran, Chivalrous, Ooze, Goaded, Wholly,

HISTORY.

SENIOR FOURTH BOOK.

- Give an account of the manners and customs of the Anglo Saxons.
- 2. Explain the Feudal System.
- 3. Give a brief account of the Crusades and their effect on England commercially.
- 4. Who were the Lollards, and what was their teaching?
- 5. Give a brief account of the Reformation in England.
- 6. Explain what is meant by "Half-a-century of Whig rule.
- 7. What is the most important historical event in the reign of Her Majesty the Queen? Give reasons for your answer.

GEOGRAPHY.

SENIOR FOURTH BOOK

- Ten marks will be allowed for neatnes and style of answering.
- 1. Explain the terms Equator, Tropic, Arctic Circle, Latitude and and Longitude. What is the Latitude of the Antarctic Circle?
- 2. Name the counties of Ontario bordering on Lake Ontario, giving the county to n of each.
- 3. What and where are the following: Winnipeg, Cleveland, Don Clyde, Land's, End, Rhine, Indus, Nile?

- 4. Draw a map of the Maritime Provinces, marking the chief city of each.
- Name the chief rivers of South America, and of the Dominion of Canada.
- 6. Give the countries of Europe with their capitals.

HYGIENE AND TEMPERANCE.

SENIOR FOURTH BOOK.

- I. State the function of the lungs.
- 2. What are the impurities found in the atmophere of an over-crowded, ill-ventilated school room?
- 3. What diseases are apt to arise from bad drainage?
- 4. Disinfect a foul-smelling drain.
- 5. "Alcohol allows the cold to rob the body of its heat." Explain this statement.

ARITHMETIC AND MENSURATION.

JUNIOR FOURTH BOOK.

Note.—The Work must be showh.

- 1. Add together $3\frac{11}{12}$, $1\frac{5}{8}$, $4\frac{11}{16}$, $2\frac{1}{3}$.
- 2. Subtract $15\frac{29}{36}$, from $17\frac{20}{27}$.
- 3. Multiply together $1\frac{5}{16}$, $3\frac{5}{9}$ $\frac{3}{14}$.

- 4. Divide 825/29 by 176/87.
- 5. Divide 1,175975723 by 18.07.
- 6. Reduce 2.086 of 5 days, 19 hours, 37 minutes to seconds and the decimal of a second. Explain each step in your work.
- 7. A mail train leaves London for Edinburgh (400 miles) at 10.20 a.m., and travels 36 miles per hour; an express leaves London for Edinburgh at noon, and travels 45 miles per hour; when will it overtake the mail, and how much sooner will it reach Edinburgh?
- 8. A boy commenced work on Tuesday, April 7th, 1885, at 60 cents a day. He worked until the evening of September 17th, 1885, except during a sickness which lasted from June 27th to July 8th, inclusive. On August 3rd his wages were increased to 75 cents a day. He paid \$1.26 a week for his board, etc., and sent the rest of his money to his mother. How much did he send her?

MUSIC.

SENIOR FOURTH BOOK.

- Name the key note of the above example. What is the name of the tune of which it forms a part?
- 2. How many semi-tones occur in it, and where are they?

 What should the time signature be?
- 3. Write the value of a half-note () in sixteenth notes.
- 4. Give the names of the following musical characters:

- 5. Give the English of the terms: Allegro; and ante; cresc.; dim; p.; f.
- 6. Write, in their proper order, the sol fa syllables of the first example.

ENGLISH GRAMMAR AND COMPOSITION.

JUNIOR FOURTH BOOK.

- 1. What parts of speech may the following words be?—Watch, free, below, hark.
- 2. Give the plural of knife, ox, mouse; the feminine of earl, nophew, emperor, and the possessive of James, horses, children.
- 3. Decline thou and who in tull.
- 4. Compare happy, large, bad, pleasant.
- 5. Write the principal parts of buy, break, build, burst.
- 6. Write in full the active indicative, future indefinite of to go.
- 7. Insert appropriate conjunctions in this sentence:

 John did not go to school he was lazy had not learned his lessons he got into trouble he reached home.
- 8. Correct errors in the following sentences:

You and me seen the mens' uniforms. It was real dangerous, but we come out good. Won't you give me none of them marbles?

9. Analyse:

Ten o'clock comes, but the time has not passed tediously: he is warm and dry; his old friends, the owls, approach the fire light and salute him with their strange, wild notes.

10. Parse the italicised words in the above passage.

- rr. Write an essay (of not more than ten lines) on one only of the following subjects:
 - (1) Love one another.
 - (2) A boat-race.
 - (3) Camping out.

SPELLING AND DERIVATION.

JUNIOR FOURTH BOOK.

- 1. Write, from dictation (Fourth Reader):
 - (a) Page 8c, first eight lines.
 - (b) Page 119, second last sentence in prose lesson.
- 2. Derive the following words, giving the meanings of the roots, also of the prefixes and affixes where they occur:

Occurrence, Domestic, Submit,
Aqueous, Insect, Visible,
Descend, Regal.

- 3. Give the meanings of the following roots, and one English word from each: Bellum, fendo, fugio, mater, merx, primus.
- 4. Give the meanings of

Canopy, Gnarled, Mien, Cloudlet, Lea, Rabble.

GEOGRAPHY.

JUNIOR FOURTH BOOK.

- Ten marks will be allowed for neatness and style of answering.
- 1. Define the following terms: City, Town, Ward, Isthmus, Strait, Hill, Mountain, and Snow Line.

- 2. Draw a map of the Dominion of Canada, marking the capital of each Province, the Great Lakes to the South, and the rivers that connect these Lakes.
- 3. What and where are the following: Port Arthur, Washington, Rio Janeiro, Glasgow, Liverpool, Clyde, Anticosti?
- 4. Give your reasons for believing that the earth is round.
- 5, What minerals are found in the Dominion of Canada, and where? Name the chief exports of Ontario.
- Name the mountain ranges of the United States and of South America.

HISTORY.

JUNIOR FOURTH BOOK.

- 1. Give on account of the career of Samuel de Champlain.
- 2. State the provisions of the Treaty of Utrecht, so far as they relate to Canada.
- 3. Describe the capture of Quebec by the British, giving the date.
- 4. State what you know about the United Empire Loyalists.
- 5. Explain what is meant by Responsible Government, and give the date of its establishment in Canada.
- 6. Who founded the Common School System in Upper Canada?
 Give a short account of his life.
- 7. State what you know about Confederation.

HYGIENE AND TEMPERANCE.

JUNIOR FOURTH BOOK.

- 1. Describe the circulation of the blood to any part—say the right hand—commencing where the blood leaves the heart.
- 2. How does the blood become deteriorated in this circuit?
- 3. There are several immediate aids for the arrest of nose-bleeding. Give any three of them.
- 4. Describe the function of the stomach.
- 5. State what you consider the three most important objections to the use of alcoholic stimulants.

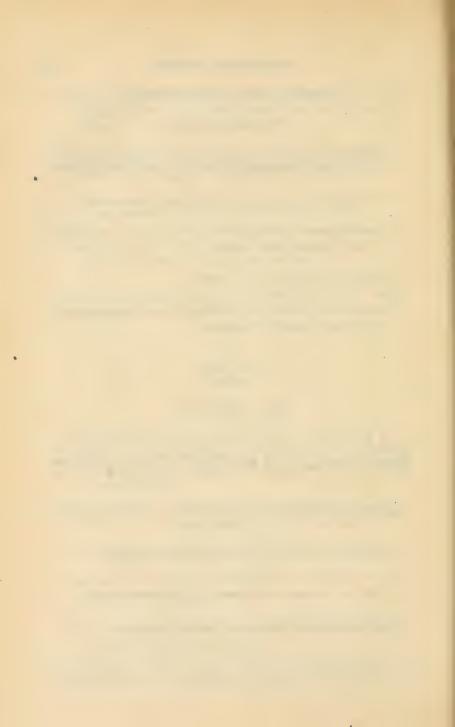

MUSIC.

JUNIOR FOURTH BOOK.

- 1. Name the key-note of the above example. What is the name of the tune of which it forms a part?
- 2. How many semi-tones occur in it, and where are they?
- 3. Write the value of a half note () in sixteenth notes.
- 4. Give the names of the following musical characters:

Statistical & Reserence Tables.
